The Group

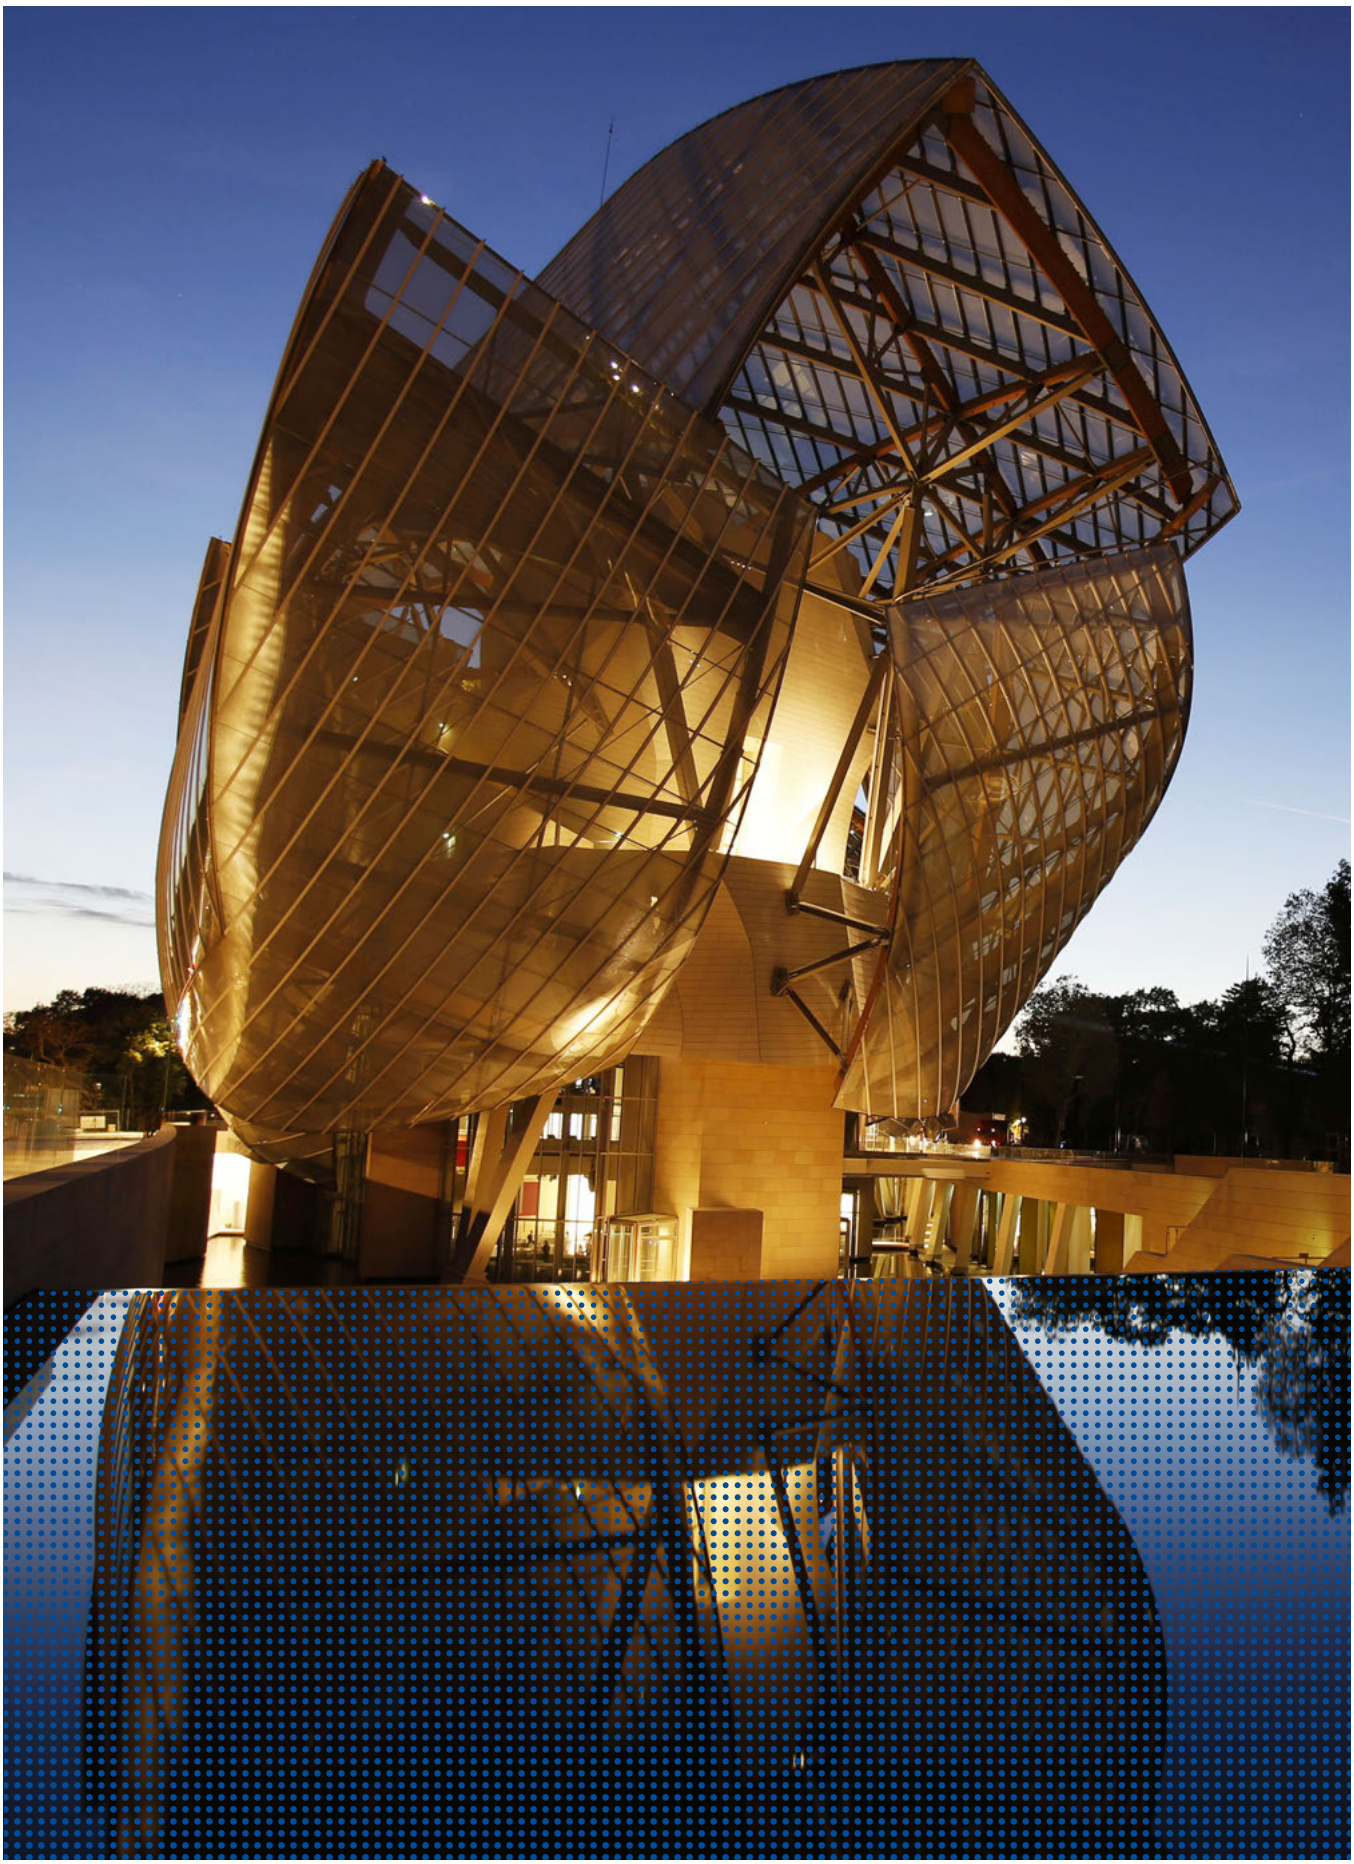
3F Filippi and Targetti, two companies that have shaped the history of lighting in Italy are now a cohesive Group acting as sole partner for lighting professionals and designers looking for quality solutions.

With extensive experience and the combination of their respective expertise in technical and architectural lighting the two brands together provide a complete portfolio of products that proudly bringMade in Italy to more than 60 countries worldwide.
Today the 3F Filippi-Targetti Group can meet and satisfy any kind of design and project requirements. Our partners can choose from a huge selection of products and solutions; from high-tech and functional products from the 3F Filippi catalogue to indoor and outdoor architectural lighting fixtures designed by Targetti, right up to a wide range of LED lamps and fixtures from the Duralamp brand.

We are Targetti

We started in Florence in 1928 and since then we have been designing and creating architectural light fixtures that we export all over the world. Our approach to “light” is profoundly influenced by the links we have with our city.

The unique architectural artistic heritage that surrounds us deeply inspires our ideas, tastes, and creativity and makes us aware of the skills and respect necessary to light architecture.



Us and light

To us light is technical refinement and scientific precision as well as feelings, atmosphere and the possibility to adorn space with emotions and to positively influence the well-being of mankind.

Dialogue is at the heart of our work

Working with light implies a multidisciplinary approach and dialogue between the various players for a common goal: the best results for every project.

We provide our customers with the experience and skills we have acquired in almost a century of working in the industry. We do this through dialogue and support at every stage of the journey, paving the way to sharing and listening while respecting reciprocal roles.

The ideas behind our products

Handcrafted care, attention to details, intuition and an accurate search for the best technical solutions are the factors that make our products recognisable expressions of Made in Italy.

Every one of our fixtures is the result of our desire to equip lighting designers with tools that are able to give shape to their ideas. Every stage of product development from concept design to scale production takes place in our plants. The ability to interpret light intelligently is the expression of Targetti style.

Worldwide

We are an international team with identity, culture and different skills united by a common language: light.

Competence

The creative process at Targetti is the result of team work composed of different skills: optics, thermodynamics, mechanics, electronics and design.

Our R&D department has highly specialised divisions and teams. Our internal testing laboratory, certified by third-party bodies, carries out photometric, electric, thermal and mechanical measurements to ensure product quality and lasting reliability.
Our Optic Division carries out advanced studies on optical systems to achieve the perfect synthesis between quantity and quality of light; between beam perfection and performance.

The results of our creative process has led to the filing of 27 patents.

Optic division

We design and create our optics starting from the effect we want to obtain and we design them around the source chosen for our fixtures. For this reason we are able to optimise the performance of the source and obtain effects of absolute precision. Everything is studied right down to the smallest detail.

It could appear that museums and shops need the same type of focused lighting but technically this is not the case.
Exhibitions spaces favour perfect, clean beams without any blurred edges and precise light directed at the works on display, with moderate luminance values of projects based on luminance contrast. Retail space on the other hand requires high luminance values and lighting effects with softer gradient tones to attract people's attention without creating sharp boundaries.

The Targetti Optic Division continuously develops optical systems that are able to favour the performance or precision of the effect according to actual needs. The quality of the lighting effect, available in different gradient tones is an essential feature of every one of our optical systems.

Indirect optics

Millimetre beam precision
for evocative effects

Makes it possible to obtain an extremely narrow light beam (up to 6°) that is precise and well defined even at great distances. It uses the principle of lighting technology where a parabolic reflector is lit by a light source that is turned backwards and completely hidden from view. The reflected light is highly collimated and creates a focused and defined effect with no falloff - a normal result of uncontrolled light – for maximum visual comfort.
Given its sophisticated shape this optic is only available in a Narrow Spot version.

Optics with lens

Sophisticated geometries
for precise beams

These are most commonly used in museums because they make it possible to obtain precise and defined beams that frame works of art without “interfering with” the background. They are available from Narrow Spot right up to Flood openings. Unlike reflector optics lenticular optics control the light produced by the source and direct it inside the beam. The high quality materials used and sophisticated geometries ensure precision and high performance.

Hybrid optics

The ideal compromise between beam efficiency and definition

The light emission of these type of optics is the result of the combined use of reflectors and lenses. The reflector controls peripheral light while one or more lenses manage the central part of the beam which is usually uncontrolled. Cancelling “spurious” light is combined with flow recovery and an increase in intensity inside the beam. These optics are available for Spot and Flood emissions.

Reflector optics

Precise and enveloping light

These optics ensure excellent performance and are available with all beam openings (spot, flood, medium wide flood and wide flood). They allow for excellent light mixing with broad, soft tones between light and shade. They are particularly suitable when a homogeneous balance between luminance and a more neutral and less dramatic effect is required. The reflective aluminium or metallised polycarbonate they are made of ensure high optical efficiency.

Wall washer optics

Uniform light and contemporary atmosphere

These optics allow for completely uniform effects even on large wall surfaces. What makes them unique is the ability to direct the light right to the top of the surface and to its full height. The distance between different fixtures will provide uniformity along the entire length of the wall. This type of effect is ideal where uniformity is required in the entire space or where particular emphasis on a large work of art displayed on a wall is needed.The contrast with the rest of the space will emphasize the dramatic effect.

Grazing optics

Grazing lighting is a kind of light used to enhance vertical surfaces in a uniform way

The effect has a gradient tone that moves away from the source softly and is used for linear fixtures. Fixtures with this type of optic must be positioned near to the surface to be illuminated because the photometric solid is in reality a blade with maximum intensity at the emission point which then fades as it moves out. In the Targetti collection the Grazing optic was created thanks to an intuition by our optical department which studied a simple yet highly effective solution: a cylindrical lens positioned above the LED source along the entire length of the fixture. The result is a soft continuous light effect that “attaches” to the wall near the fixture without any unpleasant scorching and able to reach long distances thanks to its high performance.

DBS

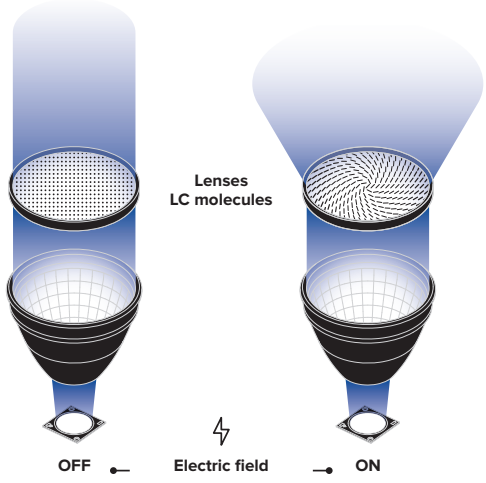
Uniform light and contemporary atmosphere

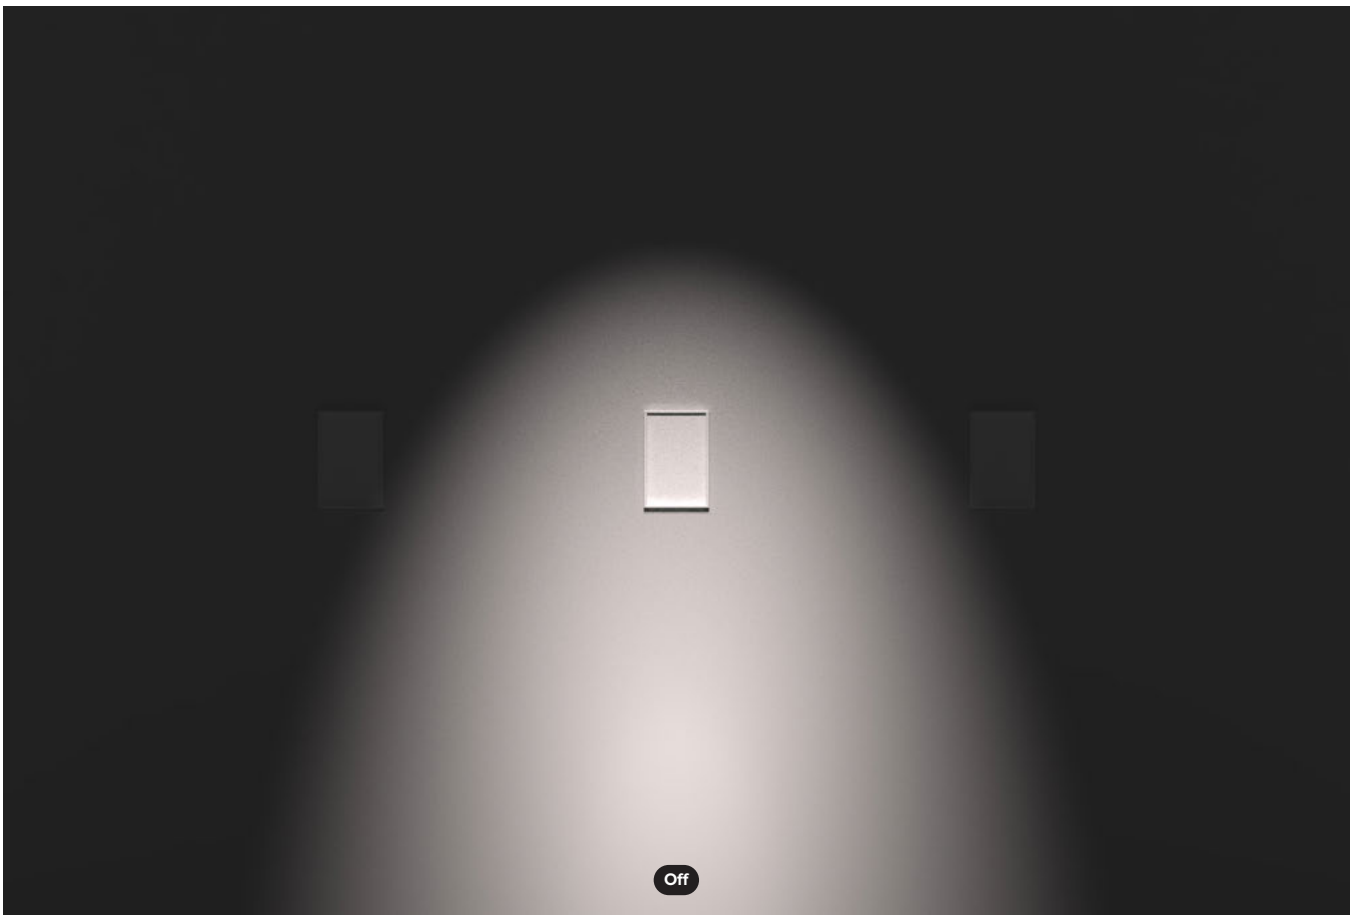
Dynamic Beam Shaper (DBS) optical technology was created from the desire to give designers a sophisticated yet simple to use tool. Technology that we were the first to develop in the lighting sector together with Lens Vector – a leading American company in lens design - that makes it possible to vary the beam opening of fixtures via digital input without any mechanical system. With DBS we combined LED sources, collimated optics and lenses equipped with liquid crystal molecules that can be activated and oriented using an electric field thus creating a light diffusion process.

Liquid crystal materials are widely used in projectors and LC (LCD) displays. They are elongated molecules that are naturally aligned in the same direction. The DBS lens is composed of two glass substrates separated by spacers that are sealed to contain the liquid crystal materials in a kind of "sandwich". When an electric field is applied to the lens the molecules change direction and refocus the light that passes through the lens. Managing the electric field and the direction of the molecules it is possible to shape the light beam.

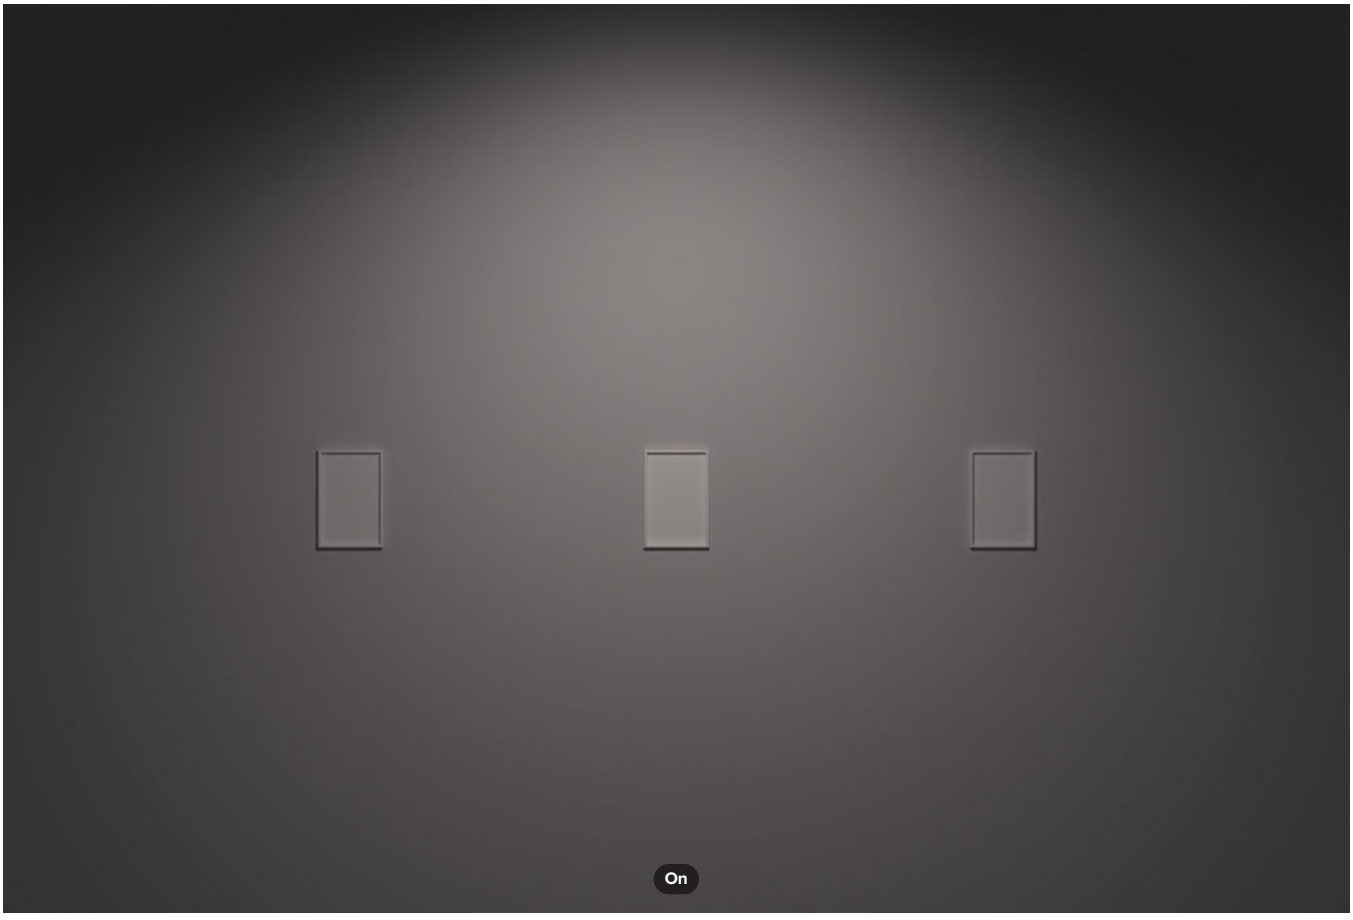
Dynamic Beam Shaper provides beam control from SP to WFL, allowing designers to create scenes and manage lighting in different environments using Targetti Control by Casambi, without the use of mechanical systems, scales or replacement optics.

Using the Casambi app, available for IOS and Android, it is possible to dim the sources, set the desired beam opening and create dynamic scenes.
The same fixture controlled from any smart device provides infinite possibilities.





Off



On

TARGETTI

Today DBS technology is available for a wide range of products including for the OZ system, the smallest fixture in the collection to have a miniaturised optical system with dynamic beam shaping:

Quality

The quality of a fixture is provided in part by objectively measurable and immediately comparable values such as performance or the type of luminous effect, as well as the result of choosing technical solutions that ensure safety and reliability over time.

The mechanical solutions we use are able to ensure the characteristics of our products remain unchanged over time and to make installation easier, especially outdoors.

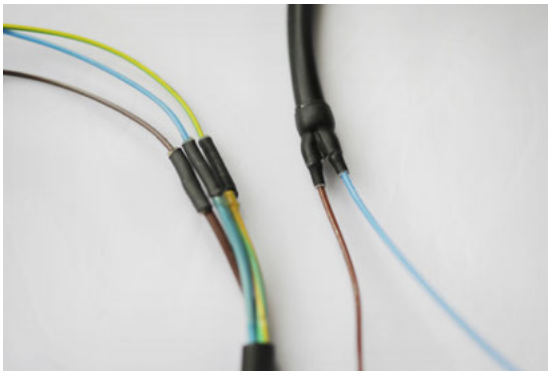
TARGETTI

Waterblock

Waterblock solutions for outdoor products

To limit the risk of compromising watertight integrity we have created the Waterblock system. The system does not include the use of accessory elements it is rather a solution used in the production phase that by acting on the input power cable makes it possible to prevent water and humidity from reaching the inside of products.

When it comes to outdoor fixtures, above all inground ones a high IP rating is often not enough to provide a moisture barrier. In addition to the mechanical characteristics of fixtures external factors come into play like the state of the terrain or the installation method. If a connector is not well tightened or connections are not carried out to perfection humidity can reach the driver or the fixture through capillary action and irreversibly impair function.
To limit this risk we have designed an Waterblock system differentiated according to the type of product.



Waterblock Smart

This is a procedure applied during the assembly of products: the power cable is cut, unsheathed and re-welded and the ends are sealed using a special thermo-retractable adhesive sheath. The part of the cable fitted with the thermo-retractable sheath is then immersed into a special resin sleeve used for outdoor products.

This type of treatment is carried out on all products in the outdoor collection.

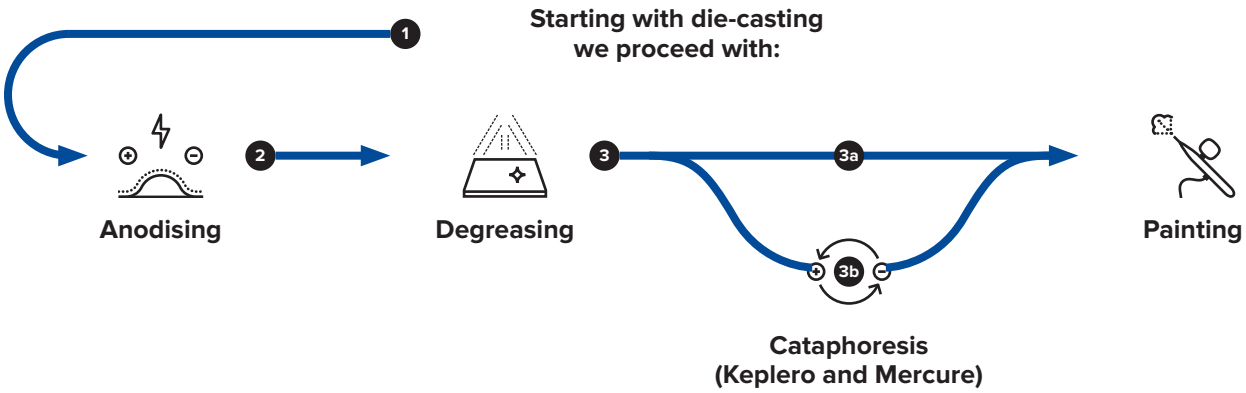
Waterblock Plus

In addition to resin coating the cable, the Waterblock Plus solution also involves completely resin coating the integrated driver. This prevents humidity from reaching the body of the fixture and impairing function.

Fixtures that use the Waterblock Plus systems are KEPLERO, MR.BO, FEBO EVO and STILO.

Treatments and resistance tests

We develop solutions that allow our products, especially recessed ones, to last even when they are installed in unfavourable conditions.



High resistance to corrosion is an essential characteristic of outdoor professional fixtures. Close proximity to the sea or exposure to corrosive agents highly increases the corrosion of materials in a significant way. All our die-cast fixtures are subjected to a series of treatments that improve resistance to corrosion.

Sample products are then tested using a "salt spray test" in a special chamber where salt spray is vapourised (5% NaCl) at a temperature of 35° C. This way the materials undergo the same (possible) changes they would if they were exposed to air for a long time. The test makes it possible to check the resistance of the materials to corrosion over time.

These treatments and tests allow us to be sure to provide quality and long-lasting products.

Cataphoresis

We wanted to increase the resistance of die-cast recessed fixtures to corrosion further to make them suitable for installation in saline environment or in the presence of corrosive agents and up to 5 m from the sea. After anodising products undergo cataphoresis painting, one of the most ecological industrial painting systems. This treatment ensures elevated protection against chemical and environmental agents for a long time.

The procedure consists of emerging pieces which are connected to a negative pole with an electrical generator in a bath where some electrodes are connected to a positive pole. The electrical field and the electrochemical phenomena which result cause the deposition of at least µm25 of epoxy resin on the pieces which are then polymerised in an oven. Subsequently the treatment proceeds with finishing paint.

The product ranges that undergo Cataphoresis treatment are **KEPLERO** and **MERCURE**.

It is possible for other outdoor non-recessed products with die-cast components that need to be installed near to the sea to undergo cataphoresis treatment on request.

Digital

We have made designing and controlling light simple and within everyone’s reach so as to allow large-scale application of its incredible benefits. We did this by combining it with digital technology, not only to control it but also to change its shape in an extremely natural way.

How we control our fixtures

DALI
Fixtures are equipped with a driver that allows them to be connected to a BUS DALI global plant management system.

TARGETTI CONTROL
Fixtures are controlled via wireless or Bluetooth from a smartphone or a tablet without the need for any other hardware.

Dimm on board
Fixtures are dimmed using a switch inside the fixtures.

DMX
RGB and RGBW fixtures are controlled using a DMX protocol. Software and touch screen interfaces are available to manage and create static and dynamic lighting scenes.

Control systems

LMS Casambi

When we were the first in the lighting industry to choose Casambi as a partner to control light our aim was to have a simple, intuitive language within everyone's reach. As a result Targetti Control by Casambi was created to make it possible to control light via Bluetooth Low Energy without the use of any special cables.

This wireless technology is compatible with all modern smart devices: smartphones, tablets and even smartwatches. Targetti fixtures are equipped with a special interface that allows them to communicate with each other to create a remotely controllable "smart" network.

The advantages are manifold, first of all the possibility for users to interact with lighting – varying intensity, tone and shape in complete freedom and autonomy according to their needs – secondly the design approach known as Human Centric Lighting that places people at the centre of lighting projects.

Another advantage is the possibility to create different scenes according to the fruition needs of the space and energy saving.
Think of conference rooms, shops, offices and churches.

The Targetti Control application is designed that anyone can use it in an intuitive way regardless of their technical skills.

Once the fixture networks and desired scenes have been created it is possible to recall them using simple wireless buttons and wall switches as well as by using the app.
The technology is easy to implement depending on the complexity of the system and can be applied and adapted to even the most complex ones.

Transparency

Transparency in communicating data is an important commitment for us. In our certified internal laboratory we carry out measurements on our fixtures and we share the results transparently. This way we provide lighting designers with absolutely real and reliable values on performance in actual operating conditions.

All of our fixtures have identity cards showing their technical features and performance. Once products have been configured on the targetti.com website it is possible to download their data sheets that are now accompanied by new information such as:

A **Lifetime**

B **Tm30 with values expressed in R_f and R_g**

SORGENTE

LED emitter alta efficienza Ra90.
Classe di efficienza energetica: F
Potenza nominale: 5,2W
Flusso nominale: 451lm
Indice resa cromatica: 90
Rf: 87,6
Rg: 103,9
CCT nominale: 2700K
SDCM: 2
Durata utile (L80/B10): >60000h tq +25°C

CARATTERISTICHE ILLUMINOTECNICHE

Ottica ELT. Riflettore in policarbonato metallizzato, filtro olografico e frame in policarbonato nero. L'apparecchio è idoneo per l'installazione in ambienti di lavoro UGR<22/13 (EN12464-1).
Ottica: RIFLETTORE
Apertura di fascio: ELT
Rendimento ottico: 71%
Flusso apparecchio: 320lm
Efficienza luminosa: 62lm/W
Sicurezza fotobiologica: Conforme al gruppo di rischio basso RG1

CARATTERISTICHE MECCANICHE

Corpo in pressofusione di alluminio anodizzato nero. Versione Small 3X.
Dimensioni: AxB=80x30mm
Peso: 0,13Kg
Versione: 3X
Grado di protezione: IP20

CARATTERISTICHE ELETTRICHE

Da completare con driver elettronico o DALI accessorio.
Potenza apparecchio: 5W
Alimentazione: 600mA
Classe di isolamento: CLASSE 3
Driver incluso: NO
Temperatura ambiente: 0°C / +25°C

INSTALLAZIONE

Sistema di installazione trimless idoneo per pannelli in cartongesso di 13, 15 e 17mm.

