---

## OUR PROCESS

# WHAT WE DO?

---

At Automated Audio Visual, we specialise in providing high-end technology solutions for homes. Our expertise lies in designing & installing audio-visual & home automation systems that seamlessly integrate to automate your home.

We are punctual, reliable, neat and get the job finished to only the highest standards, as well as being strong believers that if it's not done right, it's not finished.

THANK YOU AND WE  
LOOK FORWARD TO  
WORKING WITH YOU.

Kind Regards,

*Jake Fuller*

Director

# OUR SERVICES

---

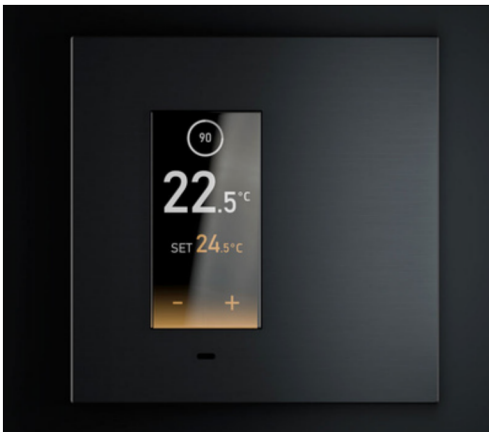

## CCTV & SECURITY

Protect your home with our smart CCTV & security alarm solutions. Having visible cameras acts as a deterrent & our intelligent solutions will give you peace of mind that your home & family are safe. They not only give you complete visibility & control - you can receive notifications keeping you up to date with who's around.

## COMFORT & CLIMATE

Get control of your home environment with our smart comfort solutions. Think air conditioning, heating, heated floors, heated towel rails and more, with on-demand control, scheduled timings or control the temperature of your home, even if you're not there. You'll enjoy greater comfort with our smart solutions.

## COMPLETE HOME AUTOMATION

Streamline your life with our smart complete home control solutions by integrating all aspects of your smart home into one easy-to-use system. Remove remote clutter, get rid of unsightly wiring, future-proof your home and make life simple with the latest in smart home automation technology.

# OUR SERVICES

---

## HIFI AUDIO

Our Hi-Fi Audio solutions utilise a range of high-end speakers and streaming amplifiers that offer high-resolution, lossless streaming of all your favourite music. Have a vinyl collection that you're keen to listen to? We have high-quality turntables, amplifiers and speakers for your listening pleasure.

## HOME AUTOMATION DESIGN

Your automation all starts with an idea.

We'll bring that idea to life through detailed discussions with you and others like your Architect, Designer & Builder to ensure we understand your requirements.

We will design a tailored solution that meets your needs, ensuring that it not only works now, but long into the future.

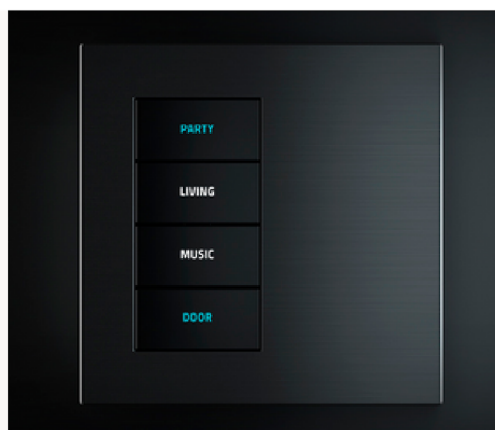

## INTERCOM & ACCESS CONTROL

See who's at your door with our smart intercom solutions, even when you're not home. Don't miss deliveries or visitors with our systems that can be easily controlled using our smart automation and remote access control technology. Give scheduled coded access to open locks, turn on lights and more.

## LIGHTING CONTROL

Create specific atmospheres depending on your mood or requirement, no matter where you are with our complete home control system utilising user-editable scenes or have lights change brightness and colour temperature automatically using our circadian rhythm lighting control.

# OUR SERVICES

---

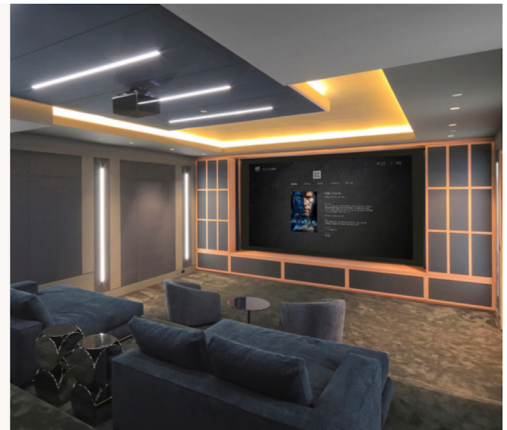

## MULTI ROOM AUDIO

Listen to your favourite music from one room or across several rooms with our multi-room audio solutions. Whether it's for your next event or everyday listening, you can control your home audio from your fingertips. We utilise quality, high-resolution systems that are compatible with all major streaming services.

## PRIVATE CINEMA

Enjoy an exciting cinematic experience every day with our premium cinema solutions. No matter the size of your room or budget, we can custom design and engineer every component of your cinema. From screen size/type, viewing angles, projectors, speakers, bass management and acoustic treatments we do it all.

## SMART TV

Whether you're looking for a single-room TV or a distributed video system for simultaneous viewing throughout your smart home, we have solutions. You'll have one central location for all your devices including satellite and streaming boxes etc. You'll be able to control all devices from the convenience of ONE remote control.

## WI-FI & NETWORKING

It all starts here, think of the networking infrastructure as the crucial backbone of all the technology functioning in your home. We provide enterprise-grade equipment to deliver a strong and reliable network, whether it be wirelessly (WiFi) or hard-wired data. You'll have the ability to connect as many devices as you need.

# OUR PROCESS

---

Our comprehensive simple to follow process ensures we offer the most efficient and knowledgeable service. We make sure all parties are aware of what to expect & the timeframe it is expected.

Rest assured that we will effectively install your devices and ensure they are up and running in no time, without any hiccups. We will help you plan, design and bring to life the smart home you've always envisioned. And even after you have settled in, we are always available and easy to reach if you require any additional help through our aftercare programs

Our goal is to ensure that all technology items are carefully selected and integrated seamlessly into the design.

# OUR PROCESS

---

01

## INITIAL MEETING

During our meeting we will gain an understanding of your expectations, budget & technology desires. Any current floor plans you have may be shared to allow us to start a S.O.W

02

## SCOPE OF WORKS REFINEMENT

We will give you our comprehensive scope of works guide, which details the systems we provide & once completed it will allow us to begin to design your system.

03

## DESIGN & DOCUMENTATION

Prior to commencing a design fee will be issued (if AAV completes the works this fee is credited). The design and documentation will include layouts, cable schedules & equipment.

04

## COSTING

During the design & documentation stage, any items of equipment that have multiple finishes and models will be presented in a proposal provided alongside the documentation.

# OUR PROCESS

---

05

## DEPOSIT & CONTRACT

Once the proposal is agreed upon & the contract of works is signed, the schedule of fees commence (with the first instalment due at this stage).

06

## CONSTRUCTION PHASE

During construction we will actively be involved in on/off site project management to completing works, adapting to any changes to ensure the design integrity is maintained.

07

## COMPLETION & HANDOVER

This includes client training & a revisit after a period of occupancy - tailoring the system to your needs, we will also provide handover documentation.

08

## SUPPORT & MAINTENANCE

Our aftercare plans offer on-going support, to handle any issues that arise & also periodically install updates to ensure stability, that can even provide improved functionality.
