Automation & Electrical Specialists

www.wiredbymjd.com.au

OVERVIEW OF THE COMPANY

Wired By MJD is a family owned company built on quality workmanship and integrity, with **over 10 years' in the electrical trade and over 15 years' experience in the AV industry. Our accreditations include THX, CEDIA, KNX & ACRS Master cabling** (licensed for data and communications), however we are not only AV specialists **we are also licensed electrical contractors.**

At Wired By MJD we take pride in our work, we respect the client's property above all else resulting in a finish that far exceeds the current average standard seen in the industry. We won't just install you the latest technology then leave you to work out how to use it, our team at Wiredby MJD will personally give you a complimentary tutorial on any new products/systems purchased and installed through us.

Wired By MJD is Australia's first CEDIA Member of Excellence

BESPOKE SOLUTIONS

Custom Home Cinema and Audio Our team are highly trained specialists who are experienced in designing and tailoring any room to create a better than cinema quality experience at home. Working with clients, architects and builders, we can design, construct and install an entertainment environment that captures the individual dreams and tastes of the client. We design, supply and install custom wall and ceiling finishes including spectacular bespoke airbrushed murals, lighting seating and decorative elements all with a focus on aesthetic and acoustic quality

Home Automation There is no limit to what home automation can do, be it in one room, the entire house and event outdoor spaces, home automation allows for audio-visual networking, superior data access, wireless systems and cable management, energy conservation and control of power sources such as lighting, heating and cooling. Good Vibrations creates a custom system allowing you to manage all of your electrical household devices through a single easy to manage, future-proofed hub. The flexibility allows Good Vibrations to tailor this system to your specific needs

EXCEPTIONAL AV AUTOMATION & ELECTRICAL SERVICES

Our work has been featured in Luxury Home Design Australia Magazine

CUSTOM AUTOMATION

The Complete **HOME AUTOMATION PACKAGE** brings a state of the art experience to your home. Using the best programs and products available on the Australian market, including Elan, Zennio, KNX and more. Our recommended systems and technologies, work together in harmony to create the best user experience possible. By taking the strengths and advantages of each system and integrating them, our clients are able to experience all the advantages of a high tech home executed with style and luxury. Our goal with the Home Automation Package, is to ensure we can create the best possible user experience for all.

ELECTRICAL AUTOMATION

Electrical automation is one of the key aspects in a smart integrated home which adds value and function to the way users can interact with their home.

Lighting, blinds, AC, boilers, exhaust fans, on/of controls of fire places, pumps are all examples of what can be controlled with the electrical automation.

The platform we use for electrical automation is the international standard, KNX, which is a non-propriety open platform technology meaning the end use has the most future proof technology available.

Electrical automation makes mundane and time consuming tasks simple and easy, with the creation of scenes it is possible to open every blind in the house with one touch, leaving the home again is as simple as a single press to turn everything off. Getting the perfect lighting is no longer a hassle with pre-determined settings.

Living Smart & Simple

KNX

KNX is an open platform automation system (not a proprietary or owned solely by one company). Almost 500 manufactures worldwide contribute to producing KNX endorsed products - enabling us to offer clients arguably the most future proof automation solution on the market. These companies are continually developing and working on new KNX automation products to keep up with the ever evolving technologies.

KNX can be used for applications in the home or office / residential or commercial. Ranging from lighting, blind control, heating, ventilation, air conditioning, monitoring, security, door communication, energy management, metering, AV and more. It can also be integrated with many other proprietary automation systems if required.

KNX has unlimited possibilities, endless flexibility and personalisation, allowing us to customise the installation to the client's requirements.

ELAN

Elan bring advanced smart home automation systems to homeowners. Elan's award-winning smart home entertainment and control system seamlessly combines whole home audio and video, TV, climate, lighting and other home systems with an easy-to-use interface that puts you in control, from anywhere in the home or anywhere in the world.