NOTE

Sistema di controllo Casambi disponibile tramite accessorio (solo per prodotti con driver DALI). I valori relativi alla potenza dell'apparecchio non tengono conto dell'assorbimento del driver accessorio. Tale valore dipende dalla scelta del driver. Disponibile su richiesta in versione 110-277Vac.

GARANZIA

5 anni.

AVVERTENZE

Apparecchio progettato per essere smaltito/riciclato a fine vita. Sorgente luminosa (solo LED) sostituibile da un professionista.

A motivo dell'evoluzione tecnologica dei componenti elettronici i dati indicati sono soggetti ad aggiornamento e quindi deve essere richiesta conferma in fase d'ordine. Flusso luminoso e potenza elettrica presentano tolleranze di +/-10% rispetto al valore indicato. tq +25°C (CIE 121).

Si riserva la facoltà di apportare modifiche tecniche.

TARGETTI

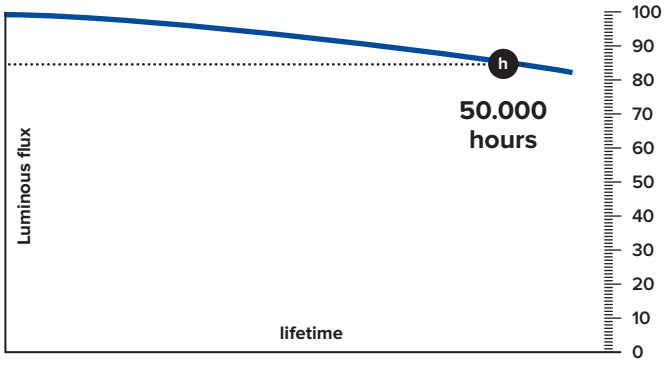
Duration of LED sources

Unlike other light sources LED have a slow decrease in the flux emitted until they run out in a more or less long period based on two main factors:

- **The quality of the LED source**
- **Operating temperature of the source inside the fixture**



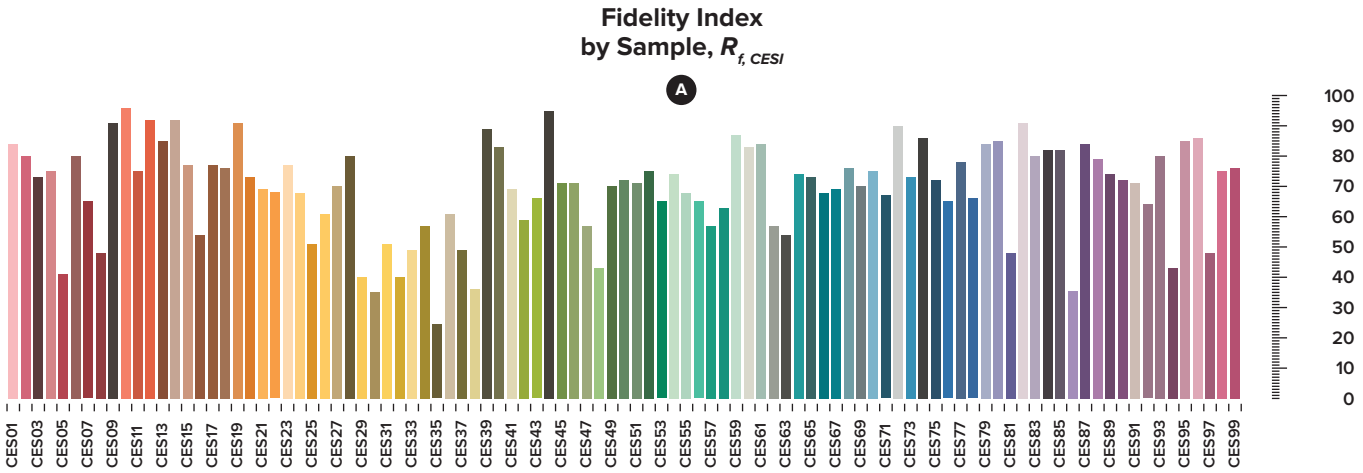
Targetti has always chosen the best sources on the market and works continuously to look for technical solutions aimed at optimising the "thermal management" of fixtures so that heat can dissipate in the correct way.
The life of LED sources is defined using the parameter "L" that indicates the flux decrease percentage referred to in operating hours (normally 50,000 hours), to which a "B" value is added usually between 10 and 50 which is an important indicator about the quality of the source because it indicates the percentage of LED sources that upon reaching the indicated hours do not maintain the declared characteristics of luminous flux. Having said that with the same number of hours the lower the B value the better the LED source.

All our LED sources guarantee the binomials L80/B10 for a lifespan of at least 50,000 hours (upon reaching 50,000 hours the luminous emission is ≥80% for 90% of LED sources. For the majority of Targetti products (60%) the binomial L80/B10 is guaranteed for a lifespan of between 50,000 to 80,000 and for 40% a duration of more than 100,000 hours is even guaranteed.

On product data sheets there is detailed analysis of the flux trend of fixtures over time. Referring to this analysis lighting designers and end customers have credible information about the reliability and the duration of lighting systems.

Nominal average useful life	**30,000 h Tq+25°C**	**50,000 h Tq+25°C**	**80,000 h Tq+25°C**	**100,000 h Tq+25°C**
	Example L93/B10	**Example L90/B10**	**Example L85/B10**	**Example L80/B10**
	At 30,000h 90% (B10) of the LEDs will have a residual luminous flux of at least 93% (L93) of the initial value with Tq=25°C.	At 50,000h 90% (B10) of the LEDs will have a residual luminous flux of at least 90% (L90) of the initial value with Tq=25°C.	At 80,000h 90% (B10) of the LEDs will have a residual luminous flux of at least 85% (L85) of the initial value with Tq=25°C.	At 100,000h 90% (B10) of the LEDs will have a residual luminous flux of at least 80% (L80) of the initial value with Tq=25°C.

Colour rendering: Ra and TM30



All our fixtures have “identity cards” that express colour rendering using both Ra as well as TM30. Knowing the colour rendering of a source is fundamental in lighting design because it expresses the ability of a source to faithfully reproduce the colours of a lit object. Almost all our fixtures can be equipped with Ra>90 LED.

Ra is the most common parameter to identify the colour quality of a source and Ra is a dimensionless index that varies from 0 to 100 that uses 8 colour samples (unsaturated colours) to determine the average Ra value. In recent years, a new parameter has also been introduced defined as TM30, that allows for a more complete reading of the way a source is able to reproduce colour.

TM30 extends the colour samples to 99 divided into 7 reference areas between saturated and “natural” colours and uses a balanced mix between an incandescent source and sunlight as a sample source. It is identified using two different parameters: an Rf fidelity index (Fidelity) and a Rg (Gamut) index range.

The datasheets of all our fixtures clearly and precisely indicate the colour rendering of LED sources using Ra, Rf and Rg (TM30) values.

Rf (Fidelity)

The Fidelity index indicates colour fidelity. It varies on a scale from 0 to 100 where 100 is perfect adherence to the sample source. A source with a score of less than 60 is not suitable for indoor use while a score of over 90 is ideal because the colorimetric characteristics of the source are similar to daylight.

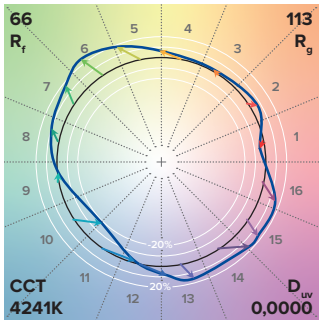
Rg (Gamut)

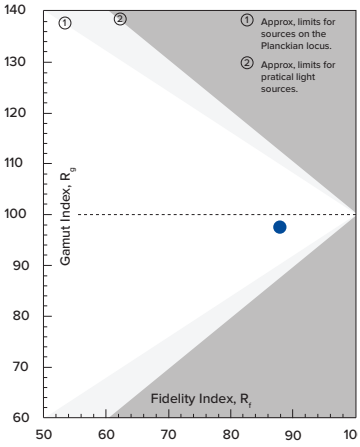
The gamut index introduces the concept of saturation by evaluating the intensity of colours under a certain light (width of the colour range).
It varies on a scale from 60 to 140 where a gamut score of 100 indicates that the light source does not change the hue and the colour saturation that are reproduced in the same way as the sample source.

R>100 indicates an increase in colour saturation therefore they appear more intense than they really are.

R<100 indicates a decrease in saturation.

The shift is saturation is represented by a vector graphic.
The black circle represents the sample light, while the red “circle” is the light being tested.
The areas that extend beyond the black circle indicate that the colours are more intense compared to the sample, however those that remain inside represent colours that appear desaturated.





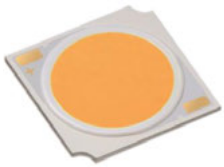
This colour shift graph makes it possible to read both parameters of TM30 in a single image.

Scouting

We choose the LED sources for our fixtures very carefully to ensure performance, long lifespan and excellent light quality. This does not mean only choosing one type of source for the entire collection but the ones that are considered the most suitable to equip particular fixtures or new optical systems while still maintaining the same shade of light for all our fixtures.

Galleria delle statue e delle Pitture degli Uffizi **Lighting Design** Massimo Iarussi **Photographer** Officine fotografiche
Florence, Italy

We choose the best LED sources on the market and we design our fixtures around the sources to enhance their performance.



LED
COB (chip on board)

This type provides maximum performance in terms of lumen, efficiency and density.
They are typically made of a matrix of small blue chips covered in phosphorous. The large number of chips used makes it possible to achieve excellent efficiency while maintaining low current in individual chips.

COLOUR TEMPERATURE
2700K • 3000K
3500K • 4000K

EFFICACY
Up to 170 lm/W

COLOUR RENDERING
Ra80 • Ra90 • Ra97

COLOUR CONSISTENCY
1,5 • 2 • 3 SDCM (Steps MacAdam)

LED
Mid power

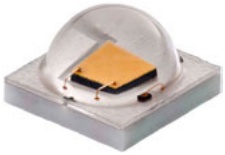
Characterised by high efficiency and low unit power (< 1W). This makes it possible to create large light sources. It is typically used in linear fixtures and in fixtures that have large emission areas of diffused light in order to obtain excellent performance while maintaining lower wattage.

COLOUR TEMPERATURE
2700K • 3000K
3500K • 4000K

EFFICACY
Up to 200 lm/W

COLOUR RENDERING
Ra80 • Ra90 • Ra97

COLOUR CONSISTENCY
3 SDCM (Steps MacAdam)



LED
Emitter

Characterised by a very small light emitting area and high unit power (2-9W), it is typically used to make fixtures with predefined light beams.

COLOUR TEMPERATURE
2700K • 3000K
3500K • 4000K

EFFICACY
Up to 150 lm/W

COLOUR RENDERING
Ra80 • Ra90

COLOUR CONSISTENCY
3 SDCM (Steps MacAdam)

Customization

We provide solutions that can give shape to the design ideas and lighting effects as imagined by our customers. Solutions can be from among the thousands of standards products in the catalogue but they can also need to be refined, customised and created.

Our origins are rooted in the tradition of Florentine craftsmanship. It is from here that we have inherited our Italian “know-how”, our natural ability to produce products tailor-made for projects.

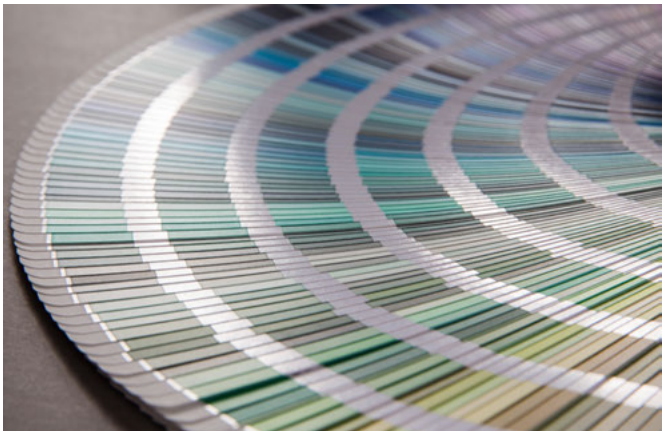
Inside our R&D department a special team develops custom products for large projects. It is team work with customers to create custom-made products for each project.

Colours

Some product ranges in the Indoor and Outdoor collection can have a customised finish upon specific request from lighting designers.
The finishes available can be selected from those in the Targetti Colours range and from more than 170 standard RAL colours.

The Targetti Colours Range
Colours is a colour palette specially designed for lighting designers featuring neutral tones in matt or brilliant finish that allows lighting fixtures to become furnishing elements to all effects with their own precise identity.

RAL Colours
It is possible to request products with a custom finish by choosing from 90 matt colours for the indoor collection and 80 textured colours for outdoor products.



Download the RAL colours palette from the website and choose the most suitable colour for your project

POWER SUPPLY
Electronic – DALI
Casambi control system available using a dedicated accessory (only for DALI version products).

MATERIAL
Powder coated, extruded, calendered aluminium.

ON DEMAND

Tunable White

110-277Vac power supply

A versatile fixture available in three different lengths, each with Low- Power and High-Power lumen and different finishes and installation types.

Two recessed versions available. One version is already equipped with a flange and does not need an outer casing for installation; the other must be completed with a special trimless outer casing or flange. Both outer casings also allow for semi-recessed installation.

It is available with diffused light, UGR<19 controlled light ideal for lighting workplaces (EN-12464 - L65<3000 cd/m^2), or wall-washer for lighting large vertical surfaces.

There are also versions available for ceiling, wall or suspension installation.

Emergency versions available on request after checking feasibility.

Montevideo, Uruguay

Architect Estudio Dovat Arquitectos
Lighting Design Estudio Hofstadter

Photographer Ferrés - Cánepa

Plus

Magnetic assembling
A magnet makes it possible to fix the light unit complete with a reflector to the housing, while the screen is attached with a simple “click”. No need to use tools. This particular fastening system means that the fixture can also be wall mounted.

Recessed version with or without a flange
The version without the flange allows for a trimless finish that totally disappears into the ceiling or for semi-recessed installations. Just accessorise the fixture with a special casing to be fitted flush into the ceiling.

Solutions available on request
Custom tailor made length modules and emergency modules.

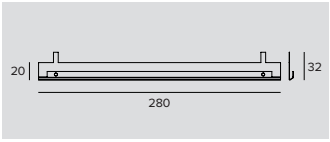
Outer casing for recessed and semi-recessed trimless installation.

Accessories

Screen



Code
1T6502

Accessory designed to improve the visual comfort of the Wall Washer version.
To be installed on a standard reflector.
Made of matte black painted aluminium.
280mm in length; to be ordered in the following quantities for every fixture length: 2 for the 562mm version, 4 for the 1122/1135/1146mm versions, 6 for the 1682/1695/1706mm versions and 12 for the 3364/3377/3386mm versions.

Control systems

Code
1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

Code
1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

Note

Check mounting instructions to verify the quantity of DALI drivers installed.

Ra90: to order this version it is necessary to add the suffix “90” at the end of the standard code (Ra80).

LOGICO

Accessories

Screen

	Code
	1T6502

Accessory designed to improve the visual comfort of the Wall Washer version.
To be installed on a standard reflector.
Made of matte black painted aluminium.
280mm in length; to be ordered in the following quantities for every fixture length: 2 for the 562mm version, 4 for the 1122/1135/1146mm versions, 6 for the 1682/1695/1706mm versions and 12 for the 3364/3377/3386mm versions.

Control systems

	Code
	1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

CCTEvo

Family

CCTEvo is a complete range of recessed LED fixtures. A wide range in terms of the breadth and depth of the product family with five different types of product on offer, each available in different sizes and luminous distributions. The CCTEvo range stands out for its design with pure and essential shapes for a coordinated and recognisable offer.

All fixtures are designed with a family feeling that is common to the latest additions to the Targetti collection- in particular for the series of Label track projectors – for aesthetic continuity and quality of light with recessed and track lighting solutions. CCTEvo is the evolution of CCTLED, the iconic, historic range of Targetti fixtures from whom it takes the baton and puts its legacy to good use. An evolution in terms of extending the range and performance that makes CCTEvo a complete suite of professional lighting tools available for our partners.

All fixtures in the CCTLED and Cloud range can still be ordered. The technical specifications and order codes can be found at **targetti.com**.

CCTEvo DOWNLIGHT

A range of recessed fixtures characterised by minimalist shapes, a depth of range, excellent performance and high efficiency. Available in five different sizes with a coordinated design and with different lumen packages, the CCTEvo Downlight range comes in a double version, trim (with a ring) or trimless, for complete integration into the architecture.

CCTEvo ARCHITECTURAL

A range of recessed projectors for professional lighting in the CCTEvo range. Real professional tools for projected light characterised by application flexibility, high performance and quality optical systems. Available in four different sizes with different lumen packages and four luminous emissions, CCTEvo Architectural comes in a double version, trim (with a ring) or trimless, for complete integration into the architecture.

Ra Ra80

A range of recessed fixtures characterised by minimalist shapes, a depth of range, excellent performance and high efficiency. Available in five different sizes with a coordinated design and with different lumen packages, the CCTEvo Downlight range comes in a double version, trim (with a ring) or trimless, for complete integration into the architecture.

The IP54 protection rating makes CCTEvo Downlight suitable for installation in humid environments for aesthetic continuity between indoor and outdoor spaces. The optical systems available are suitable for installation in work environments UGR<19 (EN12464-1) L65<1000 cd/m^2.

Sizes ø160mm and ø105mm are also available with Tunable White technology.

Ø58mm

A complete and coordinated range

Five sizes, four colour temperatures, four optical solutions and different lumen packages for all sizes.
All solutions are available in a trimless version and with a ring and have the same family feeling and colour consistency in terms of colour quality. A complete range particularly suitable for lighting work and retail environments where reliability, high efficiency and quality of light are fundamental requirements.

Tunable White Versions

Tunable White technology, available for sizes ø 160mm and ø 105mm, makes it possible to remotely modulate the colour temperature of the fixtures from 2700K to 5000K with continuity. The high quality of the COB selected for the Tunable White version of CCTEvo Downlight makes it possible to select and dynamically modulate colour temperature while still guaranteeing high standards in terms of light and colour quality.

Coordinated aesthetics for indoor and outdoor

The IP54 protection rating makes it possible to install CCTEvo even in humid environments while ensuring aesthetic consistency in lighting projects that involve indoor and outdoor spaces.

Integration, comfort and versatility

Developed to provide the best performance and maximum integration into the lighting environment, CCTEvo Downlight fixtures have different characteristics: in the smaller sizes - ø 78mm and ø 58mm – the black or white cover hides the source from sight for maximum visual comfort and total integration; in the larger sizes the reflector is mirrored to optimise the performance of the optical system.

*** On request it is possible to customise the ring by choosing from the many colour combinations in the Colours range and RAL colours available.**

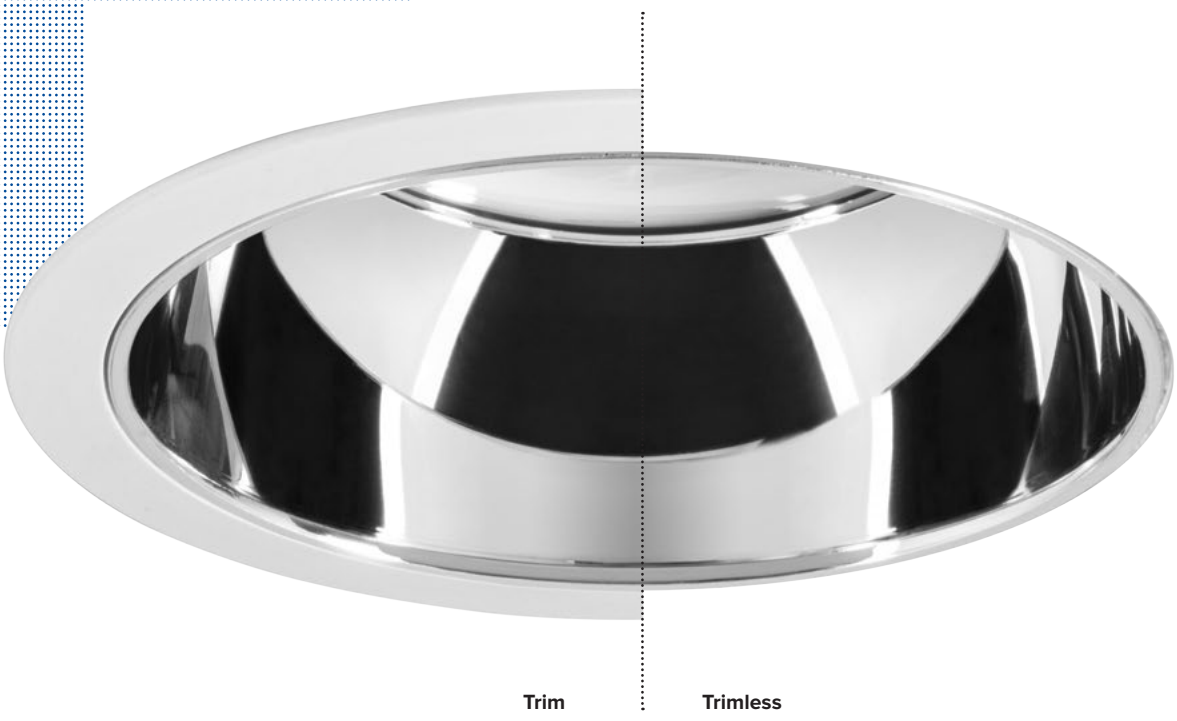
Plus

Trim and Trimless
CCTEvo Downlight is supplied equipped with a ring (for the trim version) or with a special element for trimless installation. Installation is quick and easy. Even in the trimless version the fixture remains perfectly inspectable even after installation.

Pure shapes
A simple, minimalist design with pure and essential shapes. In the trim version the ring integrated into the fixture has been made even thinner to allow for total integration into the environment.



Trim **Trimless**

Control systems

	Code
	1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

	Code
	1T5349DA8

Wireless control unit for DALI8 fixtures.
It generates a local DALI8 bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.

GENERAL INFO
Recessed LED downlight in a trim or trimless version.
Ø160mm Ø105mm Ø78mm

LED
High efficiency LED Chip on Board with Ra80-Ra90
From 1156lm to 4049lm
2700K – 3000K – 3500K - 4000K

PRODUCT EFFICACY
Up to 101lm/W

OPTICS
WW

POWER SUPPLY
Electronic – DALI
Casambi control system available using a dedicated accessory (only for DALI version products).

MATERIAL
Die-cast aluminium dissipator.
Black thermoplastic material structure and a black or white painted cut-off front.
Silicone seal to make it watertight and dust proof.

ON DEMAND

Easy Custom Colour

110-277Vac power supply

Ra80

A range of recessed fixtures for uniform lighting of large vertical surfaces. Equipped with an innovative wall washer optical system it provides very clean, wide and uniform beams with excellent light diffusion from very close to the floor. Available in three different sizes (ø160mm, ø105mm and ø78mm), in a trim (with a ring) and a trimless version in two different finishes with a carefully studied design for maximum integration into the architecture.

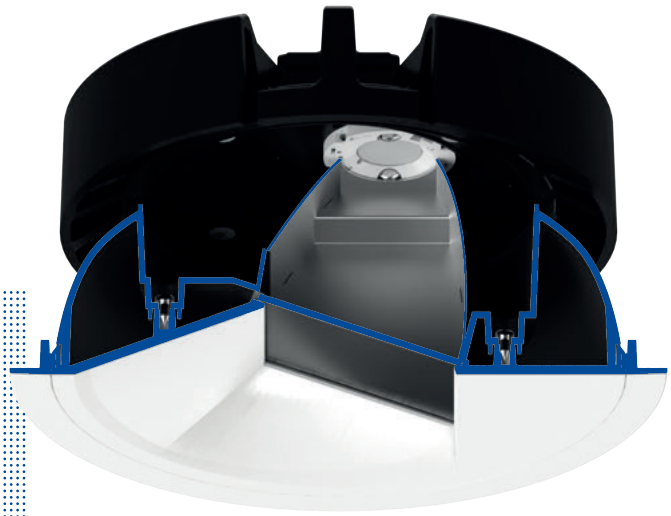
Plus



Maximum integration

The design of CCTEvo Wall Washer was carefully studied to ensure the best lighting performance and total formal simplicity for perfect integration into the environment.

Ideal for lighting large vertical surfaces

The Wall Washer optical system was designed for particular vertical light distribution. On installation with the right ratio of 1 to 3 between the distance from the wall and the height of the same a uniform effect can be obtained thanks to a clean and well controlled beam that avoids light dispersion where not necessary. The optic also guarantees accurate luminance control towards the observer.

Anti-fall safety cable to secure the body of the appliance to the building structure.

CCTEVO WALL WASHER

Control systems

	Code
	1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

CCTEvo ARCHITECTURAL

GENERAL INFO
Adjustable recessed LED projector
in a trim or trimless version
ø160mm ø105mm ø78mm ø58mm

LED
High efficiency LED Chip on Board with Ra90
From 528lm to 7313lm
2700K – 3000K – 3500K - 4000K

PRODUCT EFFICACY
Up to 103lm/W

OPTICS
NSP - SP - FL - MWFL - WFL

POWER SUPPLY
Electronic – DALI
Casambi control system available using a dedicated accessory (only for DALI version products).

MATERIAL
ø160mm and ø105mm - Painted black or white die-cast aluminium body and dissipator.
ø78mm - Die-cast aluminium body and dissipator.
ø58mm - Black or white moulded plastic optic holders and die-cast aluminium dissipator.
Available in a trim version with an integrated ring or trimless with a supporting element for installation and smoothing in plasterboard.

ON DEMAND

Easy Custom Colour

110-277Vac power supply

Ra Ra80

A range of recessed projectors in the CCTEvo range. Available in four different sizes with different lumen packages and four luminous emissions, CCTEvo Architectural comes in a double version, trim (with a ring) or trimless, for complete integration into the architecture.

The VCR aiming system is a system that makes it possible to have a tilt up to 40° on the vertical plane and 358° on the horizontal plane without the need for any other mechanical blocking system. For the Ø 160mm and Ø 105mm versions there is however a mechanical blocking system and a graduated ring.
It is also possible to choose from different colour combinations for wide design flexibility.

		Ø 160mm	Ø 105mm	Ø 78mm	Ø 58mm

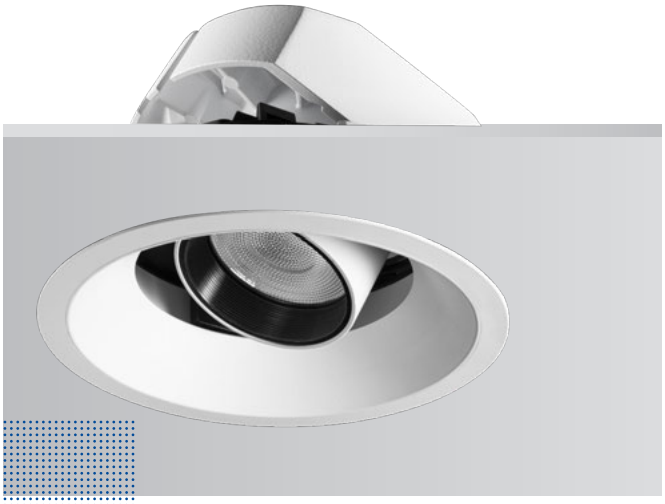
Plus



A real recessed projector

The heart of CCTEvo Architectural is a really versatile and professional performance projector. Four different sizes, two optical systems, four different emissions and different lumen packages for all sizes. A really complete range.

Family feeling

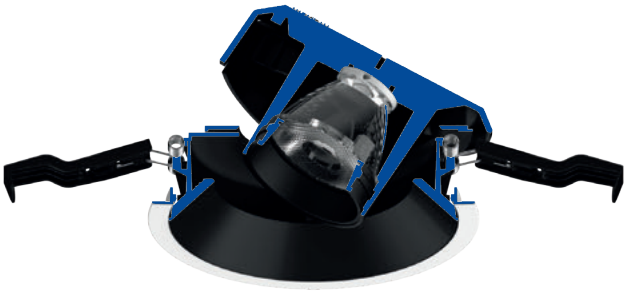
CCTEvo Architectural is designed to coordinate with projectors in the Label range with the aim of creating aesthetic and performance continuity between products with different installation types (track projectors, adjustable recesses projectors and recessed extractable projectors).

	Adjustability vertical plane	Adjustability horizontal plane	Pointing
ø 160mm	max 40° (except for 64W version)	358°	Mechanical locking system and graduated scale
ø 105mm	max 30°	358°	Mechanical locking system and graduated scale
ø 78mm	max 30°	358°	Mechanical locking system (with access from the false ceiling)
ø 58mm	max 30°	-	Friction locking system

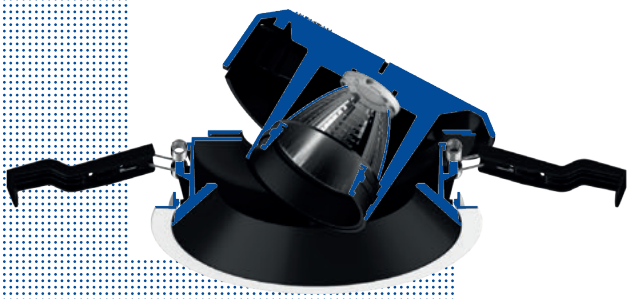
Maximum project flexibility

The VCR aiming system is a system that by combining rotation and translation makes it possible to have a tilt up to 40° on the vertical plane and 358° on the horizontal plane without the need for any other mechanical blocking system.
For the Ø 160mm and Ø 105mm versions there is however a mechanical blocking system and a graduated ring that makes it possible to easily replicate aiming between multiple products even before installation.

Plus



Optic system
with lense



Optic system
with reflector

Two optical systems

CCTEvo Architectural is an extremely flexible tool. The different optical systems available allow for NSP, SP, FL and MWFL beam openings. Sizes ø 160mm and ø 105mm provide the possibility to choose from two different optical systems – with a reflector for soft effects with low visual contrast and lenses for more defined beams – extending the choice of solutions on offer further.

Reflector

Lens

A

B

C

Each project with its own finish

To provide maximum integration with all environments the CCTEvo Architectural ring, cover and projector are available in black or white in different colour combinations for maximum flexibility.

*** On request it is possible to customise the ring by choosing from the many colour combinations in the Colours range and RAL colours available.**

Note

Trimless version: to order this version it is necessary to add the suffix “TR” to the end of the standard code.

Accessories

Filter

Ø	Code
63	**1T8094**

Holographic PMMA filter with blade of light effect.
Allows the beam to be made oval; combined with spot and flood optics the effect appears more pronounced.
Cannot be used with version from 64/W.

Grid

Ø	Code
63	**1T8093**

Anti-glare louver.
Black painted metal honeycomb structure.
Complete with holographic diffusion filter.
Cannot be used with version from 64/W.

CCTEVO ARCHITECTURAL

Mounting System

	L	Code
	2500	**1T9606**

Anti-fall safety cable to secure the body of the appliance to the building structure.

Control systems

	Code
	1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

CCTEvo EXTRACTABLE

GENERAL INFO
Adjustable extractable recessed LED projector. Ø162mm Ø125mm

LED
High efficiency LED Chip on Board with Ra90. From 516lm to 6354lm 2700K – 3000K – 3500K - 4000K

PRODUCT EFFICACY
Up to 96lm/W

OPTICS
NSP - SP - FL - MWFL - WFL

POWER SUPPLY
Electronic – DALI
Casambi control system available using a dedicated accessory (only for DALI version products).

MATERIAL
Black or white painted die-cast aluminium body and dissipator. Available in a trim version with an integrated black or white ring.

ON DEMAND

Easy Custom Colour

110-277Vac power supply

Ra Ra80

A range of professional performance extractable recessed projectors with extensive flexibility. The projector can be set back completely for maximum formal simplicity or extracted up to 75° and adjusted up to -25°/+75° on the vertical plane and 355° on the horizontal one with a manual aiming system.

Available in two different sizes ø162mm and ø125mm, four colour temperatures, two optical systems and five different luminous emissions.

A complete range of professional lighting solutions. Size ø125mm can be equipped with two different optical systems, with a reflector for softer beams and with lenses for more precise, defined beams.

Plus

Two optical systems

CCTEvo Extractable is an extremely flexible tool. The different optical systems available allow for NSP, SP, FL, MWFL and WFL beam openings. Size ø 125mm can be equipped with two different optical systems - with a reflector for soft effects with low visual contrast and lenses for more defined beams – extending the choice of solutions on offer further.

