

AMPM PROJECTS

CAPABILITY STATEMENT 2022

Our pride & passion for our craft runs deep & inspires us to achieve the impressive for our clients. But more than building structures that make a statement, we create assets; assets that create connection & provoke thought, feeling & discussion. We believe that a property should never be inanimate; it should have a soul & an identity, & like all great creations, make an impact that lasts a lifetime.

INTRODUCTION

We are specialists & enthusiasts in custom-building aspirational & architectural properties across cosmopolitan Melbourne. We have decades of advanced technical & practical know-how in the residential building space. This is most notably demonstrated across our portfolio of projects featuring the large & complex as well as the simple & sleek.

Only a truly accomplished builder understands the anatomy of construction. Our hands-on mastery & expert eye in the art of craftsmanship ensures that structural design, shape, dimension & symmetry is maximised & perfected at every turn, from the framing & flooring to the woodwork & joinery, all the way through to the materials & trims.

This attention to detail guarantees that a build is finessed in its entirety from corner to corner, top to bottom, from the inside out & the outside in, all the while observing & upholding the nuances & integrity of the architectural drawing.

No matter the scope of a project, we manage all the moving parts of a build from end to end through meticulous & continuous planning, management & evaluation of all touchpoints & deliverables. Our control of all variables to minimise risk & execute on time & within budget, is steadfast & experienced. Equally & critically important is stakeholder & client management, both of which we approach via consultative & collaborative two-way engagement.

Our pride & passion for our craft runs deep & inspires us to achieve the impressive for our clients. But more than building structures that make a statement, we create assets; assets that create connection & provoke thought, feeling & discussion. We believe that a property should never be inanimate; it should have a soul & an identity, & like all great creations, make an impact that lasts a lifetime
