Discover a new world of possibilities with Electric Home Design

Deciding to build or renovate your home and make it truly your own is an exciting step and we're here to help you discover the incredible possibilities for unlocking your home's potential.

In this magazine, we'll help you to plan and budget, provide guidance on the best electrical solutions for each room, and offer ideas and inspiration to help make your home a place that you'll never want to leave. From the kitchen to the home office, bedrooms to bathrooms, and every space in between; whether you love décor and style inspiration, or you want your home to be smart and respond intuitively to your lifestyle.

It's really useful to make notes as you discover products and solutions that you like, so you can have them ready when you sit down with your electrician to create your electrical plan.

Clipsal has proudly been in Aussie homes, delivering world-leading electrical innovations, for over 100 years. We know that choosing the right electrical solutions for your lifestyle has a huge impact on how you live in and enjoy your home. Clever decisions made now can help you create a flexible home and save you time and additional costs down the track.

Imagine living in a home that's seamlessly connected and truly reflects you. A home that doesn't just fit into your busy life, but enhances it. A home where every detail is considered and shows off your style, your personality, your taste. A haven that's intuitive, smart and adaptable, with abundant power points and lighting and temperature control that can be customised to suit the time of day. A space for impressive entertaining and a memory-making place that connects the people in it today and grows with you well into tomorrow. This is Electric Home Design from Clipsal.

Discover the possibilities at **clipsal.com/homebodies** ⬀

Planning and budgeting for good electric home design
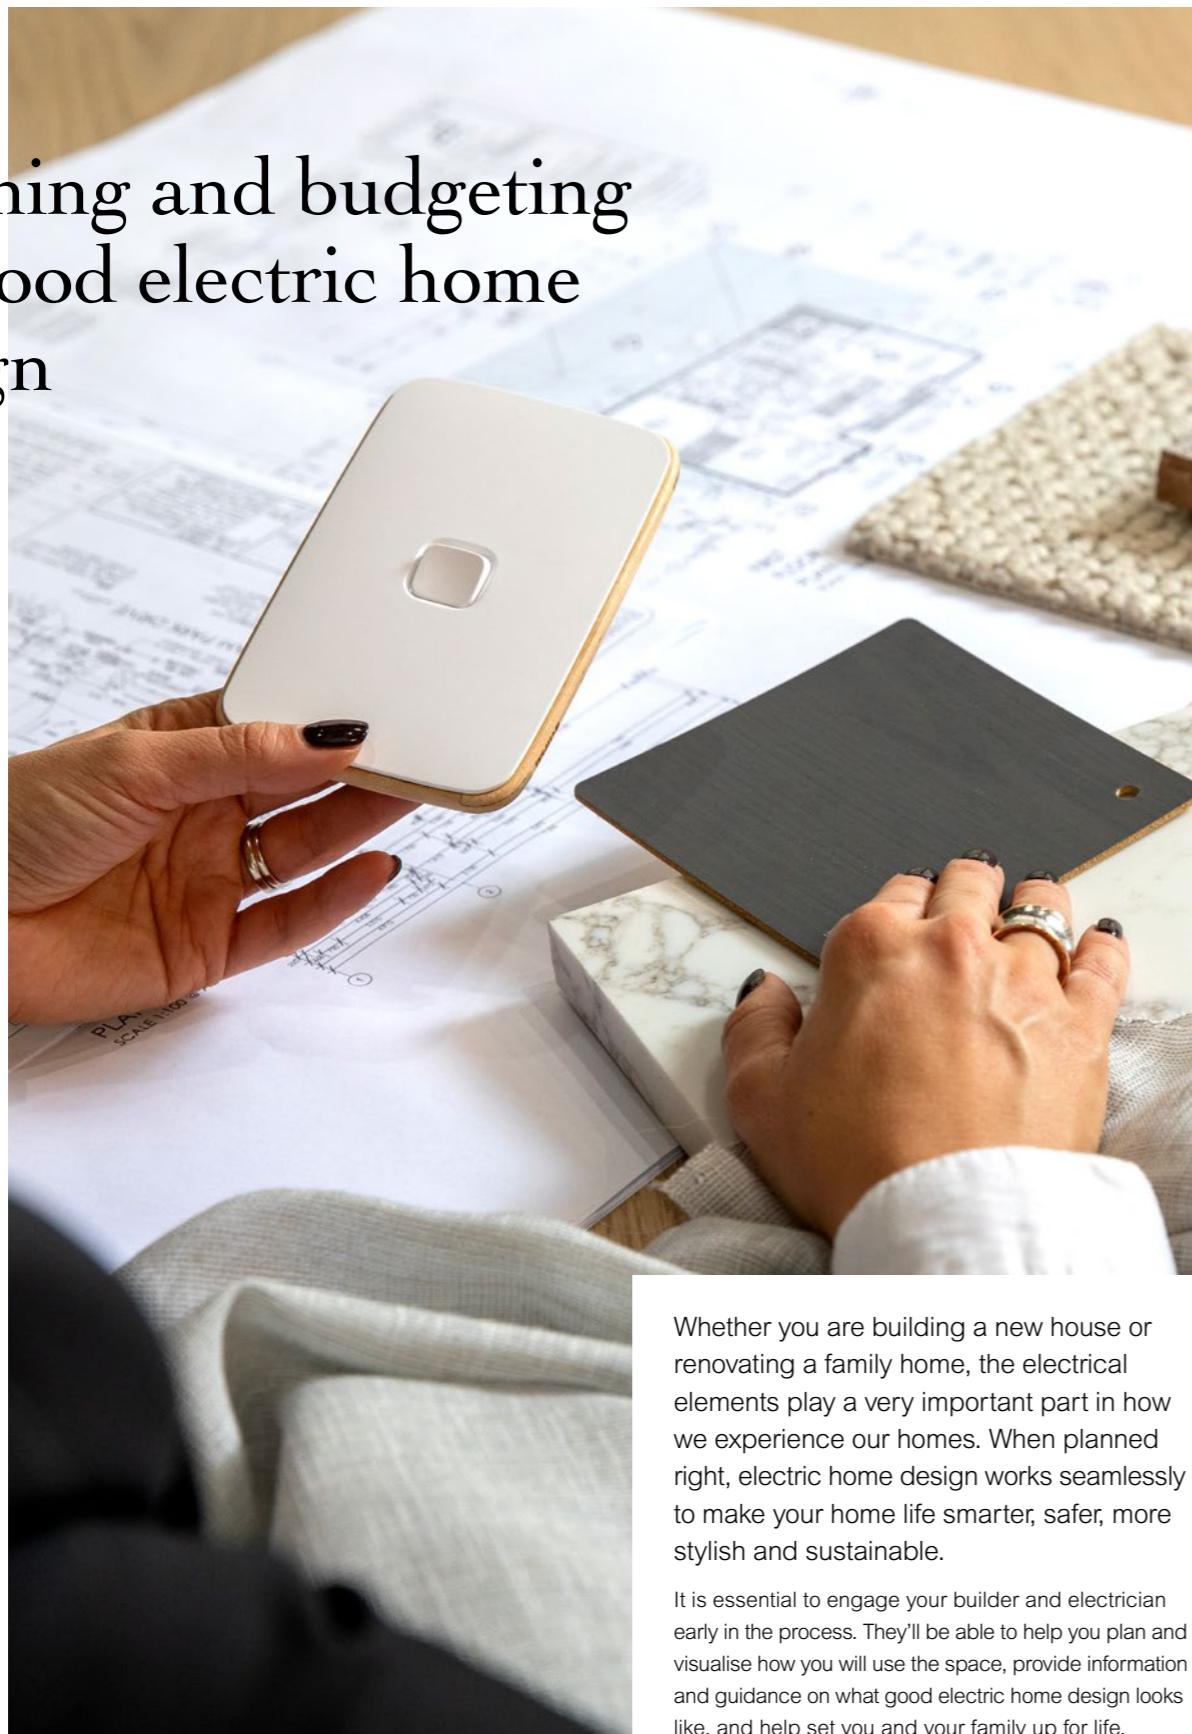

Whether you are building a new house or renovating a family home, the electrical elements play a very important part in how we experience our homes. When planned right, electric home design works seamlessly to make your home life smarter, safer, more stylish and sustainable.

