natural stone tiles & claddings

Island Stone®

Catalogue | 2012/2013

natural... timeless... beautiful

Welcome to Island Stone

> **Island Stone** is a locally owned and operated company that specialises in the sourcing, manufacturing, distribution and installation of *natural stone* tiles and claddings.

We are excited to present our latest range of products that transform the raw beauty of natural stone into tiles and claddings that will enhance any living space. Testament to this, our catalogue includes some stunning new photographs from our portfolio of installations.

One of the hallmarks of **Island Stone's** business is the control the company maintains over the entire process; from selection of the raw stone material, to refinement and production in our own purpose-built factories and exclusive distribution to licensed **Island Stone** agencies in 10 countries. This allows us to maintain the high quality of raw material and finished product that **Island Stone** is renowned for, as well as offering a range of innovative designs that are unique to **Island Stone**. It also gives us the ability to offer customised products to meet the specific designs needs of our clients.

Finally, maintaining control allows us to deliver on our commitment to develop products in an environmentally conscientious manner, including sourcing raw material in a sustainable way and minimising waste during production.

Whether you are at the very early stages of design, you have a specific product solution you are seeking, or somewhere in between, call and speak to one of our team. We look forward to helping you create a stunning effect with natural stone.

a commitment to custom design

- > In a market defined by new and original designs, **Island Stone** offers you the opportunity to be a step ahead of the competition.

Throughout our catalogue you'll find a range of natural stone tile and cladding products that we hope will excite and inspire you. Don't, however, let it limit you.

At **Island Stone** we have both the desire and the capability to offer a bespoke design service, creating custom products to fit your brief and tailored to your specific space. And because sourcing and cutting natural stone is what we do, we are more than happy to come up with design suggestions.

We own our own plant and cutting facilities which means **Island Stone** can offer a unique direct-from-factory relationship to our customers. This enables us to develop customised designs, limited only by your imagination and the structural capacity of each type of stone.

Whether you have a design concept in mind, a specific stone that you wish to work with or even if you are only in the early stages of developing ideas for a project, contact us to discuss the options for creating a bespoke natural stone product.

inspiration

- > When it comes to choosing tiles and claddings, it's hard to match the beauty and timelessness of natural stone. There is nothing man-made about real stone - the colour, the highlights, the grain and the variations, have all been crafted by nature over millions of years.

At **Island Stone** we cut and shape the stone into a range of tiles and claddings that can transform your living or working space. Even this must be done within the laws of nature - each type of stone has its own unique structure and properties which lend itself to some applications, but not others.

Over the next few pages you'll find a selection of photos from our portfolio of installations. They are a showcase of the stunning design statements that can be made with natural stone. Have a look through, and be inspired by what can be achieved through combining the raw beauty of nature with quality craftsmanship.

cladding series

- > The Island Stone **Cladding Series** is a range of solid stone tiles designed to create stunning walls, inside or outside. All tiles in this series are made from individual pieces of stone that are precision-cut and fitted together to produce the most remarkable result.

Available in a range of different stones, colours and surfaces, the **Cladding Series** seeks to enhance the natural beauty and drama of the raw material, and transform it into a design element for use by those in search of something truly unique.

Interlocking wedge pattern

Tile size > 290 x 100mm

Tile surface > Split face

Our original wedge design, **Rustic** cladding uses narrower V-tiles with a varying relief pattern to create a stunning feature wall effect. Once in place, it literally looks like the stone has been woven across your wall.

Rustic Cladding is made of solid stone with all the natural variations in surface texture and colour that this brings.

Its uneven surface, combined with the subtle colour variations, make it an ideal product to use as part of any wall or surface that you want to receive extra special attention.

Rustic cladding can be laid either horizontally or vertically, all with easy grout-free installation.

01 > ●

rustic II > CR5

Interlocking Wedge Pattern
Tile size > 390 x 120mm
Tile surface > Honed/flamed

Rustic II cladding is distinguished by the natural textured relief pattern created by the interlocking wedge shapes. The new elegant length and self interlocking format offer an additional new appeal to our exclusive rustic design. Both the honed and flamed surface options, combined with their respective, subtle colour variations, make them ideal products to use as part of any wall or surface that you want to receive extra special attention.

The narrow tile pattern offers stacking arrangements both horizontally or vertically, each creating a unique pattern and stunning effect. Offering easy grout-free installation, rustic cladding installations are often described as if stone has been woven across a wall.

01 > ●

strip > CS1

Rectangle
Tile size > 300 x 48mm
Tile surface > Split face/flamed

Exclusive to Island Stone, this innovative **Strip** cladding is suited to both interior and exterior use. The tiles are made of solid stone, with every stone having been hand-selected for its texture and color. The natural highlights that this produces, create a truly amazing effect that changes subtly with both natural and artificial lighting.

large strip > CS2

Rectangle
Tile size > Bespoke (please enquire)
Tile surface > Split face

Large Strip cladding introduces a refreshing new design element to your environment and is ideal for feature walls, in particular. Like the original Strip, It can be installed horizontally or vertically. Depending on the effect you desire, it can be installed grout-free or with traditional grout joints.

