Masson For Light produces Australian-made, serviceable architectural lighting.

Our downlights, spotlights, wall lights and pendants are produced with high quality locally-sourced steel and aluminium for our product construction.

These products are supported by technical and electronic components from internationally recognised producers, with local supply chains proudly supporting the Australian business community.

With over 90 years experience, our team is well-equipped and ready to take on your new residential or commercial project.

Masson For Light uses only high quality technical and electronic components from our unique supply chains, with varying warranties from three to ten years

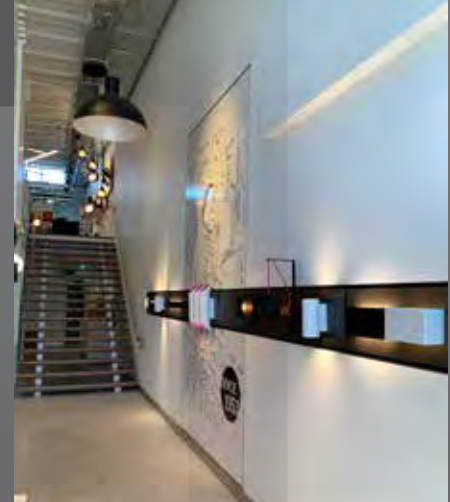

SHOWROOM

RICHMOND, VIC

Our team of Lighting Designers, Sales Staff, Engineers and Craftsmen, work closely on projects with award-winning Architects and Interior Designers.

Our Australian-made architectural range offers flexible specification selection. We can custom manufacture to a large range of project requirements.

We offer a range of serviceable LED solutions across our range. We can provide a comprehensive and seamless lighting solution for each project.

For many years the Masson Tullyspot has been the original Architect's go to spotlight of choice. The range has expanded enormously over the past few years. Discrete, compact and with many options available. Made to order in our Melbourne factory to standard specifications, or custom made to suit your project requirements utilising the latest COB LED technology, available in Dali or Casambi control system options.

BROADCAST PENDANT: collaborate, adapt, integrate

ARCHITECT
Foolscap Studios

PHOTOGRAPHY
Jack Lovell

Masson For Light played a key role in translating the concept design brief into a tangible product. The modular light fixture, based on the Broadcast pendant, was customized in terms of color, length, and mounting style to suit the specific requirements of the project.

ARCHITECT
Foolscap Studios

PHOTOGRAPHY
Jack Lovell

These fixtures were then integrated into the overall design of the flexible workspace, adding a personalized touch to each fabricated structure.

The adaptability of the design concept allowed for different versions to be implemented in various zones within the project.

FACTORY
Epping, Victoria

Our purpose-built factory allows Masson to custom manufacture up to 95% of our downlights, spotlights, wall lights and pendants.

We're also proud to support our local supply chains by using locally-sourced materials and electrical components.

Masson For Light factory precision assembly processes include.

Powder coating line, sheet metal fabrication, CNC bending, Welding, CNC laser cutting, metal lathes, hydraulic press, design and manufacture service.

All Masson For Light products are supplied in a textured powder coated finish for durability and high quality finish.
