

Transform your outdoor living space with Archgola™

  
**ARCHGOLA™**  
OUTDOOR SHELTERS

"We are absolutely delighted with our new **Archgola™**, recently installed over our back door area. It's doing a great job of keeping the rain out whilst still letting in plenty of light and it looks fantastic as well, all we hoped for and more!"

FRAN & TERRY BROAD

## Transform your outdoor living space with Archgola™

We all have that outdoor space at home that we don't use as much as we'd like to. Do you have an area that's too hot, too cold, too windy or does it lack privacy? Archgola™ canopies can be utilised in high and very high wind zones.

### Proven Quality

We believe quality is the single most important consideration in a canopy. It's not just how it looks now that's important, but how will it look in five years' time? Is it engineered to withstand our changing weather systems? Is the UV protection high? With warranties up to 25 years, along with thousands of installed canopies across the country, we stand behind the proven quality of our Archgola™.

### Proven enjoyment

An Archgola™ can give you more shade, more shelter, more space and more protection... so you can enjoy the New Zealand lifestyle as it's meant to be enjoyed – with friends and family.

You may be after a designer looking deck area or have a totally practical need. There's no single way to enjoy an Archgola™ space. It's your space, and we are excited to work with you to make it an area to enjoy.

Engineered for your home. Built to last.

**The Archgola™ team**

## Why we stand behind Archgola™

Whether you're looking for more space, more shelter, more protection or more time to entertain with friends and family, add an Archgola™ to your home and you'll enjoy more of everything!

### Your choice of style

Every Archgola™ is unique and designed to your style and specifications, ensuring your Archgola™ suits your home and your lifestyle. Choose from a variety of roof lines and a range of Dulux colours for your powder coated frame. Your licensed Archgola™ installer can advise you on the best options for your space. Pages 6-9.

### Engineered to last

Whether you're seeking shade from New Zealand's harsh UV rays or shelter from the winter wind and rain, Archgola™ provides you with more protection all year round. Our high quality polycarbonate roofing offers 99.9% UV protection, while our steel frames, built from high quality New Zealand-sourced steel, are engineered to withstand high wind zones. Pages 10-14.

### Trusted installers

Our team of licensed Archgola™ installers cover the depth and breadth of New Zealand and are on hand to answer any questions. You'll receive a free on-site consultation, measure and quote and, when you're ready to proceed, they'll ensure the installation of your Archgola™ is hassle-free. Installation is usually completed in just one day.

For inspiration and to see a range of styles, visit [archgola.co.nz](http://archgola.co.nz)

## Kiwi owned and operated

It was back in 1998 that the concept of Archgola™ originated here in New Zealand. With foresight and vision, not to mention engineering and design integrity, it didn't take long until Archgola™ became the number one choice of canopies and shade solutions for New Zealanders.

In 2015, the demand for Archgola™ by New Zealanders all around the country saw the business move into its purpose-built facility on Auckland's North Shore. Our in-house state-of-the-art powder coating operation and dedicated, highly skilled, welding team, means we have full control over the production and quality of every Archgola™ that leaves our doors.

The secret for our success is the trust our customers have in our product. With our partnership with 26 experienced and dedicated national licensee network, we use the best quality products in all aspects of the finished canopy and take pride in our installation workmanship. With thousands of Archgola™ products installed across the country, we stand behind the quality of our product and service.

Join the Archgola™ family and let us help you achieve the outdoor living lifestyle of your dreams.

## Styles to suit your own

One of the things we love about our product is being able to install an Archgola™ that suits the individual style and requirements of our customers. We truly believe one size doesn't fit all and that's because your home and the way you live in it is unique.

Our range of roof designs can complement and enhance the way you live in your home and can be adapted to fit your outdoor space. Every Archgola™ is custom designed to your unique requirements, easily going around corners, spanning large outdoor areas and helping you make the most of your outdoor living space.

Whatever style you choose, our engineering standards ensure your design is built to meet our standards for strength to withstand high winds.

### **Increasing the value of your largest asset**

Archgola™ is not only an amazing outdoor canopy to be enjoyed but also a means to increase your property value. With our reputation of quality and style an Archgola™ is definitely a feature to promote when selling your home.

## Arched

Our classic arched shape is where it all began. The super strong, traditional Archgola™ look suits most house styles, enhancing the front porch or the back deck. It's not just the extra strength that customers like with the arch, it's the extra height you gain that makes the space feel special.

## Bull-nose

A fusion between style and functionality, our bull-nose Archgola™ roof line is straight with a slight arch at the end.

## Cantilevered

To increase the depth of shade needed in sunny spots, our cantilevered Archgola™ roofline, has an additional overhang, which can be included with either the straight or classic arch shape.