01 > ●

v-tile > CR2

Wedge

Tile size > 290 x 48mm

Tile surface > Split face

Shaped like a wedge, the **V-Tile** is thin at one edge and thick at the other, providing a range of effects depending on how the tiles are laid. Several stunning design looks can be achieved from just this one tile. The tiles have a natural surface finish which, combined with relief pattern of the wedge shape, shows the natural colours and highlights of the stone off with stunning effect. One of our most versatile and innovative products in the Cladding Series, the **V-Tile** will dramatically transform any interior or exterior wall space.

large v-tile > CR4

Wedge

Tile size > 390 x 98mm

Tile surface > Split face/honed

The **Large V-Tile** is simply a bigger version of V-Tile, this shape allows the same stunning three dimensional relief to be created in a larger format. Island Stone's newest and most innovative product in the Cladding Series.

Also Available:

vtile II > CR7

Wedge

Tile size > 390x48mm Bespoke (please enquire).

Tile surface > Honed/flamed

A longer version of the original V-tile, **VTile II** has the same versatility and design options, but with the added drama of a larger tile.

solid stone series

- > With the infrastructure to source the natural raw material and the factories to refine it into virtually any form of finished product, Island Stone offers our **Solid Stone Series**. In this series we present the stone in close to its natural state and let you decide how best to feature it.

Recognizing the wide appeal and scope of applications that solid tiles have, we have greatly increased our range in this series. With an expanded choice in both the variety of stone and the range of surface finishes, the options for featuring a **Solid Stone** tile in your residential or commercial design are now many.

Whether it's the contemporary appeal of rectangles or the understated elegance of squares, the natural beauty of the stone speaks for itself, and in doing so lends itself to a wide range of design applications.

surface finishes for solid tiles

> Our solid tiles come in a range of surface finishes, providing a variety of looks and applications for each type of stone.

> **Brushed**

The stone is mechanically or chemically treated to give each tile a textured finish akin to a paint-brush being lightly dragged over wet paint.

> **Bush hammered**

A pounding action that produces a textured finish to the surface of the tile.

> **Chiseled edge**

The edge of each tile is hand-chiseled, producing a natural, rustic finish.

> **Flamed**

A rough surface that is developed through heat. During fabrication the stone is heated up, and the crystals in the stone begin to 'pop', forming a rough surface.

> **Honed**

Provides a flat to low-sheen gloss with a very smooth surface. Honed stone colours are not as vibrant as polished stone. This finish is common in high traffic areas.

> **Polished**

A glossy and very smooth surface which brings out the colour and grains of the natural stone. The shine comes from the reflectivity of the stone's crystals. It is achieved with polishing bricks and powders used during the fabrication process, it is not a coating on the stone.

> **Sanded**

The tiles are treated with a pressurized flow of sand-water, producing a textured surface with a matte gloss.

> **Split face/Natural face**

The stone is split as opposed to being cut; giving a very natural-looking textured finish that also provides an anti-slip quality to the tile.

> **Tumbled**

The cut tile placed in a purpose-built tumbling machine which produces a rounded edge. Gives the stone a naturally weathered look.

> **Cross cut**

Where the stone is cut along the grain, giving the tile the look of the natural surface of the stone.

> **Vein cut**

Where the stone is cut against the grain, so that the surface of the tile features the natural veins that run through the stone.

02 > ● granite & basalt

> Enquire about which tile sizes and surface finishes are available for each type of stone.

Primarily darker, both **Granite & Basalt** are an excellent natural stone for those seeking a dramatic effect for their exterior or interior surface. Within our range of **Granite & Basalt** tiles, the natural grains and highlights of the stone are a subtle feature of the product, which can be accentuated by the choice of finish - honed, flamed or polished.

Some of the hardest stones, **Granite & Basalt** are suitable for a variety of applications, including walls and floors, interior and exterior, heavy traffic areas and wet areas.

Colours

Andesite Grey Speckled

Atlantic

Bluestone (G684)

Mongolian Black

Note: Colour swatches are an indication only. As with all natural stone, colour and grain may vary.

travertine

> Enquire about which tile sizes and surface finishes are available for each type of stone.

With colours ranging from light to dark browns, and into silver and gold hues, **Travertine** is a stone with a character and feel all of its own. It is formed through the accumulation of calcite from hot springs, and contains holes that were formed by water flowing through the stone. These holes are generally filled with resin or cement to achieve a natural-looking finish, however in some varieties the stone can be used with the holes unfilled.

Our **Travertine** is sourced primarily from Turkey and is fast becoming one of the most popular stones in our Solid Tile range.

Skabas - K

Note: Colour swatches are an indication only. As with all natural stone, colour and grain may vary.

limestone & quartz

> Enquire about which tile sizes and surface finishes are available for each type of stone.

Offering a more subtle level of graining than Marble, **Limestone** still brings drama and sophistication to a surface, be it floor, wall or both. Naturally occurring in more neutral hues of white, grey and brown, **Limestone** has a smooth surface which can be treated with a range of finishes.

