Custom Builders

Mornington Peninsula's
high-end custom
build specialist

GSTRUCT GROUP

GSTRUCT GROUP specialises in high-end custom residential builds and large-scale bespoke transformations throughout the Mornington Peninsula and Inner Melbourne.

Director Glenn Longstaff, learnt the building trade from the ground up. Rising through the ranks from apprentice carpenter, to become construction manager on multiple notable projects here in Australia and in the UK.

Glenn's in-depth understanding of all facets of the building process helped shape the foundations for GSTRUCT GROUP.

As director, Glenn personally manages and oversees all aspects of each project and has built a reputation for his honest, open, professional and detail-orient approach.

GSTRUCT GROUP works with a team of skilled and dedicated tradespeople that celebrate craftsmanship. We're passionate about contemporary design and have valuable experience in detailed complex builds. We don't shy away from any challenges.

We have extensive knowledge with all types of construction including off form concrete, basements and retention systems.

We continually strive to make optimisations to deliver an exceptional result that goes above and beyond client expectations. We believe integrity is fundamental in the relationship between client, architect and builder. That's why we focus on clear communication, adherence to best practices, precise attention to detail and on-time completions.

Glenn welcomes initial talks with architects and clients to discuss planning, design and cost considerations during the drawing process. This ensures a positive outcome for all parties and ultimately assists in moving the project forward to the construction phase.

PORTFOLIO

Glenn has an extensive portfolio of the most prestigious and cutting-edge homes on the coast and inner Melbourne.