## Straight

For a contemporary look to suit modern homes, without compromising on quality, our Archgola™ straight roof line provides a stylish flat design finish.

## Multi-use outdoor shelter

Archgola™ canopies can be used to provide protection from the elements for more than just the deck or entrance way. We have installed many canopies for:

- Cars
- Campervans
- Caravans
- Boats
- Spa Pools
- Storage Areas

We can create a stand-alone canopy or an attachment to an adjoining building. All four roofline options can be considered, depend on your setting, protection requirements and personal taste.

Built by New Zealanders for New Zealand conditions, **Archgola™** has set the industry standard in canopy design and construction.

## Entertain all day and all of the night

When a home has uninterrupted water views, making the most of them is usually the focus of any renovation project. But for Vanessa and Shawn Wistrand, designing a sheltered and enclosed back courtyard was just as important. "We wanted a private space for our family to enjoy, a space where we could relax during the day and entertain at night," says Vanessa.

The transformation of the former tired looking courtyard into an extension of the home was achieved by the installation of an Archgola™. "We now have a dining room, an extra lounge and an evening entertaining area, all in one. In the evenings, we find ourselves sitting down in the courtyard and literally exhaling. It's such a nice place to relax."

Vanessa and Shawn's selection of the ebony Archgola™ reflects their home's contemporary look and, with the addition of curtains, enables the courtyard to be used at any time of the day or night, and in all weather. "In the evenings we pull the curtains down and get great indoor-outdoor flow with the heated courtyard. It becomes a real entertaining area." The polycarbonate roofing is also great acoustically for when the boom boxes are going!

"We now have a dining room, an extra lounge outside, and an evening entertaining area, all in one. It's such a nice place to relax."

VANESSA & SHAWN WITSTRAND

Before

## Protection and performance

Archgola™ provides protection all year round – that's protection from New Zealand's harsh sunlight as well as protection from New Zealand's winter climate. For us, quality is everything, and that's why we use New Zealand's premium polycarbonate Suntuf™ roofing on all our canopies.

Suntuf™ comes in five different tints, allowing for varying degrees of light to filter through. If you're installing an Archgola™ close to trees on your property, consider a roof tint that allows more light to come through. If you want your Archgola™ to provide shade in a sunny spot, then a darker tint will let less light through and reduce glare.

Solar Ice Tint

Solar Grey Tint

## The low down on roofing material

Your choice of roofing tint is critical as different shades offer difference combinations of heat and light penetration.

### Protection and performance

Suntuf™ protects you from harmful UV rays, only transmitting beneficial radiation. It also blocks ultraviolet rays and resists rain, hail and extreme temperatures.

### Cool tech

Suntuf™ is produced with special additives that reflect heat, leaving you cooler under the harsh New Zealand sun, while still letting light through.

### Winter sun

Suntuf™ lets through both light and heat on the clear winter days. This is a great benefit of choosing a Suntuf™ polycarbonate roof over Canvas or Louve options.

### Lifetime warranty

Suntuf™ comes with a 25 year loss of light transmission warranty and a 15 year hail breakage warranty.

Bronze Tint

Grey Tint

Clear Tint

### Archgola™ offers 5 tint options for roofing:

Your choice of roofing tint is critical as different shades offer difference combinations of heat and light penetration.

Comparison

	ARCHGOLA™ Shade Options					OTHER Shade Systems		
	Clear	Bronze	Grey	Solar Ice	Solar Grey	Closed Louvre	Open Louvre	Canvas
Heat transfered from sun	89%	68%	55%	35%	35%	Zero	100%	Zero
Light transfered	90%	43%	25%	20-25%	20-25%	Zero	100%	Limited
UV rays protection	99.9%	99.9%	99.9%	99.9%	99.9%	100%	Zero	100%

- 99.9% protection from harmful UV rays
- Protection from hail damage
- Options of level of heat and light penetration

Ask your local licensed Archgola™ installer to help you decide on the best solution for your home.

## Built to last

### Structurally engineered steel frame

We use only the best quality New Zealand sourced steel to manufacture our Archgola™ steel frames and fittings.

Our design criteria meets Building Code NZ3604 (IL1) and is aligned with AS/NZ1170 Structural Design Standards. Design methods are certified by an independent structural Engineer. Each frame provides the stability and structure to ensure your Archgola™ is built to last.

Each pre-galvanised steel frame is screwed together with a unique series of specially designed fittings to ensure maximum strength whilst maintaining an attractive finish.

For additional protection we offer a Hot Dip galvanised option. This is mandatory for our clients with a coastal property to ensure protection from the corrosive sea air.

You can select either a square or round post option for the frame.

Looking to extend your extra space?  
**Archgola™** canopies are modular by nature which means they can be easily extended at a later time with minimal disruption and mess.