It is essential to engage your builder and electrician early in the process. They'll be able to help you plan and visualise how you will use the space, provide information and guidance on what good electric home design looks like, and help set you and your family up for life.

1 | Finding inspiration

One of the most exciting parts of building or renovating is looking for ideas and inspiration.

Explore what others have done: check out websites such as **ArchiPro** ↗ and Pinterest. Many professionals show off their best and most inspirational projects there. Make a note of the brands you like best; sign up to their newsletters and follow them on social media. Buy interior design magazines, read **blogs** ↗, explore **case studies** ↗, and watch home inspiration and renovation TV shows to learn about the latest trends and innovations. It'll also give you an idea of the process involved.

Dream big! You can always narrow it down to suit your budget later.

2 | Planning it right

Electric home design is far more than just wiring and layout. It's about the overall look, feel, and functionality of your home.

Ask yourself: What's most important to you? A cosy and comfortable space for your family? An aesthetically pleasing home with curated artwork and furnishings that reflect your style and taste? How about a home that's at the forefront of innovation to make daily life as seamless and sustainable as possible?

The next step is to think about how you will use each area. Will your kitchen be a multifunctional space, where your family eats breakfast in the morning and then sets up for homework in the afternoon?

What about your dining room? Will it be your work-from-home space by day and an elegant entertainment space by night? Think about the possibilities and review the room-by-room inspiration and advice in this magazine to help you plan and visualise your dream home.

On page 32 you'll find a comprehensive wish list you can use as you explore this magazine. Don't forget to take notes of the products you'd like to discuss with your electrician and design consultant once you're ready.

3 | Setting the budget

Factoring in an electrical plan at the outset of a project is important; much of the groundwork is difficult to do retrospectively – it will also be more expensive.

Electrician Andy Hart from Hart Electrical says that it's important to trust your electrician. "A lot goes into your final invoice and not all of it is visible. When you see a power point on the wall it might not look like it was a hard job to get that there, but it could have been - especially in a renovation."

"Everyone who will do quality work is going to give around the same sort of invoice at the end." – ELECTRICIAN ANDY HART

As a general rule, allocate 10–15% of your budget for electric home design, and you'll be on your way to setting yourself up for success. This figure can vary depending on the age and size of your home.
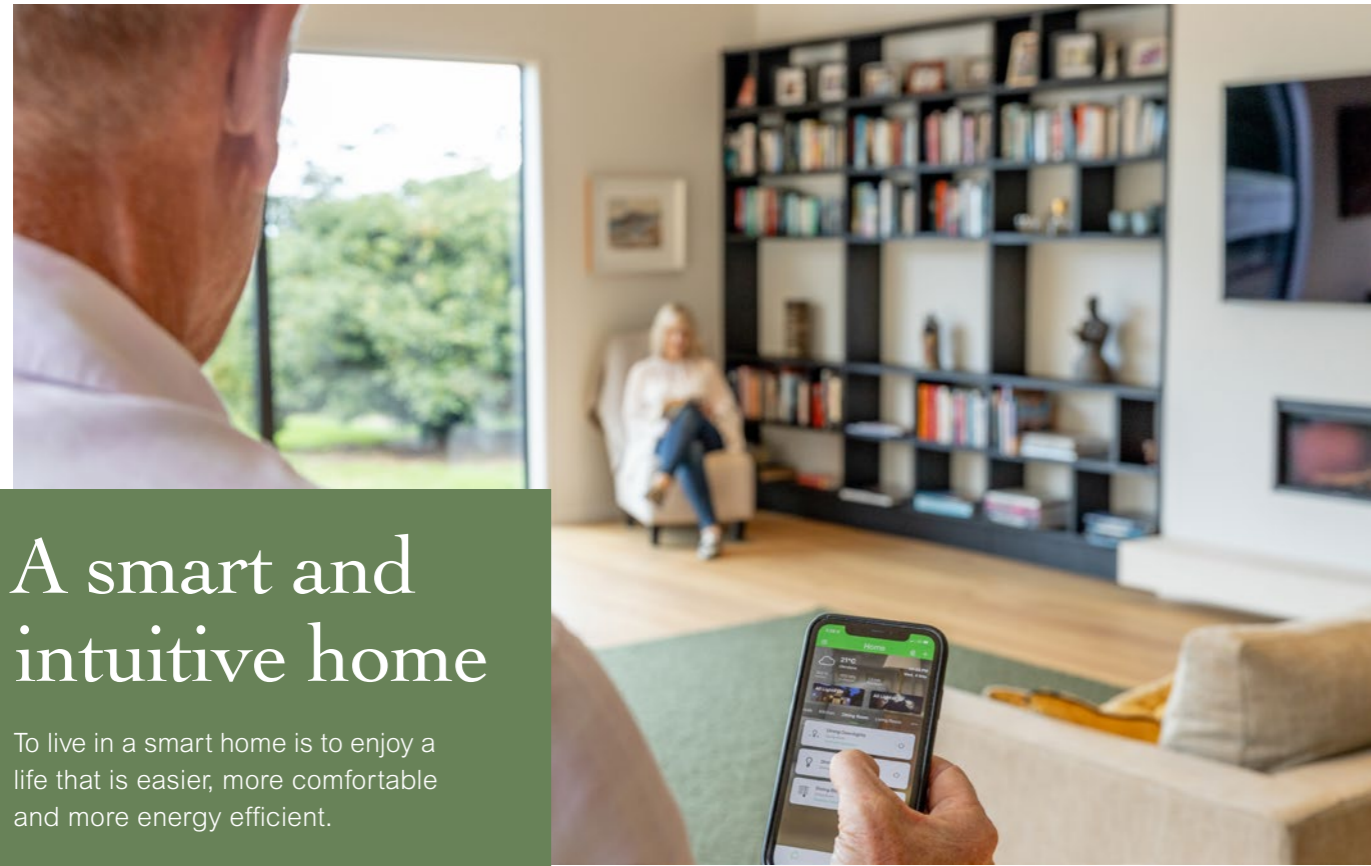

"The age of the property and its wiring will determine if the wiring is safe. If it has deteriorated, then you'd have to look at replacing it and perhaps updating your switchboard too. This can add another $1,500–$3,000 to the bill," says Tom Matic from Matic Electrical. If you're renovating, Tom recommends starting with an assessment of your home's wiring and switchboard as that can significantly impact your overall budget.

4 | Engaging with professionals

Now that you know what you want and how you want it, it's time to ask for professional help.