Elan have been in the Australian market for the past 15 years. At Wired by MJD, we have been using the Elan systems in our residential fit outs for the past decade. This document is a guide of the Elan system we will be recommending for your home. We hope this demonstrates the true value a fully automated home and why we place such value on these products being part of the modern home landscape.

Endless Potential

INTERCOM

The 2N IP intercom with numeric keypad (available in black or silver) is our best seller, as its variations allow it to be integrated with the other technologies in the home. The internal intercom unit can be an ELAN touch panel or Z41 COM, both of which double as controls for lighting, blind HVAC etc avoiding wall clutter and giving a beautiful stylish finish.

This system also has the ability to be accessed remotely, so you never miss a delivery again.

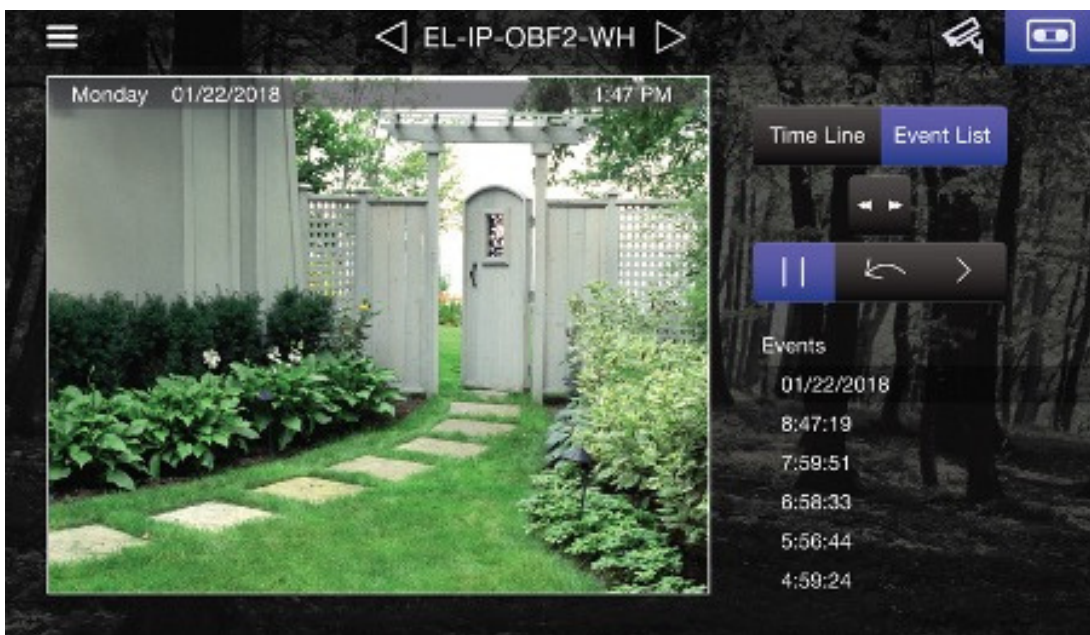

Integrated Lifestyle

CCTV

ELANs line of advanced surveillance equipment with in built IntelliVision Technology is providing our clients with newfound security, privacy and peace of mind around the clock from anywhere in the world. If desired personalised alerts can be established to notify you of certain events.

The ability to monitor live or recorded footage from the ELAN app, remote or touch panels gives our clients freedom and choice.

Peace of Mind

ALARM SYSTEM

The Ness M1 Gold offers unequalled value to System integrators, installers, and end users.

Unlike panels that may be strong in automation but weak in security (or vice versa), the M1 Gold boasts a rock solid security foundation with the most imaginative and powerful automation functionality available

SMOKE DETECTORS

Smoke detectors can be integrated into the M1 Alarm System

Security

CLIMATE CONTROL

Climate control is made simple when integrated into ELAN/KNX. Allowing users a whole new range of options when integrated into the home automation package. Automatic schedules, turn on/off HVAC units remotely, master off commands (so it is never accidentally left on, have HVAC turn off if doors or windows are left open and more.

