Infrared Heating System

Ultra Low EMF Carbon Wall heaters which emit 7,000 - 10,000nm wavelength of safe, far infrared light, emitting less than 3 milligauss.

First Grade Canadian Hemlock Timber

Canadian Hemlock timber is renowned for its strength, durability and resistance to shrinkage, splitting and mould. There is no plywood, chip board or formaldehyde used in making this sauna.

Meticulously Designed & Crafted

Designed to make you sweat without frills, our Lite Range of Infrared Saunas are among the best affordable infrared saunas available. Built to last with kiln-dried Canadian hemlock, assembled to stringent standards and perfected over 18 years.