Book an appointment at a Clipsal showroom near you to experience and explore all our electrical, smart home, safety, and energy efficiency solutions for yourself, and if you would like help planning, Clipsal also offers a professional design service. On completion of an in-person or virtual consultation, you'll leave feeling inspired and armed with a detailed electrical plan for you, your builder and electrician, along with an itemised list of products. Book these services at **clipsal.com/design** ↗

Finding the right tradespeople to help you with your project can also be challenging as it goes far beyond finding the lowest quote. Look for people who'll be with you every step of the way, who are as committed as you are to building a beautiful home that adds value to your life. Visit **clipsal.com/locate** ↗ to explore our network of trusted partners.

For more inspiration, advice, planning resources and to connect with a local electrician: visit **clipsal.com/home-hub** ↗

A smart and intuitive home

To live in a smart home is to enjoy a life that is easier, more comfortable and more energy efficient.

A smart home can let you know when the kids get home from school; it can turn the iron off if you forget; and it can even help you prep for a dinner party with a single screen tap that dims the lights, adjusts the heating and starts the music.

It's no wonder that more people are including smart home elements in their electric home design.

Today's smart home technology is affordable, easy to use and can be installed in new or existing homes without the need for rewiring. It's scalable too, so you can start small and add extra elements as your family grows or your needs change. A smart home can let you see and control almost everything that is happening electrically in your home from wherever you are.

What is a smart home and how does it work?

A 'smart home' is a property in which electrical appliances and devices can be controlled via Bluetooth®, or remotely over the internet (usually through a single smartphone app) and are often linked for added customisation.

This could be as simple as connecting your heated towel rail to a smart switch to schedule when it turns on and off, or as advanced as linking multiple home technologies for easy control from your smart device.

Smart home systems like Clipsal Wiser are simple to install with no extra wiring required and provide the ability to easily add more products over time. You can see and control each element from your smartphone with the Wiser by SE app.

For larger new build properties with complex technical needs, a specialist wiring system like SpaceLogic C-Bus offers advanced whole home automation.

Your electrician or design consultant will be able to advise you on the best system for what you want to achieve in your home.

Why have a smart home?

Put simply, a smart home gets your house working for you and adds many benefits to daily life.

Energy efficiency – Nothing runs unnecessarily in a smart home, cutting down on power costs and environmental impacts. Sensors and timers can ensure lights or appliances aren't left on unintentionally and you can even minimise heating and cooling requirements with electronic blinds that automatically close at a certain temperature or light level.

Look out for these icons to see how you can use Wiser Moments to enhance your home.

Imagine having blinds that open as the sun rises, aircon that turns on before you get home, or garden lighting that illuminates at dusk and turns off automatically after you've gone to bed. A Clipsal Wiser Smart Home adapts to how you want to live.

Convenience – Forget multiple remote controls or phone apps. Run your home from a single app on your smartphone or tablet, from wherever you are. Forgot to turn the lights off before you left for work? Do it from the app at the office. You can even combine actions – a 'Homecoming Moment' could light up the house inside and out, turn on the heating and play your favourite music as you arrive home from work.

Peace of mind – Check security cameras remotely and open gates for visitors, be notified if doors or windows open when you're away, and even get an alert if a water leak or smoke is detected. Blinds and lights can be scheduled to open and shut and turn on and off when you're away too.

Comfort – Never come home to a house that is too hot or too cold again with smart technology that activates temperature control before you arrive. Protect against mould and damp too, with humidity sensors that trigger exhaust fans in the laundry or bathroom. Move around safely in the middle of the night with sensors to automatically turn lights on at a low level around the house.

Added value – Investing in smart home technology can add value to your home. With a multitude of lifestyle benefits, smart homes are attractive to future buyers.

How do you create a smart home?

Our flexible smart home solutions can help you to unlock the potential of your connectable devices to create a home that adapts and evolves with you.

Our options range from simple Bluetooth connectivity to fully hard-wired systems.

Bluetooth Connectivity

The Iconic collection of switches and power points can integrate with Bluetooth Low Energy (BLE) to give you easy control of power points, switches and dimmers. You can link your Iconic products to the Wiser by SE app on your smartphone for basic smart home functionality at your fingertips.

One thing to consider, is that while you'll be able to set timers and schedules (for when outdoor lights should turn on, for instance), you'll only have control over your devices while you are within Bluetooth range.

Wiser Smart Home

Clipsal Wiser ⧉ is a scalable smart home solution that lets you control almost everything in your home from anywhere in the world via the Wiser by SE app.

Wiser has a range of products for smart home automation and is compatible with Iconic indoor and outdoor switches and power points too.

It can also integrate with many third party devices and appliances to create a seamlessly connected home for you and your family. It's perfect for renovation and new build alike as it doesn't require any special wiring and you can add as many or as few smart elements to your home as you'd like, with the option of expanding it over time.

Wiser products include indoor and outdoor cameras, dimmers, smart switches and power points, blind controllers, and smart smoke alarms, as well as sensors for doors and windows, temperature and humidity, and even water leakage.

You can also create customised 'Moments', a collection of actions in one tap, like a 'Movie Moment' that dims the living room lights, turns on the AV system and fires up the heating for a snug night on the couch.

Plus, if you use a smart voice assistant such as Apple's Siri, Google Home, or Amazon Echo, you can control your Wiser smart home with voice commands too.

Wiser also allows you to set automations, which control your devices depending on certain conditions. For instance, you could program your blinds to close if the temperature outside goes above 30 degrees.

Throughout this magazine, we'll recommend products that can help you use Wiser to create an intuitive home customised to your lifestyle.

SpaceLogic C-Bus

C-Bus offers the ultimate in bespoke smart home automation. This specialist wiring system is best suited to large new builds or major renovations and links stand-alone elements in your house to a single point of control.

A C-Bus smart home can integrate with virtually any third party device, letting you control everything from lights, to underfloor heating and locks, and even the garden sprinklers.

Designed to work with fast-changing technology, C-Bus creates a home that can adapt to the future.

What next? Ask yourself: How would your ideal home work for you? What would make life in your home easier, or more enjoyable? Talk to your electrician or design consultant for advice on how to create the smart home of your dreams and visit **clipsal.com/smarthome** ⧉ to discover more.

Beautiful spaces that inspire

Creating your perfect home means choosing switches and power points that enhance both the space and the way you live in it.

Iconic Collection ⬀

A range of stylish switches and power points with the option of simple smart home functionality, the award-winning Iconic Collection is the new standard in modern living for every home. Once the Iconic grid plates are safely installed by a qualified electrician, you can change your light switch and power point covers at any time. Simply clip off the existing cover and clip on a fresh new look.

Iconic

With smooth, curved edges and a matt finish, the base range is available in *Vivid White*, a brilliant white, perfect for lighter interiors and with a translucent or solid white edge. *Cool Grey* is a wonderfully versatile neutral that's ideal for interiors with subtle grey accents. *Anthracite* is a charcoal-like grey that complements dark and moody interiors, but also looks superb when paired with creamy whites and shots of bold colour. The ever-popular *Black* features a solid edge and works perfectly in monochrome interiors and homes with natural textures and finishes.

