

The Lighting Bible®

FIFTEEN

 DELTALIGHT®

Welcome to our world.

Let's journey into the world of Delta Light with the Lighting Bible 15 Lookbook. Get inspired by new product families, innovative integrations and technical advancements.

This lookbook is a testament to our craft, where light and creativity collide. It will give you a deeper understanding of our architectural lighting solutions, as well as access to summarized technical information.

Nime.

BY DELTA LIGHT & DEAN SKIRA

Invisible. Yet tangible.

The black hole reflects no light, but the light of Nime finds its way out.

The tangible part disappears inside its heart, and the intangible part illuminates the object.
An hole of mere 10mm, a whole lot of options.

Light is important, influencing the passer-by in many ways. It impacts the inner mood, the physical health, the mental state of mind. We care for that, we study this impact and we implement our findings into our luminaires. Soft Dim technology to set the mood, state-of-the-art LEDs that help to focus during the day and relax in the evening or careful positioning of the LEDs within the design of our luminaires to enhance the human visual comfort are some examples that show we care.

Visual comfort

Size matters*

Mini Deep Ringgo.

Although we like to stand out, we like to fit in just as much.

Fit in the concept, fit in the lighting design, fit in the architecture. Our miniature lighting fixtures do just that. They are designed to perform and designed to fit in. Unnoted to the eye and seamlessly integrated into any ceiling.

One for all

Obin.

Obin. Based on the patented ERS (Ex-Centriq Rotation System) and equipped with flat lenses, Obin fuses ultimate flexibility with supreme user comfort in a minimalistic surface mounted lighting fixture.

By adjusting the rounded backside - using the ERS system - Obin is 360° rotatable and 45° tiltable without the need of an additional hinge. On the frontside, the sleek lenses create a sense of depth without the need of real physical space. Combining both results in free space on the inside to house a DALI power supply, perfect for an easy individual controllable surface mounted lighting scheme.

Boxy.

We love a challenge and we don't step away from them. Reinventing our evergreens is one of those. Take Boxy, once a single surface mounted cube for halogen lamps, now an elaborate family of cylindrical and cubic shaped fixtures that even fit on our magnetic profile range. We strive to be one step ahead and build on what you love.

we keep renewing
our Evergreens
because we love
them as much as
you do.

▲AIR

Air is a powerful combination of architectural lighting and ventilation. Thanks to the intelligent integration of ventilation into lighting fixtures, ventilation openings in the ceiling are no longer necessary. This offers a lot of new possibilities for architects and interior architects

**Less does
more**

!

~~Soft ceiling~~

**Make the
~~visible~~
invisible.**

The Soft Ceiling© concept offers numerous possibilities for the integration of architectural lighting. It enables architects and designers to work with a variety of lighting applications, light beams and power levels, with unobtrusive and non-glare luminaires for a ceiling with a clear sight-line. The large number of options with Trimless Suspension and Connection sets makes it possible to work with a Soft Ceiling© fixture throughout the project and meet the different needs of each room, without ruining the look of the ceiling.

Shape your wall into a piece of art. The layers of light generated by Band-Oh! provide a sense of depth onto the surface its being installed on. The light not only hits the wall for a V-shaped down-up light effect, it also creates a play of light on the fixture itself.

Wall - Ceiling

Let your creative vision soar as you transform your wall and ceiling into a work of art with the Mikaline wall and ceiling models. These models can effortlessly stretch from one end of the ceiling to another, span across walls, or even transition from wall to ceiling, creating a seamless fusion of multiple planes within the same space. The possibilities are endless with Mikaline and its connection sets.

Pendant

The Mikaline pendant models have the flexibility to be oriented horizontally or vertically, giving you the freedom to create unique hanging lighting solutions. The pendant models can also be attached to the wall at one end, forming a seamless connection between planes. Play with lines of light and let your imagination take flight with Mikaline.

