# Jaspur

A remarkable achievement in handweaving, Jaspur translates the richness of handwoven velvet into a form rarely seen at this level of quality. An expression of craftsmanship closely associated with Jacaranda.

The dense pile creates a soft, generous underfoot experience while maintaining a tailored appearance. Classic, plush and enduring, it delivers comfort with a timeless sensibility. Handwoven from pure wool, Jaspur balances warmth, resilience and visual calm, with a level of performance that allows it to sit comfortably across both residential and more demanding interior settings.

# Willingdon

Exceptional durability and proven contract performance, combined with beauty, luxury and character. A trusted and enduring choice for Jacaranda customers.

Textured, resilient and quietly characterful, Willingdon is defined by its distinctive random weave. The surface introduces depth and movement without repetition, creating visual interest that remains timeless. Handwoven from high-quality pure wool, it balances robust performance with tactile refinement—proving that practicality can still feel beautifully considered.

# Chennai

Tough, practical and designed for everyday living, Chennai offers enduring performance with a considered, accessible appeal. Handwoven from pure wool, Chennai feels comfortable, reassuring, and well-judged underfoot. A subtle natural fleck runs through the surface, introducing gentle variation and depth to the weave. Chennai is simplicity with substance, versatile and quietly confident, providing a calm foundation for a wide range of interiors. The gently tactile surface brings warmth and character without overwhelming the space.

# Daiya

Made from undyed wool, the natural fibre brings warmth and depth without pretence. Daiya suits interiors that value authenticity and restraint. Natural, understated, beautifully honest and very well priced, it allows material character to lead the design. Subtle tonal variation and a soft bouclé texture create a surface that feels relaxed yet intentional.

# Desuri

Crafted from undyed wool, Desuri offers natural warmth and quiet tactility. Softly structured and effortlessly relaxed, it is defined by its refined loop texture. The surface engages through touch rather than pattern, creating a calm and welcoming atmosphere. Subtle and understated, practical and good value for money, Desuri enhances interiors without demanding attention.

# Hand-sewn in India

Most of Jacaranda's carpet ranges are available as stock rugs, offered in a selection of standard sizes and finished with a smart, hand-sewn edge. These rugs are typically available for immediate delivery, making them an ideal choice for projects with tighter timelines. Every stock rug is carefully finished by hand using a needle and the same colour of wool or TENCEL™ lyocell fibres from which the rug is made, ensuring a seamless and high-quality edge that complements the overall design.

For a more tailored option, measure-to-measure and colour matched, handwoven rugs can also be finished with the same carefully crafted handsewn edges. Lead times for bespoke handsewn rugs typically range from 14 to 18 weeks.

## Ethical labour practices

These artisanal methods are extremely labour intensive and central to Jacaranda's ethos is ensuring that everyone involved is well-treated. Also, that no children are involved in our production. For this reason, we are long standing supporters of GoodWeave to ensure all our mills work to the 'GoodWeave Standard' and open themselves to regular, random, unannounced inspections.

GoodWeave was founded in 1994 by Indian activist Kailash Satyarthi and his international organization has worked tirelessly to eradicate child labour from production via its unique labelling scheme. He was recognized in 2014 with a Nobel Peace Prize, for his drive to ensure that children should have their childhood restored, so they can laugh, learn and play. GoodWeave provides educational opportunities to children in weaving communities and ensure a fair working environment for all employees. For any rugs handmade in India, please look out for the GoodWeave label for the reassurance that GoodWeave's ethical working practices are being upheld. Do visit the GoodWeave website for more information.

# Made to order in the UK

All ranges can be made-to-order in bespoke size rugs.

### Blind-hemmed

Blind-hemming is so called as the stitching is invisible and the tape gives a subtle edge to the rug. We colour match tape closely to the rug centre to create a stylishly, understated finish. Visible tape width varies, but will be as narrow as each texture allows, whilst ensuring longevity. Lead time approximately 2 - 5 weeks from order to despatch.

### Wide blind-hemmed

Due to the loop construction of certain ranges, they require a slightly wider blind-hem than our standard finish. We closely match cotton tape to the rug centre and add a narrow edge, ensuring that the loop pile is securely held for longevity whilst giving a smart, subtle finish. Lead time approximately 2 - 5 weeks from order to despatch.

### Bordered

We can border rugs in a choice of leather, cotton, linen or Alcantara®. Standard border width is 5 - 6cm. Please note that our leather borders are made from real hides so joins may be visible. In addition to the tapes we stock, we are happy to border rugs in tapes supplied by customers, please get in touch for further information. Lead time approximately 2 - 5 weeks from order to despatch.

### Whipped

The edges of all but Jacaranda's thickest carpets can be overlapped in our workshop. For ranges made from TENCEL™ lyocell fibres, we use the same yarn as the pile, or customers can use our TENCEL™ pom box to choose contrasting colours. We whip wool ranges in carefully matched wool yarn for a subtle, stylish finish. Lead time approximately 2 - 5 weeks from order to despatch.

# Hand-weaving

It takes 1,200 hand filled bobbins to charge the hand operated warping wheel to fill the cones for every 5m wide traditional wooden hand loom. Each loom is operated by hand and foot without the need for electricity, and requires three strong weavers to maintain the tension.

Each roll of Jacaranda handmade carpet passes through at least 64 skilled hands, across 280 hours, over several weeks. Our stock rugs are sewn by hand around the edges and we can also make bespoke shapes and sizes.

# Natural fibres

## Wool

Wool is natural, renewable, and biodegradable—ideal for beautiful, durable flooring. Choose from smooth velvets, chunky bouclés, and contract-rated textures.

### Benefits:

- Naturally fire-resistant & insulating
- Our wool is treated and guaranteed against moths for 10 years
- Dye-free colour options
- Easy to clean, stain resistant & hard-wearing for contract use
- Custom dyeing available to match any colour

## Silk

Silk has been prized for centuries for its shine and softness. At Jacaranda, we blend real silk with merino wool in our handwoven Mandalay range.

### Benefits:

- Natural fibre with a striking, luminous sheen
- Soft, strong & beautifully tactile, performance similar to wool
- Cold water extraction cleanable
- Colour matching available to fabric, Pantone or pom
- Mandalay silk blend fire rated Bfl-S1

## TENCEL™

TENCEL™ fibres create soft, silk-like carpets that reflect light beautifully. Made from sustainably grown trees, TENCEL™ is produced in a closed-loop process with minimal environmental impact.

### Benefits:

- Sustainable, biodegradable & low-emission production
- Absorbs moisture, limiting bacteria for a healthier home
- Can be wet cleaned by professionals
- Custom dyeing available to match any colour
- Low tog rating—ideal for underfloor heating

## Cashmere

Spun from the ultra-fine undercoat of cashmere goats, the cashmere yarn that Jacaranda uses in Kashmir and Kochi delivers a tactile experience softer and more indulgent than even the finest wool.

### Benefits:

- Exceptionally soft, fine fibres for unparalleled comfort underfoot
- Naturally warm and insulating while remaining breathable
- Smooth, luxurious handle with a subtle, elegant lustre
- Blended with wool for enhanced strength and longevity
