## Residential Interior Design

Creating wow interiors that are easy on the eye

## Why engage Studio 28?

Whether building new, renovating or refreshing one room or an entire home, the design process is the same. I bring creativity and professional expertise to the table to find a solution for your design dilemma. Using customisation, and detailed finishes, I'll find a look that is tailored just for you.

Left - new build family living room. Below - kitchen renovation.

## Before we begin, I have a few questions...

The end result incorporates answers to those questions and more. You may need more time to answer, or you may filter your list, realising that some priorities may be more doable than others. The more information you share about what you want, the better.

## The Real Value...

I am Diploma qualified and a member of the Designers Institute of NZ, and I know careful consideration and planning make the best results. With the answers done, I begin to develop a design concept that takes into consideration all your wants and desires.

Left - new build luxury bedroom. Below - renovation addition ensuite.

## We start with a Concept...

Using my skills and expertise I will design a solution for you. It's the interior design process where I am working towards the end result. I may challenge you, throw other ideas into the mix for consideration, because that is what I do; extending ideas and creating a space that works well.

## Then we move to Development...

I'll be customising your home to make it personal. In the solution it's all about the bespoke mix of items in your space to ensure your comfortable enjoyment. Drawings, floor plans, elevations, and details are provided when required. Shopping, sampling and showroom visits for all furnishings, fixtures, and finishings are completed.

Left - bedroom refresh.

## Finally Installation.

I'll source supplies and trades, get quotes and get the job done. You will be introduced to my network of suppliers and installers who will give you the utmost attention and care to detail. You get the best deal from my list of trade suppliers including custom designed upholstery, furniture, cabinetry, window treatments, lighting, bedding and more.