$

Iconic Styl

Cool to the touch, Iconic Styl features an extruded aluminium finish designed to catch the light. It looks particularly stylish in kitchens and bathrooms against modern splashbacks or gloss tiles. *Silver* superbly complements interiors with contemporary appliances and tapware, while the *Crowne* finish is a glistening champagne tone that adds warmth to any space. *Silver Shadow* is the perfect finish for a cool, crisp décor and blends well with darker wall colours too.

$$

Iconic Essence

Iconic Essence features a sustainably sourced timber surround that is manufactured using a combination of traditional and high-tech techniques. The *Arctic White* finish brings together birch timber and matt white to blend perfectly into the surrounding wall colour – no matter which room you put it in. The *Ash Grey* finish looks stunning against the natural beauty of other raw building materials – perfect alongside slate or stone.

$$

Iconic Outdoor

Bring your unique indoor style outdoors with Iconic Outdoor. This award-winning range is robust, water-resistant, dustproof, and was built to withstand Aussie weather conditions. With smart connectivity and a modern design, it will add peace of mind and enhance the overall look and feel of your outdoor space. The matt *White* finish blends seamlessly into white walls and looks stunning against brick, render or stone, while the *Black* option complements raw surfaces and is striking with timber, concrete or metal.

$$

One of the things that makes the Iconic range unique is the variety of clever accessories available – from pictogram icons and USB chargers, to Night Walk sensor lights and energy-saving sensors. Iconic also integrates seamlessly with Wiser Smart Home to allow you to control lights and other home electrical devices via the Wiser by SE app or voice control.
Saturn Collection ⬀

The Saturn Collection of switches and power points complements any modern architectural interior style. This contemporary range is like no other with its minimalistic look that is a favourite amongst design aesthetes. The Saturn Collection is available in three different designs.

Saturn

An elegant glass look that complements modern surfaces in kitchens, bathrooms and family areas. Manufactured from premium quality materials. *Pure White* provides a crisp neutral option, while *Ocean Mist* works perfectly in spaces with a lot of natural light and *Espresso Black* provides an elegant option for darker interior spaces.
$$$$

Saturn Horizon

With a textural metallic finish and flat, square edge design, Saturn Horizon has a sophisticated look that blends in superbly with today's popular tapware, kitchen appliances and on-trend interior style. The premium finish of *Horizon Silver* and *Horizon Black* responds to different levels of light, keeping interiors feeling vibrant and interesting.
$$$$

Saturn Zen

With a minimalistic design and matt fingerprint-resistant finish, Saturn Zen adds sophistication to any space. Use *Zen White* to complement crisp white paint. *Zen Black* provides a strong, elegant finishing touch, especially when paired with natural finishes.

$$$

Metal Plate Series ⬀

Simple lines and a stylish finish in *Stainless Steel* or *Polished Brass* make the Metal Plate range a versatile choice.

The ultra-slim, minimal metal design makes this range perfect for high-end modern spaces with an industrial feel and is also the ideal finishing touch for renovated heritage villas. Choose between white or black base modules (buttons).

$$$$$

Choosing premium switches and power points can make a huge difference to the overall look of your home and its electric home design. Whether your space is beautifully classic, sleek and modern, or more industrial cool, there is something for every style.

Home, sweet home

Home is where our story begins. A place where we come and go, and where our children grow. It's a place to gather, where friends become family, and we can truly be ourselves. No matter what home means to you, Clipsal will always be there too.

AN INTUITIVE HOME. Imagine coming home after a long day and the outdoor and entrance lights automatically turn on, giving you safe passage and saving you from having to find the light switch when your hands are full. The temperature throughout the house is just right, and your favourite music is playing to welcome you home.

SAFE AND SOUND. Help keep your family, home and possessions as safe as possible by installing long-life, interconnected, photoelectric Wiser Smoke Alarms throughout your home. These smart alarms work like traditional alarms, but will also send you notifications via the Wiser Hub when smoke is detected or when they are due for a test. Integrated with the Wiser system, they can turn lights on in case of an emergency.

DESIGN TIP. Ever got home and struggled to find the light switch?

Consider adding subtle LEDs to your light switches. Set them as indicators to show which are in use; or as locators, so it's always easy to find the right switch in the dark.

FEATURED PRODUCT: ICONIC ESSENCE SEE PG 38 FOR FULL PRODUCT SUITE
LIGHT THE WAY. There are several essential considerations when it comes to creating good electric home design in large spaces. Here are some pointers for your planning:

– Create a warm and welcoming atmosphere by choosing LED lighting throughout your home.

– Place light switches in convenient locations so you can turn the lights on and off easily.

– Use multi-way switching so lights can be controlled at either end of a hallway or staircase.

– Add motion sensors around your home, so you and your guests can easily find your way around, with lights that come on as needed.
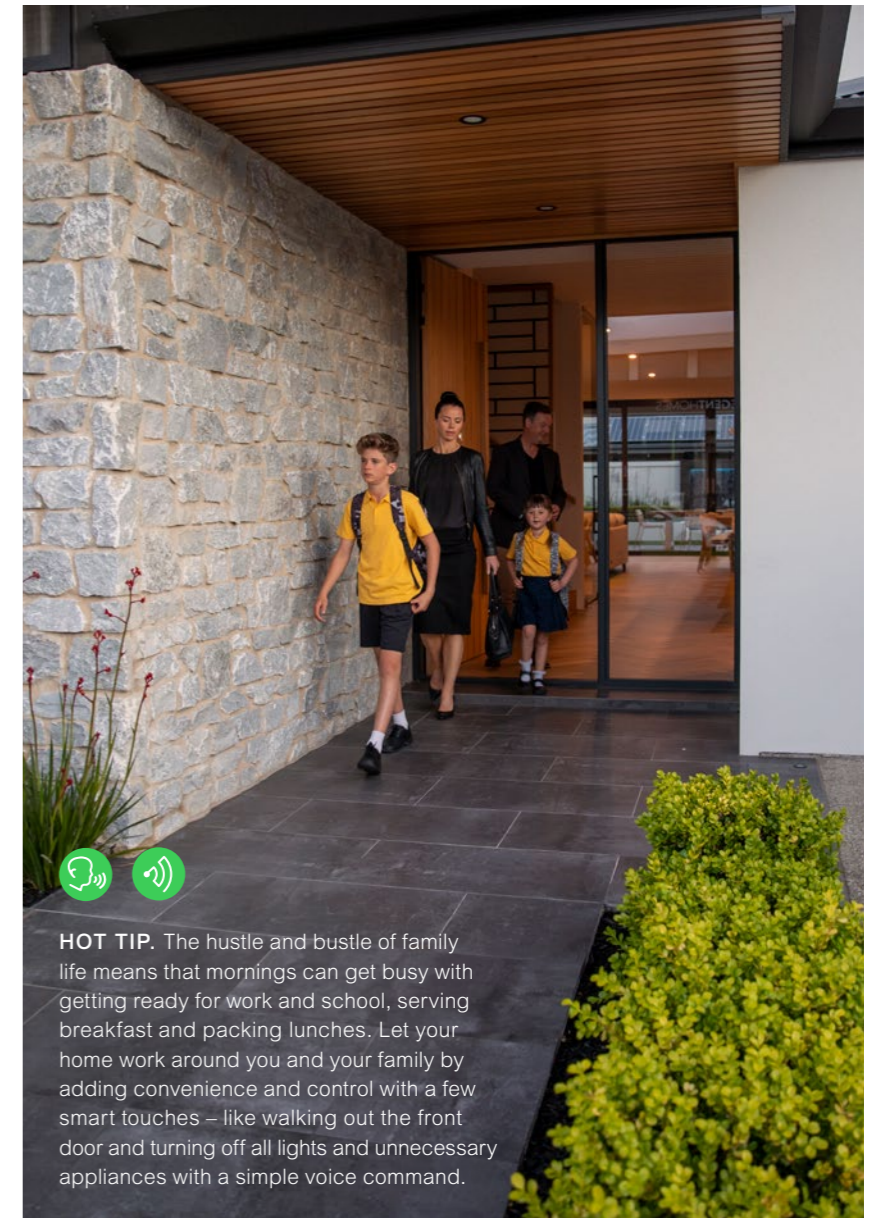

HOT TIP. The hustle and bustle of family life means that mornings can get busy with getting ready for work and school, serving breakfast and packing lunches. Let your home work around you and your family by adding convenience and control with a few smart touches – like walking out the front door and turning off all lights and unnecessary appliances with a simple voice command.

