Welcome to Touch Handles

Touch Handles is an Australian, family-owned brand that offers high-quality cabinetry handles and knobs to Australians.

Welcome to the inaugural edition of our Touch Books, dedicated exclusively to our exquisite Touch Made collections. Flip through the pages to explore our meticulously crafted wooden and leather handles, showcasing our dedication to detail. We embrace the natural imperfections found in raw timbers and authentic Australian leather, as they add uniqueness and beauty to each piece. We view our handles as functional works of art, engineered to endure a lifetime in both function and style. Thoughtfully designed and curated to suit a wide range of aesthetics, our extensive variety of finishes ensures you'll find the perfect match for any project.

Explore our ever-expanding range anytime on the Touch Handles website.

Follow us on Instagram for all the latest additions.

we can't wait to see your new cabinetry

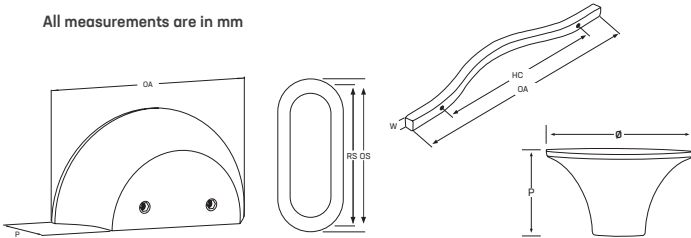

Touch Handles x Dorset Australia.

Stained Timber Handles

Cadello Creast Handles | Heskett Peak Handles | Chicama Wave Handles | Cascade Recessed Handles | Barfold Handles

Raw American Oak

The handles in this range are made from reclaimed, recycled American Oak Timber. Mismatched timber offcuts are revived and crafted into stunning handles. Raw American Oak Handles have been sanded ready to be installed raw or stained to pair in with surrounding interiors.

Clear Coated American Oak

Handles are finished with clear Osmo Wood Wax finish which enhances and protects the natural grain of the timber without covering the grain up. Additionally, the handles are easier to clean, stain and are water resistant. Wax finish is based on natural plant oils & waxes even suitable for children's toys.

Ebony Stained American Oak

Finished with Ebony Osmo Wood Wax, the timber is a beautiful dark, dramatic colour. The dark, bordering on black, ebony wax really creates a feature of the unique grain of American Oak timber. Osmo Wood Wax is based on natural plant oil & waxes and is stain & water resistant.

Walnut Stained American Oak

American Oak timber finished with Walnut Osmo Wood Wax, changes the blonde American oak to a beautiful mid-brown colour to match in with surrounding interiors while still maintaining the stunning American Oak grain. Osmo Wood Wax is based on natural plant oil & waxes and is stain & water resistant.

Raw Timber Species - Turned Handles

Half Moon Timber Handles | Half Moon Dished Timber Handles | Full Round Timber Handles | Leo Knobs

Raw Victorian Ash

Common in cool mountainous areas throughout Victoria. Straw to pale blonde and straw pink in appearance, often with gum vein features. Excellent staining qualities allowing for ready matching with other timbers or finishes. Also known as Tasmanian Oak.

Raw Blackbutt

Grown in coastal forest in NSW & QLD. Straight grain timber, with a warm nutty hue which will compliment a range of interiors where a lighter palette is required. Borer holes and cracks may feature in the timber.

Raw American Oak

A native hardwood of North America. American Oak has a medium to coarse texture with a distinctive figure grain pattern common only to genuine oak species. Colour ranges from a pale to medium golden-brown tone.

Raw Burnt Ash

American White Ash is grown in North America. A thermal modification process which is chemical free uses heat & steam to increase the durability of the timber. The process darkens the timber to a beautiful medium. A rich dark chocolate colour.

Raw Spotted Gum

A premium Australian Hardwood, grown along the NSW coastal strip into QLD. Aside from its durability, it has a striking back-sawn grain, attractive fiddleback, and vibrant colour palette. Widely sort after by designers & architects, it's also an ideal choice for matching to flooring.

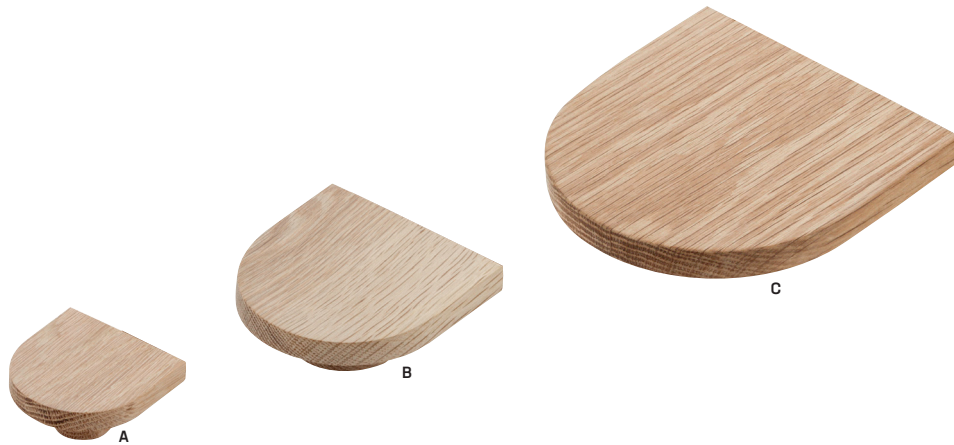

A Note From Touch Handles:

Please remember to always read our installation guides before installing our Timber handles to minimise risk of damage to the handle.

Custom sizing is available for many of our Touch Made Handles. Contact our team today to request a tailor-made handle.

Timber Half Moon

Burnt Ash Finish

Burnt ash is thermally modified American White Ash. The thermal modification process uses high heat which darkens the white ash into a beautiful and rich medium to dark chocolate colour.

Hyde Natural

The natural refers to the edges being left untouched. Burnished edges as show on previous page is a time consuming process used in traditional leatherwork. Burnishing seals any frays & makes for a longer lasting more durable handle. Hyde Natural Handles are ideal for wardrobes or furniture.
