BEST COMMERCIAL FIT OUT

Bringing warmth and functionality to this commercial space through use of timber table tops, bar tops and window benches, along with glass and bottle storage for the busy service space.

Client Brief:

We require hard wearing functional storage for our busy bar service area, along with restaurant tables and bench tops using recycled Rimu we wish to supply.

Key Features:

- ◆ Attractive strip lighting for the busy service area
- ◆ Recycled Rimu table tops & window bench
- ◆ Staggered end jointed timber to form the full length timber bar
- ◆ Large open display shelving for glass and bottle storage

Challenges:

- ◆ The installation of a 4m bar with an on-site mitred corner joint.
- ◆ Fitting around existing building interior structures.
- ◆ Recycled Rimu supplied by the client provides an unknown factor. This means running a metal detector past all the timber prior to machining to prevent tool damage.
- ◆ Ultra hard OBCE 2 pack clear polyurethane system with a hint of stain injection to lift the timbers character and preserve the colour.