ESSENTIAL PRODUCTS FOR THIS ROOM:

• Backlit LED Switches	• Switches and Power Points	• Wiser Outdoor IP Camera
• Iconic Night Walk Sensor Light	• Wiser Connected Power Point	• Wiser Smoke Alarm
• LED Downlights	• Wiser Indoor IP Camera	• Wiser Window / Door Sensor
• Motion Sensor	• Wiser Lighting Control

For the homebodies

Our living room has a special place in our homes. It's our relax-and-unwind space, a place where we lose ourselves in stories, go on epic adventures, learn, laugh and spend precious moments together.

MOVIE MOMENT. Imagine walking into your living room, saying "movie time" and having your home create the perfect movie set-up for you: the blinds close automatically, the overhead lights dim to 20%, your sound system turns on and your TV starts your favourite streaming service. The only thing you have to worry about is remembering to bring the popcorn with you.

KEY SMART HOME PRODUCTS FOR THE ULTIMATE HOME CINEMA EXPERIENCE:

Control your lights with a simple voice command or with a tap on the Wiser by SE app to set the perfect mood as you snuggle up on the couch.

Use the Wiser IR Converter to add existing infrared devices such as your TV, air conditioner and sound system to your Wiser Smart Home.

Add a Wiser Temperature / Humidity Sensor to control your air conditioner or heater as you need it, or set it to automatically maintain a comfortable environment.
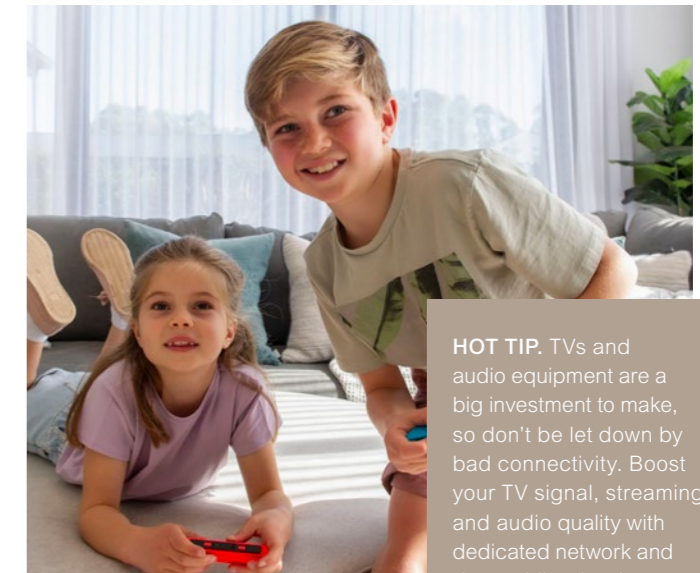

SAFETY FIRST. If you have expensive electronic equipment such as a TV, gaming console or sound system, help protect them against lightning damage, power surges and voltage strikes with a Surge Protection Device, which an electrician can install into your electrical switchboard.

HOT TIP. TVs and audio equipment are a big investment to make, so don't be let down by bad connectivity. Boost your TV signal, streaming and audio quality with dedicated network and data cabling / outlets.

CHECK IN FROM ANYWHERE. Keeping an eye on your home and pets while you're not there is effortless with the Wiser Indoor IP Camera. You can see exactly what's going on with day and night live streaming, wide-angle view and motion detection alerts, and keep in touch over the intercom.

DESIGN TIP. For the perfect finishing detail, match your light switches to your décor.

The heart and hub of the home

Your kitchen can also be your home office, entertaining space, and memory-making place where master chefs and little cooks can learn and play. A place that connects the people in it today and grows with you well into tomorrow.

HOT TIP. Ensure everyone is charged up and ready to start their day by adding a USB Type C fast charger, or USB Type A+C charging port to the power points around your benchtop and in cupboards to create the ultimate charging station.

Avoid clutter on your bench with an Iconic USB Smart Shelf. Designed to hold two smartphones or one tablet, the shelf keeps devices out of the way when charging and is ideal for viewing recipes on your smart devices.

FEATURED PRODUCT: ICONIC ESSENCE
SEE PG 38 FOR FULL PRODUCT SUITE

DESIGN TIP. Lighting should be considered well in advance as good lighting adds to the overall design of the kitchen and can enhance the overall look and feel of the space.

Zero in on each zone and think about what exactly it needs. Install energy efficient lights overhead for areas such as benchtops where you need task lighting, and then complement with LED light strips and feature lights.

FEATURED PRODUCT: LED DOWNLIGHTS

Make your dining space your favourite place

The dining room is a place for celebration, sharing memories and catching up with loved ones. It's a space for impressive entertaining, where you and your guests can relax, unwind and share in some of life's most precious moments.

SET THE MOOD. Love entertaining friends and family? Imagine setting the perfect mood with the tap of a screen or a voice command. The overhead and pendant lights turn on and dim to just the right level, while all unused lights around the house automatically turn off.

To ensure you dine in comfort, the blinds close and the heater switches on. To round it all off, soft music starts playing in the background.

LIGHTING DESIGN. Impress your guests with ambient, decorative and energy efficient LED lighting paired with a dimmer so you can effortlessly create a relaxing atmosphere. Match your downlights to the style of the room, available with a White, Brushed Chrome, or Black surround.

DESIGN TIP. Dine in style! With a minimalist design, fingerprint resistant matt finish, and negative detailing, the Saturn Zen range takes elegant aesthetics to the next level. Available in Zen Black and Zen White.

ESSENTIAL PRODUCTS FOR THIS ROOM:

- Dimmer
- LED Downlights
- Switches and Power Points
- Wiser Blind Controller
- Wiser Connected Power Point
- Wiser Lighting Control
- Wiser Temperature / Humidity Sensor

For the soakers

Being one of the busiest rooms in the home, the bathroom needs to be a chameleon, transitioning through the demands and daily routines of your family life, while also being a space where you can relax and unwind.

COMFORT ON DEMAND. Imagine preparing a relaxing bubble bath at the end of a long day. The Wiser Temperature / Humidity Sensor automatically triggers the exhaust fan when an increase in humidity is detected, and the temperature adjusts to just the right level. The lights dim and soft music starts playing to set the mood. And when you're done, everything turns off automatically, so the only thing you have to do is enjoy a good night's sleep.
DESIGN TIP. Elevate your bathroom design with the Iconic Essence and Iconic Styl ranges and enhance the attention to detail by adding Pictogram Icons to individual switches.

HOT TIP. Add cool white LED lighting to your bathroom; it mimics natural light, which will help you wake up while you're getting ready in the morning. Add a dimmer too, for when you need softer, more soothing light.

LIGHT THE WAY. Ensure that kids and guests can find their way around safely at night by integrating a Wiser Motion Sensor with your bathroom and hallway lighting. Schedule lights to turn on at a dimmed brightness between set hours, allowing just enough light for safe passage.

