## COMPANY PROFILE

New Material For Large Space Decoration

Established in 1992, Newpearl Ceramic Group is headquartered in Foshan, Guangdong Province, a city known for its ceramic products. It is an enterprise with a diverse range of businesses and is specializing in the R&D, manufacture and sales of building ceramics.

Newpearl Contemporary Ceramic Research and Design Institute

SBF Tower

Strong Group Headquarter Building

As a new material for large space decoration, NEWPEARL MARBLE SLAB is the core product of Newpearl's strategic business. It represents the style of grand decoration and symbolizes the glamour and taste of success.

We not only sell the tile products of MARBLE SLAB series, but also provide systematic decoration solutions. At the same time, we actively explore household and engineering channels including cabinets, countertops and wardrobes. NEWPEARL MARBLE SLAB is widely used in different space and well-received in the high-end market. The slabs have been installed in the SBF Tower (designed by Prizker Prize winners Hans Hollein & Christoph Monschein), Strong Group Headquarter Building and other landmark buildings.

## ENVIRONMENTAL FACTORY

### INTELLIGENT MANUFACTURING

In 2017, Newpearl invested 300 million yuan to build a fully automatic green intelligent production line, and continuously promoted the innovation of building materials and technology. This new production line supports the R&D and production of the MARBLE SLAB.

With its capabilities to develop, mass produce and deep process the large slabs (3.2m\*1.6m), Newpearl has been leading the industry. In September 2018, it was approved to establish the China Ceramics Industry Research Center.

In 2019, the MARBLE SLAB launched new products of different specifications and sizes, bringing more possibilities for household applications!

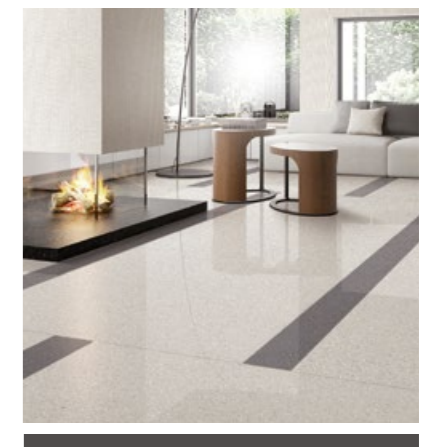

## INNOVATION DESIGN

The MARBLE SLAB can not only be applied on background walls, interior walls and floors, but can be widely used to build curtain walls, cabinets, wardrobes, table tops and bathrooms. They can also be used to create continuous patterns and parallel patterns, which makes the space look bigger and grander.

N E W P E A R L

## ART INNOVATION DESIGN

As a “new material for modern household decoration”, the MARBLE SLAB ushers in a customized era featuring “interdisciplinary design”: the specifications and thickness can be customized; slab colors cover internationally popular colors; the textures include whole body, continuous pattern, original stone, sandstone. Other categories that can be customized through a new intelligent production line include bright surface, matte, soft light surface, satin surface, natural surface, whole body, moulding and fine carving. The mixture of different specifications, colours, textures, and technology stimulates the visual nerve, so that the designer's creative work can satisfy the individual needs of the user.

## ▶ PRODUCT ADVANTAGE

**Magnificent**  
shocking effect

**Fluent**  
Continuous pattern

**Changeable**  
Arbitrary size

**Quality**  
Patented technology

## ▶ PERFORMANCE ADVANTAGE

Abrasion resistant  
Anti-skid  
Acid and alkali resistant, corrosion resistant  
Strong antifouling  
Impact resistant  
Fireproof and high temperature resistant

## ▶ PRODUCT SPECIFICATION