AC
Hydronic
Under-Floor Heating
Outdoor Radiant Heaters
Ceiling Fans

Comfortable Living

* Please check compatibility of AC control - as the level of integration may vary

BLINDS

Blinds, awnings, shades and window coverings can all be seamlessly integrated into your home automation and activated with scenes, automated with environmental factors or time of day and controlled via any of the chosen interfaces in the home.

Simple Perfection

SENSING

Sensors can be used to activate lights, scenes or even sequence of events, humidity sensors can be used to activate extraction ventilation systems. Temperature sensors already integrated in switches or as stand alone units can be utilised to regulate heating and cooling systems or activate other comands.

Technology Working for You

LANDSCAPE LIGHTING

Landscape and outdoor Lighting is one of the most beautiful yet under used aspect of most homes. With automation you can always be welcomed home with an incredible view, or walking through your home at night take in the beautiful lit outdoor aspects as you pass by your windows. All of this is is easy to customise and schedule according to the individuals.

Serenity

IRRIGATION

Irrigation is one of those items which is often forgotten, either in the design phase or after installation. Forgetting to turn on or off your irrigation is a costly mistake. Take the thinking out of irrigation and have it included in your automation package and schedule the irrigation to come on at set times or go one step further and have sensors which measure the moisture in the ground and adjusting the timing to suit.

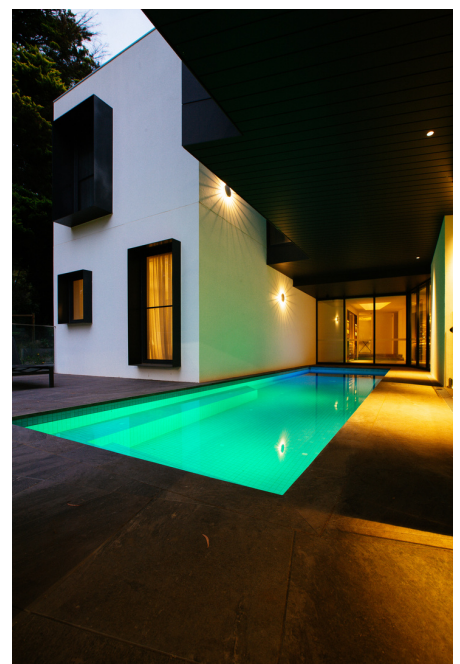

Never forget to water again

OUTDOOR ENTERTAINING

Pools and tennis courts can be a great addition to the home lifestyle and adding these into the home automation means you can have control where and when you need it most.

Pool - some equipment can be controlled via the automation and set up on schedules or to run when required (avoiding the need for another control system and allowing easy accessibility)

Tennis Courts and outdoor entertaining areas are easily controlled and can not only incorporate lighting but also audio

Relax & Unwind

VIDEO DISTRIBUTION

Video Distribution is really important especially in today's environment where we have so many ways to stream and view content is a variety of different qualities.

At Wired By MJD we understand the limitations with video distribution and hence we can propose a package that will deliver high quality video images to anywhere in your home from any source you choose. We can house all of your electronics and media source equipment away and out of the way yet still provide the best viewing experience.

Seeing is Believing

AUDIO

Audio is an important aspect of home living, whether it's listening to your favourite tunes, relaxing in the bath or entertaining with friends outside. Maybe you just like get the t latest news reports whilst sitting on the balcony or cheering on your sporting team whilst in your man cave.

Perhaps listen to your favourite vinyl on crystal clear stereo speakers is more your style

What ever your audio needs are we can tailor a package and have amazing sound in any room of the house or garden.

Multi Room & High Fidelity

Because Music is Life

MEDIA ROOM

Media Rooms are often one of the most used rooms in the home, it is a multi functional area where people can gather to watch TV, listen to music or play video games.

Regardless of how you want to use this room, whether you want your technology hidden or take pride of place we can tailor a system for you.

Entertainment for Everyone

HOME THEATRE

Imagine going to the movies in the comfort of your own home! We can design your perfect dedicated home theatre, complete with curtains, wall coverings, custom seating and all the AV fit out to create the perfect atmosphere to enjoy your favourite movies.