PEACE OF MIND. Add comfort and convenience to your bathroom with a Wiser Connected Power Point. Set it to turn on and off at select times or use the timer function, or control it via your smart device. You'll never have to wonder if you've left the hair straightener on again. Also ideal for electric toothbrushes and shavers.

For the inspired minds

Whether you work from home, need a place to get life admin done, or have carved out a space for the kids to do their homework, make your home office a place that inspires the flow of creativity, productivity and focus.

Imagine a work-from-home space with lighting, blind and temperature control at your fingertips. A space that helps you achieve flow, boosts efficiency and promotes productivity so you can get through your to-do list effortlessly.

HOT TIP. Unnecessary lead and extension cables make the tidiest of spaces feel messy and disorganised and can be a fire hazard. Declutter your space and keep your equipment safe by installing a quad power point.

STAY CONNECTED. Adding data and network cabling / outlets to your home office can significantly increase internet speed, connection, reliability, and overall security. It's perfect for gamers, streamers and work-from-homers. You'll no longer have to play 'conference call bingo' or risk losing that game because of an unstable connection.

FEATURED PRODUCT: ICONIC

Your hideaway haven

Whether you're a jump-out-of-bedder or sleepy-header, your bedroom is your sanctuary; a place to rest, relax and recharge at the end of each day. It's where you get ready each morning for all of life's moments, big and small.

SLEEP SOUNDLY.
From blinds that close to keep the warmth in, a heater that turns on before it cools down, USB charging ports at the ready and lights that dim as you prepare for bed, your bedroom can be tailored to your every need.

COMFORT AND CONTROL.
Make sure to get a good night's sleep by keeping your oasis at just the right temperature with a Wiser Temperature / Humidity sensor and Wiser IR Converter. Automatically turn your air conditioner or heater on or off to maintain the room's pre-set temperatures.

DESIGN TIP. Complete your décor and add a point of difference to your bedroom with the Iconic Styl range.

The range features an extruded aluminium finish and is available in three colour options, so there's something to suit your unique style.
HOT TIP. Layer overhead LED downlights with LED strips under cupboards and add a full-length mirror to create a luxe in-store feel to your walk-in-robe. Add a motion sensor for energy efficient and convenient lighting when your hands are full.

Rise and shine

From those exciting early days preparing a nursery, to tea parties and all sorts of adventures, big and small, your child's bedroom is where they can recharge, discover the world, play and learn.

ALWAYS BE THERE. Keep a close eye on your young ones from wherever you are.

With day and night recording, wide-angle view, motion detection alerts and intercom, the Wiser Indoor IP Camera makes keeping watch over little ones effortless.
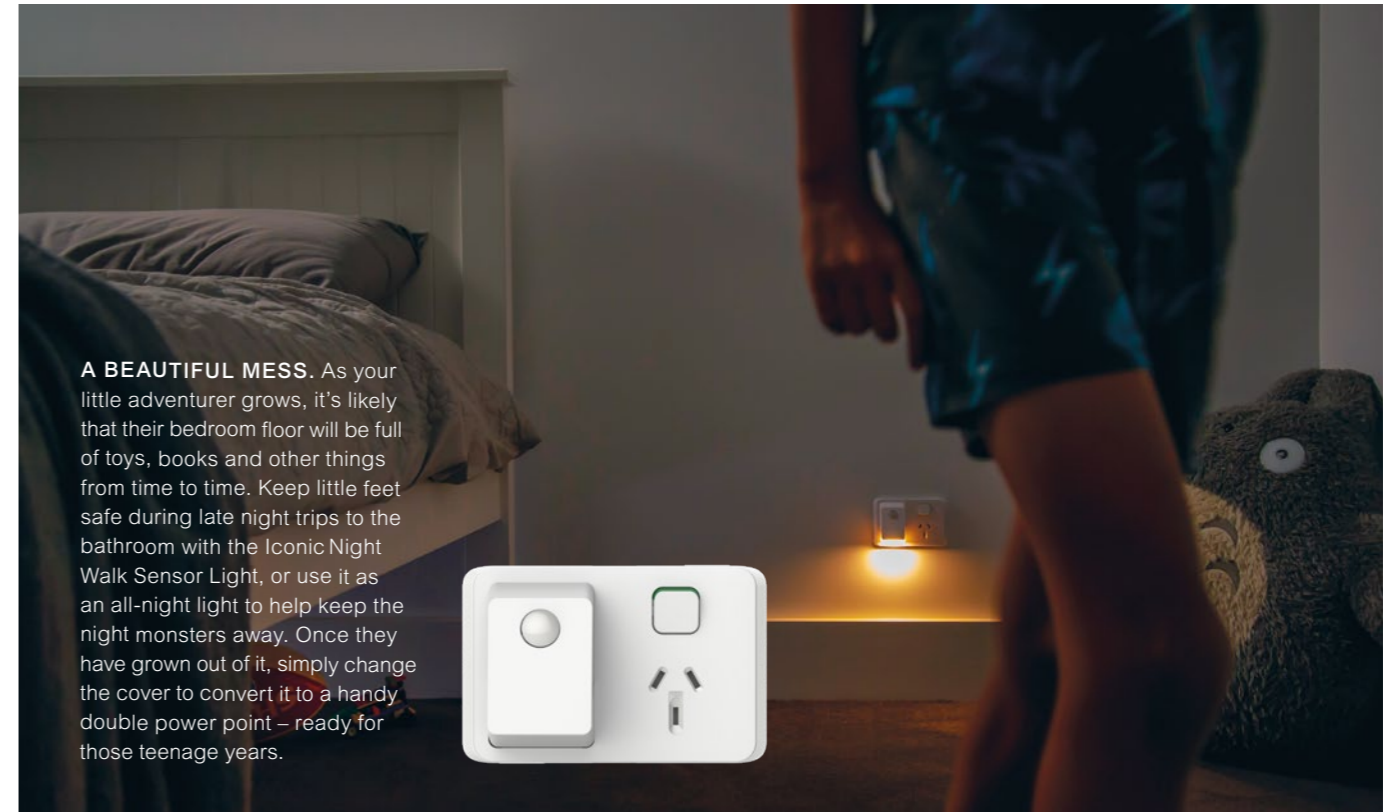

A BEAUTIFUL MESS. As your little adventurer grows, it's likely that their bedroom floor will be full of toys, books and other things from time to time. Keep little feet safe during late night trips to the bathroom with the Iconic Night Walk Sensor Light, or use it as an all-night light to help keep the night monsters away. Once they have grown out of it, simply change the cover to convert it to a handy double power point – ready for those teenage years.

TIPS TO SET THEM UP FOR THE FUTURE.

- Install light switches in areas that are easy to reach for little ones and adults alike. Think about how they'll use the space as they grow.

- It's likely your children will need several power points in the room, especially as they grow older. Avoid potentially unsafe power boards and extension cables by adding a few extra power points.

- Install dimmers to get the right lighting for every task, from bright and vibrant for play and homework, to dim and low for snuggling in for bedtime stories.

- Kids have many devices they use for learning and playing, so why not add convenience to their lives with a USB charger or USB Smart Shelf.

DESIGN TIP. The Iconic Collection will provide flexibility down the road as your child's needs change. It is available in a variety of colours and finishes that are as easy to change as the cover on your phone, perfect for matching to whatever style they grow into.