Maximum adjustability

For both sizes the optical unit can be adjusted from 75° to -25° on the vertical plane and 355° on the horizontal plane. The optical unit can even be setback into the false ceiling.

Optic system with lense

Optic system with reflector

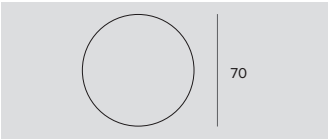
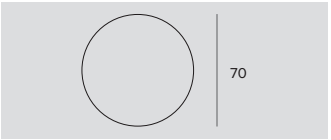
Accessories

Filter



Ø	Code
70	**1T1708**

Flat striped glass blade light refractive filter.
This makes the beam take on an oval shape and when combined with spotlights, the light blade appears more prominent.
To be completed with an additional holder ring for Cloud, Ray Mini, Store, Label 9, CCTEVO Extractable 162 and Keplero Mini HE.
Cannot be used with version from 48/W.



Ø	Code
70	**1T1709**

Flat glass wired refractive diffusive filter.
This softens the luminous effect.
To be completed with an additional holder ring for Cloud, Ray Mini, Sore, Label 9 and CCTEVO Extractable 162.
Cannot be used with version from 36/48W.

Grid

Ø	Code
70	**1T1711**

Anti-glare louver.
Black painted metal honeycomb structure.
To be completed with an additional holder ring for Cloud, Ray Mini, Store, Label 9, CCTEVO Extractable 162 and Keplero Mini HE.
Cannot be used with version from 48/W.

Cut-off

Ø	Code
80	**1T3142**

Cut-off Tube.
Allows for the beam to be focused while removing the fall-off component.
No for DBS version.
Cannot be used with version from 48/W.

Holder Ring

Code
1T3727

Transparent polycarbonate accessory holder ring.

Mounting System

L	Code
2500	**1T9606**

Anti-fall safety cable to secure the body of the appliance to the building structure.

CCTEVO EXTRACTABLE

Control systems

	Code
	1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

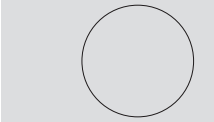
Accessories

Filter

Ø	Code
50	**1T4721**

PMMA holographic filter with blade effect to ovalize the light beam; more evident when combined with spot and flood optics.

Grid



Ø	Code
50	**1T4322**

Anti-glare louver.
Black painted metal honeycomb structure.
Complete with holographic diffusion filter.

Mounting System

L	Code
2500	**1T9606**

Anti-fall safety cable to secure the body of the appliance to the building structure.

CCTEVO EXTRACTABLE

Control systems

	Code
	1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

CCTEvo GIMBAL

GENERAL INFO
Recessed adjustable LED projector.
ø125mm ø105mm

LED
High efficiency LED Chip on Board with Ra90.
From 1266lm to 3180lm
2700K – 3000K – 3500K - 4000K

PRODUCT EFFICACY
Up to 102lm/W

OPTICS
SP - FL - MWFL

POWER SUPPLY
Electronic – DALI
Casambi control system available using a dedicated accessory (only for DALI version products).

MATERIAL
Die-cast black or white painted anodised aluminium body.
Available with a black or white integrated ring.

ON DEMAND

Easy Custom Colour

110-277Vac power supply

Ra80

The simplest product in the range, CCTEvo Gimbal is a recessed fixture in two different sizes - ø125mm and ø105mm - designed to meet the particular lighting needs of the retail sector. A real recessed projector with professional performance and minimal design that can be adjusted up to a +/-25°. It can be equipped with two different optical systems: with lenses for more precise, defined beams and with a reflector for softer and more uniform emissions.

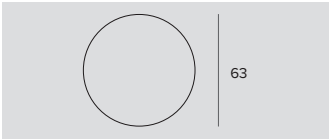
Accessories

Filter



Ø	Code
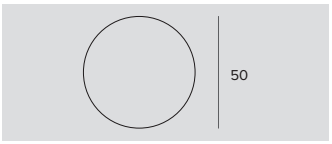
50	**1T4721**

PMMA holographic filter with blade effect to ovalize the light beam; more evident when combined with spot and flood optics.

Grid



Ø	Code
50	**1T4322**

Anti-glare louver.
Black painted metal honeycomb structure.
Complete with holographic diffusion filter.

Mounting System

L	Code
2500	**1T9606**

Anti-fall safety cable to secure the body of the appliance to the building structure.

Control systems

Code
1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

Code
1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

OZ STAND ALONE

Recessed

GENERAL INFO
Recessed fixed LED single or multi-optic projectors.

LED
LED emitter for the Small version
LED Chip on Board for the Large version
From 224lm to 4260lm
2700K – 3000K – 3500K - 4000K
Ra90

PRODUCT EFFICACY
Up to 99lm/W

OPTICS
SP – FL – MWFL
AM – ELT – ELL

POWER SUPPLY
Electronic remote and DALI driver for the Small versions. Electronic and DALI driver integrated into the body of the fixture for the Large versions. Casambi control system available using a dedicated accessory (only for DALI version products).

MATERIAL
White painted die-cast aluminium body and black polycarbonate frame.

ON DEMAND
Easy Custom Colour

110-277Vac power supply

Single or multiple downlights with miniature optical systems inspired by the 48V Oz version. Available in two different sizes, Small and Large for recessed installations. The range is enriched with the addition of three new optical systems AM for soft and diffused general lighting, ELT and ELL - with a transversal elliptical (ELT) or longitudinal beam (ELL)- , ideal for controlled lighting in corridors and passage ways.

All the optical systems available make Oz Stand Alone suitable for installation in work environments (EN12464-1).

The Large version is also available in a ceiling version with 3x and 5x modules.

Great variety of solutions

Different solutions in terms of size, aesthetics, performance and installation to provide a valid solution for all project needs.

Very narrow installation depth

Both the Small and the Large versions have a very narrow installation depth (8 cm).

New optical systems to interpret space

The new optical systems in the Oz Stand Alone range are designed to light space while enhancing flexibility. It is possible to select the desired optical system according to the conformation of the environment and furnishings to obtain comfortable and functional light distribution in compliance with regulations governing lighting in working environments.

The different optical systems available make it possible to interpret space in different ways to satisfy different requirements and tastes.

Note

The drivers selected by Targetti make the fixtures “Safe Flicker”.

Accessories

Control systems

	Code
	1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

Note

The drivers selected by Targetti make the fixtures “Safe Flicker”.

Accessories

Control systems

Code
1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

Code
1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

STORE

Gimbal

GENERAL INFO
Recessed adjustable projector.
Gimbal System to adjust the optical unit 30° vertically and 355° horizontally.

LED
Chip on board
From 200lm to 4385lm
3000K – 4000K
Ra80 - Ra97

PRODUCT EFFICACY
Up to 119lm/W

OPTICS
NSP – SP – FL – MWFL – WFL

OPTICS
Electronic - DALI
Casambi control system available using a dedicated accessory (only for DALI version products).

MATERIAL
Painted die-cast aluminium projector body and external ring.
Polycarbonate internal ring.

ON DEMAND

Easy Custom Colour

110-277Vac power supply

Ra90

Range of recessed fixtures available in two different sizes, designed to meet the particular needs of the retail market where excellent performance, minimal design and controlled light are required.

The light units can be single, and multi-optic 1x, 2x and 3x. Mini versions available with a frame with a Trimless finish.

Also available in a projector version.

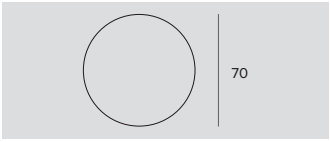
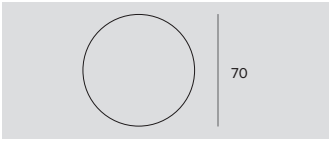
Accessories

Filter



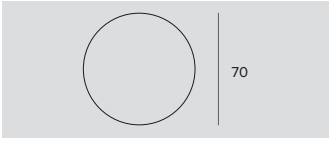
Ø	Code
70	**1T1708**

Flat striped glass blade light refractive filter.
This makes the beam take on an oval shape and when combined with spotlights, the light blade appears more prominent.
To be completed with an additional holder ring for Cloud, Ray Mini, Store, Label 9, CCTEVO Extractable 162 and Keplero Mini HE.
Cannot be used with version from 33/W.



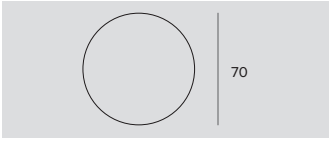
Ø	Code
70	**1T1709**

Flat glass wired refractive diffusive filter.
This softens the luminous effect.
To be completed with an additional holder ring for Cloud, Ray Mini, Sore, Label 9 and CCTEVO Extractable 162.
Cannot be used with version from 33/W.



Filter	Ø	Code
Halogen +	70	**1T6506**
Vivid +	70	**1T6507**

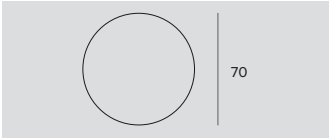
Art filter.
Flat glass interference filter that can vary the colour parameters of the emission of the fixtures it is applied to.
To be used only with 3000K and Ra80 fixtures.
To be completed with an additional holder ring for Cloud, Ray Mini, Store, Label 9.
Cannot be used with version from 33/W.



Filter	Ø	Code
Meat	70	**1T6508**
Fish	70	**1T6509**
Bread	70	**1T6510**
Vegetables	70	**1T6511**

Food filter.
Flat glass interference filter that can vary the colour parameters of the emission of the fixtures it is applied to.
To be completed with an additional holder ring for Cloud, Ray Mini, Store, Label 9.
Cannot be used with version from 33/W.
1T6508 - To be used only with 3000K and Ra80 fixtures.
1T6509 - To be used only with 4000K and Ra80 fixtures.
1T6510 - To be used only with 3000K and Ra80 fixtures.
1T6511 - To be used only with 3000K and Ra80 fixtures.

STORE



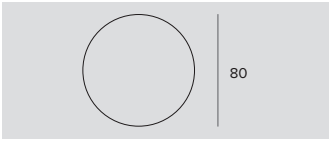
Filter	Ø	Code
Beauty	70	**1T6512**

Beauty filter.
Flat glass interference filter that can vary the colour parameters of the emission of the fixtures it is applied to.
To be used only with 3000K and Ra80 fixtures.
To be completed with an additional holder ring for Cloud, Ray Mini, Store, Label 9.
Cannot be used with version from 33/W.

Note

A minimum order quantity is required for interference filters. Please, refer to the Company for more information.

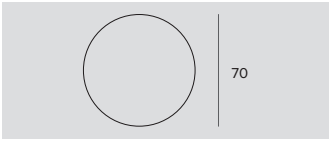
Screen



Ø	Code
80	**1T6522**

Protective screen.
Cannot be used with version from 33/W.

Grid



Ø	Code
70	**1T1711**

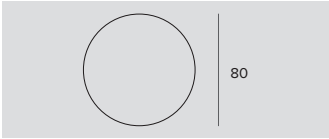
Anti-glare louver.
Black painted metal honeycomb structure.
To be completed with an additional holder ring for Cloud, Ray Mini, Store, Label 9, CCTEVO Extractable 162 and Keplero Mini HE.
Cannot be used with version from 33/W.

Zoom

Ø	Code
80	**1T3432**

Zoom.
Optical system consists of an optical glass flat convex lens, an anodized aluminium specular reflector and a diffusive holographic filter.
To be used after removing the existing optic.
It makes it possible to obtain a variable beam from 13° to 42°.
It can not be used with NSP and hybrid optics; no for DBS version.
Cannot be used with version from 33/W.

Cut-off



Ø	Code
80	**1T3142**

Cut-off Tube.
Allows for the beam to be focused while removing the fall-off component.
No for DBS version.
Cannot be used with version from 33/W.

Screen

Ø	Code
80	**1T3143**

Black painted anodized diffusive aluminium asymmetric screen.
Complete with blade light filter.
Ideal for a Wall Washer effect.
To be combined with spot and flood optics.
Cannot be used with version from 33/W.

Holder Ring

Code
1T3727

Transparent polycarbonate accessory holder ring.

Control systems

	Code
	1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

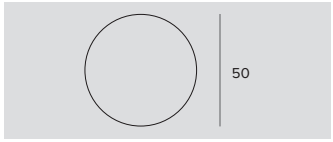
1T6391 - To be used only with 3000K and Ra80 fixtures.



Filter	Ø	Code
Beauty	50	**1T6393**

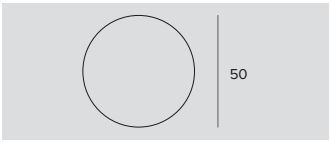
Beauty filter.
Flat glass interference filter that can vary the colour parameters of the emission of the fixtures it is applied to.
To be used only with 3000K and Ra80 fixtures.

Note

A minimum order quantity is required for interference filters. Please, refer to the Company for more information.

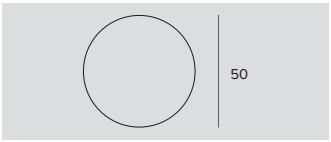
STORE

Screen



Ø	Code
50	**1T4325**

Black painted anodized diffusive aluminium asymmetric screen.
Complete with blade light filter.
Ideal for a Wall Washer effect.
To be combined with spot and flood optics.



Ø	Code
50	**1T6521**

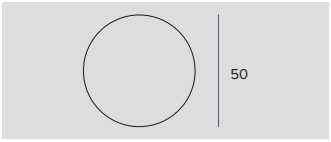
Protective screen.

Grid

Ø	Code
50	**1T4322**

Anti-glare louver.
Black painted metal honeycomb structure.
Complete with holographic diffusion filter.

Zoom



Ø	Code
50	**1T4324**

Zoom.
Optical system consists of an optical glass flat convex lens, an anodized aluminium specular reflector and a diffusive holographic filter.
To be used after removing the existing optic.
It can not be used with a narrow spot optic.
It makes it possible to obtain a variable beam from 15° to 60°.

Control systems

Code
1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

Code
1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

ZENO

Small Extractable

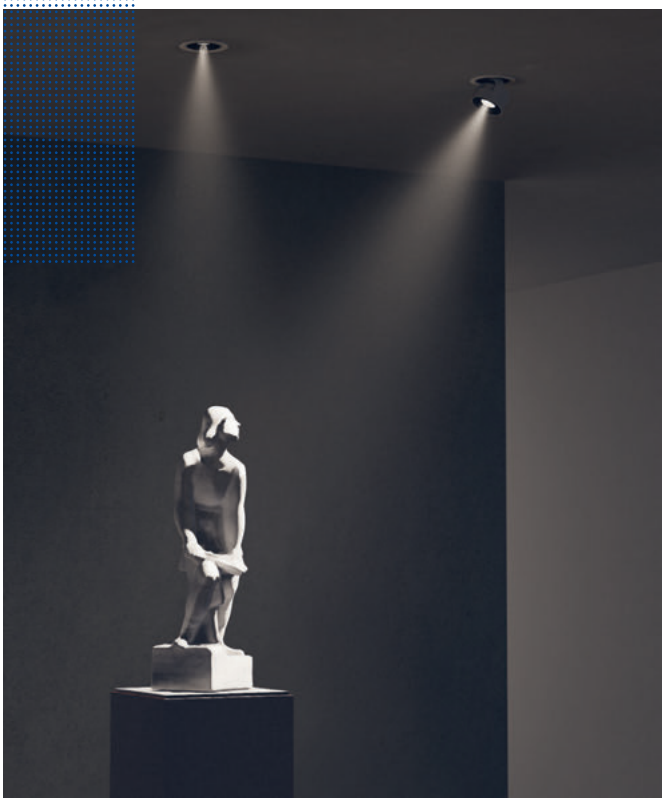
Plus



Trimless or with a decorative ring

Zeno extractable combines the flexibility and performance of a projector with the ability to blend into the architecture. It is possible to choose from installation with a trimless finish or with a decorative ring (to be ordered separately).

The optical body

To be moved into four different positions.

- Step 0 - recessed and non-adjustable;
- Step 1 -partially extracted but non-adjustable;
- Step 2 - the optical unit can be adjusted from 15 to 90° on the vertical plane and 360° on the horizontal plane;
- Step 3 - when the fixture is completely extracted the optical unit can be adjusted from 0 to 90° on the vertical plane and 360° on the horizontal plane with the possibility to block the beam.

MATERIAL
Painted white aluminium body; high transmittance optical PMMA screen with UGR<19 controlled luminance.

A range of high-efficiency, excellent performance, direct emission LED fixtures ideal for lighting working environments. Available in two different sizes – 595x595 and 295x1195 – T-Panel fixtures have an aluminium body that allows for surface installation on modular panels of 600x600mm and 300x1200mm. The PMMA optical screen makes it possible to perfectly control the emission of the fixtures making them suitable for installation in work environments – UGR<19 (EN12464-1) L65<3000 cd/m^2.

All fixtures in the range are equipped with anti-fall safety cables and quick connection terminal blocks.

Using special frame accessories it is possible to install T-Panels directly on the ceiling while the cable kit allows for suspension installation. Emergency kit available as an accessory.

Accessory for installation on continuous ceilings available on request.

2700K-3500K

A range of high performance characterised by simple, soft and rounded lines. Available in three different versions for ceiling mounted, suspension and recessed installation. In all versions the LED lamps are retracted and hidden from view to ensure optimum visual comfort. The flexible installation makes it possible to use the same type of light in environments with different architectural characteristics.

The recessed version has a reduced depth and a polycarbonate finishing ring with a white finish that “disappears” into ceilings creating the illusion of a plaster finish.

A range of projectors for professional lighting ideal in particular for museum environments thanks to the quality of the LED sources, the avant-garde optical systems and installation flexibility. Ten different optical systems for different luminous effects, three installation types and three different sizes. Today the design of Zeno is even more discrete thanks to the integrated adapters that allow for perfect integration of the projector with the architecture. The 1-10V version has a driver box with a dimmer on board. Zeno Medium is also available in a DBS – Dynamic Beam Shaper version. The Zeno range also includes an applique and a recessed extractable version.

Studied in detail

No detail of Zeno was left to chance: the depth of the projector is reduced to the minimum while still maintaining excellent heat dissipation, the geometry of the bracket, a really distinctive element is designed to disappear and become an integral part of the body of the fixture.

Controlled and modular light

The Zeno range is also available in a DALI version or already equipped with a Casambi control system (Casambi ready products) for perfect control of lighting systems. Zeno Small, Zeno Medium and Zeno Large are also available with a 1-10V driver box with a dimmer on board that makes it possible to adjust the emission of individual fixtures with extreme simplicity.

Different optical systems

The different optical systems for Zeno were designed to optimise the performance of the different beam openings.

A A new optical system was designed for the Zeno Small NSP and SP versions composed of a special PMMA lens with metallisation on the back surface, a holographic diffusion filter and a black painted aluminium honeycomb structure.

B The Large and Medium Zeno versions have an indirect Narrow spot optic that works by reflection and makes it possible to obtain extremely narrow (9°), precise and defined beams. The source is hidden from view and directed towards a parabolic reflector that collimates the beams and emits a cone of particularly precise and defined light. This makes Zeno ideal for museum lighting and where there is a need to have narrow beams with minimal fall-off.

C Zeno Medium and Large in the SP and FL versions are equipped with a hybrid optical system composed of a mirrored reflector, an optical glass lens and a holographic screen.

D All Zeno versions with MWFL and WFL optical systems are equipped with a faceted reflector and a holographic screen.
Zeno Small even in the FL version has a reflector optic.

E

WW (Reflector)
Zeno Medium, Zeno Large

F

ZOOM (Hybrid)
Zeno Medium

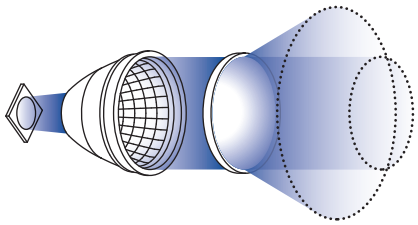
G

DBS (Variable)
Zeno Medium

E The WW versions have a highly reflective aluminium optical system that combines with a holographic screen and a painted plastic cover element to ensure maximum lighting uniformity.

F Zeno Zoom is the manual solution to change beams. Just one optical system makes it possible to have a variable beam with continuity from Spot to Flood emission.

G Zeno DBS (Dynamic Beam Shaper) is the dynamic light version with remote control that makes it possible to activate a light diffusion process from a minimum of 14° and a maximum of 51° using the Casambi Application that is compatible with IOS and Android systems.



DBS - Digital beam opening control

Plus

Anti-glare louver

Black painted steel asymmetric cut-off

Black painted steel cut-off

Adjustable barn doors flaps

A large variety of optical accessories available for all sizes

Like barn door flaps, anti-glare grids and cut-off and corrective filters to meet the demands of more complex lighting needs.

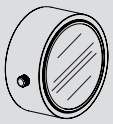
Accessories

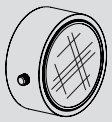
Filter



Code
1T6054

Blade of light filter.
Methacrylate holographic filter.
This makes the beam take on an oval shape and when combined with spotlights, the light blade appears more prominent.
To be completed with a dedicated holder ring.

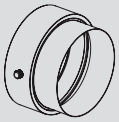
Grid



Colour	Code
◐	**1T6055**

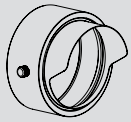
Anti-glare louver.
Black lacquered aluminium honeycomb structure.
To be completed with a dedicated holder ring.

Cut-off



Colour	Code
◐	**1T6056**

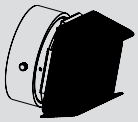
Black painted steel cut-off.
To be completed with a dedicated holder ring.



Colour	Code
◐	**1T6057**

Black painted steel asymmetric cut-off.
To be completed with a dedicated holder ring.

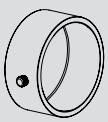
Ray Shade



Colour	Code
◐	**1T6058**

Adjustable barn doors flaps made of black painted steel.
To be completed with a dedicated holder ring.

Holder Ring



Colour	Code
○	**1T6053**
◐	**1T6500**

Black painted aluminium accessory holder ring.

Accessories

Filter

	Code
	1T6060

Blade of light filter.
Methacrylate holographic filter.
This makes the beam take on an oval shape and when combined with spotlights, the light blade appears more prominent.
To be completed with a dedicated holder ring.

Grid

	Colour	Code
	◐	**1T6061**

Anti-glare louver.
Black lacquered aluminium honeycomb structure.
To be completed with a dedicated holder ring.

Cut-off

	Colour	Code
	◐	**1T6062**

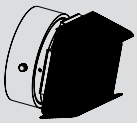
Black painted steel cut-off.
To be completed with a dedicated holder ring.

	Colour	Code
	◐	**1T6063**

Black painted steel asymmetric cut-off.
To be completed with a dedicated holder ring.

ZENO

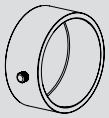
Ray Shade



Colour	Code
◐	**1T6064**

Adjustable barn doors flaps made of black painted steel.
To be completed with a dedicated holder ring.

Holder Ring



Colour	Code
○	**1T6059**
●	**1T6501**

Black painted aluminium accessory holder ring.

Accessories

Filter

	Code
	1T6572

Blade of light filter.
Methacrylate holographic filter.
This makes the beam take on an oval shape and when combined with spotlights, the light blade appears more prominent.
To be completed with a dedicated holder ring.

Grid

	Colour	Code
	●	**1T6573**

Anti-glare louver.
Black lacquered aluminium honeycomb structure.
To be completed with a dedicated holder ring.
Not to be used with NSP and SP optics.

Cut-off

	Colour	Code
	●	**1T6574**

Black painted steel cut-off.
To be completed with a dedicated holder ring.

	Colour	Code
	●	**1T6575**

Black painted steel asymmetric cut-off.
To be completed with a dedicated holder ring.

Ray Shade

	Colour	Code
	●	**1T6576**

Adjustable barn doors flaps made of black painted steel.
To be completed with a dedicated holder ring.

Holder Ring

	Colour	Code
	●	**1T6571**

Black painted aluminium accessory holder ring.

LABEL 230V

GENERAL INFO
Adjustable professional LED projector.
The optical unit can be adjusted from 0° a 90° on the vertical plane and 355° on the horizontal plane with the possibility to block the beam on the horizontal plane (friction blocking system on the vertical plane).
Ø60mm – Ø74mm – Ø88mm

LED
Chip on board
From 1683lm to 3287lm
3000K – 4000K
Ra97

PRODUCT EFFICACY
Up to 95lm/W

OPTICS
SP – FL – MWFL

POWER SUPPLY
Electronic – DALI
Casambi control system available as an accessory (only for DALI versions).

MATERIAL
Die-cast painted aluminium body.

ON DEMAND
Easy Custom Colour
2700K - 3500K

A range of coordinated projectors for track installation with retractable power supplies designed for application in retail, interior and hospitality environments. Available in three different sizes - Label 6, Label 7 and Label 9.

Label 6 and Label 7 can be equipped with two different optical systems: with a reflector for soft effects with low visual contrast and lenses for more defined beams. Label 9 is available with a reflector optical system. The LED source is particularly setback to ensure excellent visual comfort.

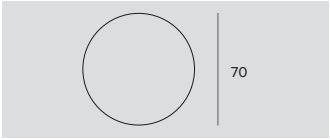
Accessories

Grid



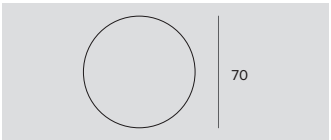
Ø	Code
70	**1T1711**

Anti-glare louver.
Black painted metal honeycomb structure.
To be completed with an additional holder ring for Cloud, Ray Mini, Store, Label 9, CCTEVO Extractable 162 and Keplero Mini HE.

Filter

Ø	Code
70	**1T1708**

Flat striped glass blade light refractive filter.
This makes the beam take on an oval shape and when combined with spotlights, the light blade appears more prominent.
To be completed with an additional holder ring for Cloud, Ray Mini, Store, Label 9, CCTEVO Extractable 162 and Keplero Mini HE.



Ø	Code
70	**1T1709**

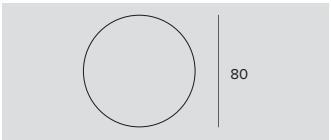
Flat glass wired refractive diffusive filter.
This softens the luminous effect.
To be completed with an additional holder ring for Cloud, Ray Mini, Sore, Label 9 and CCTEVO Extractable 162.

Holder Ring

Code
1T3727

Transparent polycarbonate accessory holder ring.

Cut-off



Ø	Code
80	**1T3142**

Cut-off Tube.
Allows for the beam to be focused while removing the fall-off component.
No for DBS version.

LABEL

Control systems

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

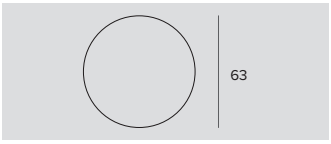
63	**1T8093**

Anti-glare louver.
Black painted metal honeycomb structure.
Complete with holographic diffusion filter.

Filter



Ø	Code
63	**1T8094**

Holographic PMMA filter with blade of light effect.
Allows the beam to be made oval; combined with spot and flood optics the effect appears more pronounced.

Control systems

Code
1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

CAPSULE

GENERAL INFO
An adjustable professional LED projector. The optical unit can be adjusted from 0° to 90° on the vertical plane and 355° on the horizontal plane
Ø60mm – Ø70mm

LED
Chip on board
From 1928lm to 3878lm
3000K – 4000K
Ra90

PRODUCT EFFICACY
Up to 101lm/W

OPTICS
SP - FL - MWFL

POWER SUPPLY
Electronic

MATERIAL
Painted die-cast aluminium body.

A range of adjustable versatile projectors available in two different sizes, Capsule 6 (Ø60mm) and Capsule 7 (Ø70mm).
The optical unit can be adjusted from 0° to 90° on the vertical plane and 355° on the horizontal plane.

The Ø 60mm versions are equipped with MWFL (42°) optics, whereas the Ø 70mm versions with FL (32°) optics . It is very easy to replace the lens to obtain a narrower beam. Already included in the package is a second lens to obtain a SP emission. An additional lens for 24° beam openings is available as an accessory (for Capsule 7). The LED source remains set back to ensure excellent visual comfort.

Accessories

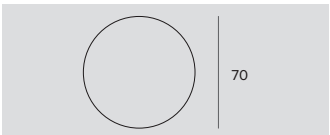
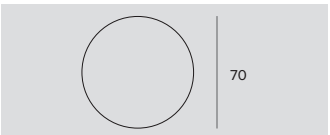
Filter



Ø	Code
70	**1T1708**

Flat striped glass blade light refractive filter.
This makes the beam take on an oval shape and when combined with spotlights, the light blade appears more prominent.
To be completed with an additional holder ring for Cloud, Ray Mini, Store, Label 9, CCTEVO Extractable 162 and Keplero Mini HE.
Cannot be used with version from 33/W.



Ø	Code
70	**1T1709**

Flat glass wired refractive diffusive filter.
This softens the luminous effect.
To be completed with an additional holder ring for Cloud, Ray Mini, Sore, Label 9 and CCTEVO Extractable 162.
Cannot be used with version from 33/W.

STORE

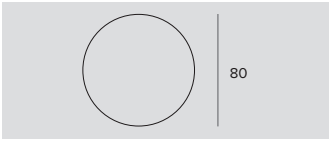
Beauty	70	**1T6512**

Beauty filter.
Flat glass interference filter that can vary the colour parameters of the emission of the fixtures it is applied to.
To be used only with 3000K and Ra80 fixtures.
To be completed with an additional holder ring for Cloud, Ray Mini, Store, Label 9.
Cannot be used with version from 33/W.

Note

A minimum order quantity is required for interference filters. Please, refer to the Company for more information.

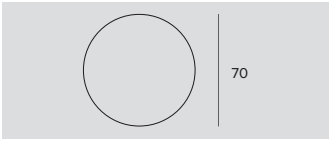
Screen



Ø	Code
80	**1T6522**

Protective screen.
Cannot be used with version from 33/W.

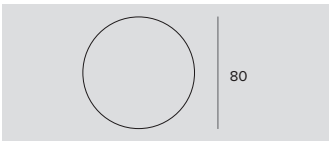
Grid



Ø	Code
70	**1T1711**

Anti-glare louver.
Black painted metal honeycomb structure.
To be completed with an additional holder ring for Cloud, Ray Mini, Store, Label 9, CCTEVO Extractable 162 and Keplero Mini HE.
Cannot be used with version from 33/W.

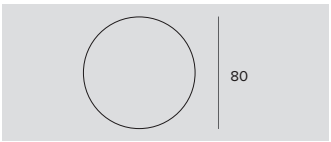
Zoom



Ø	Code
80	**1T3432**

Zoom.
Optical system consists of an optical glass flat convex lens, an anodized aluminium specular reflector and a diffusive holographic filter.
To be used after removing the existing optic.
It makes it possible to obtain a variable beam from 13° to 42°.
It can not be used with NSP and hybrid optics; no for DBS version.
Cannot be used with version from 33/W.

Cut-off



Ø	Code
80	**1T3142**

Cut-off Tube.
Allows for the beam to be focused while removing the fall-off component.
No for DBS version.
Cannot be used with version from 33/W.

Control systems

Code
1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

Code
1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

Optical system consists of an optical glass flat convex lens, an anodized aluminium specular reflector and a diffusive holographic filter.
To be used after removing the existing optic.
It can not be used with a narrow spot optic.
It makes it possible to obtain a variable beam from 15° to 60°.

Control systems

Code
1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

Control: Dimmer on board – Casambi on board

MATERIAL
Painted die-cast aluminium body (L=178 mm) or extruded painted aluminium body (L=213 mm). Black polycarbonate front interchangeable optical chamber for versions with electronic drivers and with the same colour body for the other versions, back ring with radial grid for heat dissipation.

ON DEMAND
Easy Custom Colour

110-277Vac power supply

Track projectors designed for museum lighting given the precise beam modelling, the high colour quality of the light and excellent colour rendering. Available with a fixed optic with a DBS system to modulate the beam on the object to be lit up to 50°.

The Tunable version on the other hand allows to vary the colour temperature from 2700K to 5700K.

The different versions are available with an electronic driver, a dimmable on board driver or can be controlled with a smartphone using the Casambi app to manage the luminous intensity of every single fixture.
The electronic, DALI and DBS versions have an integrated driver. The Tunable version has a separate driver.

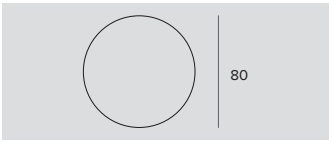
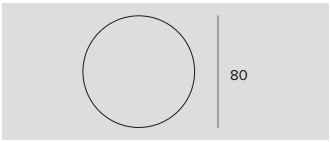
Accessories

Filter



Ø	Code
80	**1T3141**

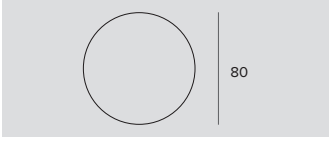
Flat glass, grooved refractive blade light filter.
This makes the beam take on an oval shape and when combined with spotlights, the light blade appears more prominent.