It's Showtime

CONTROL SYSTEMS

With so much technology in today's home, it is easy to be overcome with multiple platforms and various apps and, switches and control panels,

Wire By MJD take the confusion and the clutter away by providing you with one easy to use system that is accessible the way the user chooses.

Completely customisable

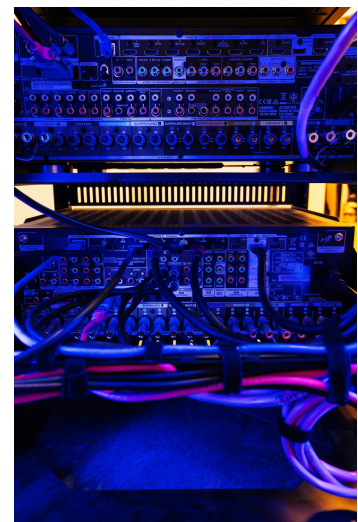

Control it Your Way

CENTRAL HUB

This is arguably one of the most important rooms or areas in the home. In today's connected and technologically advanced society, there is a lot of equipment...possibly more than you realise.

We can discreetly and neatly store all of your networking, audio visual and security needs in one central location. Avoiding the need for cupboards and cabinetry to hide the necessary but often unsightly equipment and turn it into a hidden gem.

Cable management, surge protection and a carefully crafted custom racking system can extend the life of your equipment by allowing adequate airflow to reduce the risk of overheating and easy access for equipment maintenance when ever it is required.

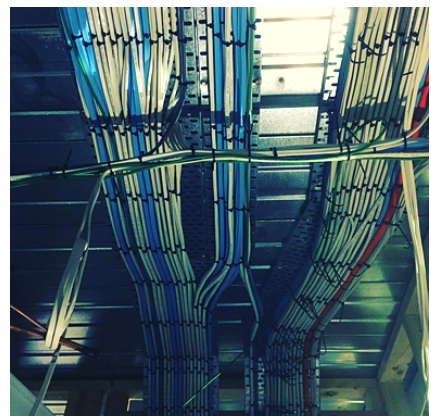

The Epicentre

GENERAL ELECTRICS

As Licensed Electricians and a Register Electrical Contractor with over 15 years experience in custom builds, you trust that your job will be completed to the highest possible standards in the industry.

At Wired By MJD we take great pride in providing all our clients the best experience when creating your forever home. From walk throughs to documentation to execution, we will be with you every step of the way. We make the seemingly impossible a reality by liaising with your architect, builder, designers and every other trade as well as the home owners we can keep your build running smoothly.

Power Your Life

NETWORKING & WIFI

Keep all the occupants in the home happy with a well managed WIFI network.

The Unifi cloud managed access points and network switch can be fully installed and programmed throughout your home giving you peace of mind that you can always be connected to the internet.

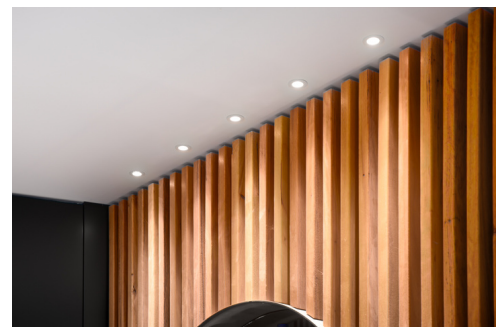

Reliable

LIGHTING DESIGN

A great lighting design adds so much value to the home and yes this is just another one of the services we provide.

Lighting helps create the mood and feel of a room, it can be used to highlight the architecture of the home or light up specific elements you want to display. Lighting can be the feature and the hero of the room or subtle and just enhance the space.

Lighting design is not just for your interiors but also the exterior and landscape.

Illuminate your Life

DUCTED VACUUM

Not technically part of home automation, but this value add is definitely something to consider. Anyone who has had a great ducted vacuum will never look back.