Lighten the load

Some of the best and most memorable days end with dirty clothes. Whether you're preparing for a special occasion, getting ready for the week ahead, or packing for a holiday, it all starts with a laundry day.

DESIGN TIP. Do you prefer your laundry to have a crisp, clean, all-white look, or does it feature a pop of colour with bold wallpaper, or maybe you prefer a dark and moody design? The Iconic range has a variety of finishes and colours to complement whatever style you choose.

HOT TIP. Forget fumbling in the dark for a light switch while your hands are full.

Get convenience and energy efficiency in your laundry with a motion sensor. It will automatically turn the lights on when you enter, and off after you've left.

FEATURED PRODUCT: ICONIC
SEE FOR FULL PRODUCT SUITE

KEEP DRY. Ever had a water leak and discovered it too late? The Wiser Water Leakage sensor sounds an alarm and sends a notification to your phone so you can avoid nasty surprises.

CLEAN AND COMFORTABLE. Laundries can quickly become warm, humid spaces that are uncomfortable to be in. Install an Airflow Exhaust Fan and combine it with the Wiser Temperature / Humidity sensor to automatically clear the air and keep the space comfortable.

NO WORRIES. Set your Wiser Connected Power Point to only stay on for a set period of time, so you never have to worry about leaving the iron on.

ESSENTIAL PRODUCTS FOR THIS ROOM:

• Exhaust Fan	• Surge Protection	• Wiser Temperature / Humidity Sensor
• LED Downlights	• Switches and Power Points	• Wiser Water Leakage Sensor
• Motion Sensor	• Wiser Connected Power Point	
• Quad Power Point	• Wiser Lighting Control

More than just a parking space

Arriving home to your loved ones and your own private sanctuary is a moment to look forward to each day. Whether you're returning from work or from running errands, or coming home from holiday, there's nothing quite like coming back to the place where you belong.

CHARGE UP AND GO. Charge your electric vehicle quickly, safely and cost effectively with a Schneider Electric EVlink Charger.

Don't have an EV yet? Why not pre-wire your home so it's ready when you are? It'll also be a great selling point when you're ready to move on.

SWITCHBOARD SAFETY. Your electrician is your partner for all your electric home design needs. Ask them about switchboard safety to ensure your home's electrical is up to date and optimised to help offer the ultimate in protection. This is especially important if your home was built before 1980.

Your electrician will make sure you have the right electrical protection to help keep your family safe against shocks and arc faults that cause electrical fires. They can also add protection against power surges that could damage your appliances and electronic devices.

LIGHTS ON. Set your lights to turn on automatically as you enter the garage and off when you exit, with a Wiser Motion Sensor. It can also send an alert to your phone if motion is detected unexpectedly.

DESIGN TIP. The Iconic Outdoor range can withstand dirt, moisture and bumps. With its clean, sleek design and smart connectivity, it's a must-have for any garage.

ESSENTIAL PRODUCTS FOR THIS ROOM:

- EV Charger or Wiring Provision
- Iconic Outdoor Switches and Power Points
- LED Batten Lights
- LED Downlights
- Motion Sensor
- Wiser Garage Door Control
- Wiser Indoor IP Camera
- Wiser Lighting Control

To explore more solutions for your garage, visit **clipsal.com/garage** ⬈

Outdoor like never before

Hot summer days are for spending time outdoors - relaxing or entertaining on the deck, playing games in the pool, or pottering in the garden. But as day turns to dusk, outdoor fans create a soft breeze by the barbie, heaters keep the party going in cooler months, and atmospheric garden lighting adds to the mood.

STYLISH AND COOL. Keep everyone comfortable with a Zen ceiling fan. It's perfect for design lovers who like a little something extra. With a matt black finish and clean lines, this award-winning fan is ultra-quiet and maximises airflow. It's perfect for cooling down on those hot summer days.

DESIGN TIP. When carefully considered, exterior lighting can help you navigate safely when it's dark. It can also create ambience and add an overall sense of elegance to your home.

Place lights in front of plants and key garden features to create a warm and inviting look.

FEATURED PRODUCT: FLOODLIGHT WITH SENSOR
SEE PG 34 FOR FULL PRODUCT SUITE

LIGHT THE WAY. The Infrascan® Motion Sensor detects your moves and triggers outdoor lights when you need to find your way in the dark, and saves power when the light is not needed. It's weatherproof and detects movement up to 18m away at a 110-degree angle, has adjustable sensitivity, light level and time delay for ultimate control.

RELIABLE AND ROBUST. Create a seamless experience by having your indoor style flow through to the outdoors, and still enjoy the indoor comforts: fans, fridges, heating, lighting, music and more.

Iconic Outdoor switches and power points were built to withstand the Australian outdoors and integrates with the Wiser Smart Home system, giving you more control and connecting your home from the inside out.

PEACE OF MIND. Check in on your home remotely with a Wiser Outdoor IP Camera; speak to the courier dropping off your parcel, and keep an eye on your pets while you're out.

ESSENTIAL PRODUCTS FOR THIS ROOM:

- Ceiling Fan
- Exterior Lights
- Iconic Outdoor Switches and Power Points
- LED Downlights
- Motion Sensor
- Switchboard and Circuit Protection
- Wiser Fan Control
- Wiser IP Outdoor Camera
- Wiser Lighting Control

AIR MOVEMENT, HEATING AND LIGHTING

Cool down on hot summer days and create a healthy and inviting home with our air movement, heating and lighting solutions.

Add your selected colour code to the catalogue number, e.g. C4HS1300-WE

Ceiling Sweep Fans

ZENFAN-ZB
Zen Ceiling Sweep Fan with 1400mm diameter blades

C4HS1300
Caloundra Ceiling Sweep Fan with 1300mm diameter blades. Available in White (WE) and Anthracite (AN) with or without light (L)

P3HS1200AL
Airflow Performance Ceiling Sweep Fan. 3 or 4 blades. Available in White (WE) and Stainless Steel (SS) with or without Light (L)

Exhaust Fans

CEF30R-WE
CEF exhaust fan with ducting. Available with stylish round insert grille design

CEF30-WE
CEF exhaust fan with ducting. Available with stylish square grille design and inbuilt lighting option

CEF40N-WE
CEF exhaust fan with ducting. Available with stylish square grille design
CE200N / CE250N
Performance exhaust fan with high airflow. Available with 200mm or 250mm fan blades

Fan / Light / Heater Units

6500ADS-WE
With backdraught shutter 4 x 275W heat lamps

6600ADS-WE
With backdraught shutter 2 x 275W heat lamps

7500ATP-WE
With backdraught shutter and ducting. 4 x 275W heat lamps

7600ATP-WE
With backdraught shutter and ducting. 2 x 275W heat lamps

LED Downlight

TPDL1C3
7W, 750lm with colour changing output switch. Also with Brushed Chrome (BC) and Black (BK) trim options

LED Floodlights

TPFLT30PSC
With power shifting and colour changing switch. Converts to 15W or 20W if required. Available in 50W and 100W versions

TPFLT20SEN
20W, with sensor

LED Wall Lights

TPW1
LED Wall Light, 6 W, IP54, 4000 K

TPWL2
LED Wall Light, 12W, IP54, 4000 K

LED Batten Lights

CLITPDB1
600mm, 20W/40W with colour changing output switch

CLITPDB2
1200mm, 20W/40W with colour changing output switch

Sensors

753R-WE
Infrascan 360° Indoor sensor

751R-WE
Infrascan corner mount indoor sensor

WS226SSR / 3-RG
Sunset Switch, IP66

Infrascan Motion Sensor

750WPR5-BK
Infrascan outdoor motion sensor, IP66. Available in Black (BK) and Grey (GY)

41EPIRM-TN
Iconic PIR Motion Sensor – In Switch

WISER SMART HOME

A scalable smart home solution that lets you control almost everything in your home from wherever you are with the tap of a screen or a voice command.