Ø	Code
80	**1T3140**

Flat glass micro prismatic refractive diffusive filter.
This softens the luminous effect.

Screen



Ø	Code
80	**1T6522**

Protective screen.

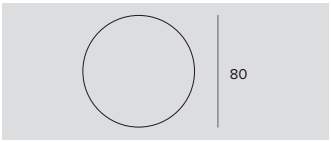
Grid

Ø	Code
80	**1T3423**

Anti-glare louver.
Black painted metal honeycomb structure.

LEDÒ

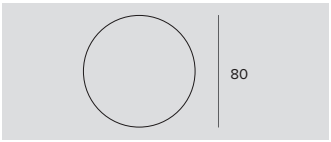
Zoom



Ø	Code
80	**1T3432**

Zoom.
Optical system consists of an optical glass flat convex lens, an anodized aluminium specular reflector and a diffusive holographic filter.
To be used after removing the existing optic.
It makes it possible to obtain a variable beam from 13° to 42°.
It can not be used with NSP and hybrid optics; no for DBS version.

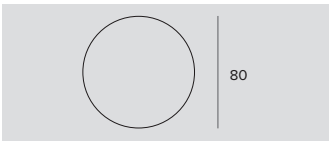
Cut-off



Ø	Code
80	**1T3142**

Cut-off Tube.
Allows for the beam to be focused while removing the fall-off component.
No for DBS version.

Screen



Ø	Code
80	**1T3143**

Black painted anodized diffusive aluminium asymmetric screen.
Complete with blade light filter.
Ideal for a Wall Washer effect.
To be combined with spot and flood optics.

Ra97 (Ray Micro)

110-277Vac power supply (Ray Mini)

A range of projectors characterised by an essential design and high performance. Clearly intended for the Retail environment, there are different sizes and different power supplies to satisfy size and performance requirements within the same project.

All versions have optics with reflectors to obtain soft, delicate tones on all beam openings.

EUROSTANDARD

Plus

GENERAL INFO
Eurostandard Plus 230V track.
L. 1000mm – 2000mm – 3000mm

POWER SUPPLY
Electronic – DALI
Frequency: 50Hz

MATERIAL
A 3 phase mixed system with two additional conductors intended to manage a general data signal (for example DALI, DMX).
Electrified track in three lengths in extruded anodized aluminum or in extruded painted aluminium. Conductors in copper insulated in PVC.

The Eurostandard Plus is a universal 230V track that is compatible with all projectors in the Targetti collection and with all projectors that conform with European standards.

A standard double and recessed version in three different lengths. It has a double fixing systems for ceiling and suspension installations with joints of various sizes and configurations to obtain infinite compositions.

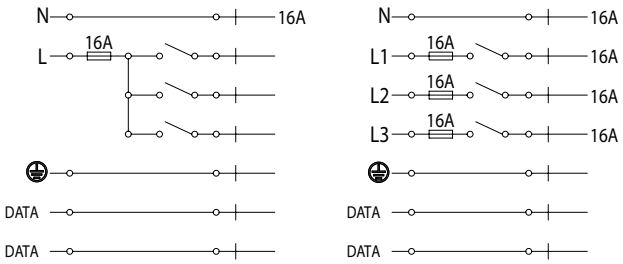
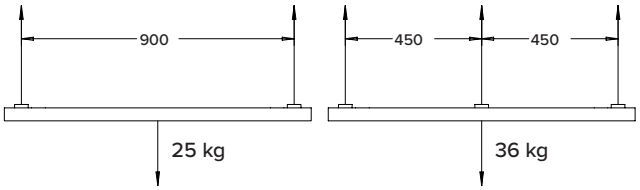
Electrical scheme

During the wiring the electrical scheme of picture must be followed.



Load scheme



Installation

There is a polarity on the lighting track to guarantee the right connection of the multiple pieces of the track. Also end-feeds and connection joints have a polarity that must be taken into account in order to choose the right component. In the catalogue sketches of this articles, the position of the polarity is highlighted with a red line.

Compact Indoor

GENERAL INFO
Adjustable linear LED projector.
41x37,5mm (exluded driver)
41x79mm (included driver)
Lengths 289mm – 570mm – 850mm – 1130mm

LED
Linear boards
From 1301lm to 6360lm
2700K – 3000K – 3500K – 4000K
Ra90

PRODUCT EFFICACY
Up to 100lm/W

OPTICS
SP, FL, Grazing,
Wall Washer

POWER SUPPLY
Electronic – DALI
Casambi control system available using a dedicated accessory (only for DALI version products).
In L 570/850/1130mm versions the driver box can be removed and placed in another position while remaining connected (cable 0.5m).

MATERIAL
Extruded anodised aluminium 15µ body.
1.8mm thick polycarbonate removable (to insert accessories) flat screen.
The body of the fixture is adjustable and can be installed away from the mounting surface using accessory brackets.

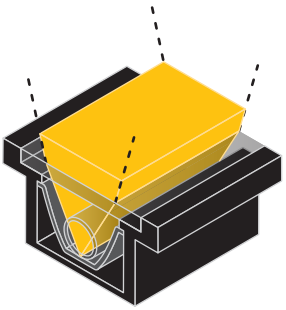
**A compact, high performance linear LED fixture, suitable for installation in small grooves or on particularly thin frames. Depending on the optics chosen it is suitable for general lighting of walkways, vaulted ceilings or vertical surfaces. It is complete with a removable driver that can be positioned remotely if the installation space is small.
The L. 300mm version is only available with a remote driver.**

If equipped with special brackets the projector can be adjusted up to +/-145°.

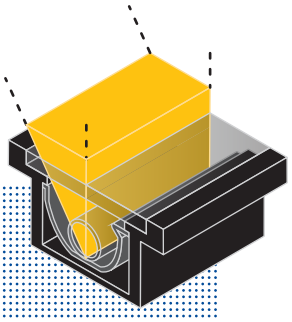
Also available in an outdoor version.

Sala Zuccari, Palazzo Giustiniani
Rome, Italy

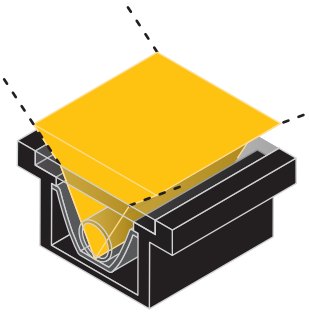
Plus



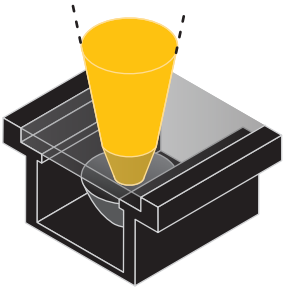
Grazing



Wall washer



Flood



Spot

Four different optical systems

The two different optical systems - hybrid and lenticular - make it possible to obtain four different lighting effects: grazing light thanks to the grazing optic, soft and uniform on high, wide surfaces with the wall washer optic and more concentrated effects with flood and spot optics. A special Louvre grill accessory makes it possible to equip the different versions of Jedi Compact Indoor with an anti-glare system with longitudinal blades to control lateral emission and reduce the risk of glare.

The Grazing optic versions

Is the most suitable solution for lighting vertical surfaces. Installed in continuous rows it makes it possible to obtain seamless uniform lighting.

A

Wide rotation

If equipped with special brackets the projector can be adjusted up to +/-145°.

B

Installation freedom with the removable driver

Removable driver of the 600, 900 and 1200mm versions can be hooked onto the fixture or placed next to it to better fit to thin frames or small grooves.

110-277Vac
power supply

Professional adjustable LED projector for wall or cornice installation, particularly suitable for lighting historical buildings of great artistic value.

It can be installed on cornices for lighting vaulted ceilings or pedestrian areas.
Available in various colour variants that have been carefully studied to insert the fixture into historical architectural contexts.

All versions can be installed indoor as well as outdoor (IP66).

To be completed with an electronic or DALI remote power supply.

Accessories

Filter

Colour	Code
	1T4638
	1T4639
	1E2575
	1E2576

Blade of light filter.
PMMA holographic filter for a blade of light effect, CNC machine anodised and powder coated aluminium frame.
To be used with NSP optics.

Colour	Code
	1T4640
	1T4641
	1E2577
	1E2578

Anti-glare.
PMMA holographic filter to reduce the beam angle, CNC machine anodised and powder coated aluminium frame.
To be used with NSP, ASYM and ELLIPTICAL optics.

Screen

Colour	Code
	1T4642
	1T4643
	1E2579
	1E2580

Asymmetric screen.
Powder coated stainless steel.
To be used with NSP, EFFECT and ELLIPTICAL optics.

Control systems

	Code
	1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

	Code
	1E3048

A IP67 Module for individual control of external devices equipped with DALI drivers.
The module needs to be positioned in order to receive radio signals.
The distance to the lighting fixtures can reach up to 50m.
Wireless control via the Casambi application.
LxHxP=56.5x22.3x35.8mm.

	Code
	1E3049

IP67 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in outdoor applications via the Casambi application.
LxHxP=150x40x148mm.

Bologna, Italy

Photographer Ivan Rossi

CORO

GENERAL INFO
Professional adjustable LED projector for wall or cornice installation.
Optic adjustability: +/-165° horizontally and 180° vertically with aiming blocking system.
Ø82mm – Ø119mm

LED
Chip on board
From 200lm to 7217lm
3000K-4000K
Ra80 – Ra97

PRODUCT EFFICACY
Up to 132lm/W

OPTICS
NSP (only Small version) –
SP – FL
MWFL – WFL
DBS - Digital beam opening control (Coro Large)

POWER SUPPLY
Electronic – DALI - Casambi on board

MATERIAL
Coro Large: die-cast aluminium body and powder coated aluminium front ring and joints.
Coro Small: powder coated die-cast aluminium body, front ring and joints.

ON DEMAND
Easy Custom Colour

A range of cornice, capital and shelf projectors particularly suitable for installation in prestigious architectural environments where it is necessary to light the space without interfering with the architecture in any way.

Available in two different sizes - Large and Small - each with two different length arms and three different fixing systems that increase installation flexibility.

There is also a DBS - Dynamic Beam Shaper- version - for the Coro Large version only.

Cattedrale di Santa Maria Assunta
Volterra, Pisa - Italy

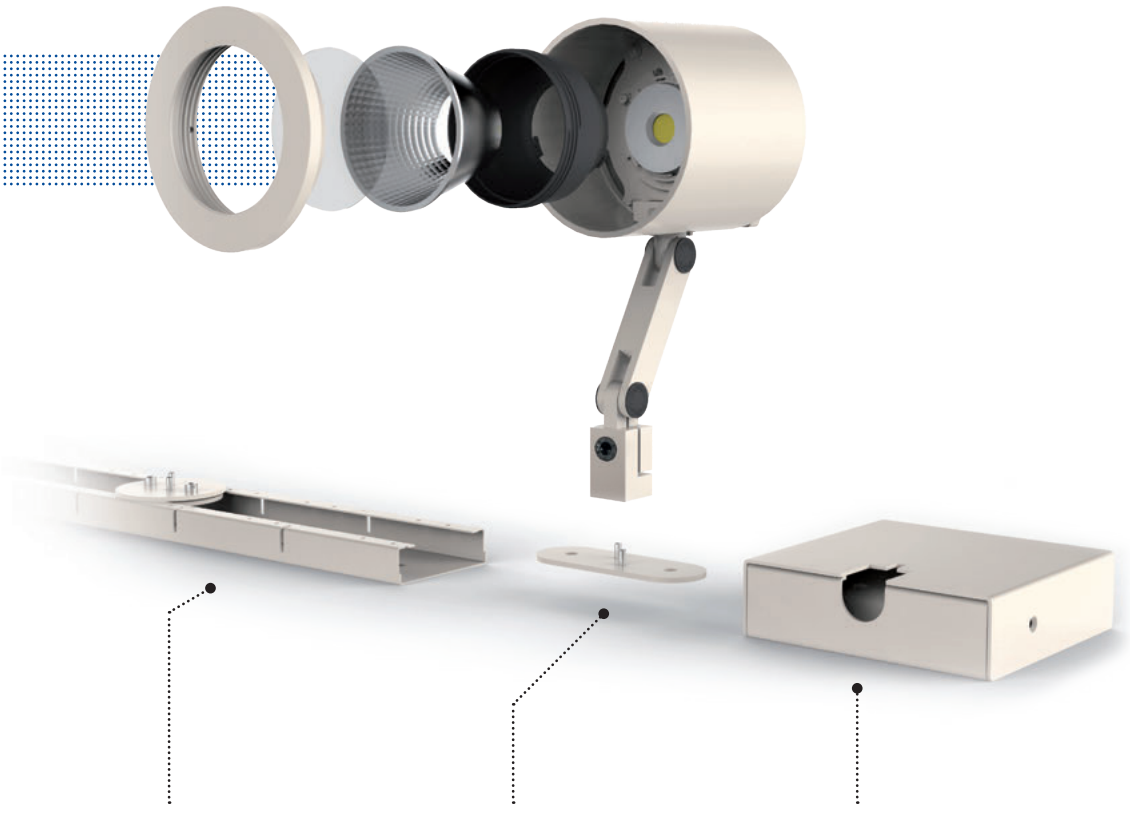
Architect Giorgio Bascià

Lighting Design Arch. Massimo Iarussi

Plus

A **Coro available in two different sizes**
and two different finishes: sandstone grey and Florentine white, two colours that integrate perfectly in historical contexts.

B **The flexibility of the fixture is best represented by its fixing system.**
Three different solutions for as many types of installation.



Mounting rail for surfaces up to 900mm long. Great installation flexibility using a few fixing elements, the projectors can be fixed to any point on the rail which can also house all the electrical conduits of the system (remote driver)

Base for surface mounting (remote driver)

Base for surface mounting with integrated driver. Also available in a Casambi version to control fixtures using an App.

Note

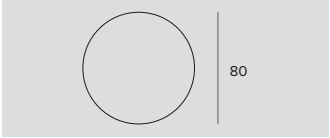
The drivers selected by Targetti make the fixtures “Safe Flicker”.

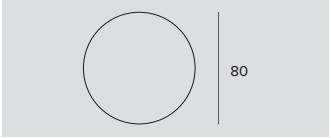
Accessories

Filter



Ø	Code
80	**1T3141**

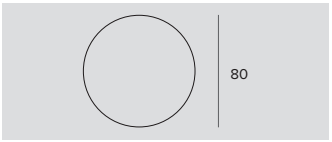
Flat glass, grooved refractive blade light filter.
This makes the beam take on an oval shape and when combined with spotlights, the light blade appears more prominent.
Cannot be used with version from 48/W.



Ø	Code
80	**1T3140**

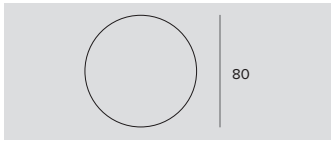
Flat glass micro prismatic refractive diffusive filter.
This softens the luminous effect.
Cannot be used with version from 48/W.

CORO



Filter	Ø	Code
Halogen +	80	**1T6382**
Vivid +	80	**1T6384**

Art filter.
Flat glass interference filter that can vary the colour parameters of the emission of the fixtures it is applied to.
To be used only with 3000K and Ra80 fixtures.
Cannot be used with version from 48/W.



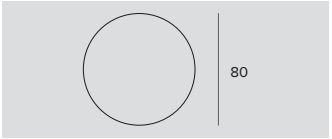
Filter	Ø	Code
Beauty	80	**1T6394**

Beauty filter.
Flat glass interference filter that can vary the colour parameters of the emission of the fixtures it is applied to.
To be used only with 3000K and Ra80 fixtures.
Cannot be used with version from 48/W.

Note

A minimum order quantity is required for interference filters. Please, refer to the Company for more information.

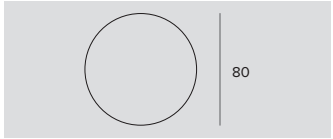
Grid



Ø	Code
80	**1T3423**

Anti-glare louver.
Black painted metal honeycomb structure.
Cannot be used with version from 48/W.

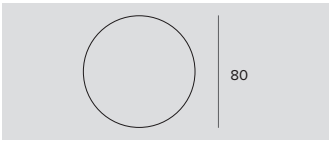
Zoom



Ø	Code
80	**1T3432**

Zoom.
Optical system consists of an optical glass flat convex lens, an anodized aluminium specular reflector and a diffusive holographic filter.
To be used after removing the existing optic.
It makes it possible to obtain a variable beam from 13° to 42°.
It can not be used with NSP and hybrid optics; no for DBS version.
Cannot be used with version from 48/W.

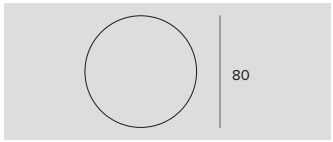
Cut-off



Ø	Code
80	**1T3142**

Cut-off Tube.
Allows for the beam to be focused while removing the fall-off component.
No for DBS version.
Cannot be used with version from 48/W.

Screen



Ø	Code
80	**1T3143**

Black painted anodized diffusive aluminium asymmetric screen.
Complete with blade light filter.
Ideal for a Wall Washer effect.
To be combined with spot and flood optics.
Cannot be used with version from 48/W.

CORO

Emergency Kit

	Version	IP	Code
	3H	IP20	**1T3144**
	1H	IP20	**2T0066**

Emergency kit.
Inverter + battery pack.
No for DBS version.

Control systems

	Code
	1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

1H	IP20	**2T0066**

Emergency kit.
Inverter + battery pack.

Control systems

Code
1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

Code
1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

Easy Custom Colour

110-277Vac power supply

Oz is a system that designs space and lights it with extreme simplicity and lightness.
A clean, minimal design, an extremely thin 6mm track and a 48V power track. The real heart of the system the magnetic power track adapts freely to the space ready to welcome the light units available with different types, sizes and beam openings at any point along the track.

The systems can be left visible in surface installations where lightness and technology are highlighted, or housed in special profiles that allow for surface, suspension or recessed installation.

The system is available with a 1-10V (Digital Dimming) controller and a DALI-Casambi gateway.

Single light modules are available in DBS - Dynamic Beam Shaper versions.

OZ is also available in a ceiling and recessed stand alone 230V version.

Highlights

A The world is not only made of right angles

OZ is not a rigid and rigorous system where lines can only meet orthogonally. The new adjustable connector makes it possible to create new geometries extending the configuration and use possibilities of the OZ system. Thanks to the new connection system it is possible to create in space with greater freedom: every connector can connect from 2 to 8 powertracks to create free angles between “right” angles (minimum 45° angle).

B DBS Module: a new record for OZ

In the single version, both fixed and adjustable, Oz is the first miniature light unit that can be equipped with the innovative DBS – Dynamic Beam Shaper - optic that makes it possible to digitally regulate beam openings. Not only is it possible to add, remove and move light modules along the powertrack but now it is also possible to define the photometric distribution as well as the luminous emission of individual light points with extreme simplicity. A prime example of flexibility.

C Linear light modules

Available in two lengths - L=569mm and L =869mm- they guarantee a soft and diffused effect. Now available also with Digital Dimming

D Wall Washer Modules

For uniform and diffused lighting of vertical surfaces, new OZ modules with Wall Washer optics are now available.

E A L shaped support

Thanks to the L shaped support the system is even more flexible. In standard installation the light units appear perpendicular to the power track; the new L shaped support provides further possibilities to attach Small modules at 90° to allow for zenithal lighting for example, even when the power track is installed on cornices or on a beam.

A connected system

Thanks to the new DALI-Casambi gateway it is possible to interface Casambi version OZ modules with a traditional DALI system. This makes it possible to manage individual light modules using Bluetooth directly fwrom the DALI control unit.

The power track is the heart of the system

The power track is available in three different lengths, black or white. For an effect of formal simplicity it is possible to accessorise the power-track with the cover that hides the two metal tracks. The cover can be easily cut to size on installation.

Innovative 48V magnetic system

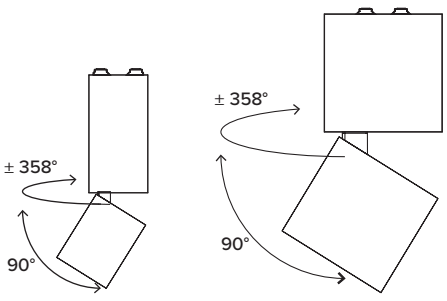
Installing modules is really easy, just place them at any point on the system and the magnets will attach them without the need for accessories.

Linear Light Modules

The OZ range has been extended with new linear light modules. Available in two different sizes, they are equipped with optical systems composed of a high reflectance reflector and an opal polycarbonate screen for a soft, diffused effect. The linear modules are also available in Digital Dimming version.

Single lighting modules

Available in two different extremely compact sizes - 25x25x50 e 50x50x50 - both in fixed and adjustable versions. Now also available with a variable DBS - Dynamic Beam Shaper optic. They can have a body with a white finish and a black screen or be completely black.



Multiple lighting modules

New 3x multi-optical light modules for the Large version and 5x for the Small version, available both in an electronic and Casambi version for remote control of light points. This allows for independent autonomous management of light points on the same track to create different scenarios as needed.

Not only black and white

On request it is possible to have both the single and multiple lighting modules in the desired RAL colour. Download the RAL colours palette from the website and choose the most suitable colour for your project.

Easy Custom Colour

targetti.com/downloads

NEW

Wall Washer modules

Now available the new OZ wall washer light modules, both in the Small and Large versions, for uniform and diffused lighting of all vertical surfaces. The exclusive optical system allows maintaining the correct ratio of 1 to 3 between the distance from the wall and its height.

Five different solutions for maximum application flexibility

OZ allows for maximum application flexibility. The power track can be installed directly on the wall and ceiling (A). Using a special “thin” recessed profile for power tracks, ideal for installation in existing suspended ceilings, it is possible to recess the power track leaving the light units visible (B). Alternatively, the profiles available allow to install the power track and luminous units completely hidden from view in suspended ceilings (C), on the ceiling (D) or suspension installation (E).

Thanks to the cover accessory, available in black or white, it is possible to cover the power track for a totally clean effect.
Thanks to a special cover accessory (F), available in black or white it is possible to cover the power track for a completely clean effect. A special cover accessory was also designed to complete the OZ system even with installations using profiles for ceiling or suspension applications (G).

The cover can be easily cut to size to leave only the part of the power track that is necessary to install the light modules on visible.

Photographer GOJIS Lifestyle Pvt Ltd

A single profile for recessed installations with or without a flange

This recessed profile was specially developed to allow for both trimless installation and with a visible flange. This makes it possible to order a unique solution and decide the installation method after.

Different power supplies available

OZ is powered by a driver box installed directly on the power track or a remote driver, to be completed with a power head. The on board driver box can be positioned at the top of the system or at the centre of the power track.

For suspension applications it is possible to choose the solution with a ceiling driver box installed as a canopy and to be completed with a power head positioned directly on the power track.

1. Direct installation on the power track with an on board driver box
2. Direct installation on the power track with a remote driver and a power head
3. Direct installation on the power track with an on board driver box positioned in the centre between two power tracks
4. Installation on a recessed profile with an on board driver box
5. Installation on a recessed profile with a remote driver and a power head positioned on the power track
6. Installation on a ceiling profile with an on board driver box
7. Installation on a ceiling profile with a remote driver and a power head positioned on the power track
8. Installation on a suspension profile with an on board driver box
9. Installation on a suspension profile with a ceiling driver box and a power head positioned on the power track

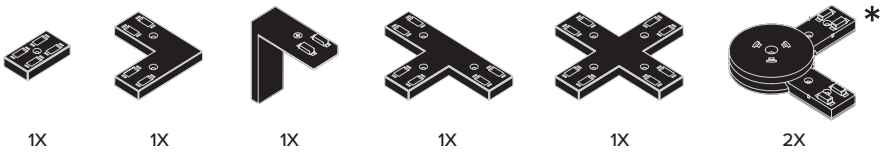
The rules of OZ

5

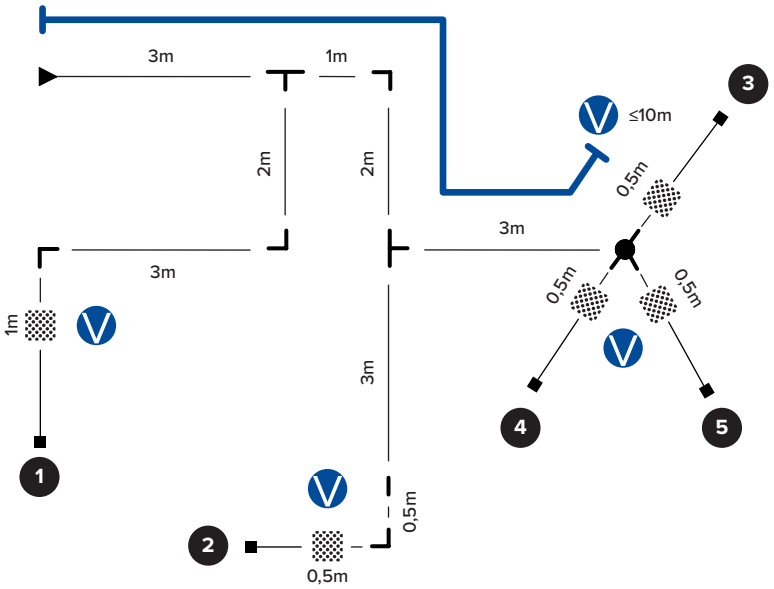
Is the maximum number of joints that can be used in the same configuration per each single power supply

10

Metres, is the maximum distance between the light module and the power head inside the same configuration



* The adjustable electrical jcounts as two joints, regardless of the number of power tracks effectively connected to it

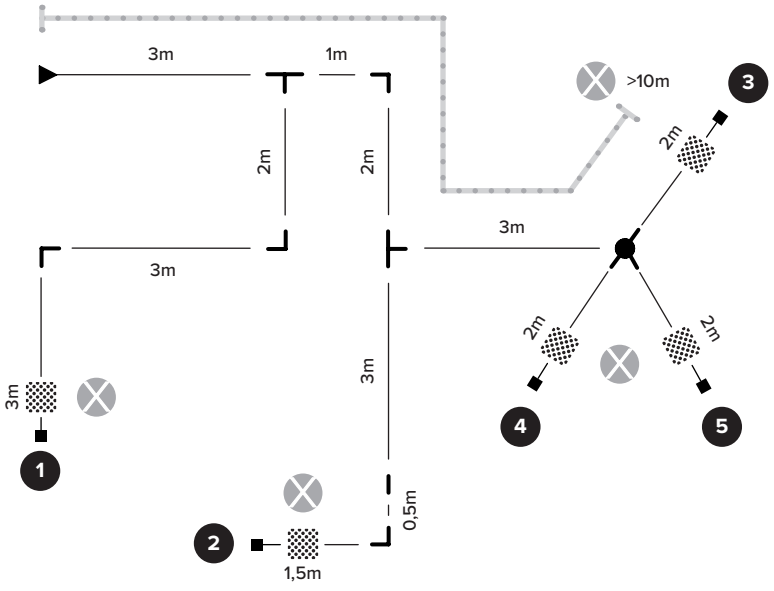


Configuration 1

⊥ + L + L = 3

Configuration 2

⊥ + L + ⊥ + I + L = 5



Configuration 3 4 5

⊥ + L + ⊥ + = 5

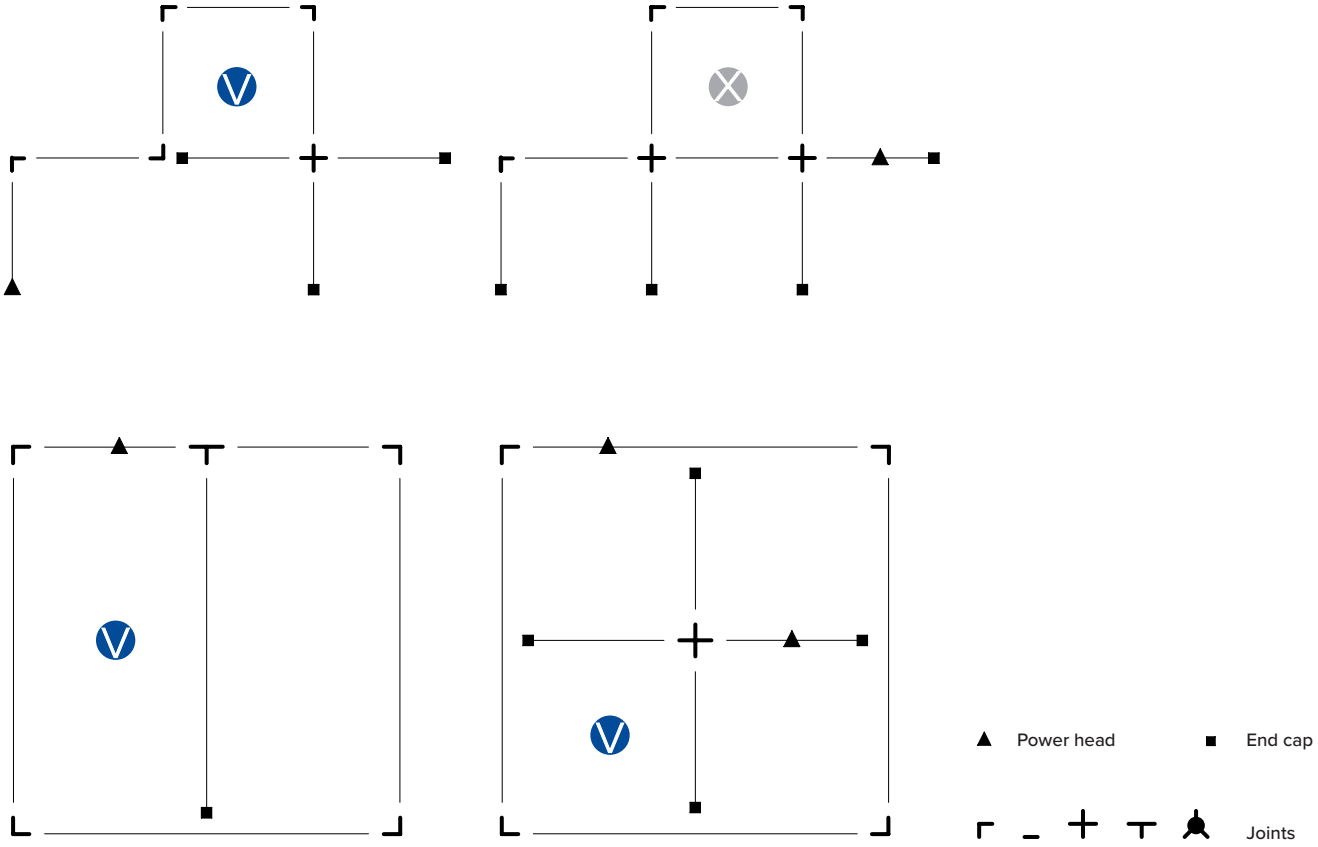
Lighting module

▲ Power head ■ End cap

Joints

1

Are the closed systems that can be created. Only closed systems with 4 L-joints are allowed



3

There are 3 types of driver available

- On board driver box to be house directly on the power track - max 90W
- Driver box for ceiling installation - max 90W - and to be completed with a power head
- Remote driver to be completed with a power head - max 210W

100

Watt is the maximum power that can be installed per metre. The total power of the configuration varies according to the type of driver used.

240x49x60	130W	IP20	**1T6916EL**
251x37x90	210W	IP67	**1T7403EL**

48Vdc electronic driver.
1T6917EL - Single power supply for Electronic, DALI and Casambi systems. Maximum distance 20m - cable 1.5mm^2.
1T6916EL - Single power supply for Electronic, DALI and Casambi systems. Maximum distance 10m - cable 1.5mm^2.
1T7403EL - Universal power supply (110-277V) for Electronic, DALI and Casambi systems. Maximum distance 5m - cable 1.5mm^2.

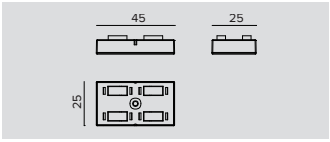
Note

The drivers selected by Targetti make the fixtures “Safe Flicker”.

Digital Dimming version products must be completed with remote driver (1T6917EL, 1T6916EL, 1T7403EL) and 1-10V controller (1T9594D – see p. 340).

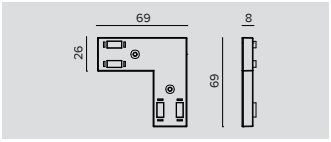
Accessories

Electrical Connector



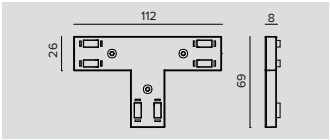
Colour	Code
○	**1T7016**
●	**1T7020**

Linear electrical connector.
5 the maximum joints for each driver source.



