about windsor

Windsor Architectural Hardware is one of the most recognised and respected brands of high-end boutique hardware products in the residential sector.

Established in 1984 Windsor sought to go beyond what had already been mastered. What started as a vision has today become a leading supplier in the New Zealand market as an award winning, national architectural hardware company that is actively expanding into Australia.

Our proven experience has led the Windsor name to be renowned for a commitment to continuous improvement enabling the company to remain progressive and stay ahead of market trends. But what always remains constant is our reputation for exceptional customer service and quality.

Our hardware collections offer product ranges that are elegant, functional and reliable supported by the best to-market and special finishing lead times.

feel, finish & function

When you're creating a beautiful designer home, we understand that door handles aren't an element that immediately comes to mind during the design process; however, they are a more important consideration than you might think. Handles are functional products that you touch every day.

It's underrated just how much they're used and needed.

Our handle ranges are constructed out of solid brass which as an alloy of copper and zinc, is a ductile metal meaning it's strong while being very machinable. It withstands pressure, making it a wear-resistant material, ultimately increasing the life of the door handle.

Windsor's design approach follows three fundamental elements – feel, finish and function. The 'feel' correlates with the design, engineering and ergonomics of the handles; the 'finish' element is the visual aspect achieved at the intersection of colour, trends and natural patina; and the 'function' refers to the mechanism, installation and how it operates on the door.

bespoke hand finishes

The Italian range includes six luxurious collections which all are available in 15 different finishes, allowing the perfect coordination with the overall aesthetics of a home.

Levers, roses and plates are forged and machined in Italy using the finest quality solid brass and arrive at Windsor in their raw state to be processed and hand-finished.

To create the different finishes, we use a variety of metal treatments, then the finish is relieved-back by hand by one of our specialist craftspeople, creating a series of natural patina finishes. This aspect of our work sets us apart in the market because we are able to achieve bespoke finishes that are not possible through mass production.

Accessories and pull handles are batch processed with levers for colour coordination.

The living finishes are designed to age gracefully over time and are becoming increasingly popular in contemporary homes to complement materials such as rustic steel, schist, timber and concrete, as well as structural components, including exposed beams and visible fixings.

italian

The Italian range includes six luxurious collections which are all available in 15 different finishes, allowing the perfect coordination with the overall aesthetics of a home.

federal

The solid surfaces of the lever join the rose or longplate with contoured detailing. Pronounced accents make a bold statement that confidently blends colonial and Italian style.

hermitage

nido

A diamond in the rough.

Sleek edges embellished with raw texture offer a sensory experience.

Simplicity and complexity unite in a harmonious fusion.

A natural evolution of industrial elegance.

