COLLECTION

Partner your new carpet with New Zealand's most trusted and comfortable carpet cushion.

Dunlop Slipcoat Laminate System for Optimum Installation

Dunlop Quadmesh™ webbing for leading structural support

Dunlop Maxbond™ Cushioning Featuring High Performance Comfort Foams

Every roll sold supports Breast Cancer Foundation NZ. Having raised over \$250,000 since 2008, Dunlop Flooring in conjunction with Harrisons Carpet are proud to support Breast Cancer Foundation NZ programmes of education and awareness, research, advocacy and support for women who are living with breast cancer.

Advanced underfoot comfort™

Dunlop Carpet Cushion is made in New Zealand using our world-leading Maxbond™ cushioning system. We only use high quality materials and processes that guarantee the best comfort per kilo of foam is delivered to ensure long lasting comfort.

Featuring advanced proven technology certified for peace of mind. Simply the best choice for your carpet's comfort, performance, and life.

Not all carpet underlays are created equal. No other manufacturer takes their product design as seriously as we do. Advanced underfoot comfort guaranteed for the life of your carpet.

QUALITY GUARANTEED

Australian Standard
AS4288:2003
Lic 596450076
SAI Global

Australian Standards Certification

Dunlop Carpet Cushion is certified to exceed the Australian Standard AS4288:2003 for soft underlays. This is New Zealand's recognised standard as required by the joint Australian and New Zealand flooring installation standard AS/NZS2455.1:2007.

CRI Green Label Plus Accreditation

Dunlop Carpet Cushion is certified by the Carpet Rug Institute Indoor Air Quality Programme. This programme identifies products that have low VOC's which help promote superior indoor air quality.

Dunlop Guarantee

Dunlop Cloud9™ Carpet Cushion is guaranteed for the life of the carpet.

Made in New Zealand

Dunlop Carpet Cushion is proudly made in New Zealand by Dunlop Flooring Limited. Made to New Zealand's high expectations.

COMFORT ASSURED

Comfort guide

Look for our easy guide on comfort. The higher the rating the better the comfort. Make sure you try the different options.

Density

Density is a key contributor to comfort which includes the quality of material used. Maxbond™ products only use high performance comfort foams giving you the best comfort.

Thickness

Thickness is a key factor to overall comfort, normally the thicker the better but this depends on the density it is combined with. The number shown represents a nominal thickness in mm.

Antimicrobial Protection

Options are available that include MicroFresh antimicrobial protection proven to inhibit the growth of bacteria, mould, mildew and dustmites for a healthier home.

Recycle by Dunlop

Dunlop Flooring uses new high quality foam off cuts from furniture and bed factories and has an active programme recycling Dunlop trims leftover from installations.

Quadmesh™

Quadmesh™ is the webbing used in the product to add structural support. Dunlop Carpet Cushion features high performing 7x7 Black Quadmesh.

Insulation

The heat insulation effectiveness is measured by a TOG rating. The higher the figure, the greater the insulating performance.

Acoustic

The ratings quoted show the impact sound reduction properties in terms of dB so that you can make comparisons between the different products.