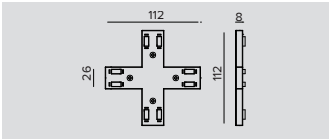
Colour	Code
○	**1T7017**
●	**1T7021**

Electrical L connector.
5 the maximum joints for each driver source.



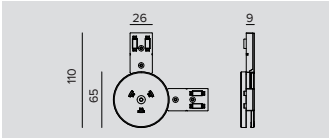
Colour	Code
○	**1T7018**
●	**1T7022**

Electrical T connector.
5 the maximum joints for each driver source.



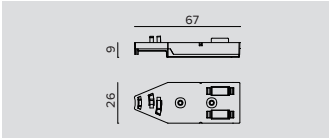
Colour	Code
○	**1T7019**
●	**1T7023**

Electrical X connector.
5 the maximum joints for each driver source.



Colour	Code
○	**1T9524**
●	**1T9525**

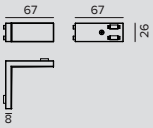
Adjustable 2 way electric connector.
Using a special accessory element it is possible to connect up to 8 Power Tracks.



Colour	Code
○	**1T9579**
●	**1T9580**

Accessory element for adjustable electric connector (1T9524 and 1T9525).

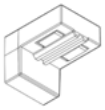
OZ

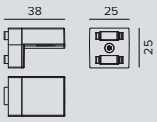


Colour	Code
○	**1T7439**
●	**1T7440**

L-angle electrical coupling.
5 the maximum joints for each driver source.

Mounting System





Colour	Code
○	**1T9592**
●	**1T9593**

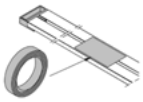
L shaped support that offers the possibility to attach modules to the Power Track at 90°.
The support allows for zenithal lighting for example when the power track is installed on the wall.
Only for single 25x25mm light modules.

Cover Panel

L	Colour	Code
1000	○	**1T7938**
1000	●	**1T7941**
2000	○	**1T7939**
2000	●	**1T7942**
3000	○	**1T7940**
3000	●	**1T7943**

Cover for Power Track (5 pieces).

Mounting System



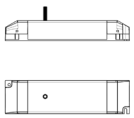
Code
1T7098

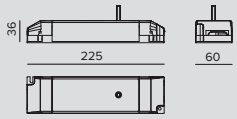
Double-sided adhesive roller, 10m long, for fixing Power Track on any surface.

Code
1T9523

Bracket for ceiling installation of the Power Track in modular suspended ceilings.

Control systems





Code
1T9594D

1-10V (Digital Dimming - DIMM ON BOARD) controller for remote installation.
Each 1-10V controller can drive several products for a maximum of 96W per circuit.

Code
1T8173CA

Bridge DALI/Casambi: a fixture that allows fixtures equipped with mesh Bluetooth Casambi to interface with a traditional DALI system and to be adjusted by a DALI control unit.
Inside the usual DALI circuit it is possible to have a maximum of 64 cabled DALI and Casambi wireless devices.
It only works with Casambi Evolution networks.
The DALI Bridge is transparent in the DALI system, and therefore does not require an address.
There is no need for a power supply given that it is supplied directly by the DALI bus.
LxHxP=40.4x14x36.3mm.

Lighting module Single fixed 25x25mm

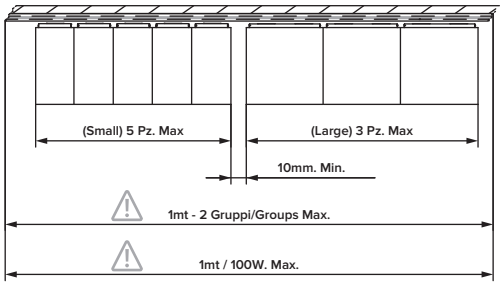
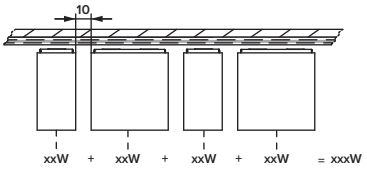
Installation constraints

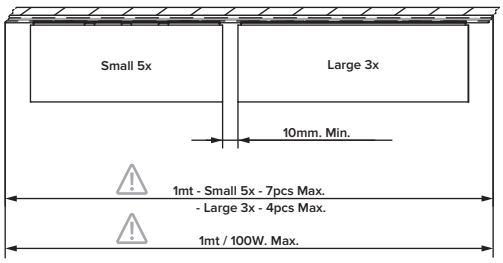
OZ Lighting module – Single



Small max 20pcs/mt
Large max 10pcs/mt

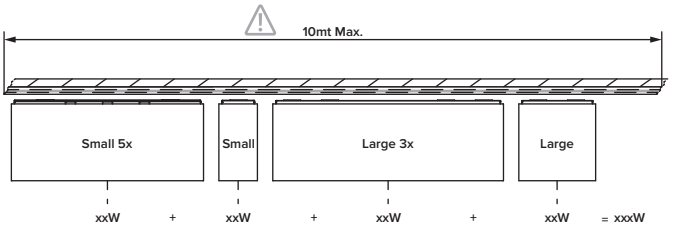


OZ Lighting module – Multiple

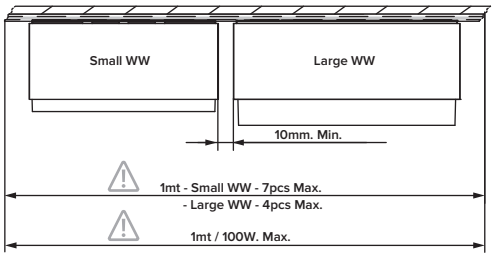


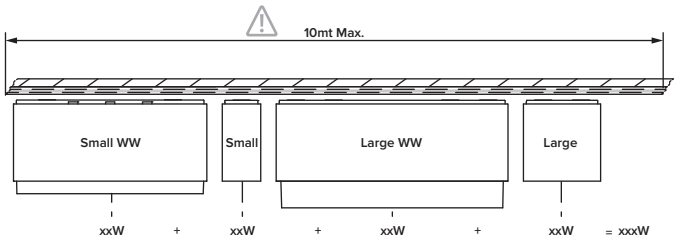
Note

Each 1-10V (Digital Dimming) controller can drive several products for a maximum of 96W per circuit.

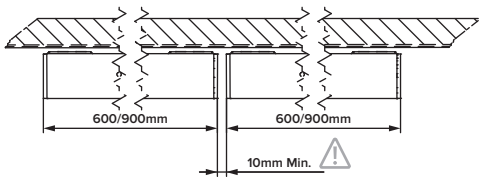


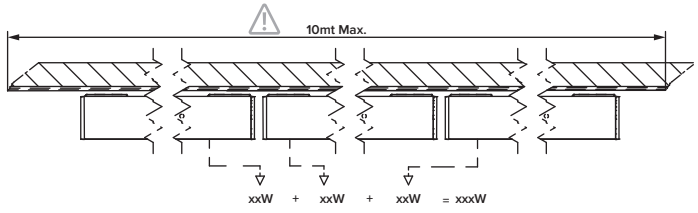
OZ Lighting module – Wall Washer





OZ Lighting module – Linear





FORTYEIGHT

GENERAL INFO

Track
A modular system with variable lengths to be equipped with projectors and linear light fixtures. The geometry of the track varies on the type of installation (suspension, ceiling or recessed).

Label
Projectors for track installation available in a double version with a short and long bracket depending on the type of installation selected.
Ø23mm – Ø40mm – Ø59mm – Ø74mm

Logico 30
Low voltage linear LED fixture for track installation.
Lenghts: 294mm – 573mm – 1132mm – 1970mm
L Module: 310x310

LED

Label 4, Label 6, Label 7: chip on board Ra90
Label 2: LED emitter Ra90
From 171lm to 2799lm
2700K – 3000K – 4000K
Logico 30: Linear boards Ra90
From 750lm to 5600lm
3000K – 4000K

PRODUCT EFFICACY

Label: up to 107lm/W
Logico 30: up to 77 lm/W

OPTICS

Label: SP – FL – MWFL
Logico 30: Opal

POWER SUPPLY

Electronic – DALI
Casambi control system as an accessory (only for DALI versions).

MATERIAL

Label: Painted extruded aluminium body.
Logico 30: Painted extruded aluminium body

ON DEMAND

Easy Custom Colour

110-277Vac power supply (Label 7)

3500K

2700K (Logico 30)

A 48V system that can be recessed or deep recessed both with a trimless finish, ceiling or wall and suspension mounted. It can be fitted at any point with linear lighting fixtures due to its simple mechanical fixing system.

The depth of the track is extremely compact: 29mm or 53mm. The new track with a H" section - has a depth of around 29mm.

The deep recessed version - trimless deep - must be equipped with Label projectors with long brackets.

Recessed

Plus

There are two recessed versions both with a trimless finish:

- Simple recessed with a flush system and protruding fixtures
- Deep recessed completely hidden in the ceiling with linear light elements. For this version the projectors have a longer bracket to allow for maximum extraction and adjustability.

Wall mounted installation
For effective easy lighting for example in retail spaces such as shop windows.

Logico 30

Linear modules complete with opaline screens
For a soft and diffused lighting effect equipped with LED 3000K and 4000K sources with Ra90.

The system can be configured in various ways
Thanks to the use of linear joints and the new corner joints that make it possible to create closed and open loops. Available a new corner light module for lines of seamless light.

Optic system with lens

Optic system with reflector

Label 48V

48V projectors available in four sizes

Carefully studied for professional applications in the museum, retail, interior and hotel sectors 48V Label projectors have a simple, essential shape and an extremely compact size. Available in four different sizes all versions have a remote power supply to reduce visual impact to the minimum. Label 2 (Ø23mm), Label 4 (Ø40mm) Label 6 (Ø59mm) and the new Label 7 Ø74mm) are equipped with Ra90 with 2700K, 3000K and 4000K colour temperatures.

Double optical systems

Label 6 and the new Label 7 can be equipped with two different optical systems: with a reflector for soft effects with low visual contrast or with lenses for more defined beams.

Label 2
Ø23mm

Label 4
Ø40mm

Label 6
Ø59mm

Label 7
Ø74mm

Label 2

The miniature projector in the Label range has a diameter of just 23mm and provides professional performance with an absorption of 4W. Available with three different optical systems equipped with lenses for the SP - FL - MWFL versions with both long and short arms.

Accessories

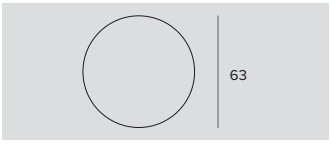
Filter



Ø	Code
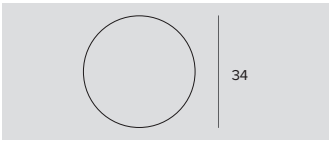
34	**1T6931**

PMMA holographic filter with blade effect to ovalize the light beam; more evident when combined with spot and flood optics.

Grid



Ø	Code
34	**1T6930**

Anti-glare louver.
Black painted metal honeycomb structure.
Complete with holographic diffusion filter.

Accessories

Filter

	Ø	Code
	17	**1T6939**

Holographic PMMA filter with blade of light effect.
Allows the beam to be made oval; combined with spot and flood optics the effect appears more pronounced.

LOGICO

System

GENERAL INFO
Modules of variable lengths for ceiling, suspension, recessed and semi-recessed installations.
Recessed versions with a flange or trimless.
Lenghts:
281mm - 562mm – 1122mm – 1682mm – 3364mm

LED
Linear Board LED Engine for linear and SPOT versions
LED COB for LABEL versions
From 982lm to 28960lm
3000K – 4000K
Ra80 - Ra90

PRODUCT EFFICACY
Up to 109lm/W

OPTICS
OPAL – UGR – WW - SP - FL - MWFL

POWER SUPPLY
Electronic – DALI
Casambi control system available using a dedicated accessory (only for DALI version products).

MATERIAL
Powder coated, extruded, calendered aluminium.

ON DEMAND

Tunable White (continuous light module)

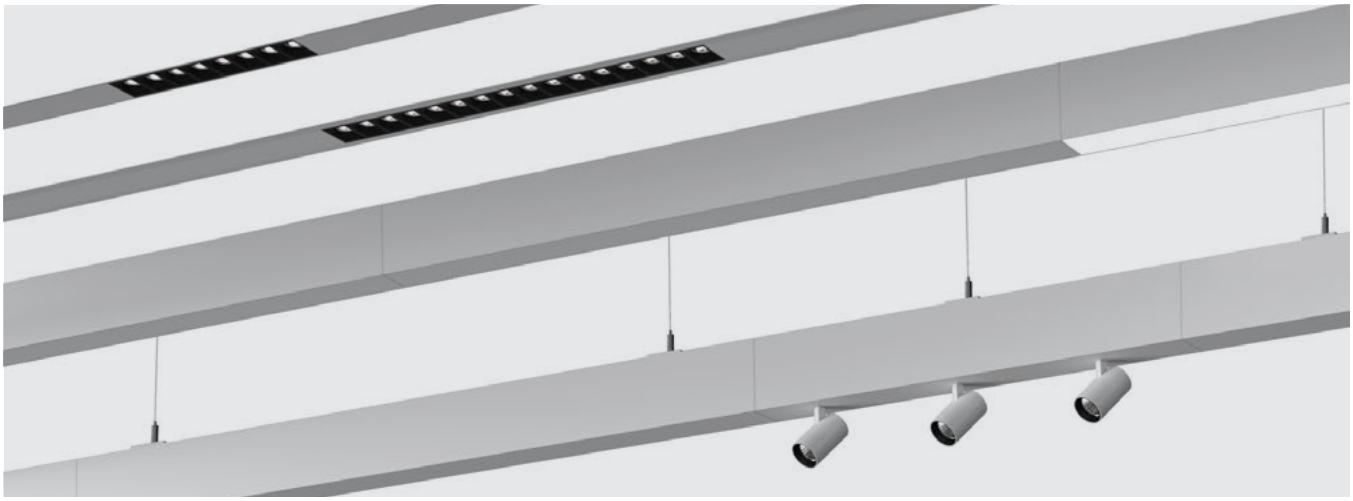
110-277Vac power supply

Modular lighting system with which it is possible to create luminous shapes and numerous lighting scenes given the different lengths available and T, L, and X light connectors and high-power or low-power lumen on modules of the same length.

It is made up of many lighting units: diffused light, UGR<19 controlled light suitable for the workplace (EN-12464 - L65<3000 cd/m^2), wall washer and the new spotlight modules with Label 4 and Label 6 projectors.
The accessories allow it to be installed on the ceiling, walls, suspended, recessed, or semi-recessed (with or without flange).

Also available in a stand alone version.

Emergency versions available on request after checking feasibility.

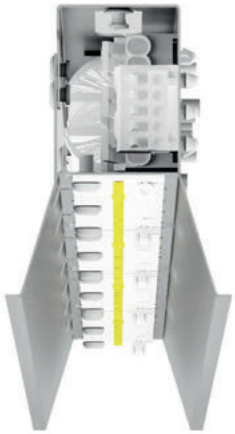


Zonamerica
Montevideo, Uruguay

Architect Estudio Dovat Arquitectos
Lighting Design Estudio Hofstadter

Photographer Ferrés - Cánepa

Plus



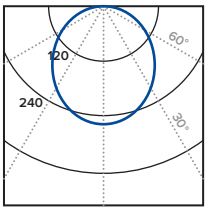
Easy to assemble

Each module is already complete with the lighting unit. Modules with linear light snap together or use magnets, so no tools are needed. The new modules with spotlights already have built-in projectors or lighting elements.

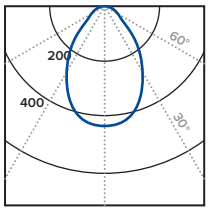
Dimmer light

The Logico modules (opal, ugr, asy, Label) equipped with DALI driver can be dimmed from 10% to 100% with AM modulation amplitude. Dimming is done by modifying the piloting current and not by turning the LEDs on and off. This prevents flickering and makes it suitable for installation even where videos are recorded.

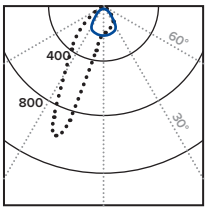
10% 100%



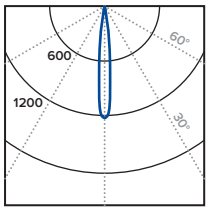
Opal



Ugr<19



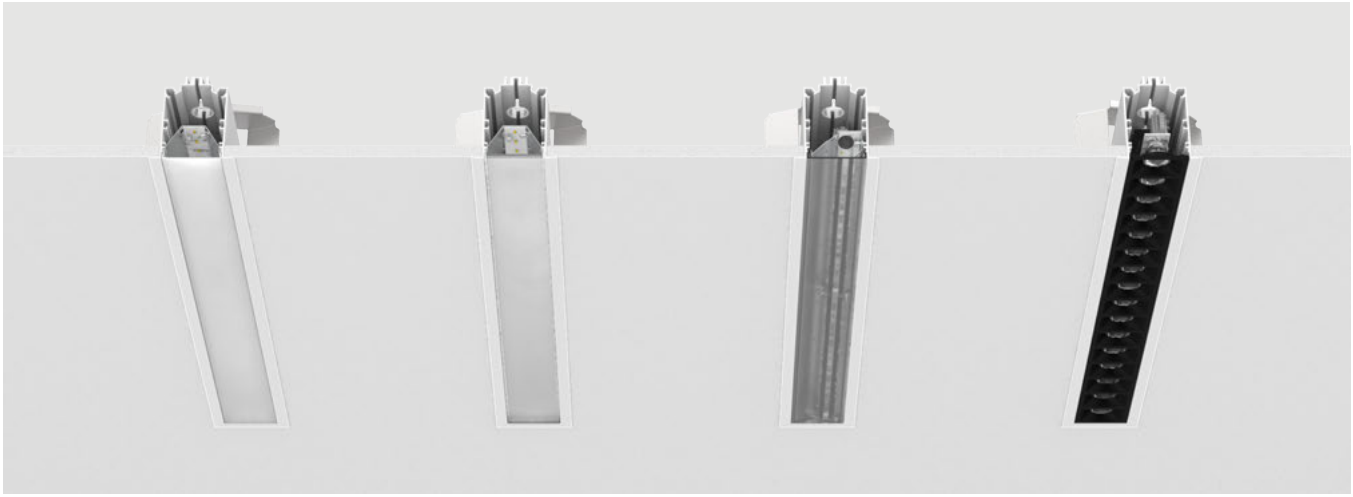
Wall Washer



Spot Ugr<7

Four different optical systems

- Diffused light with an opal screen: a soft, wide light emission particularly suitable for receptions and communal areas, corridors, etc...
- Controlled light UGR<19 (EN-12464 - L65<3000 cd/m^2) with a prismatic screen (only for the direct component): ideal for open space offices, schools or meeting rooms where glare must be reduced to a minimum.
- Directed light with a Wall Washer optical system: ideal for lighting vertical surfaces like walls or works of art.
- Precise light where a system composed of micro lenses produces precise and focused SPOT effects with UGR<7, ideal for lighting commercial and hotel environments.

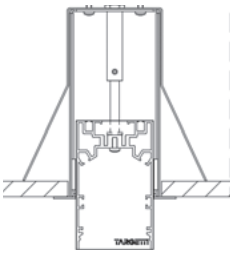


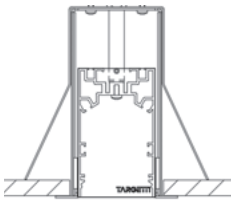
Plus

A **Logico trimless recessed**
It can be installed recessed or semi-recessed using the same recessing box that can be left with the flange visible or grouted for a trimless effect.

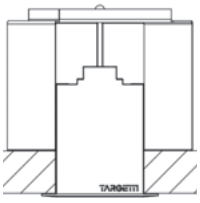
B **Logico recessed with flange**
It can be installed without an outer casing using the brackets supplied. Semi-recessed installation is not available.

A



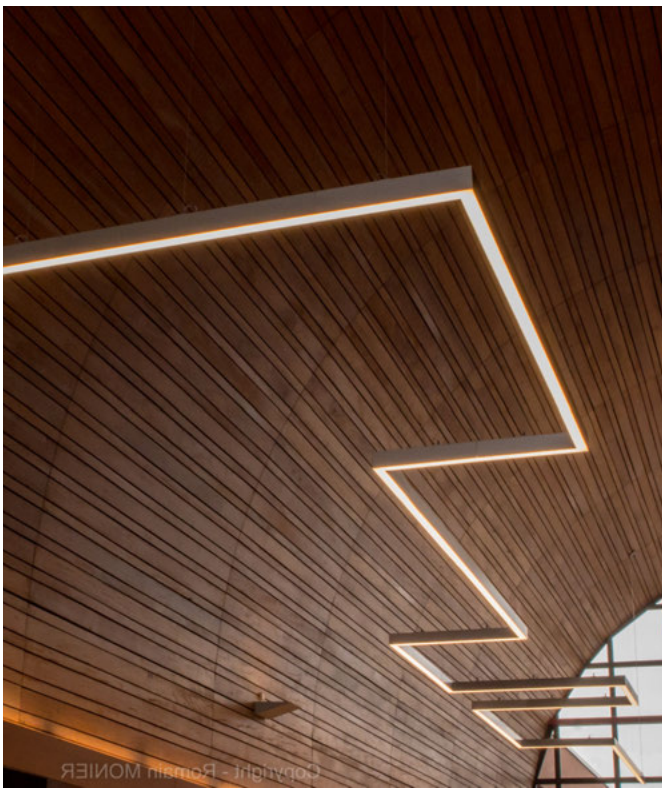


B

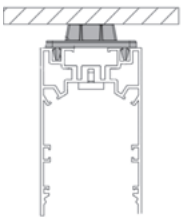


C **Ceiling installation**
The modules must be fixed to the ceiling with the special accessory brackets. The springs are attached to the modules in a “click” by applying pressure.

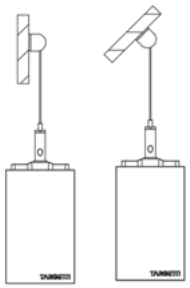
D **Suspended also on sloping ceilings**
The suspension kit allows installation even on tilted ceilings or on vertical elements.



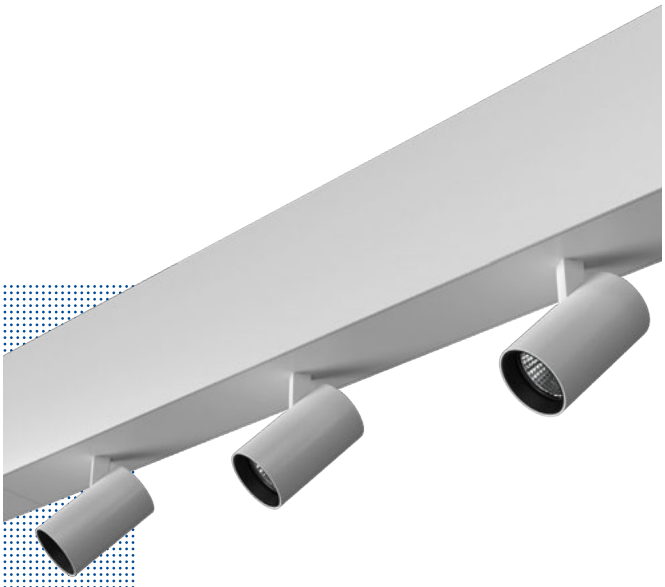
C



D



Plus



Label modules
Modules equipped with Label 4 or Label 6 projectors, available with spotlights, floodlights, and medium wide floodlights.

Spot modules
Logico is also available with the new Spot modules with LED Lineare High Power card and optical system made up of TIR lenses in optical methacrylate, holographic filter and black polycarbonate frame (the profile finish also comes in white). The result is a highly concentrated and controlled light for scenic effects UGR<7 (EN 12464-1)

Blind modules
Blind modules to create a continuous system that connects the spaces between them without interruption. Joints without a light unit are also available to guarantee infinite compositional solutions.

Accessories

Screen

	Code
	1T6502

Accessory designed to improve the visual comfort of the Wall Washer version.
To be installed on a standard reflector.
Made of matte black painted aluminium.
280mm in length; to be ordered in the following quantities for every fixture length: 2 for the 562mm version, 4 for the 1122/1135/1146mm versions, 6 for the 1682/1695/1706mm versions and 12 for the 3364/3377/3386mm versions.

Electrical Connector

	Code
	1T5911

Linear electrical connector.
EL/DALI.

Control systems

	Code
	1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

Control systems

	Code
	1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

Accessories

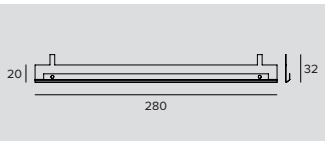
Screen



Code
1T6502

Accessory designed to improve the visual comfort of the Wall Washer version.
To be installed on a standard reflector.
Made of matte black painted aluminium.
280mm in length; to be ordered in the following quantities for every fixture length: 2 for the 562mm version, 4 for the 1122/1135/1146mm versions, 6 for the 1682/1695/1706mm versions and 12 for the 3364/3377/3386mm versions.

Electrical Connector

Code
1T5911

Linear electrical connector.
EL/DALI.

LOGICO

Control systems

	Code
	1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

Control systems

Code
1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

Code
1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

GENERAL INFO
Fixed multi-optic LED ceiling mounted fixture
Large version: 3x and 5x.
3x: 153x53mm h.100mm
5x: 253x53mm h.100mm

LED
High efficiency LED Chip on Board
From 1419lm to 4260lm
2700K – 3000K – 3500K – 4000K
Ra90

PRODUCT EFFICACY
Up to 101lm/W

OPTICS
SP – FL – MWFL
AM – ELT – ELL

POWER SUPPLY
Electronic and DALI driver integrated into the body of the fixture.
Casambi control system available with an accessory (only for DALI version products).

MATERIAL
Black or white painted die-cast aluminium body with black polycarbonate frame.

ON DEMAND

Easy Custom Colour

110-277Vac power supply

New concept ceiling fixtures with miniature optics inspired by the 48V OZ. Available only in the Large version for ceiling installations.

The range is enriched with the addition of three new AM optical systems for soft and diffused general lighting, ELT and ELL - with a transversal elliptical (ELT) or longitudinal beam (ELL) - , ideal for controlled lighting in corridors and passage ways.

All the optical systems available make Oz Stand Alone suitable for installation in work environments (EN12464-1).

Large and Small versions also available for recessed installation with 1x, 3x and 5x modules.

		LARGE

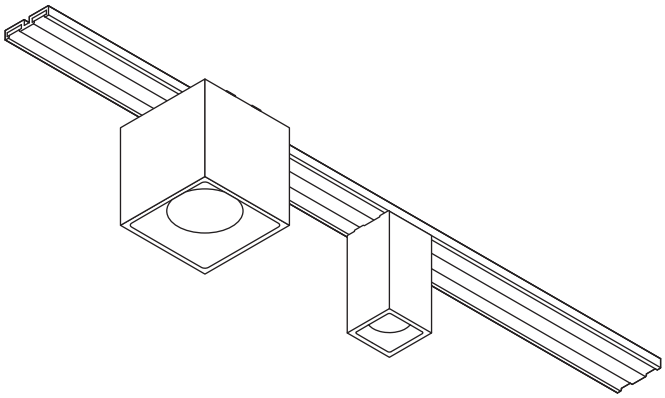
Plus

OZ 48V - the same family feeling

The same design, similar performance characteristics with a conceptually different installation philosophy.Small points of light provided by single or multiple elements that are self-sufficient, contrast with the concept of a system which is inspired on the other hand by a continuous line that develops in the space.



OZ System 48V

		SMALL		LARGE

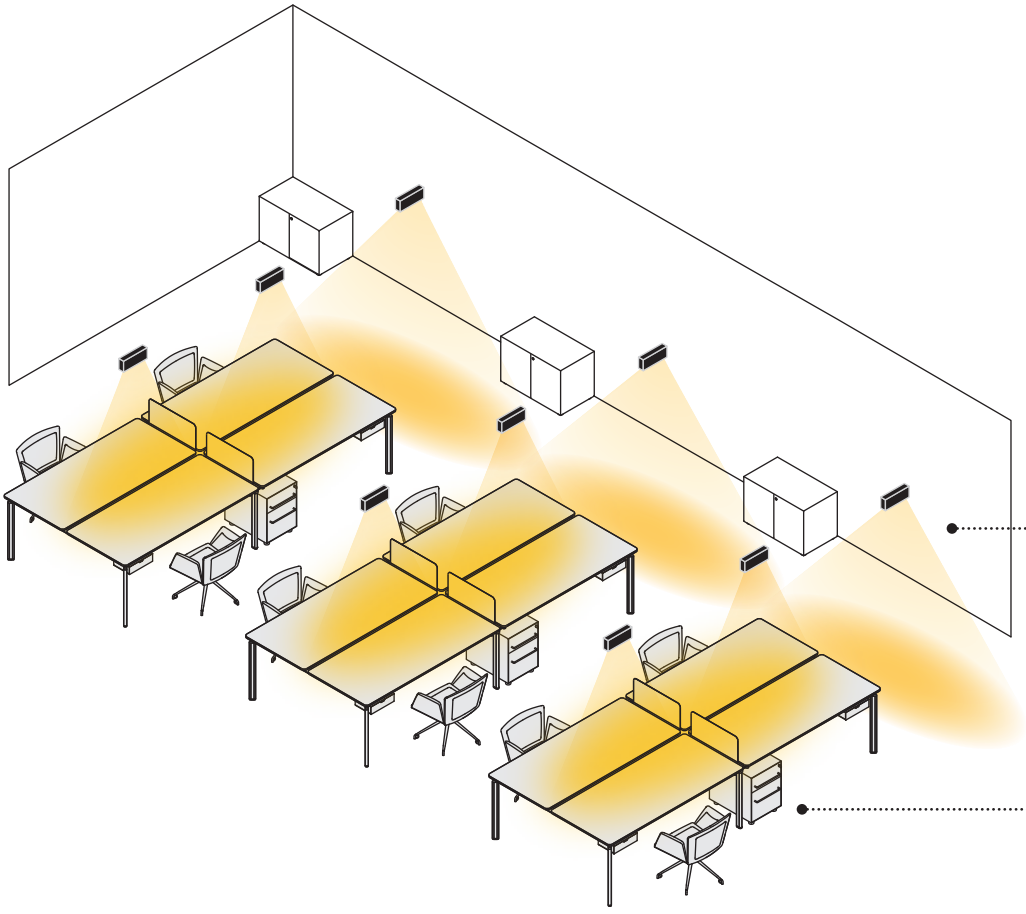
New optical systems to interpret space

The new optical systems in the Oz Stand Alone range are designed to light space while enhancing flexibility. It is possible to select the desired optical system according to the conformation of the environment and furnishings to obtain comfortable and functional light distribution in compliance with regulations governing lighting in working environments.
The different optical systems available make it possible to interpret space in different ways to satisfy different requirements and tastes.



Transversal Elliptical Optic
(ELT)
for passage ways

Longitudinal Elliptical Optic
(ELL)
for work environments

Accessories

Control systems

	Code
	1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

Emergency Kit

	Version	IP	Code
	3H	IP20	**1T3144**
	1H	IP20	**2T0066**

Emergency kit.
Inverter + battery pack.

LOGICO

Stand Alone Ceiling and Suspension luminaire

A versatile fixture available in three different lengths, each with Low- Power and High-Power lumen and different finishes and installation types.

It can be ceiling, wall or suspension installation if equipped with special accessories; is it is available with direct or direct/indirect diffused light, UGR<19 (EN-12464) L65<3000 cd/m^2 controlled light ideal for lighting workplaces or wall-washer for lighting large vertical surfaces. There are also versions available for recessed installation. In addition there are custom made solutions that are available on request: modules with custom made lengths, emergency modules and Tunable technology.

Emergency versions available on request after checking feasibility.

