

Shaker-style home
in Randwick

This new build was fully renovated in a Shaker style, which also included a classical twist with brass detailing. Custom joinery was created in this style for the entirety of the home. The fully integrated appliances and two colours of joinery used in the kitchen accentuated the beautiful marble benchtops and splashback. Invisible handle pulls were custom made for the upper cabinetry in the kitchen. The butler's pantry and laundry room were continued with the same style and accents to provide the feeling of cohesion and greater space. Additional unique features to highlight are the curved vanity units made for the bathrooms, as well as the curved daybed and entertainment units.