## Your choice of colour

### Powder coating

Our powder coating offers superior durability and corrosion protection, exceptional resistance to chipping, scratching and wear and ensures the frame is highly resistant to moisture/corrosion creep if damaged. Archgola™ guarantees the powder coated finish on your Archgola™ will remain in good condition for a period of five years from the completion of construction if you observe the productcare guidelines.

In most cases clients choose to match their canopy with their joinery. Archgola offers colours from the Dulux range.

- Quality New Zealand sourced pre-galvanised steel frame
- Engineered to withstand with NZ weather environments
- Archgola™, a product that's proven to last

## Added protection for year round outdoor living

We know here in New Zealand we're not immune to extreme weather conditions. There's always the occasional day when the wind\* whistles in, the rain comes in sideways, or the evening temperature drops a little more than we were hoping for.

Not to worry. Because with an Archgola™ you can add outdoor curtains and blinds giving you extra protection and privacy to create your ultimate outdoor living area.

\*Recommended to roll blinds up if winds exceed 60km/hour.

### Ezi Guide Outdoor Curtains and Blinds

Outdoor curtains extend extend the use of your outdoor area. You'll still get the outdoor experience with the added protection from bright sun, wind and rain.

Options are either a mesh blind, allowing you to enjoy the view but also enjoy a level of privacy and reduced glare on bright days, or select a clear PVC blind, strengthened by a 90mm polyester weave border.

### Custom designed to retrofit

If you have an existing outdoor structure we can retrofit outdoor curtains and blinds to suit your needs.

[www.archgola.co.nz/blinds](http://www.archgola.co.nz/blinds)

### Built for the elements

Our quality blinds and fittings are designed to withstand New Zealand conditions and come with a two-year warranty for the blinds and gear box. The aluminium channel and powder coating have a five-year warranty.

### Easy to use

We've kept our outdoor curtains simple – there are no buttons, zips or clips. Instead, two aluminium channels position the blinds perfectly. Once wound down and tensioned gaps are eliminated to prevent unwanted draughts. Our Ezi Guide curtains come with stainless steel fittings and a unique locking system, providing you with quality in both appearance and performance.

Scan the QR code to watch how easy the Ezi Guide curtains are to use.

Did you know...  
You can add blinds to your **Archgola™** at a later date. Just let your licensed **Archgola™** installer know so they can design your canopy to ensure blinds can be installed when you're ready.

## Our Guarantee

We stand behind our product and guarantee that our canopies and service are of the highest quality from start to finish.

### 1. The frame

All Archgola™ canopies have been designed by a certified structural engineer. Providing the ongoing Archgola™ product care guidelines are strictly adhered to, all materials used in the construction of the canopies carry a five year warranty.

We use the highest quality steel, formed in our own precision tube mill and fabricated in our own factory, so you can be assured that the structure is built to last. This is backed by warranties on workmanship, frame and roofing materials. (Provided care guidelines are adhered to).

Archgola™ guarantees the powder coated finish on your Archgola™ will remain in good condition for a period of five years from the completion of construction if you observe the product care guidelines. Hence if you look after your Archgola™ it will look as good after five years, as it did the day it was installed.

Archgola™ canopies exposed to sea spray require higher levels of maintenance to honour this warranty. Please discuss this with your local installer.

### 2. Installation warranty

All products installed by Archgola™ or an authorised installer carry a five year workmanship warranty from the date of invoice.

### 3. Suntuf™ polycarbonate roofing

Your Suntuf™ Roofing comes with two warranties. A 25 year warranty against loss of light and transmission and a 15 year warranty against hail breakage.

### 4. Ezi Guide Outdoor Curtains

Ezi Guide Outdoor Curtains come with a two year warranty from the date of installation on blinds and the gear box. Plus a five year warranty on aluminum channel and powder coating.

"I love it when you hear how delighted a customer is when their Archgola™ is installed. You know you've done a good job when they say they have been outside enjoying their Archgola™ all night!"

## Not just for homes

It's not just your lifestyle that Archgola™ is committed to enhancing; our team also install Archgola™ products in a range of commercial spaces, from cafes to warehouses, schools to sports grounds.

If your local school is looking to extend its outdoor learning environment or your business could do with added outdoor protection, speak with your local licensed Archgola™ installer for a bespoke solution that enhances your commercial environment.

[www.archgola.co.nz/commercial](http://www.archgola.co.nz/commercial)

“We were looking for a cost effective, durable, attractive solution to give shade and rain protection over a deck at Broadgreen Intermediate. We found the right result in Archgola™, the team were really helpful, efficient and they made the process really easy. The team worked around us to install while the children weren't onsite. The finished product is a durable, attractive structure that still provides light to the classrooms but at the same time filters direct sunlight stopping the glare. We will definitely be looking at them again for our next shade/rain protection structure.”