GENERAL INFO
Modules of variable lengths for ceiling, suspension, recessed and semi-recessed installations.
Lengths: 1135mm – 1695mm – 3377mm

LED
Linear Board LED engine
From 2108lm to 28960lm
3000K – 4000K
Ra80 - Ra90

PRODUCT EFFICACY
Up to 109lm/W

OPTICS
OPAL – UGR – WW

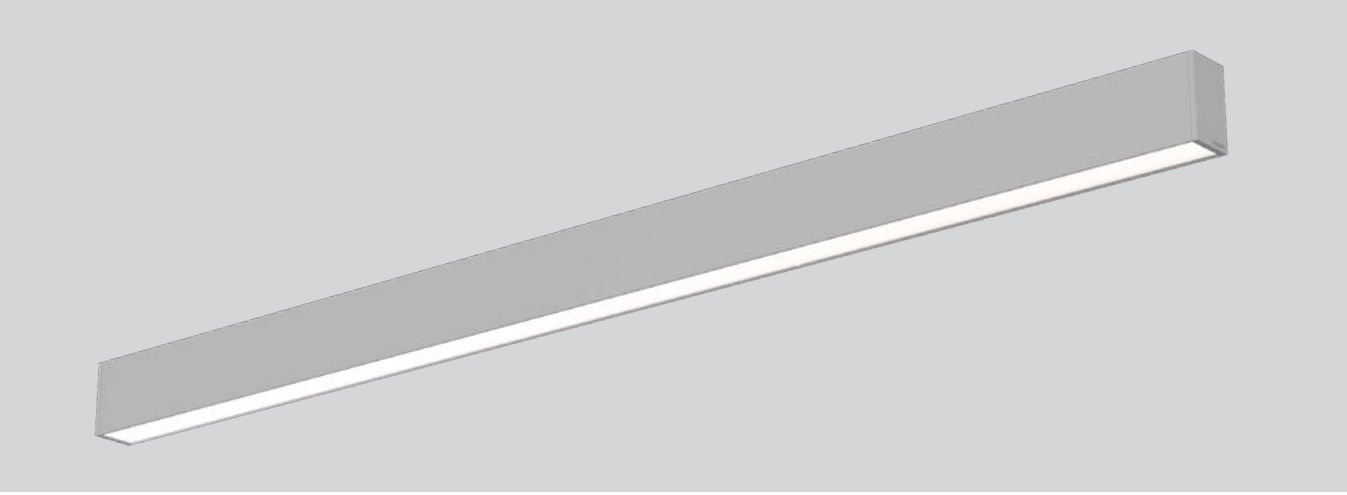
POWER SUPPLY
Electronic – DALI
Casambi control system available using a dedicated accessory (only for DALI version products).

MATERIAL
Powder coated, extruded, calendered aluminium.

ON DEMAND

Tunable White

110-277Vac power supply



Zonamerica
Montevideo, Uruguay

Accessories

Screen

	Code
	1T6502

Accessory designed to improve the visual comfort of the Wall Washer version.
To be installed on a standard reflector.
Made of matte black painted aluminium.
280mm in length; to be ordered in the following quantities for every fixture length: 2 for the 562mm version, 4 for the 1122/1135/1146mm versions, 6 for the 1682/1695/1706mm versions and 12 for the 3364/3377/3386mm versions.

Control systems

	Code
	1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

THREESIXTY

GENERAL INFO
Circular LED fixture for ceiling mounted, suspension and wall mounted installations.
Ø384mm - Ø590mm - Ø870mm - Ø1150mm

LED
Self-cooling circular boards.
From 1735lm to 44809lm
3000K – 4000K
Ra80 - Ra90

PRODUCT EFFICACY
Up to 121lm/W

OPTICS
OPALE – UGR – OPALE+HALO – UGR+HALO

POWER SUPPLY
Electronic – DALI
Casambi control system available using a dedicated accessory (only for DALI version products).

MATERIAL
Powder coated, extruded, calendered aluminium.
High luminance transmission and light diffusion opaline polycarbonate lower diffusive screen. UGR Version: transparent micro prismatic PMMA lower diffusive screen and spreader lens.

ON DEMAND

Easy Custom Colour

110-277Vac power supply

A fixture with a pure and simple design in four different diameters and five different installation types: recessed, semi-recessed, ceiling mounted, suspension and wall mounted. Any light fixture can be configured in various ways when accessorised with different installation elements.

Available only with direct, direct/indirect light or in a direct light version combined with a slight indirect HALO component. a solution that is particularly suitable for the ceiling mounted, wall mounted or semi-recessed versions to create a soft frame of light. Also available in UGR<19 for the two smaller diameters (EN-12464 - L65<3000 cd/m^2).

The direct/indirect version is set up for three different effects: direct emission, indirect emission and mixed direct/indirect emission.

For recessed or semi-recessed installations it is necessary to order both the fixtures and the accessory outer casings.
The 384mm and 590mm versions can also be recessed wall installed using a special accessory outer casing.

Emergency versions available on request after checking feasibility.

Opal, UGR

Four different diameters

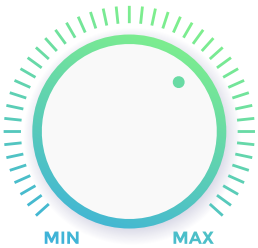
To light spaces with different characteristics.
Compact solutions to light environments with limited heights and large size fixtures to light great heights and showrooms.

A wide range of direct or direct/indirect lighting effects

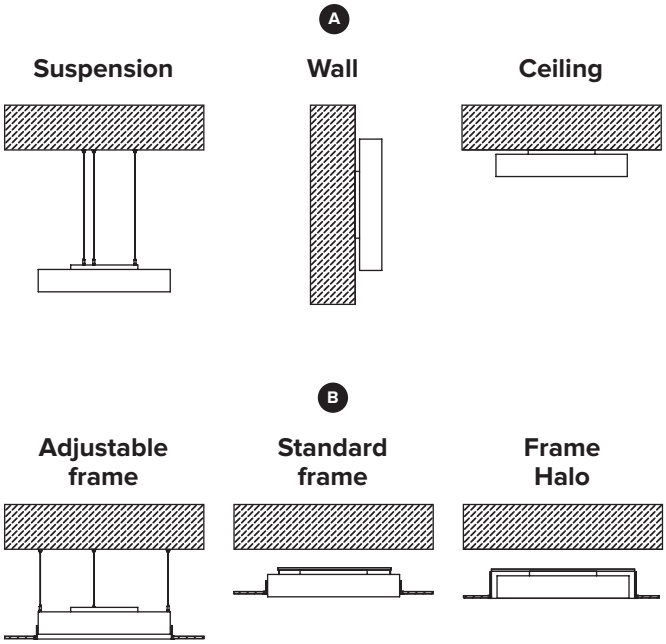
Diffused light, controlled light UGR<19 and a particular Halo effect

Dimmable light

The Threesixty DALI versions can be dimmed from 10% to 100% with amplitude modulation AM. Dimming is possible by modifying the drive current and not by turning the LED source on or off. This avoids flicker and makes the fixture suitable for installation even in environments where videos are recorded.



10% 100%



A **Suspension, Wall and ceiling mounted**
The fixture can be ceiling or wall mounted without the use of any accessories. For suspension installation a special suspension kit must be used.

B **Recessed - Semi Recessed**
For recessed or semi-recessed installations it must be completed with special outer casings.

- The 384 mm and 590 mm versions are compatible with an accessory standard or HALO version load bearing outer frame that attaches directly to the false ceiling.
- The 384 mm, 590 mm, 870 mm and 1150 mm versions are compatible with a recessed non load bearing frame that attaches to the main ceiling.

Different lumen packages
For every diameter to light spaces with the same design.

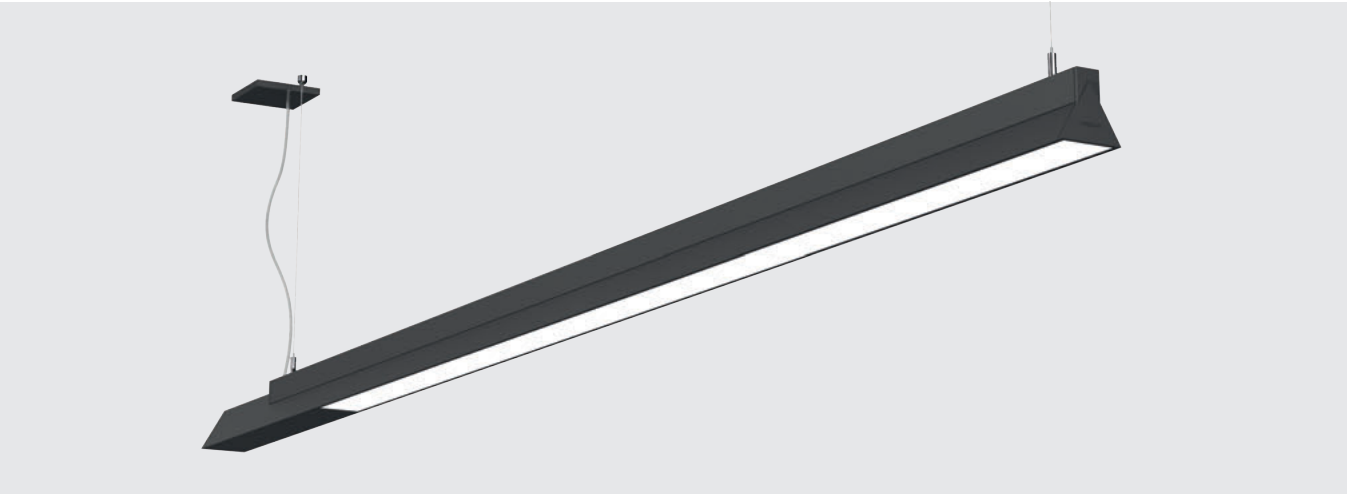
Easy Custom Colour

110-277Vac
power supply

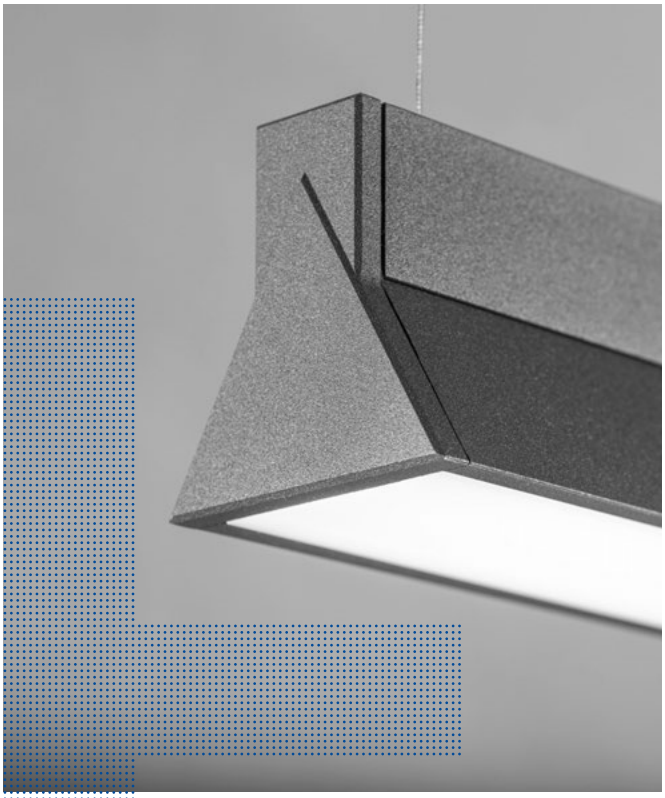
Suspension fixture for office and hospitality environments designed in close collaboration with the American firm Gensler. Available with direct or direct/indirect emission with two different effects: diffused light and controlled light UGR<19 (EN-12464) L65<3000 cd/m^2.

L=840mm central indirect lighting.

Also available in a version for ceiling installation.

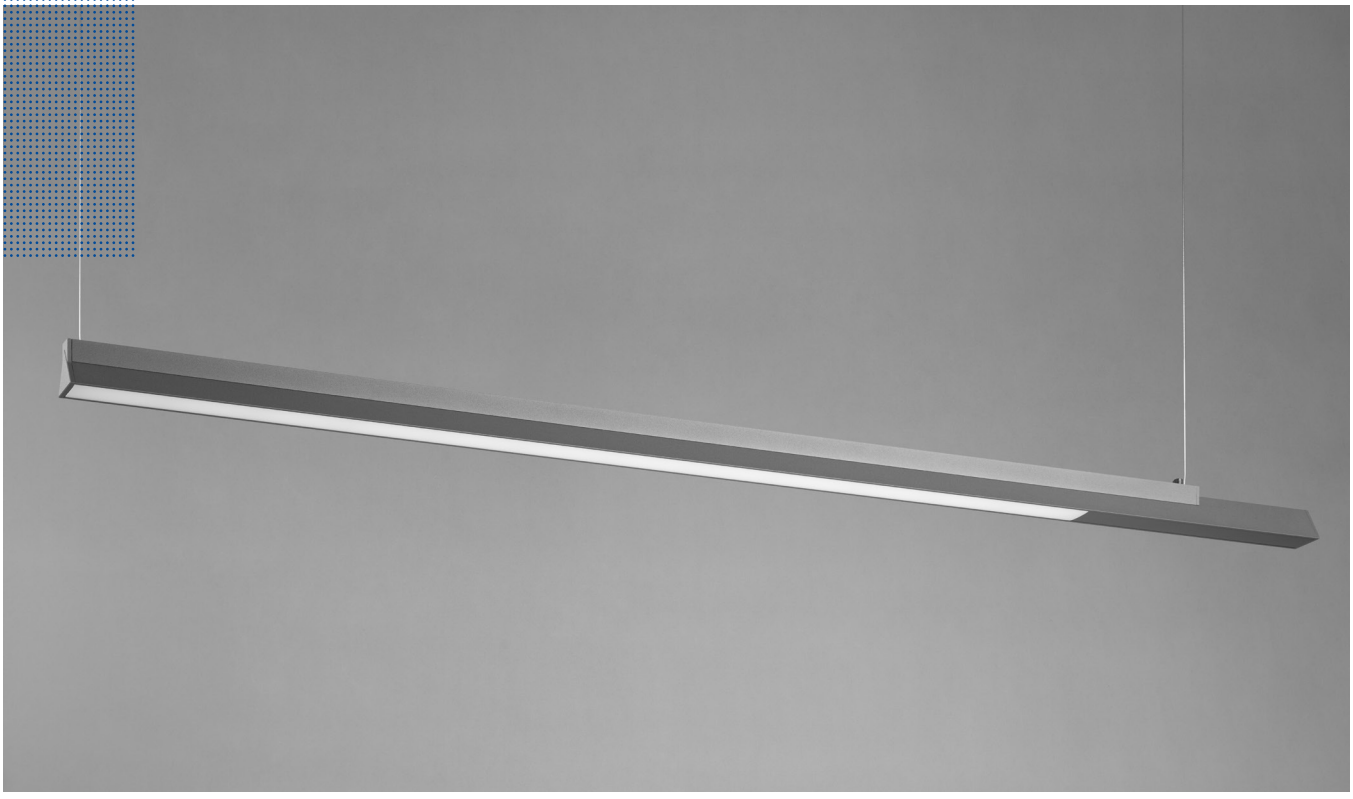


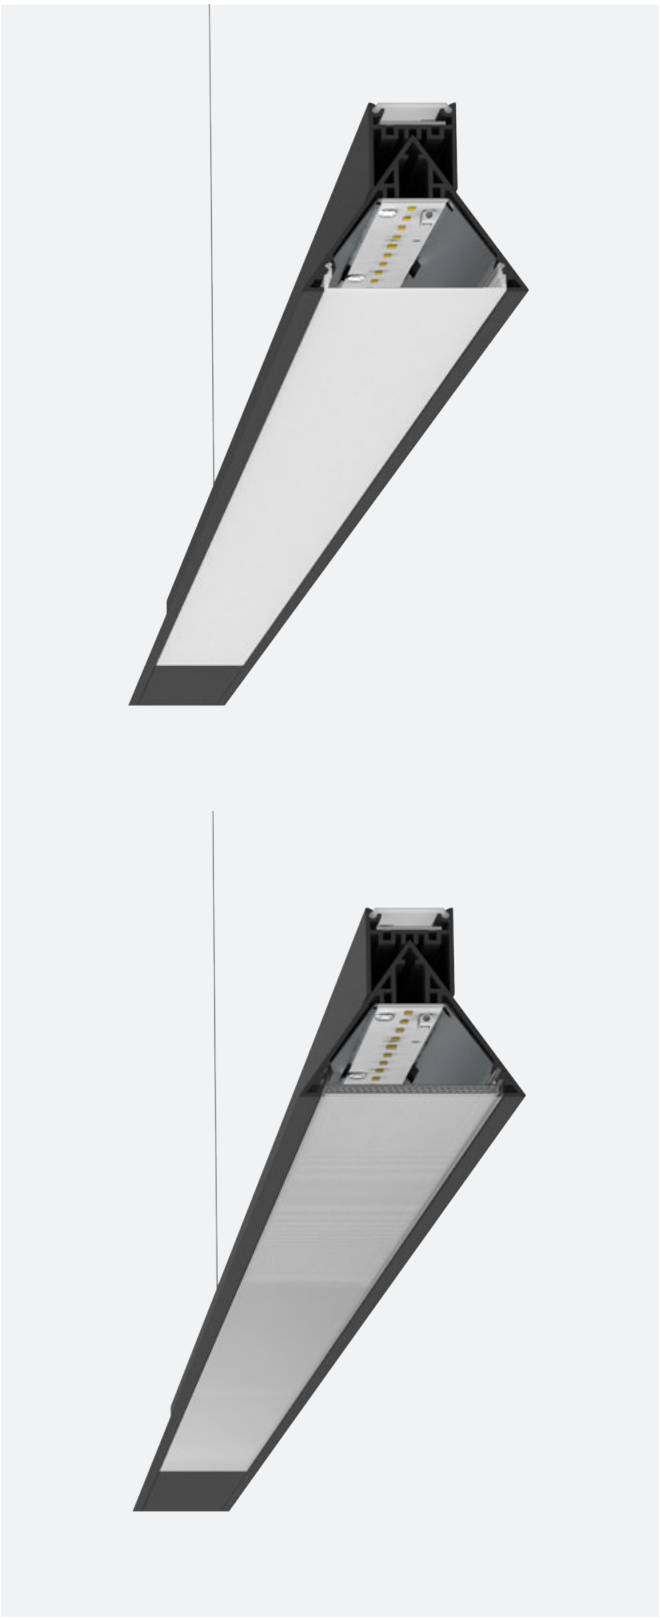
Plus



Design
The union between the interpenetration of two solids produce a fixture with a recognisable yet discrete design, perfect to characterise modern spaces

Two optical systems
The two different optical systems it can use – OPAL and UGR – make it suitable for installation in OFFICE applications which are increasingly becoming open spaces, and in Hospitality projects which require not only visual comfort, but also attention to design and detail.





UGR<19 optic

The UGR version is focused entirely on visual comfort. The colour rendering index of CRI 90 and the perfect UGR screening allows for a pleasant and measured light.
The sophisticated optical system, comprised of a mirrored reflector and a particular prismatic screen, reduces the shadows and reflections that can cause disturbance on work surfaces, allowing for an unrestricted distribution of desks without having to bear in mind the position of the lighting units.

Opal optic

The diffused effect of ISO OPAL is the result of a mirrored reflector with an opal screen. The light emitted appears soft and widespread, particularly suitable for reception areas in offices, hotels and spaces. In the direct/indirect light version, a line of light is present on the upper part, complete with diffusing screen to provide even light on the ceiling.

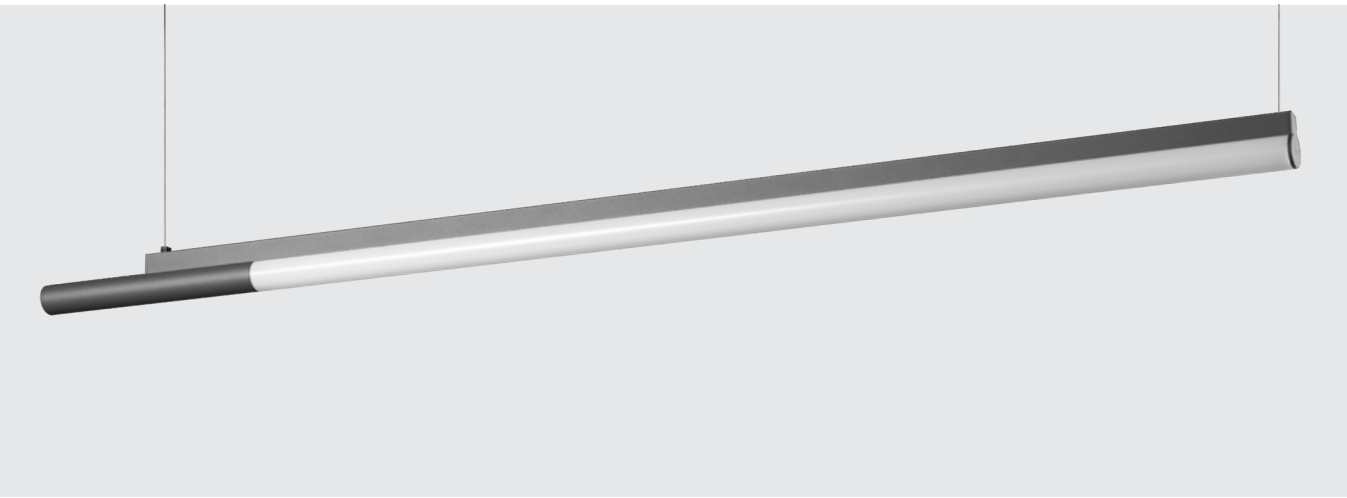
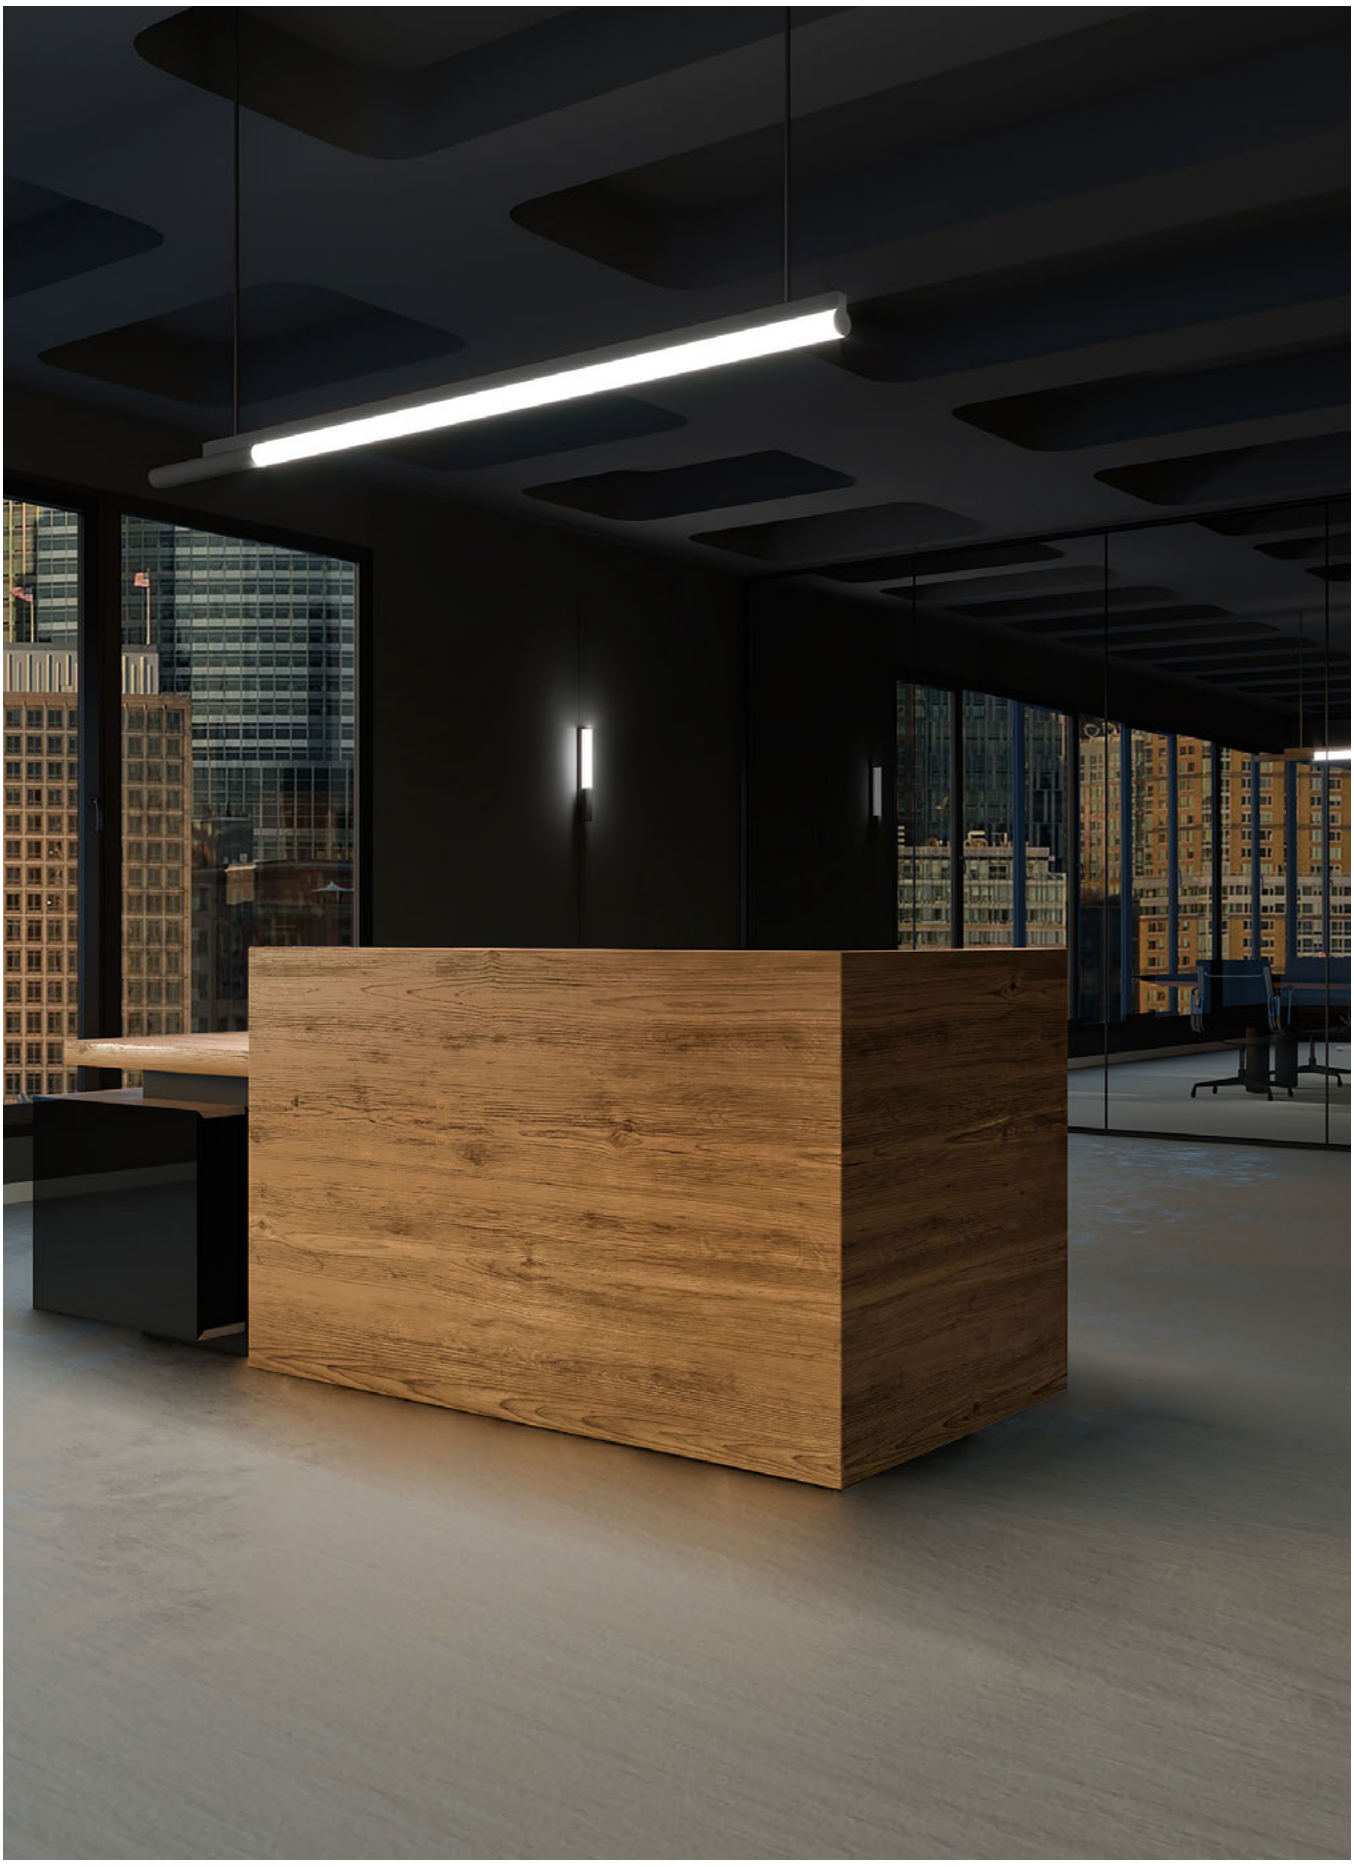
110-277Vac power supply

The result of the collaboration with the architectural and design firm Gensler, Omega is a range of fixtures for coordinated lighting of work and hospitality environments in particular for reception areas and common areas. Available in different sizes and application types for ceiling, suspension and wall installation. For the wall version L=792mm it is now possible to choose between a Hi-Power and Low-Power solution.





Plus

Design
The union between two pure shapes led to the development of a discrete, yet recognisable lighting fixture. A new 270° light emission that takes advantage of geometries and shapes and the interpenetration of two solids for a soft light that lights up the three-dimensionality of a space.

Suspension versions
The suspension versions are 2114 mm in length with a single direct point of emission, supplied complete with suspension kit.

Wall-mounted version

Wall versions are available in two different lengths (472mm and 792mm) and can be installed vertically or horizontally. They are ideal for lighting common areas and stairwells coordinated with general lighting supplied by longer versions.

The L=792mm version is available with both Hi-Power and Low-Power solutions.

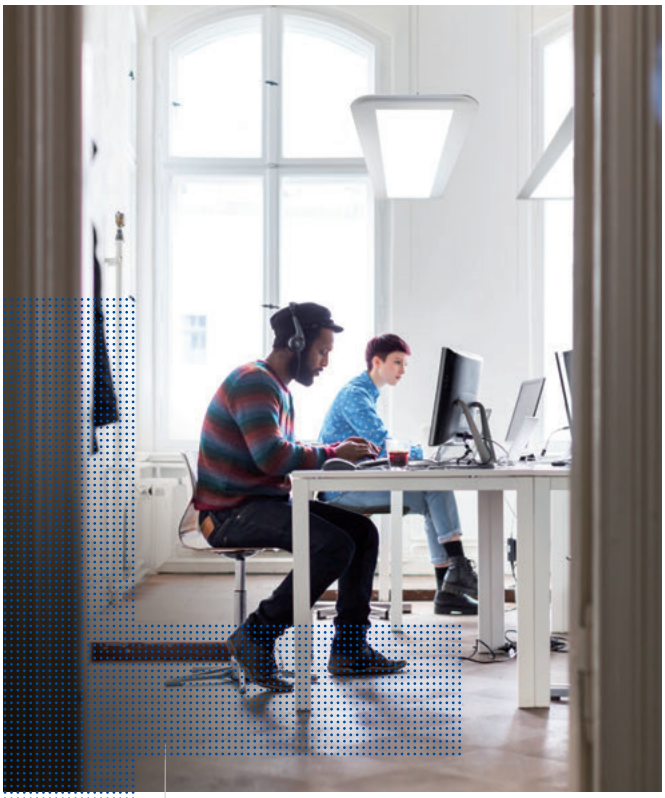
ON DEMAND
Easy Custom Colour

A range of fixtures dedicated to the work environment with soft lines and professional performance for suspension installations.

Cartesio offers different light emissions: direct indirect and combined direct/indirect in one fixture. The optical system has been developed to be suitable for use in workplaces UGR<19 (EN-12464) L65<3000 cd/m^2. Cartesio is designed to be installed in a continuous line by means of an accessory joint.

Plus



Lighting for the office

The rectangular Cartesio versions, fitted with the direct emission component guarantee more than 500lux on the work surface, in line with the requirements outlined in the EN12464-1 standard and have a UGR value of 16 which is considerably lower than the limits indicated in the standard (UGR<19), which ensures reliability and maximum freedom when designing spaces. In addition to this there is the indirect component that contributes to softly balancing the luminance to reduce user eyestrain and improve perception of the illuminated space.

MATERIAL
Body made of extruded anodised aluminium. Polycarbonate lateral end caps. Transparent polycarbonate upper safety screen. Lower diffusive screen made of ribbed, extruded opal polycarbonate.

ON DEMAND

Ra Ra90

4000K

Minimal modular suspension fixture with indirect or direct/indirect light emission with a compact size to disappear into the environment to leave space for just the architecture and the light.

Available in a modular linear system version or stand alone.