As a set of tools, Mikaline let's you paint lines of light without limits, with the room as a blank canvas and the wall, floor or ceiling as a starting point, you can go any direction you want. Create frameworks that light up the room completely, opt for a cosy setting with only indirect light towards the wall or go for a pure linear pattern with dedicated task lighting, possibilities are endless and customizable to individual preferences.

Mikaline

Like brush
strokes on a
blank canvas

The base of this family is a combination of Delta Light's Melanopic Light Technology (MLT) with high efficient louvre optics.

Superloop Slim further explores the boundaries of circular general light, as it offers three different ways of diffusing light around a room. Within its small size, Superloop Slim hides away a specially designed current controlled LEDflex, covered by a sandblasted diffuser to evenly spread the light. The diffuser is either installed on the inside of the circle, on the outside or facing downwards, providing various looks and displaying a different take on a circle of light.

reddot design award

Superloop
Slim

The Superloop SBL has the ability to diffuse light all around. It represents a universal symbol with extensive options, rolled out of 1 aluminium profile and seamlessly welded together into an oval shape. It is both functional and a real eye-catcher. The specially designed current controlled LEDflex inside Superloop SBL allows it to be dimmed in various ways. Diameters up to 1700mm and finishes in different colours let you create the setting you want.

Built in first instance as a family of exterior products,
Oono is a family of dualities.
It combines elegant looks with a warm diffused light effect.
It couples the sturdy look of metal with the pureness of glass.
It unifies exterior and interior, as the range offers IP-rated solutions for outdoor with straightforward surface mounted and pendant luminaires for indoors.
It unites a play of straight lines with perfect circular shapes.
It merges black and white, by adding a touch of gold.
It brings together the shimmer of dusk with the fresh start of dawn.

The range of Femtoline profiles is very extensive, with each family member having its own specific design and application area. Small or wider profile design, down or down-up lighting, wall, ceiling or floor mounted, flush or tilted plexi, ... the Femtoline family offers a solution to any lighting problem. As diverse applications ask for diverse optics, Femtoline 35F HE comes in 3 different optical finishes: sandblasted for general lighting, prismatic for task lighting and our LGC (Low Glare Control) extrusion that avoids direct interaction between LED and the human eye when looking at it from aside.

Femtoline

Diverse applications ask for diverse optics

PR - prismatic

SBL - sandblasted

**Make your
own path**

Narrow and wide streets draw black lines through space and literally form a 'lighting path' that dialogues with the architecture of the surroundings. The Splitline profiles can be interpreted in very varied ways, depending on what the space needs, both functionally and in terms of design. Flexible led modules for accent lighting, LED lines for general light, or high-power led modules for an extra-powerful solution.

Magnetic corners

Think of a lighting solution that is not only flexible but also creative. Imagine having the ability to install and re-install luminaires into the profile, while also using the profile itself to draw unique sets of black lines into the ceiling. With multiple curves, corners, T- and X-sections available, the possibilities are endless. You have the freedom to create a structure that matches your vision. And the best part? You can combine corners to make your creation even more unique.

With the elaborate D-Liner family, Delta Light offers a range of linear and spotlight solutions to create any desired light setting for SAPP ceilings by Interlu or HeartFelt ceilings by Hunter-Douglas. Both ceiling systems build on modularity and allow for a linear lighting solution in between or in line with the panels.

Logic Linear

Based on the same principles as Logic 190 R, Logic Linear offers additional options in linear uplighting. As an individual projector or installed in a continuous line, these fittings are perfect to install around facades or other architectural elements. With its wallgrazing optics, Logic Linear easily lights up structured vertical surfaces to enhance the sense of depth of the structure and make them more lively.

As a range of full IP65 wall fixtures, Nocta is the example that form and function can be merged into one. Build around 4 types of optics, Nocta is available in a cylindrical or cubical design, both with a down or down-up light emission. The cubical version also has a wider brother with double light beams, a way to add a more decorative touch onto the wall.