With great suction and large storage capacity, ducted vacuums not only add value to the home but make this chore so much easier and enjoyable.

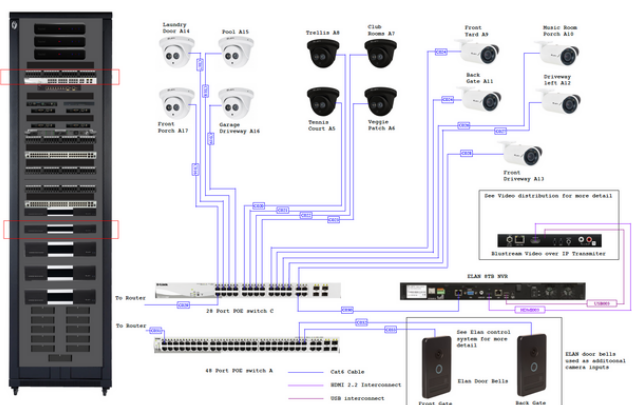

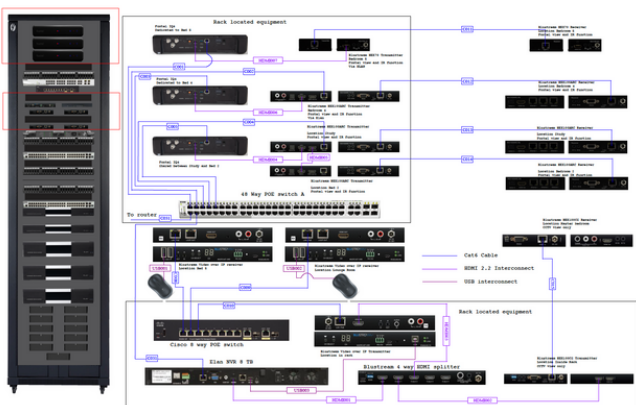

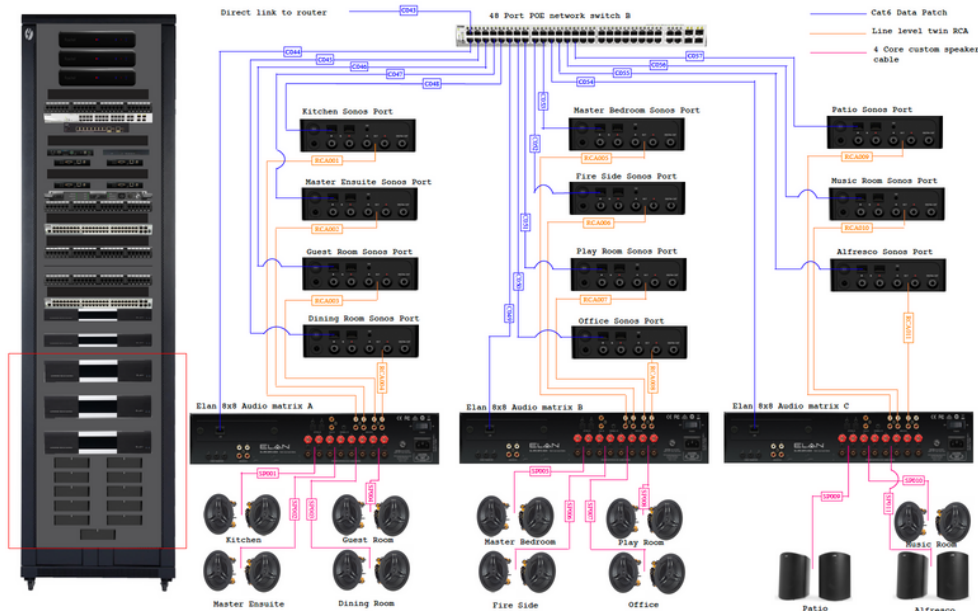

Cleaning Made Easy

DOCUMENTATION

Documentation is often a forgotten part of the project, however it is important that clients have a record of what is hidden behind the walls.

If documentation is important to you we are well equipped to provide you with all the necessary plans that you require.