Coordinable with the indirect or direct/indirect light wall solution.

CCTLED TUBE

Control systems

	Code
	1T5349

Wireless control unit for DALI fixtures.
It generates a local DALI bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.
LxHxP=56.5x22.3x35.8mm.

	Code
	1T5352

IP20 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.
LxHxP=129x30x42mm.

2700K-3500K

A range of high performance products characterised by simple, soft and rounded lines. Available in three different versions for ceiling mounted, suspension and recessed installation.

Also available in a recessed installation version.

In all versions the LED lamps are retracted and hidden from view to ensure optimum visual comfort. The flexible installation makes it possible to use the same type of light in environments with different architectural characteristics.

OSIRIDE

GENERAL INFO
Wall or ceiling mounted fixture for halogen or compact fluorescent lamps.
Ø200mm – Ø260mm
Ø320mm – Ø400mm – Ø500mm

LAMPS
HAL – FLUO – LED
Not included

OPTICS
VWFL

MATERIAL
White painted metal body and satin opaline white glass diffuser.

A range of glass ceiling/wall fixtures satin opaline white glass and a painted white metal frame.

Five different sizes that can be equipped with halogen lamps, compact fluorescent lamps or LED lamps with E27 adapters not included.

OSIRIDE

Ø 200mm

Control systems

Code
1T5351

A Wireless Trailing Edge / IGBT dimmer managed using Bluetooth 4.0 technology.
It works with LED 230V-AC modules, dimmable LED sources and halogen lamps.
It can be installed inside a standard 503 wall switch box, lighting fixtures or ceiling canopies.
It can manage systems with a maximum absorption of 150W.
The module is wireless controlled using a Casambi app for smartphones and tablets or traditional wall switches.
IP20.
LxHxP=40.4x14x36.3mm.

PROFESSIONAL

GENERAL INFO
Wall or ceiling mounted fixture for LED, halogen or compact fluorescent lamps.
120x220mm

Recessed

GENERAL INFO
Recessed linear projector.
Lenghts 616mm – 916mm – 1216mm

LED
Optics FL, GR, WW - Linear boards
Optic SP - Led Emitter
RGBW version - Led Emitter
From 632lm to 7180lm
3000K – 4000K
Ra80
RGBW

PRODUCT EFFICACY
Up to 117lm/W

OPTICS
SP – FL – GRAZING – WALL WASHER

POWER SUPPLY
Electronic – DALI
Casambi control system available using a dedicated accessory (only for DALI version products).

MATERIAL
Extruded anodised aluminium 15µ body. Extra clear 10mm thick glass flat screen. Brushed stainless steel (AISI 316) frame. The body of the fixture can resist a static load up to 20kN and vandalism (IK10). Anti-slip glass available on request.

ON DEMAND

110-277Vac power supply (Jedi Recessed RGBW)

2700K - 3500K

A coordinated range of linear projectors for lighting large surfaces.

The multiplicity of effects, three different lengths with lumen packages proportioned to each one, maximum load and vandal resistance make it a flexible tool that can always provide solutions to various project needs in the public or private sector.

Completely sealed housing complete with external electrical connection through IP68 connectors.
Continuous line installation using accessories.

Available also in projector and RGBW versions.

Anti-theft Torx screws.

The entire range uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.

770	**1E2765**

Connection cable.
Complete with 5 pole connectors.
For the electronic and DALI version.
1E2762 - For in line adjacent connection of one 600mm projector with one 900mm projector.
1E2763 - For in line adjacent connection of one 600mm projector with one 1200mm projector or two 900mm projectors.
1E2764 - For in line adjacent connection of one 900mm projector with one 1200mm projector.
1E2765 - For in line adjacent connection of two 1200mm projectors.

Connector

Code
1E2769

Linear connection box IP66/IP68.
5 poles max. wire section 1.5mm^2.
Cable diameter range from 7 to 12mm.

JEDI

Control systems

	Code
	1E3048

A IP67 Module for individual control of external devices equipped with DALI drivers.
The module needs to be positioned in order to receive radio signals.
The distance to the lighting fixtures can reach up to 50m.
Wireless control via the Casambi application.
LxHxP=56.5x22.3x35.8mm.

	Code
	1E3049

IP67 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in outdoor applications via the Casambi application.
LxHxP=150x40x148mm.

Note

Photometrics show the maximum emission values of fixtures.

IP68: the projector is not suitable for permanent underwater installation but can withstand temporary accidental immersion to a depth of 2 metres (max.24h).
IP69: IEC/EN 60529 standard compliant.

USB-RDM Programmer code.
DMX-RDM (Remote Device Management) address planner.
Used with the “RDM Targetti” software that can be downloaded for free from the Targetti website download section.
To be used with all RGBW products.
The USB-RDM programmer manages to direct DMX-RDM fixtures if there are no BUFFER or Splitter DMXs on the section.
Please refer to the instructions for more details.

Code
1T1898

my-SCENARIO Show Store.
Digital devices designed to control dynamic lighting fixtures and programme dynamic light scenarios and sequences.
The system consists of intuitive software, compatible with Windows operating systems, able to control different hardware devices with the following functions: - record colour-changing scenarios set by the operator; - allow selection among the multiple scenarios already recorded; - transmit the control signals to the lighting system.
The software is interfaced to the PC through a USB port; the interface with lighting fixtures is featured through a DMX 512 output.
The software provides a graphic simulation of the operating keys of a lighting controller; the patching function allows the DMX control channels to be assigned to fixtures by using the internal library.
The Colour Manager function allows for quick and intuitive programming of a RGB light show, consisting of several steps with assigned duration and fading times.
The built-in calendar allows full time scheduling of show playback (month, day, hour, minutes, recurring events).
The programmed light shows can be transferred to different control interfaces.

JEDI

	Code
	1T6499

myScenario Wall.
DMX controller with a glass touch sensitive screen for architectural applications.
It can control two different DMX universes (2x 512 channels).
Stand alone function or connected to a computer using a USB port.
Software for creating scenarios (that can be downloaded from the Targetti website) included.
It can manage 10 different lighting zones and 50 scenarios per zone.
The touch keys on the front make it possible to modify and recall programmed scenarios.
USB cable included.
To be used with all RGB and RGBW products.

Wall Washer

with Louvre
FL, Grazing, Wall Washer

POWER SUPPLY
Electronic – DALI
Casambi control system available using a dedicated accessory (only for DALI version products).

MATERIAL
Extruded anodised aluminium 15µ body. Extra clear 5mm thick glass flat screen.

ON DEMAND

Ra Ra90

110-277Vac
power supply

Compact, high performance, recessed linear LED fixture.
The 34mm version is only available with a remote driver.
To be completed with a special outer casing.
Four different optics available: Spot, Flood, Grazing and Wall Washer.

The Flood, Grazing and Wall Washer optic versions can be ordered already equipped with an integrated Louvre grill with longitudinal blades to control lateral emission and reduce the risk of glare.

The entire range uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.

Also available in a projector version both for indoor and outdoor installations.

MATERIAL
Die-cast aluminium housing.
Anti slip, flush, tempered safety glass.

ON DEMAND
Ra Ra90

A range of compact inground recessed linear light fixtures with and a flush “all glass” finish” for particularly striking and elegant installation in continuous rows. Mercure comes in three different sizes to light shapes with monochromatic or RGB light.

The larger versions combine elegance and high performance; the smaller version combines a compact size, elegant design and resistance in a unique linear glass fixture that can meet walk-over requirements.

Mercure and Minimercure are subject to Cataphoresis treatment and are therefore suitable to be installed near the sea (up to 5 metres) or in hostile environments.

The entire range uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.

SECS 75.
IP67
Power supply and Control System SECS Scene Effect Control System.
SECS 75 drivers combine the following 3 functions in a single unit,: power supply to RGB LED devices, playback of pre-set colour sequences and a DMX interface for external control devices.
The SECS “Easy-Run-Menu” function is able to playback colour-changing light scenarios that are pre-stored into the driver without the use of an external driver: - 8 static colour scenarios; - 8 dynamic colour sequences; - 5 different playback speed values; - Start/Stop the selected scenario using a remote switch.
SECS 75 drivers can also be controlled through DMX 512; in this case: - DMX address (from 1 to 511) can be configured by using dip-switches; - 3 channel mode: all R-G-B outputs are controlled simultaneously by 3 DMX channels only; - 6 channel mode: the outputs are divided into 2 R-G-B groups, each one controlled by 3 different DMX channels; - DMX line termination: SECS drivers contain a 120Ohm resistance which can be activated using a dip-switch; - DMX output is available for connection to other DMX devices.
75W output.

my-SCENARIO Show Store.
Digital devices designed to control dynamic lighting fixtures and programme dynamic light scenarios and sequences.
The system consists of intuitive software, compatible with Windows operating systems, able to control different hardware devices with the following functions: - record colour-changing scenarios set by the operator; - allow selection among the multiple scenarios already recorded; - transmit the control signals to the lighting system.
The software is interfaced to the PC through a USB port; the interface with lighting fixtures is featured through a DMX 512 output.
The software provides a graphic simulation of the operating keys of a lighting controller; the patching function allows the DMX control channels to be assigned to fixtures by using the internal library.
The Colour Manager function allows for quick and intuitive programming of a RGB light show, consisting of several steps with assigned duration and fading times.
The built-in calendar allows full time scheduling of show playback (month, day, hour, minutes, recurring events).
The programmed light shows can be transferred to different control interfaces.

	Code
	1T6499

myScenario Wall.
DMX controller with a glass touch sensitive screen for architectural applications.
It can control two different DMX universes (2x 512 channels).
Stand alone function or connected to a computer using a USB port.
Software for creating scenarios (that can be downloaded from the Targetti website) included.
It can manage 10 different lighting zones and 50 scenarios per zone.
The touch keys on the front make it possible to modify and recall programmed scenarios.
USB cable included.
To be used with all RGB and RGBW products.

110-277 vac power supply
2700K-3500K

A complete range of recessed LED up-lights for outdoor lighting. The two different sizes with a wide range of optics with white LED or RGBW lamps with different lumens are the expression of versatility and performance. The entire range has been subject to “Cataphoresis” treatment and is therefore suitable to be installed near the sea (up to 5 metres) or in “hostile” environments.

Keplero uses the “Waterblock Plus” technical solution that involves resin coating the connection cables and completely resin coating the integrated driver.
The entire range uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.

The large versions of Keplero are available with an integrated electronic 220-240V driver, while the Keplero Mini has a range with both an integrated 110-240V driver and a remote 48V driver making it easier to connect several fixtures to the same driver that is available as an accessory. Cabling is simply through IP68 connectors that are equipped for In and Out looping.

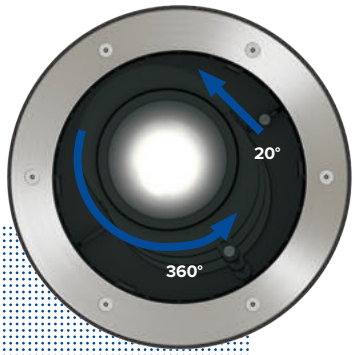
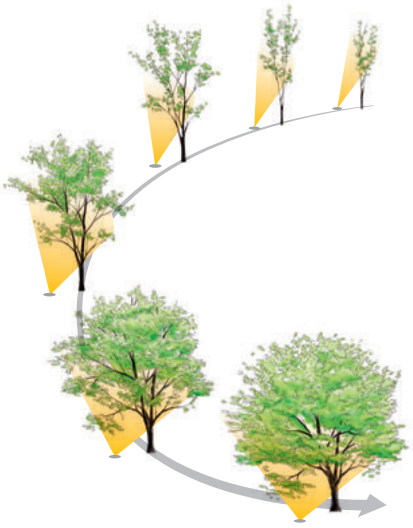
Keplero Zoom

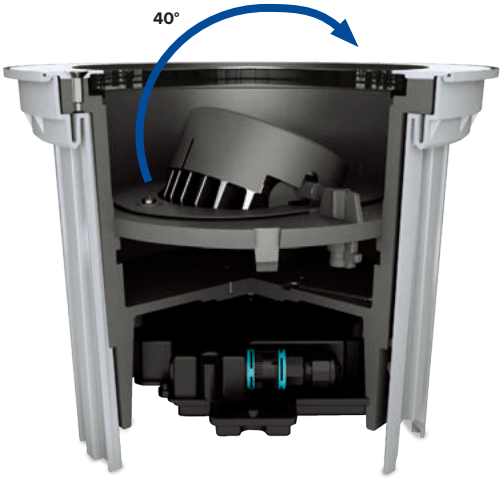


Keplero Mini Zoom

The dynamism of the optical system produces numerous luminous effects

Perfect solidity and stillness of an inground recessed fixture contrast with the dynamism of a unique optical system that gives life to countless luminous effects. The light emitted by Keplero Zoom and Keplero Mini Zoom can change at any time thanks to the innovative patented optical system that makes it possible to vary the beam opening by manually moving the optical unit. Thanks to a few simple steps it is possible to modify the emission of the fixture from spot to wide flood and adjust the beam up to 20°. Grade rings help to identify orientation and make replication simple.





Keplero Gimbal

Keplero Mini Gimbal

Gimbal optic

For precision lighting. A real projector given its high performance and the adjustability of the optical unit up to 40°.

Wall washer

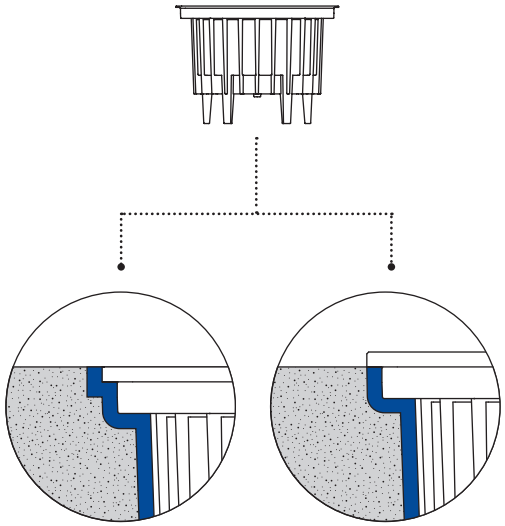
Optical system to light vertical surfaces uniformly

An optical system composed of a reflector and a lens that can not only guarantee complete uniformity on vertical surfaces but also excellent light diffusion from very close to the floor.
Available even in a Mini version (Ø 161mm)

Keplero Wall Washer

Keplero Mini Wall Washer

Plus



Brushed stainless steel or copper bronze finish

Installed flush or protruding by simply removing the frame from the nylon installation sleeve available as an accessory. Special stainless steel inserts - with silicone o-ring - house the fixing screws of the ring thus preventing corrosion deriving from galvanic interactions

Extremely resistant to corrosion

The aluminium “primary alloy” with a low copper level used for die-casting makes Keplero highly resistant to corrosive phenomenon. In addition 8µm of anodisation, 15/40µm of cataphoresis treatment and 100µm of black polyester paint on the top ensure protection to all exposed surfaces, making it suitable to be installed up to 5 mt from the sea (no submersion).

Anti-slip glass

Keplero and Keplero Mini can be equipped with anti-slip glass, ideal for public pedestrian areas.

Easy pointing

Graduated rings help to define aim adjustment and replicate it easily.

Note

All lighting fixtures have to be completed with installation sleeves.

Copper bronze version: to order this version it is necessary to add the suffix “CB” to the end of the standard code.

IP68: the projector is not suitable for permanent underwater installation but can withstand temporary accidental immersion to a depth of 2 metres (max.24h).

All versions of the KEPLERO family meet all the requirements of EN 60598-2-13 standard regarding drive-over and walk-over performances. Low temperatures on the glass which characterises the LED range of fixtures make them suitable even for installation in “special areas”, such as spaces for children.

USB-RDM Programmer code.
DMX-RDM (Remote Device Management) address planner.
Used with the “RDM Targetti” software that can be downloaded for free from the Targetti website download section.
To be used with all RGBW products.
The USB-RDM programmer manages to direct DMX-RDM fixtures if there are no BUFFER or Splitter DMXs on the section.
Please refer to the instructions for more details.

	Code
	1T1898

my-SCENARIO Show Store.
Digital devices designed to control dynamic lighting fixtures and programme dynamic light scenarios and sequences.
The system consists of intuitive software, compatible with Windows operating systems, able to control different hardware devices with the following functions: - record colour-changing scenarios set by the operator; - allow selection among the multiple scenarios already recorded; - transmit the control signals to the lighting system.
The software is interfaced to the PC through a USB port; the interface with lighting fixtures is featured through a DMX 512 output.
The software provides a graphic simulation of the operating keys of a lighting controller; the patching function allows the DMX control channels to be assigned to fixtures by using the internal library.
The Colour Manager function allows for quick and intuitive programming of a RGB light show, consisting of several steps with assigned duration and fading times.
The built-in calendar allows full time scheduling of show playback (month, day, hour, minutes, recurring events).
The programmed light shows can be transferred to different control interfaces.

	Code
	1T6499

myScenario Wall.
DMX controller with a glass touch sensitive screen for architectural applications.
It can control two different DMX universes (2x 512 channels).
Stand alone function or connected to a computer using a USB port.
Software for creating scenarios (that can be downloaded from the Targetti website) included.
It can manage 10 different lighting zones and 50 scenarios per zone.
The touch keys on the front make it possible to modify and recall programmed scenarios.
USB cable included.
To be used with all RGB and RGBW products.

USB-RDM Programmer code.
DMX-RDM (Remote Device Management) address planner.
Used with the “RDM Targetti” software that can be downloaded for free from the Targetti website download section.
To be used with all RGBW products.
The USB-RDM programmer manages to direct DMX-RDM fixtures if there are no BUFFER or Splitter DMXs on the section.
Please refer to the instructions for more details.

	Code
	1T1898

my-SCENARIO Show Store.
Digital devices designed to control dynamic lighting fixtures and programme dynamic light scenarios and sequences.
The system consists of intuitive software, compatible with Windows operating systems, able to control different hardware devices with the following functions: - record colour-changing scenarios set by the operator; - allow selection among the multiple scenarios already recorded; - transmit the control signals to the lighting system.
The software is interfaced to the PC through a USB port; the interface with lighting fixtures is featured through a DMX 512 output.
The software provides a graphic simulation of the operating keys of a lighting controller; the patching function allows the DMX control channels to be assigned to fixtures by using the internal library.
The Colour Manager function allows for quick and intuitive programming of a RGB light show, consisting of several steps with assigned duration and fading times.
The built-in calendar allows full time scheduling of show playback (month, day, hour, minutes, recurring events).
The programmed light shows can be transferred to different control interfaces.

	Code
	1T6499

myScenario Wall.
DMX controller with a glass touch sensitive screen for architectural applications.
It can control two different DMX universes (2x 512 channels).
Stand alone function or connected to a computer using a USB port.
Software for creating scenarios (that can be downloaded from the Targetti website) included.
It can manage 10 different lighting zones and 50 scenarios per zone.
The touch keys on the front make it possible to modify and recall programmed scenarios.
USB cable included.
To be used with all RGB and RGBW products.

Note

All lighting fixtures have to be completed with installation sleeves and decorative ring.

IP68: the projector is not suitable for permanent underwater installation but can withstand temporary accidental immersion to a depth of 2 metres (max.24h).

All versions of the KEPLERO family meet all the requirements of EN 60598-2-13 standard regarding drive-over and walk-over performances. Low temperatures on the glass which characterises the LED range of fixtures make them suitable even for installation in “special areas”, such as spaces for children.

Note

Photometrics show the maximum emission values of fixtures.

All lighting fixtures have to be completed with installation sleeves and decorative ring.

IP68: the projector is not suitable for permanent underwater installation but can withstand temporary accidental immersion to a depth of 2 metres (max.24h).

All versions of the KEPLERO family meet all the requirements of EN 60598-2-13 standard regarding drive-over and walk-over performances. Low temperatures on the glass which characterises the LED range of fixtures make them suitable even for installation in “special areas”, such as spaces for children.

Values relating to the power of the fixture do not take into account the absorption of the accessory driver. This value depends on the choice of driver.

USB-RDM Programmer code.
DMX-RDM (Remote Device Management) address planner.
Used with the “RDM Targetti” software that can be downloaded for free from the Targetti website download section.
To be used with all RGBW products.
The USB-RDM programmer manages to direct DMX-RDM fixtures if there are no BUFFER or Splitter DMXs on the section.
Please refer to the instructions for more details.

Code
1T1898

my-SCENARIO Show Store.
Digital devices designed to control dynamic lighting fixtures and programme dynamic light scenarios and sequences.
The system consists of intuitive software, compatible with Windows operating systems, able to control different hardware devices with the following functions: - record colour-changing scenarios set by the operator; - allow selection among the multiple scenarios already recorded; - transmit the control signals to the lighting system.
The software is interfaced to the PC through a USB port; the interface with lighting fixtures is featured through a DMX 512 output.
The software provides a graphic simulation of the operating keys of a lighting controller; the patching function allows the DMX control channels to be assigned to fixtures by using the internal library.
The Colour Manager function allows for quick and intuitive programming of a RGB light show, consisting of several steps with assigned duration and fading times.
The built-in calendar allows full time scheduling of show playback (month, day, hour, minutes, recurring events).
The programmed light shows can be transferred to different control interfaces.

Code
1T6499

myScenario Wall.
DMX controller with a glass touch sensitive screen for architectural applications.
It can control two different DMX universes (2x 512 channels).
Stand alone function or connected to a computer using a USB port.
Software for creating scenarios (that can be downloaded from the Targetti website) included.
It can manage 10 different lighting zones and 50 scenarios per zone.
The touch keys on the front make it possible to modify and recall programmed scenarios.
USB cable included.
To be used with all RGB and RGBW products.

POWER SUPPLY
24V
Casambi control system available using a dedicated accessory (only with DALI dimmer).

MATERIAL
Anodised polished aluminium body. Polished stainless steel front ring.

ON DEMAND
110-277Vac power supply

High performance fixture with a lenticular optic. The absence of visible screws and the raised ring avoid treacherous steps on the ground. The 24V power supply makes it possible to install Jupiter in environments like SPAs or near swimming pools. It is easy to install and has an extremely compact recess depth.

All Jupiter fixtures are drive-over and can also be supplied complete with an anti-glare grill or an asymmetric screen.

The entire range uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.

Also available in a projector version.

A series of miniature LED fixtures available in recessed or projector versions with monochromatic LED and RGB technology. The monochromatic versions are both mono and multi-LED.

The recessed version has a flat, flared edge and domed glass for a choreographic effect.

The entire range uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.

my-SCENARIO Show Store.
Digital devices designed to control dynamic lighting fixtures and programme dynamic light scenarios and sequences.
The system consists of intuitive software, compatible with Windows operating systems, able to control different hardware devices with the following functions: - record colour-changing scenarios set by the operator; - allow selection among the multiple scenarios already recorded; - transmit the control signals to the lighting system.
The software is interfaced to the PC through a USB port; the interface with lighting fixtures is featured through a DMX 512 output.
The software provides a graphic simulation of the operating keys of a lighting controller; the patching function allows the DMX control channels to be assigned to fixtures by using the internal library.
The Colour Manager function allows for quick and intuitive programming of a RGB light show, consisting of several steps with assigned duration and fading times.
The built-in calendar allows full time scheduling of show playback (month, day, hour, minutes, recurring events).
The programmed light shows can be transferred to different control interfaces.

	Code
	1T6499

myScenario Wall.
DMX controller with a glass touch sensitive screen for architectural applications.
It can control two different DMX universes (2x 512 channels).
Stand alone function or connected to a computer using a USB port.
Software for creating scenarios (that can be downloaded from the Targetti website) included.
It can manage 10 different lighting zones and 50 scenarios per zone.
The touch keys on the front make it possible to modify and recall programmed scenarios.
USB cable included.
To be used with all RGB and RGBW products.

Cataphoresis treatment

Grazing light effect inground fixture with a light that can be projected in one, two or more directions. The vertical angle is controlled by the lens to produce a glare-free effect which is highly effective on horizontal surfaces.

They meet all the requirements of standard EN 60598-2-13 regarding vehicle and pedestrian use and are therefore ideal for lighting all the areas provided for by the regulations, such as car parks, pedestrian zones and other designated areas.

On request it is possible to subject the product to “Cataphoresis” treatment making it suitable to be installed near the sea (up to 5 metres) or in “hostile” environments.

The entire range uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.

ON DEMAND

110-277Vac power supply (Jedi RGBW)

2700K - 3500K

A coordinated range of linear projectors for lighting wide surfaces. The multiplicity of effects, installation flexibility, three different lengths and the possibility to camouflage them into the architecture make them fundamental tools for lighting large surfaces.

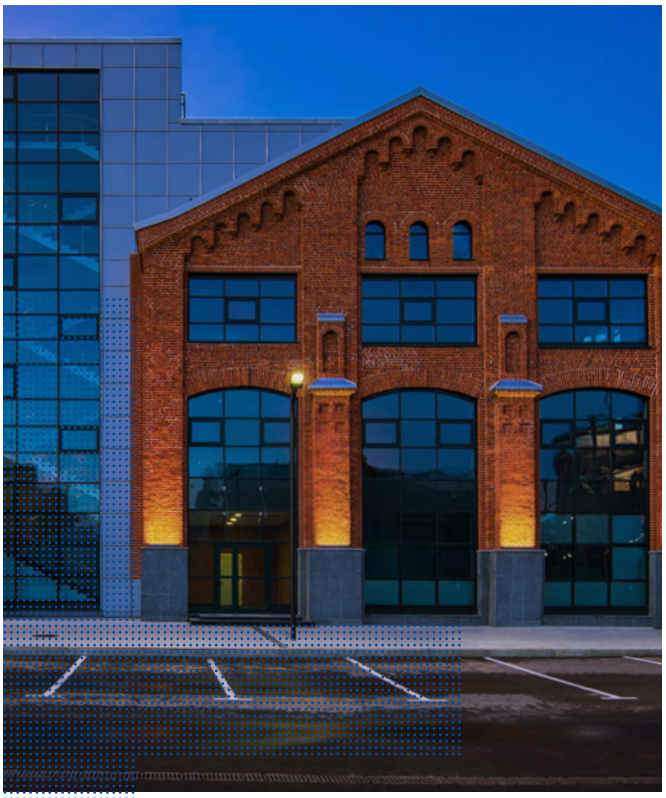
The accessory fixing system allows the projector to be adjusted with aim locking.

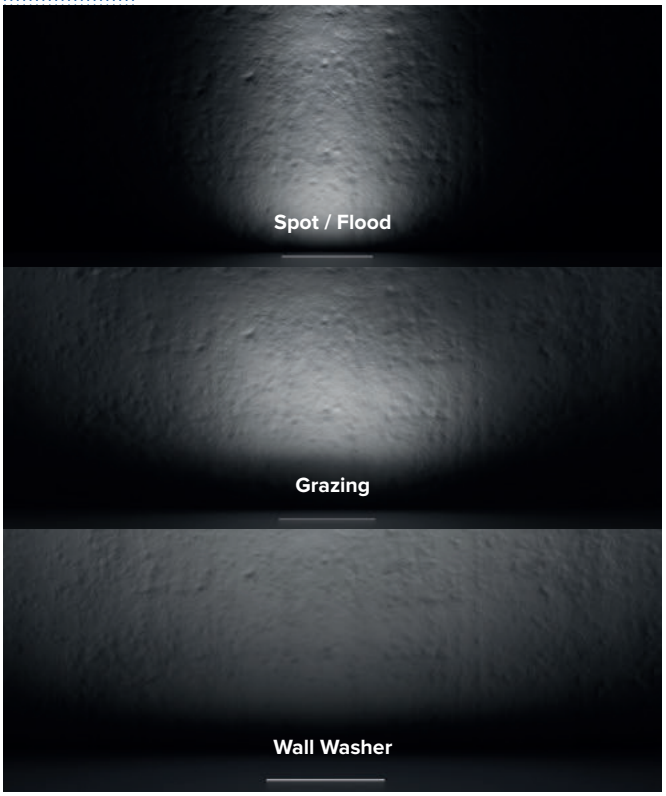
Completely sealed housing complete - external electrical connection through IP68 connectors.

Also available Inground and RGBW versions.

The entire range uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.

Plus





Four different effects

Spot and Flood optics to obtein more concentrated, precise lighting.
Grazing Optic for a grazing, uniform light effect for installation near to the wall to be illuminated.
Wall Washer Optic for a completely homogeneous effect on the wall, thus avoiding any bright stripes or separate beams that are typical of linear fixtures that are fitted with visible LED strips.

The different lengths have proportioned lumen packets to suit each one

The different lengths have proportioned lumen packets to suit each one. The same quantity of light per linear metre makes it possible to light every surface in a uniform way irrespective of the length of the fixture used.

	320	**1E2762**
	470	**1E2763**
	620	**1E2764**
	770	**1E2765**

Connection cable.
Complete with 5 pole connectors.
For the electronic and DALI version.
1E2762 - For in line adjacent connection of one 600mm projector with one 900mm projector.
1E2763 - For in line adjacent connection of one 600mm projector with one 1200mm projector or two 900mm projectors.
1E2764 - For in line adjacent connection of one 900mm projector with one 1200mm projector.
1E2765 - For in line adjacent connection of two 1200mm projectors.

Connector

	Code
	1E2769

Linear connection box IP66/IP68.
5 poles max. wire section 1.5mm^2.
Cable diameter range from 7 to 12mm.

Control systems

	Code
	1E3048

A IP67 Module for individual control of external devices equipped with DALI drivers.
The module needs to be positioned in order to receive radio signals.
The distance to the lighting fixtures can reach up to 50m.
Wireless control via the Casambi application.
LxHxP=56.5x22.3x35.8mm.

	Code
	1E3049

IP67 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in outdoor applications via the Casambi application.
LxHxP=150x40x148mm.

USB-RDM Programmer code.
DMX-RDM (Remote Device Management) address planner.
Used with the “RDM Targetti” software that can be downloaded for free from the Targetti website download section.
To be used with all RGBW products.
The USB-RDM programmer manages to direct DMX-RDM fixtures if there are no BUFFER or Splitter DMXs on the section.
Please refer to the instructions for more details.

	Code
	1T1898

my-SCENARIO Show Store.
Digital devices designed to control dynamic lighting fixtures and programme dynamic light scenarios and sequences.
The system consists of intuitive software, compatible with Windows operating systems, able to control different hardware devices with the following functions: - record colour-changing scenarios set by the operator; - allow selection among the multiple scenarios already recorded; - transmit the control signals to the lighting system.
The software is interfaced to the PC through a USB port; the interface with lighting fixtures is featured through a DMX 512 output.
The software provides a graphic simulation of the operating keys of a lighting controller; the patching function allows the DMX control channels to be assigned to fixtures by using the internal library.
The Colour Manager function allows for quick and intuitive programming of a RGB light show, consisting of several steps with assigned duration and fading times.
The built-in calendar allows full time scheduling of show playback (month, day, hour, minutes, recurring events).
The programmed light shows can be transferred to different control interfaces.

	Code
	1T6499

myScenario Wall.
DMX controller with a glass touch sensitive screen for architectural applications.
It can control two different DMX universes (2x 512 channels).
Stand alone function or connected to a computer using a USB port.
Software for creating scenarios (that can be downloaded from the Targetti website) included.
It can manage 10 different lighting zones and 50 scenarios per zone.
The touch keys on the front make it possible to modify and recall programmed scenarios.
USB cable included.
To be used with all RGB and RGBW products.

aluminium 15µ body. Extra
clear 5mm thick glass flat
screen.

ON DEMAND

Ra Ra90

110-277Vac
power supply

A compact, high performance linear LED fixture suitable for installation in small grooves or on particularly thin frames. Depending on the chosen optic it is suitable for general lighting in pedestrian areas, vaulted ceilings and vertical surfaces. Available also in a double version with an integrated or remote driver with an extremely thin profile of just 5x4 cm.

If equipped with special brackets the projector can be adjusted up to +/-90°.

The L. 300mm version is only available with a remote driver.

The versions with Flood, Grazing and Wall Washer optics can be ordered already equipped with an integrated Louvre grill.

The entire range uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.

Also available recessed version.

