CASCADE

DRAINERS & GROOVES

Cascade Drainers & Grooves by Tru Stone provides you with the ultimate solution in undermount sinks for your stone benchtops. It is practical in keeping the water contained to your sink area, while completing that unique

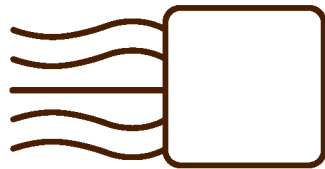

look of your stone benchtops. To help inspire you, we've created three ranges with five design options. Each drain board is recessed into the stone, while each draining groove gently slopes into the undermount sink.

RIVA

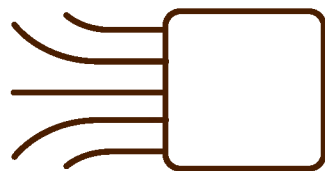

- Polished undermount sinks of your choice
- Sloping drain grooves
