WEIGHT

422KG

Innovative Design

The Nu-a Infrared Sauna sets a new standard for modern, elegant sauna design. Thick laminated glass panels replace timber on the upper third of the side panels and the on the front corners, giving the sauna an overall lighter, airier, more open appearance.

Take Control Wherever You Are

Wherever you are, you can turn on your sauna, set the temperature, duration, colour therapy and what you want to listen to, all from the palm of your hand.

Sentiotec Heaters

The Nu-a features industry-leading, full-spectrum infra-red heaters made by Sentiotec of Austria. These heaters emit: 24% near infrared, 55% mid infrared and 21% far infrared. The heaters have resistant glass ceramic covers and over-temperature protection.
