

Cleverly renovated
apartment that
maximises space

This apartment underwent a complete renovation to update a small home in a prime location to feel more spacious. Joinery was created for the kitchen, living area, bedrooms and bathroom. Materials used alongside the joinery include marble and 5mm laser-cut stainless steel. Unique features of this apartment include the floating shelves – which were rounded to allow for the circular extractor fans and a tongue-and-groove fold-down queen size bed.