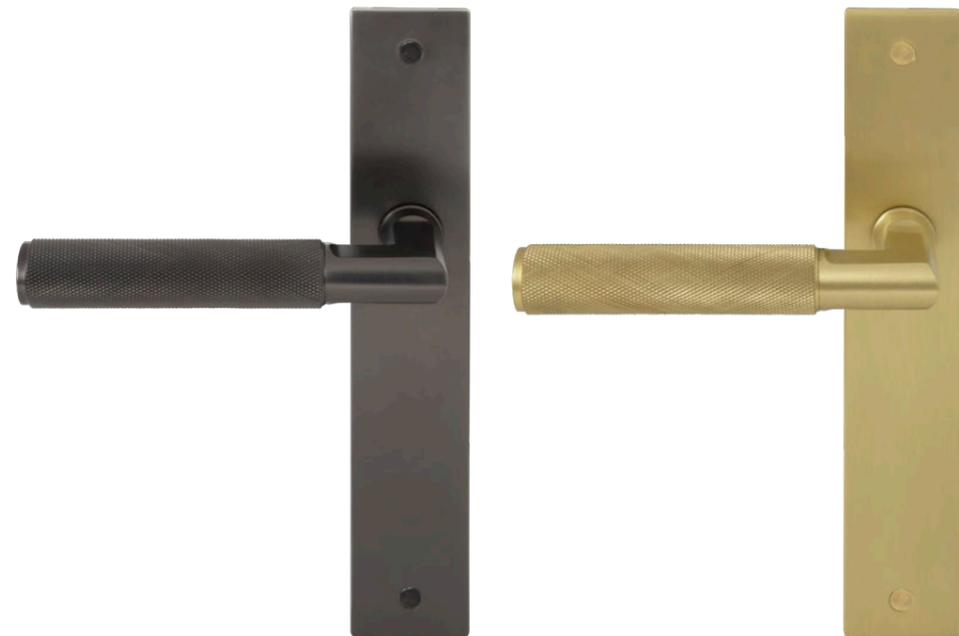

lumina

The juxtaposition of modern vs. timeworn makes for a layered and textured statement. Bold hues are saved for the small details with the diamond knurling embellishing.

Rose

care & maintenance

Windsor Special Finishes

This range of handles is constructed from superior solid brass. Forged in Italy they arrive here at Windsor in their raw state to be processed and hand-finished by our in-house team of craftspeople.

To create the different finishes, we use a variety of metal treatments, then the finish is relieved-back by hand, creating a series of natural patina finishes. Some finishes are left in their natural state to age over time, this is our living finish range, others are coated with a resin lacquer to protect the colour and provide either a high gloss or matt finish, these are our lacquered finishes.

It is recommended that all painting or staining of the doors is completed prior to installation of the door handles.

Living Finishes

The living finishes will naturally patina over time with general use. As with all living and aging finishes, it is recommended to clean the surface periodically with a damp soapy cloth to remove any build up of dust and grime that may cause corrosion and affect the integrity of the finish.

Matt Brass and Unlacquered Brass finishes can be further protected by using the Windsor wax polish occasionally, rubbing this lightly over the surface will provide a layer of protection for extended finish longevity.

Oil Rubbed Bronze and Roman Brass (including DRB) can both be preserved by gently applying a thin oil layer to the surface from time to time. Wipe a thin layer of olive oil (or similar) over the handle then with a clean cloth wipe again to remove any excess on the surface.

Lacquered Finishes

The finishes with a lacquer are recommended to be kept free of dust and grime to prevent any chance of these particles affecting the integrity of the lacquer and potentially causing breakdown or discolouration. We suggest these are wiped and cleaned periodically using a mild window cleaner and damp cloth.

Gloss Lacquered finishes may get some light surface scratches appearing with normal wear and tear, for this we recommend using the Windsor wax polish occasionally, rubbing this lightly over the affected area to will provide a layer of protection for extended finish longevity.

lead times & technical

Ordering Lead Times

Standard Stock Finishes

▼ 7 day ordering lead time

This lead time applies to standard stocked products. Products with finishes in this category can be returned if they are complete, have not been used and are in original order and condition.

Special Finishes

▼ 21 day ordering lead time

This lead time applies to non-stocked bronze products and made to order products. The time allowance is conservative and products should be expected to arrive within 15-21 days. Our Technical Advisors will provide you with an ETA upon order placement. Products and finishes in this category are non-returnable items as they are a special order.

Warranty

At Windsor we stand behind the quality of our products 100% and are pleased to offer a lifetime mechanical warranty on all products in residential applications within this catalogue. Warranty on finishes will be at Windsor's discretion.

what interior designers say about us...

"Windsor works with us on each project to make sure we have all the technical information and sampling we need, as well as being extremely responsive to suggestions in regards to what the industry is demanding and upcoming trends."

Anniq Heesen – Director & Interior Designer, Gezellig Interiors

"I have had the pleasure of working with Windsor and specifying their beautiful hardware for the past six years. Not only is their range and colour finishes of a very high quality, but the customer service and support from the Windsor team is amazing. I have also put the Galaxy Brushed Nickel levers through my own home, so I stand behind their product 100%!"

Sophia Cole – Interior Designer, Yellowfox