The natural highlights and grains that appear in **Quartz** provide a striking look as a solid tile. The solid square tiles can be used either on their own, or paired with one of our Mosaic tiles in the same colour for a unique contrasting effect.

marble

> Enquire about which tile sizes and surface finishes are available for each type of stone.

Marble comes in a range of naturally occurring colours and can be quite heavily veined. Whether the choice is to make a statement with a strongly coloured and veined stone, or to opt for a more subtle tone with lighter shades and grains, the look of **Marble** is unmistakable. **Marble** is ideal for bathrooms, kitchens, feature entranceways and more.

White Marble

Note: Colour swatches are an indication only. As with all natural stone, colour and grain may vary.

02 > ● sandstone

> Enquire about which tile sizes and surface finishes are available for each type of stone.

A very durable form of quartz grains, **Sandstone** usually forms in lighter creams, browns or red colours. Available in either a natural or honed finish, **Sandstone** is naturally resistant to weathering, making these tiles an ideal option for outdoor spaces such as decks, courtyards, and pool surrounds.

Colours

Autumn

Grey

Mint

Note: Colour swatches are an indication only. As with all natural stone, colour and grain may vary.

03 > ●

pebble series

- > The **Pebble Series** is Island Stone's original and largest range of tile, consisting of pebbles of the highest quality and incorporating an extensive array of colours and styles.

Crafted by nature, the stones are gathered from various island locations, carefully hand sorted for colour, then laid into our exclusive interlocking format to create an easy-to-install tile. As we own our own factories, we are able to maintain the quality of finished product to a consistently high standard.

With the **Pebble Series** our goal is to offer our customers a range of tiles to suit a myriad of applications, both internal and external, with a standard of tile that will satisfy the most discerning eye, and that will stand the test of time.

03 > ● perfect pebble > 13

interlocking tile

Tile size > 300 x 300mm

Tile surface > Natural

Our original **Perfect Pebble** tile range is the first and finest mesh-backed pebble tile in the world. Firmly established as an international best-seller, it features our unique seamless interlocking system and is available in an extensive range of colors.

The stones are hand-sorted to ensure only the highest quality pebbles are used. They are additionally cut and calibrated to achieve an unparalleled consistency in size, colour and flatness.

pebble borders > b5, b4, b3

03 > ● bali pebble > E4

Interlocking tile
Tile size > 400 x 400mm
Tile surface > Natural

In response to the demand from professional landscapers, Island Stone has produced the **Bali Pebble** tile. This tile offers an affordable way to introduce the pebble look for areas such as paths, driveways and courtyards and is also suitable for indoor use.

The **Bali Pebble** tile has a more variable colour and flatness profile, creating a look that is more random than the Perfect Pebble tile.

Use the Perfect Pebble in feature locations and the more economical **Bali Pebble** in those less critical areas.

03 > ●

king pebble > 14

Interlocking tile
Tile size > 400 x 400mm
Tile surface > Natural

King Pebble is one of Island Stone's flagship tiles. Based on the original Perfect Pebble tile, it uses a much larger and more random shaped pebble to create a rugged, chunky look.

With its indoor/outdoor versatility, and large colour palette, the numerous applications for the **King Pebble** include entranceways and atriums, larger interior rooms and open-plan spaces, feature walls, courtyard and patio areas, pools and more.

A unique look can also be achieved by contrasting the **King Pebble** tile with other Island Stone products.

03 > ● strip pebble > SP1

Interlocking tile
Tile size > 300 x 300mm
Tile surface > natural

Strip Pebble reflects the desire for modern designs using natural materials. By cutting the stone in a longitude direction, we create a fusion between the natural curved personality of pebble and the dynamic geometrical appeal of the directional cut.

In contrast to our vertical pebble line, with **Strip Pebble**, individual pebbles are aligned in rows to create a distinctively linear appearance.

Strip Pebble is a uniquely designed mosaic sure to create an exclusive appeal to any surface.

04 > ●

random series

- > As the name suggests, the **Random Series** of tiles are made from stones of random shapes and sizes that have been melded into a single tile. Combined with Island Stone's unique four-sided interlocking design, they create a natural, near seamless look across any surface area.

Achieving this look requires the hand-selection and sorting of the stones, which are then laid precisely into the interlocking pattern. So while the effect created is random, the process followed to achieve this is anything but!

As with the Pebble Series, Island Stone is only able to produce such an intricately designed tile to a consistent standard because we own our own factories, and have control of all processes through to the finished product.

Beige & Tan Marble Random Squares - RS3MW

NEW

04 > ● random squares > RS3

Interlocking tile
Tile size > 300 x 300mm
Tile surface > Cut and tumbled

Random Squares offer an endless variety of four sided stones all tightly woven together as a mosaic tile. Each tile is uniquely made up of individual stone rectangles and squares of varying size and shape, hand placed in an interlocking design. The resulting tile is both modern and playful yet reflective of classic cobblestone designs.

Offered in a range of popular stone types and proven stone combinations, Island Stone's flawless interlock design insure a seamless surface once installed.

Random Squares are a versatile product equally appropriate for smaller areas such as high profile kitchen backsplashes as well as larger projects such as interior feature walls, exterior patios and walkways and larger commercial installations.
