

Simply smarter living

digihome

Our difference

We tailor smart technology to enhance every home

We believe that truly smart technology should appear simple and seamless, fading into the background, while enhancing peoples everyday lives. Good technology should be natural and intuitive; it shouldn't require too much effort, and should make the modern home safe, comfortable and energy efficient. Our goal is to make smart technology easily available to every home and to make everyday life much more comfortable.

Our solutions range from simple audio systems to large scale intelligent home automation. Let's get your home working for you, so you can focus on the things that really matter.

Rhys Dilks

Digihome owner

Our solutions

We cover all key areas of the modern smart home

Our customers

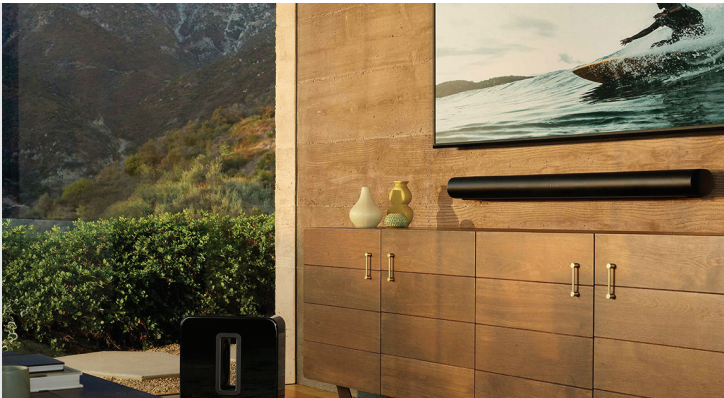

**Homeowners
Architects & Designers
Builders & Developers**

Automation

—

Have your gate automatically open when arrive home. Ensure your heating and appliances turn themselves off, control music and entertainment, enable blinds to automatically open and close and control all lighting from a single device. We're able to automate almost any scenario in your home.

Entertainment

—

Relax with incredible visual and audio experiences that bring joy and excitement to the whole family. From crystal clear wireless audio, to multi-room video experiences, we can enable incredible content at your fingertips and make your home the ultimate entertainer.

Security

Protect your family and the things you love with intelligent, simple to operate systems. Monitor your home via your smartphone and have a complete view on your homes security from anywhere in the world. Access your home via keypad, card or smartphone - we enable smart, secure and easy entry.

Internet & WiFi

Our whole home WiFi provides enterprise-strength network capabilities with at-home simplicity. We ensure you are getting the internet speed you are paying for throughout the entire house and can even optimise media streams to ensure your Netflix and on-demand services play seamlessly.

How we work

We pride ourselves on our seamless process – from start to finish

1. Consultation

We get in touch to understand your requirements and determine what systems are the 'best fit'

2. Design and Pricing

We provide a design solution that directly meets these requirements and works within your budget

3. Meet with trades

We determine the best approach with your trade and construction partners and plan our timelines

4. Installation

We install and configure your smart home solution – keeping you in the loop at all times

5. Training and Handover

We utilise user friendly technology and always provide full training and a comprehensive handover

6. Final sign off

We ensure you're 100% happy and enjoying your new smart life. We also obtain any formal sign-off