Wiser Hub

CLP501902
Wiser Smart Home Hub

CLP501902_0001
Wiser Table Stand for Hub

Wiser IR Converter

CLP501401
Wiser IR Converter

Wiser Sensors

CLP595011
Wiser Motion Sensor

CLP593011
Wiser Temperature / Humidity Sensor

CLP592011
Wiser Water Leakage Sensor

CLP591011
Wiser Window / Door Sensor

Wiser Smart Smoke Alarms

755WSA
Wiser Smoke Alarm, 240V, Round

CLP599WSAL
Wiser Lithium Battery Smoke Alarm, Square

CLP599WSA
Wiser Smoke Alarm, 240V, Square

Wiser Cameras

CLP724419
Wiser Outdoor IP Camera

CLP723419
Wiser Indoor IP Camera

Wiser Iconic Mechanisms

41E2PBSWMZ-VW
Wiser Connected Switch, 2AX, Zigbee

41E2PBSWM-VW
Wiser Connected Switch, 2AX, BLE

41E10PBSWMZ-VW
Wiser Connected Switch, 10AX, Zigbee

41E10PBSWM-VW
Wiser Connected Switch, 10AX, BLE

41EPBDWCLMZ-VW
Wiser Connected Dimmer, Zigbee

41EPBDWCLM-VW
Wiser Connected Dimmer, BLE

41ECSFWM-VW
Wiser Connected 3 Speed Fan Controller, BLE

41ECSFWMZ-VW
Wiser Connected 3 Speed Fan Controller, Zigbee

Wiser Modules

CLP5011WSZ
Wiser Micro Module Switch

CLP5010WDZ
Wiser Micro Module Dimmer

CLP5015WBZ
Wiser Micro Module Blind Controller

Wiser Power Point Grids

3025CSGZ
Wiser Connected Double Power Point Grid, Zigbee

3025CSG
Wiser Connected Double Power Point Grid, BLE

SAFETY ⌞↗⌝

Help protect your family, home and valued possessions.

Safety Switches ↗

3043V44-VW
Waterproof switches
Available in 1 to 4 gang

Switchboard ↗ and Circuit Protection ↗

Switchboards
Consult your electrician about the right solution for your home

Surge Protection Device (SPD)
Consult your electrician about the right solution for your home

Residual Current Device (RCD)
Consult your electrician about the right solution for your home

Arc Fault Detection Device (AFDD)
Consult your electrician about the right solution for your home

Smoke Alarms ↗

755PSMA4
Fire Tek® Surface Mount Photoelectric Smoke Alarm

755RLPSMA4
Fire Tek® Surface Mount Photoelectric Smoke Alarm with rechargeable lithium backup battery

755PFM4
Fire Tek® Flush Mount Photoelectric Smoke Alarm

755LPSMA4
Fire Tek® Surface Mount Lithium battery powered Photoelectric Smoke Alarm

EV CHARGERS ↗

Charge your electric vehicle quickly, safely and cost effectively with a Schneider Electric EVlink Charger.

EV Chargers – EVlink Home ↗

EVH4S07NC
7.4 kW charger with cable

EVH4S11NC
11 kW charger with cable

EVH4S07N2
7.4 kW charger without cable

EVH4S11N2
11 kW charger without cable

ICONIC OUTDOOR ↗

Take your indoor style outdoors and create a safe and relaxing space all year round.

Weatherproof Switch and Power Points ↗

O3041HA
Switch, 1 gang

O3015
Single power point

O3025
Double power point

Smart Weatherproof Switched Power Point ↗

O3015T
Single power point with Wiser Switch

Available in:
○ Extra White (XW)
● Black (BK)

Add your selected colour code to the catalogue number, e.g. O3041HA-BK.

ICONIC ↗

The new everyday standard, Iconic has a modern, clean design that complements any style.

Available in:			
○ Vivid White (VW)	◐ Cool Grey (CY)	◑ Anthracite (AN)	● Black (XB)
Edging colour available in:			
○ Translucent / ○ Solid White (XW)	○ Translucent	○ Translucent	● Solid Black

Assembled product available in VW eg. 3041VA-VW, other coloured covers are available separately e.g. 3041C-XB

Switch Cover, Mechanism and Grid ↗

3041VA
Switch, 1 gang

3042VA
Switch, 2 gang

3043VA
Switch, 3 gang

3044VA
Switch, 4 gang

3045VA
Switch, 5 gang

3046VA
Switch, 6 gang

Architrave Cover and Grid ↗

3041AL
Switch cover, 1 gang

3042AL
Switch cover, 2 gang

Cooker Switch ↗

3041/45
Single pole, 45A

3041D45
Double pole, 45A

Dimmers ↗

41E300PBUD2SM-VW
Pushbutton (mechanism only)

42ELEDM2-VW
Rotary (mechanism only)

Data / Connectivity Cover and Grid ↗

3041VH–3046VH
1 to 6 gang plates for data or AV mechanisms

Cable Plate ↗

3040CEP
Brush plate to tidy cables

Power Point Cover and Grid ↗

3015
Single power point
Also in vertical: 3015V

3025
Double power point

3025XA
Double power point with extra switch

3015/4
Quad power point

3015/4XXUA
Quad power point with extra switches

3025V
Double vertical power point
Also in extra switch: 3025VXA

Night Walk LED Cover ↗

3025NW
Motion activated night light cover

USB Chargers ↗

3025USB2
Double horizontal power point with USB-A ports

3025USBC
Double horizontal power point with USB-C fast charger

3025USBAC
Double horizontal power point with USB-A+C ports

USB Smart Shelf ↗

3043HSUSB
USB charging station with shelf, 3 gang

Wiser Cover ↗

3025CSC-VW
Connected Power Point cover

To discover pictogram icons and other accessories visit **clipsal.com/build-my-iconic** ↗

ICONIC ESSENCE ↗

With smooth, round wooden edges, Iconic Essence brings a hint of raw, rustic nature to the home.

Available in:
○ Arctic White (AW)
● Ash Grey (AG)

Add your selected colour code to the catalogue number, e.g. E3041C-AG

Switch Cover ↗

E3041C	E3042C	E3043C	E3044C	E3045C	E3046C
Switch cover, 1 gang	Switch cover, 2 gang	Switch cover, 3 gang	Switch cover, 4 gang	Switch cover, 5 gang	Switch cover, 6 gang

Power Point Cover ↗

E3015C	E3015XC	E3025C	E3025XC	E3015/4C
Single power point cover	Single power point with extra switch cover	Double power point cover	Double power point with extra switch cover	Quad power point cover

E3015/4XXUAC	Cooker Switch Cover ↗	Dimmers* ↗	Wiser Cover ↗
Quad power point with extra switches cover	E3041/45C	41E300PBUD2SM-VW Pushbutton (mechanism only)	E3025CSC Connected Power Point cover
		42ELEDM2-VW Rotary (mechanism only)	

USB Charger Covers ↗

E3043USBC	E3015/4XXUAC + 3015/4XXUAG + 2 x 40E2USBACM-VW + 40E2USBACCAP