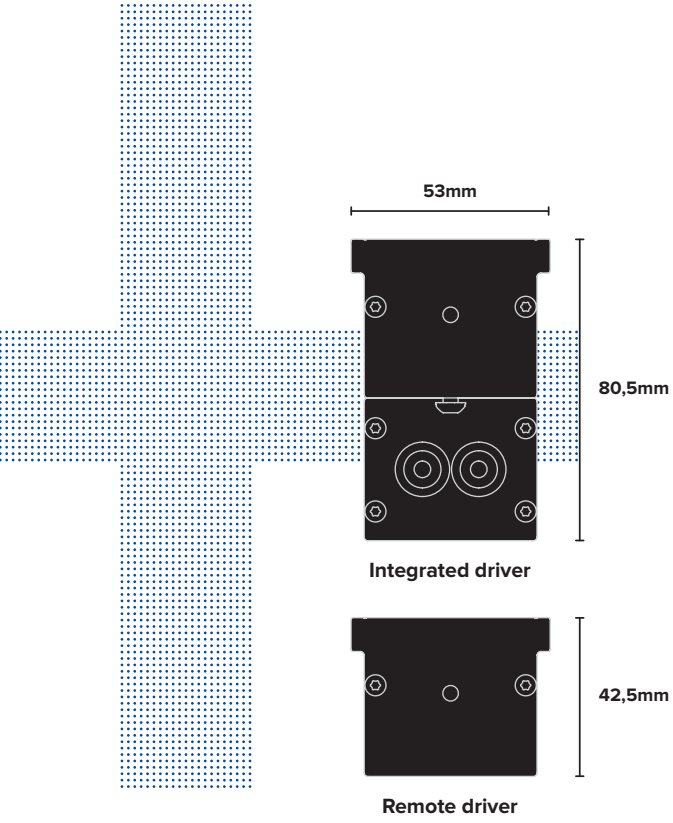
Plus



A Compact size and adjustability

There are two profiles to choose from depending on the characteristics of the installation surface: with a remote driver where it is necessary to have a compact profile, or with an integrated driver when space permits and priority is given to connection speed. Furthermore, thanks to the special brackets that are available in two different lengths, the projector can be rotated from -90° to +90° with aim locking using an Allen key for maximum reliability in the installation phase.

B Anti-glare multiple effects

The two optical systems - hybrid and lenticular - make it possible to obtain four different luminous effects: grazing light with the grazing optic, soft and uniform light on high and wide surfaces with the wall washer optic and more concentrated effects with flood and spot optics.
The versions with Flood, Grazing and Wall Washer optics can be ordered already equipped with an integrated Louvre grill and longitudinal blades to control lateral emission and reduce the risk of glare.

Cataphoresis treatment

A range of professional al projectors for outdoor architectural lighting, available in three different sizes-Small, Medium and Maxi; it has a compact and essential design that integrates into every architectural context.

Dart is extremely versatile thanks to the possibility to choose from different versions with different lumens and optics for accent lighting or uniform lighting of large surfaces. Also available with an asymmetrical optic. Dart Medium is also available in RGBW version.
On request it is possible to subject the product to “Cataphoresis” treatment making it suitable to be installed near the sea (up to 5 metres) or in “hostile” environments.

The entire range uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.

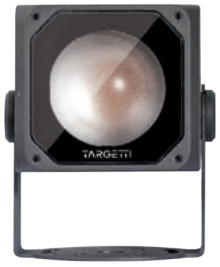
Plus

The large version in the Dart range

Is designed for architectural lighting of large surfaces and where it is essential to install fixtures at a distance.
Dart MAXI has the NSP optic to have clean, precise 8° beams. It works by reflection which means the lamp is hidden from sight and aimed towards the parabolic reflector which collimates the beam and emits a particularly defined, precise cone of light.

Dart medium is available with two asymmetrical optics

A more open version on the horizontal axis that makes it possible to widen the pitch between fixtures and a new version defined as Narrow Asymmetric that is more comfortable and controlled.



The MINI version is available with a remote power
Supply for installation in extremely confined spaces and with an integrated driver to simplify installation and accommodate cables on building facades.

Off-centre rotation to zoom
The body of the fixture towards and away from the support surface. Fitted with a graduated scale for precise aiming.

Pole multiple mounting system.
Powder coated stainless steel.
To be completed with 1E2825.
Max 4 projectors.

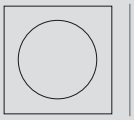
Holder Ring



Code
1E3022

Holder ring.
Powder coated stainless steel.
AxB 120x120mm.

Tool

Code
1E3029

Laser pointing system.
Installed by friction on the projector's body.
Powder coated stainless steel.
Laser included.

Connector

Code
1E2769

Linear connection box IP66/IP68.
5 poles max. wire section 1.5mm^2.
Cable diameter range from 7 to 12mm.

Code
1E2494

Multiple connection box IP68.
1 IN - 3 OUT 4 poles max. wire section 2.5mm^2.
Cable diameter range from 6 to 12mm.

DART

Control systems

	Code
	1E3048

A IP67 Module for individual control of external devices equipped with DALI drivers.
The module needs to be positioned in order to receive radio signals.
The distance to the lighting fixtures can reach up to 50m.
Wireless control via the Casambi application.
LxHxP=56.5x22.3x35.8mm.

	Code
	1E3049

IP67 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in outdoor applications via the Casambi application.
LxHxP=150x40x148mm.

USB-RDM Programmer code.
DMX-RDM (Remote Device Management) address planner.
Used with the "RDM Targetti" software that can be downloaded for free from the Targetti website download section.
To be used with all RGBW products.
The USB-RDM programmer manages to direct DMX-RDM fixtures if there are no BUFFER or Splitter DMXs on the section.
Please refer to the instructions for more details.

Code
1T1898

my-SCENARIO Show Store.
Digital devices designed to control dynamic lighting fixtures and programme dynamic light scenarios and sequences.
The system consists of intuitive software, compatible with Windows operating systems, able to control different hardware devices with the following functions: - record colour-changing scenarios set by the operator; - allow selection among the multiple scenarios already recorded; - transmit the control signals to the lighting system.
The software is interfaced to the PC through a USB port; the interface with lighting fixtures is featured through a DMX 512 output.
The software provides a graphic simulation of the operating keys of a lighting controller; the patching function allows the DMX control channels to be assigned to fixtures by using the internal library.
The Colour Manager function allows for quick and intuitive programming of a RGB light show, consisting of several steps with assigned duration and fading times.
The built-in calendar allows full time scheduling of show playback (month, day, hour, minutes, recurring events).
The programmed light shows can be transferred to different control interfaces.

Code
1T6499

myScenario Wall.
DMX controller with a glass touch sensitive screen for architectural applications.
It can control two different DMX universes (2x 512 channels).
Stand alone function or connected to a computer using a USB port.
Software for creating scenarios (that can be downloaded from the Targetti website) included.
It can manage 10 different lighting zones and 50 scenarios per zone.
The touch keys on the front make it possible to modify and recall programmed scenarios.
USB cable included.
To be used with all RGB and RGBW products.

110-277Vac power supply (Pyros Pyros RGBW Nano Pyros)

Cataphoresis treatment

A range that was designed for lighting building facades, accentuating trees and green elements and in all those contexts where precision must be combined with excellent performance.

The larger version is high performance making it suitable for lighting from long distances and large architectural structures. Where on the other hand it is required to light details the Nano and Pico versions provide optical solutions and different powers. Pyros shows the extent of its flexibility with its installation system that makes it possible to extend or contract it depending on requirements.

The Pyros and Nano Pyros versions are also available in RGBW and RGB versions.

On request it is possible to subject the product to “Cataphoresis” treatment making it suitable to be installed near the sea (up to 5 metres) or in “hostile” environments.

The entire range uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.

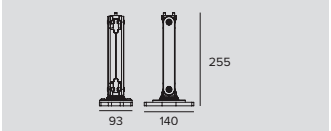
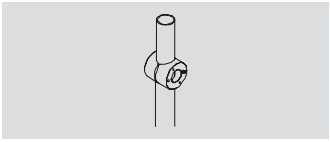
Die-cast aluminium bracket with double joint to allow 180° rotation on the vertical plane.
Graduated metal ring located at the base of the bracket to allow 360° rotation on the horizontal plane. Mechanical locking system to ensure aiming stability.
Short version.



Kg	Colour	Code
1.3		**1E2807**

Die-cast aluminium bracket with double joint to allow 180° rotation on the vertical plane.
Graduated metal ring located at the base of the bracket to allow 360° rotation on the horizontal plane. Mechanical locking system to ensure aiming stability.
Complete with a connection joint.
Long version.

PYROS



Code
1E2825

Pole bracket.
Anodised and powder coated aluminium.
Pole Ø 60mm (+/-2mm).

Code
1E2826

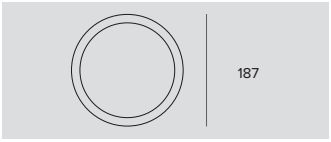
Pole head for pole with external diameter 60mm (+/-2mm) and internal diameter > 40mm.

Accessories

Filter

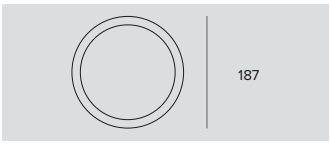
Ø	Code
187	**1E2821**

"Blade of light" effect refractive filter.
The special linear incisions modify the light beam, enlarging it in a perpendicular direction to the incisions.
With very narrow beams it is possible to obtain precise "blades" of light for special effects.
Complete with ring.



Ø	Code
187	**1E2822**

"Soft beam" effect refractive filter.
The special linear incisions reduce the variance between the primary and secondary light beam, making it more uniform.
Complete with ring.



Ø	Code

USB-RDM Programmer code.
DMX-RDM (Remote Device Management) address planner.
Used with the “RDM Targetti” software that can be downloaded for free from the Targetti website download section.
To be used with all RGBW products.
The USB-RDM programmer manages to direct DMX-RDM fixtures if there are no BUFFER or Splitter DMXs on the section.
Please refer to the instructions for more details.

Code
1T1898

my-SCENARIO Show Store.
Digital devices designed to control dynamic lighting fixtures and programme dynamic light scenarios and sequences.
The system consists of intuitive software, compatible with Windows operating systems, able to control different hardware devices with the following functions: - record colour-changing scenarios set by the operator; - allow selection among the multiple scenarios already recorded; - transmit the control signals to the lighting system.
The software is interfaced to the PC through a USB port; the interface with lighting fixtures is featured through a DMX 512 output.
The software provides a graphic simulation of the operating keys of a lighting controller; the patching function allows the DMX control channels to be assigned to fixtures by using the internal library.
The Colour Manager function allows for quick and intuitive programming of a RGB light show, consisting of several steps with assigned duration and fading times.
The built-in calendar allows full time scheduling of show playback (month, day, hour, minutes, recurring events).
The programmed light shows can be transferred to different control interfaces.

PYROS

Jupiter Pro
Frame and joint in aluminium with CNC machining, anodised and painted.

ON DEMAND
110-277Vac power supply

Range of professional projectors. Ultra-compact and adjustable Jupiter projectors are equipped with a lenticular type optical system for precise and defined beams. Made completely of ferrite painted anodised aluminium they are characterised by an aluminium bracket which allows them to be adjusted on the both the vertical and horizontal planes.

Jupiter Pro projectors, available in two different sizes ø40mm and ø50mm, are equipped with a joint that allows them to be adjusted by ±360°on the horizontal plane and 180°on the vertical plane. The multi-optic system of Jupiter Pro projectors makes it possible to vary the width of the beam opening easily – from SP15 to SP24, FL, MWFL – according to needs, without affecting the IP protection rating of the fixtures.

The 24V power supply of Jupiter Mini and Jupiter Pro means that it can even be used in humid environments like SPAs or near swimming pools. The entire range uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture. The Jupiter range is available in a recessed version.

Toyekunov Family Palace
Moscow, Russia

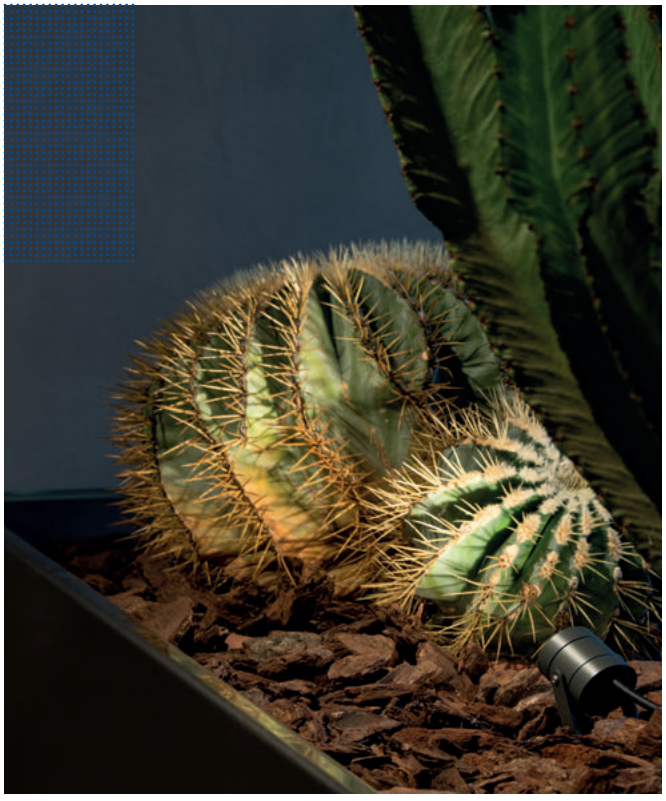
Lighting designer Tatyana Shkolnikova

Photographer Ilya Kouzov

Plus

Jupiter Mini

Jupiter Mini is the most simple and compact version in the family, with a fixed, lenticular-type optic system for precise and defined beams.
It is entirely made of anodized aluminium painted ferrite complete with a steel bracket that allows it to be adjusted in respect to both the vertical and horizontal plane.



Jupiter Pro

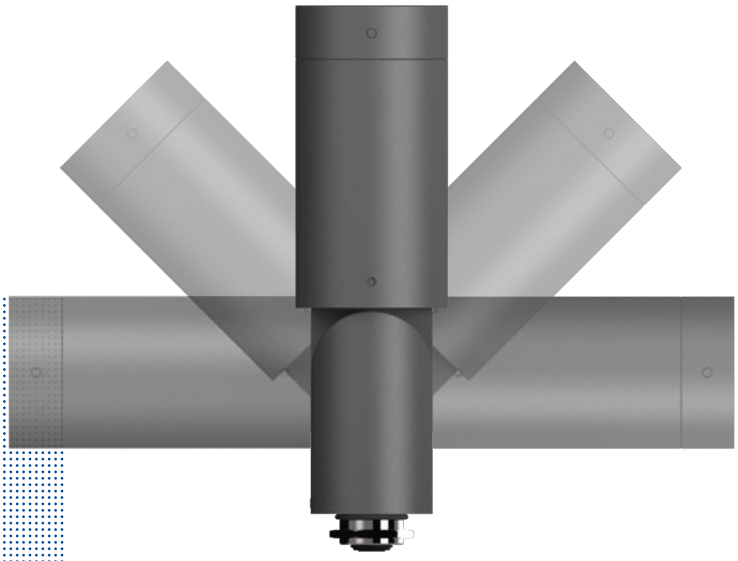
Jupiter Pro is the most professional projector of the Jupiter range and is available in two different diameters Ø40 and Ø50 with fixed or multiple optics.

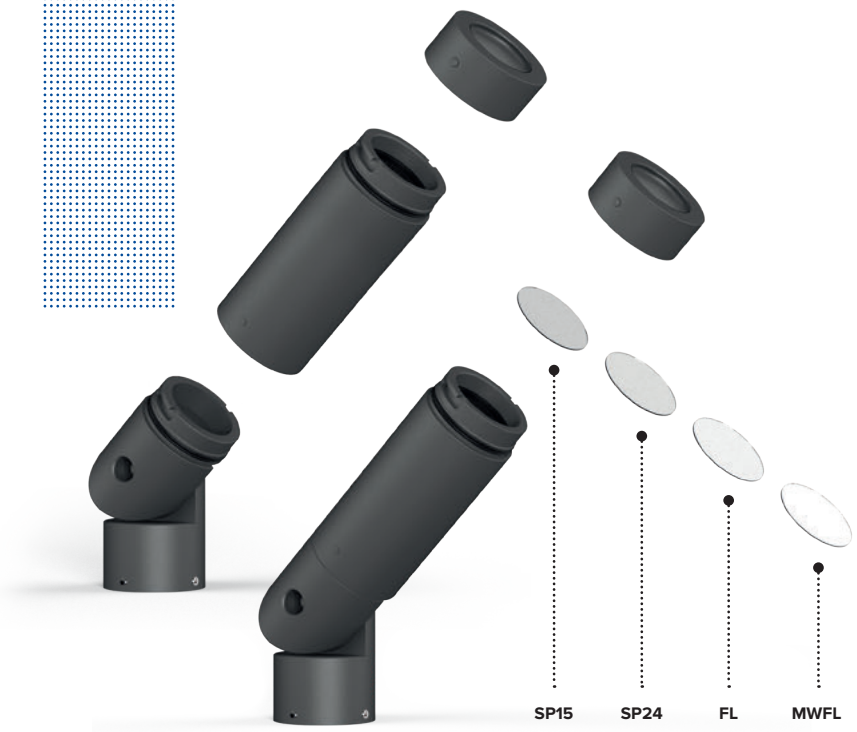
Now available with Ra90 LED.

Varied and flexible installation

Jupiter Pro is equipped with a universal mounting system and can be installed using any support equipped with a G ½ shank hole (Ø22mm). In the Targetti collection there are two different installation systems available as accessories: a spike for in-ground installation and a plate for wall or inground installation.

Plus





Maximum flexibility

The joint Jupiter Pro is equipped with makes it possible to adjust the projector ±360° on the horizontal plane and 180° on the vertical plane.

Three elements in a single projector

Jupiter Pro is made up of three elements:

- the base that can be attached to the floor or wall and then completed with the actual projector body;
- The central body, which is the heart of the system and physically isolated from the other elements with resin coating;
- The optical compartment that allows to vary the beam angle by replacing the different holographic filters.

Multi-optic versions

One of the primary features of Jupiter Pro is the ability to change the beam angle of the Multi-optic version. Without changing the IP rating, the holographic filter can be changed inside the optical compartment to obtain different beam angles. The product comes with additional holographic filters so they can be changed based on the project needs.

my-SCENARIO Show Store.
Digital devices designed to control dynamic lighting fixtures and programme dynamic light scenarios and sequences.
The system consists of intuitive software, compatible with Windows operating systems, able to control different hardware devices with the following functions: - record colour-changing scenarios set by the operator; - allow selection among the multiple scenarios already recorded; - transmit the control signals to the lighting system.
The software is interfaced to the PC through a USB port; the interface with lighting fixtures is featured through a DMX 512 output.
The software provides a graphic simulation of the operating keys of a lighting controller; the patching function allows the DMX control channels to be assigned to fixtures by using the internal library.
The Colour Manager function allows for quick and intuitive programming of a RGB light show, consisting of several steps with assigned duration and fading times.
The built-in calendar allows full time scheduling of show playback (month, day, hour, minutes, recurring events).
The programmed light shows can be transferred to different control interfaces.

	Code
	1T6499

myScenario Wall.
DMX controller with a glass touch sensitive screen for architectural applications.
It can control two different DMX universes (2x 512 channels).
Stand alone function or connected to a computer using a USB port.
Software for creating scenarios (that can be downloaded from the Targetti website) included.
It can manage 10 different lighting zones and 50 scenarios per zone.
The touch keys on the front make it possible to modify and recall programmed scenarios.
USB cable included.
To be used with all RGB and RGBW products.

ZEDGE

Family

The result of the collaboration with the architectural and design firm Gensler, the Zedge range is designed to light passage ways, stairwells and corridors with solutions with the same minimal and refined design characterised by a perfect play of proportions, inclined planes, and sharp and defined edges.

The range is available in three different sizes and with 24V and 220V integrated drivers. In addition to the first Zedge version - the extremely compact step-marker, - the range includes Zedge Line and Zedge Line Opal linear fixtures, the Zedge Pro floor washer - and the compact Zedge Bollard suitable for lighting small passage ways.

Cataphoresis treatment

Ra90

110-277Vac power supply

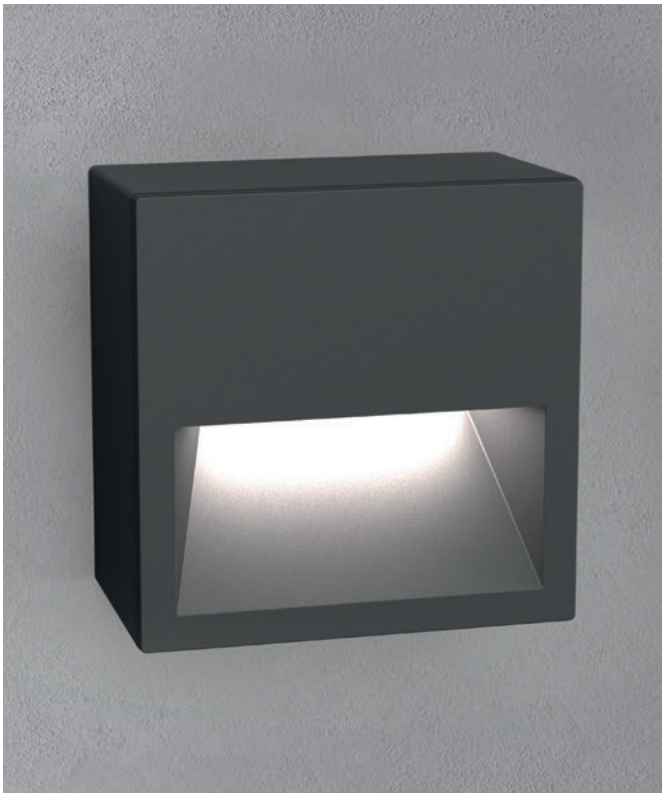
The larger and high-performance fixture it is a real floor-washer with an innovative optical system and a design based on a perfect play of proportions, inclined planes, defined corners and sharp edges.
The finishing screen can be installed on the surface or flush with the wall for maximum formal simplicity.

Optical systems is made of two independent beams that can be configured in different ways to produce multiple effects: deep, wide plus all the effects in between with the innovative adjustable version.

On request it is possible to subject the product to “Cataphoresis” treatment making it suitable to be installed near the sea (up to 5 metres) or in saline environment or in the presence of corrosive agents.

The entire range uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.

Bollard and
Wall mounted versions
Thanks to the special accessories it is now possible to install Zedge Pro even in a Wall mounted and Bollard versions, available in three different heights 400 - 800 - 1000mm.



Adjustable Version
An innovative solution that makes it possible to obtain different light effects with the same fixture by calibrating the light beam to suit different project needs. Using an Allen key, it is possible to rotate the optical system changing from a DEEP effect to a WIDE effect fluidly, choosing the most suitable position for the project from among the myriad of intermediary positions.

Deep Version
For deep lighting of horizontal surfaces where the priority is to light large open spaces or very wide pathways.

Wide Version
For lighting that favours illuminance uniformity on the longitudinal axis such as long public or private pedestrian walkways.

Cataphoresis treatment

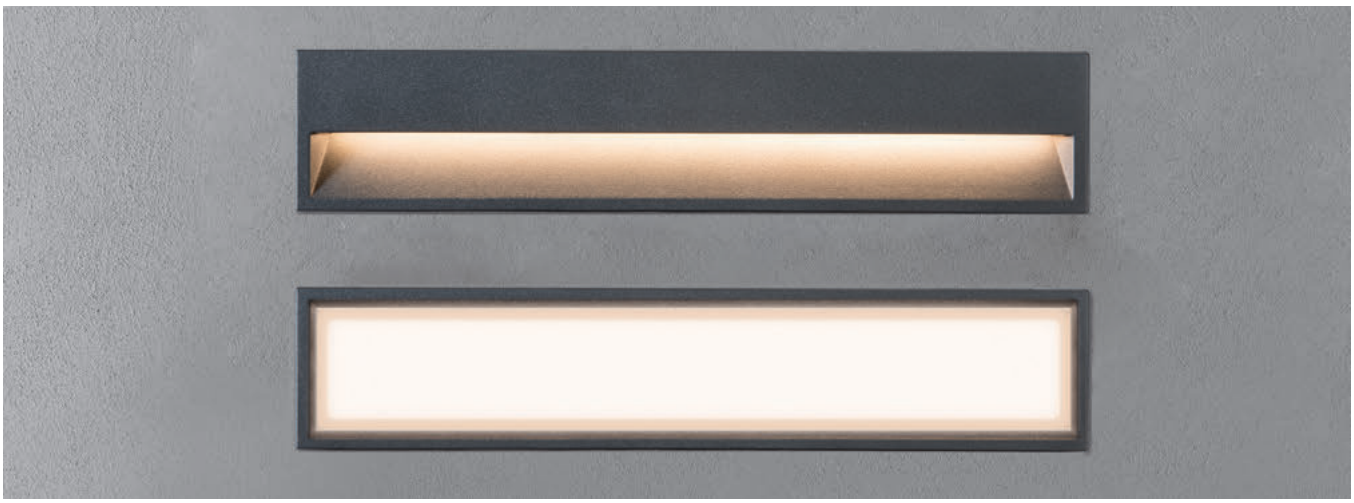
Ra90

110-277Vac power supply

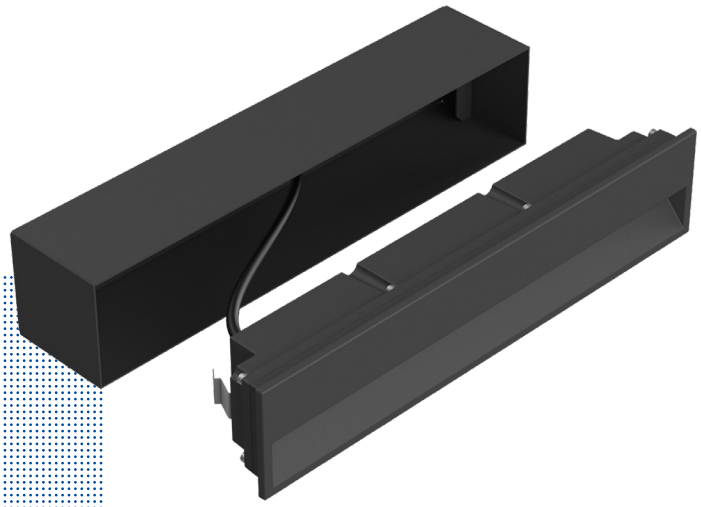
The slender and slim rectangular version of the range is available with both a floor washer reflector for discrete and controlled lighting of floors as well as in a new Opal version for a softer and more diffused effect.

On request it is possible to subject the product to “Cataphoresis” treatment making it suitable to be installed near the sea (up to 5 metres) or in saline environment or in the presence of corrosive agents.

The entire range uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.



Plus

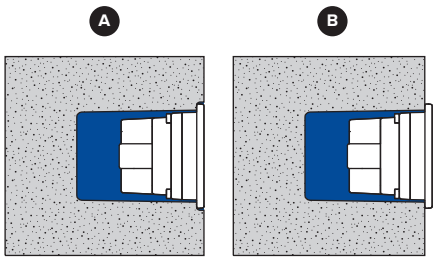


Surface installation

Thanks to the special accessory Zedge Line and Zedge Line Opal can also be surface installed.

One solution for two recessed possibilities.

The special outer casing makes it possible to install Zedge Line and Zedge Line Opal both flush (A) and surface with a protrusion of just 4.5mm (B).



Flush installation Surface installation

Cataphoresis treatment

110-277Vac power supply

Zedge, the first and smallest version in the range is an extremely compact step-marker - 63.5mm x 63.5 mm – with a minimal and well proportioned design that characterises the entire family.

Designed to light outdoor environments it is a functional yet decorative fixture at the same time, ideal even for indoor environments thanks to its compact size and the possibility to choose from different colour finishes in the RAL range.
Installation requires the use of an accessory outer casing or directly on the plasterboard.

The decorative front screen, available in three different versions and just 5mm thick simplifies and finishes any installation to ensure three different lighting effects.
Zedge Floor Washer is now available also as High Output versions.

Zedge uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.

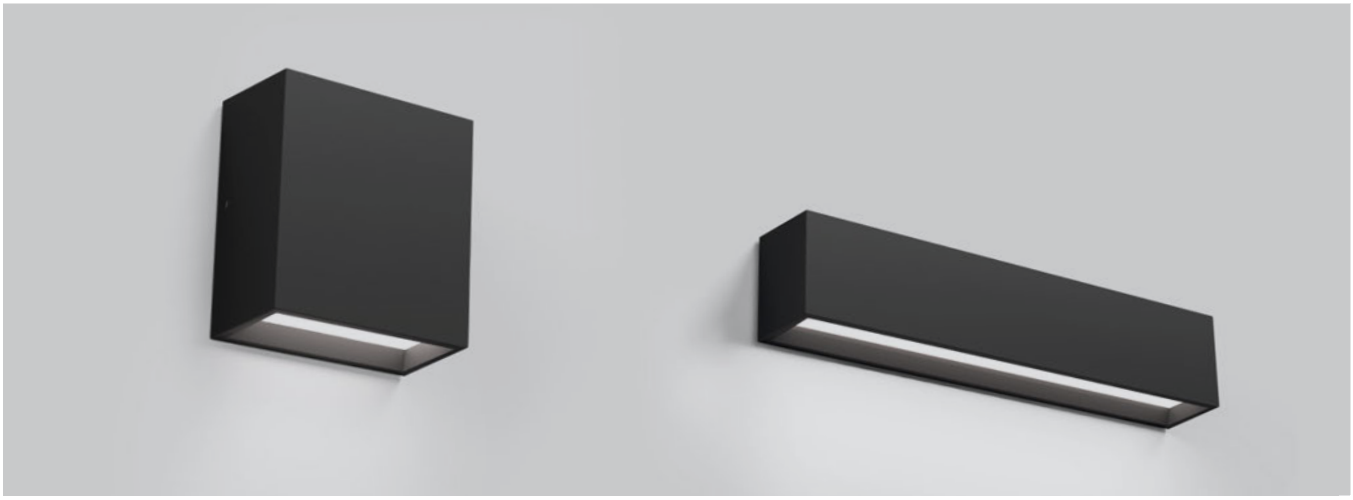
Cataphoresis treatment

110-277Vac power supply

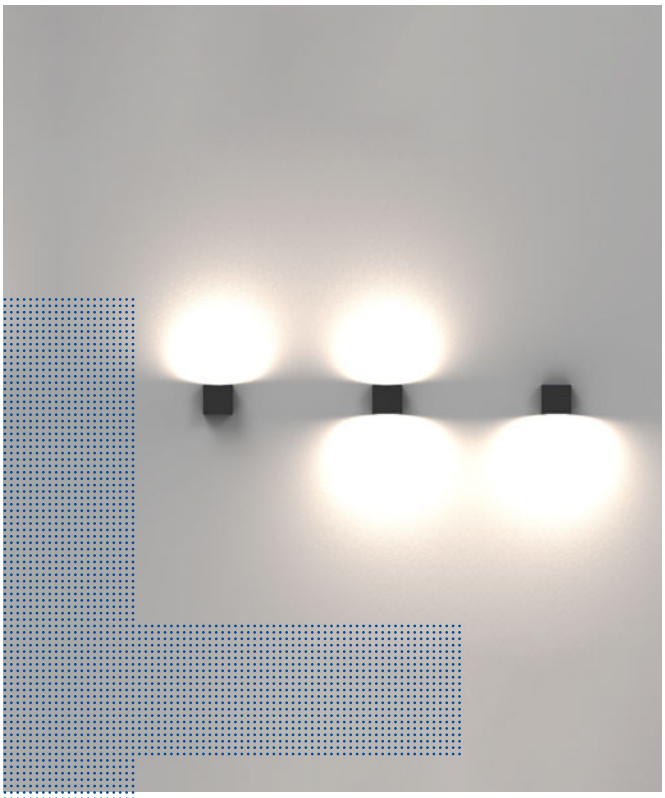
New applique for outdoor installation. Available in two different versions: Square shaped Mr Smith and rectangular shaped Mrs Smith for wall mounted installations with direct fixing on the back of the product. Both versions are available with different emissions: indirect, direct and direct/indirect.

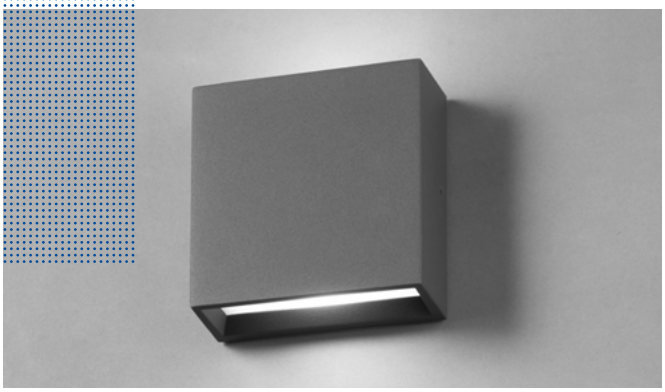
On request it is possible to subject the product to “Cataphoresis” treatment making it suitable to be installed near the sea (up to 5 metres) or in saline environment or in the presence of corrosive agents.

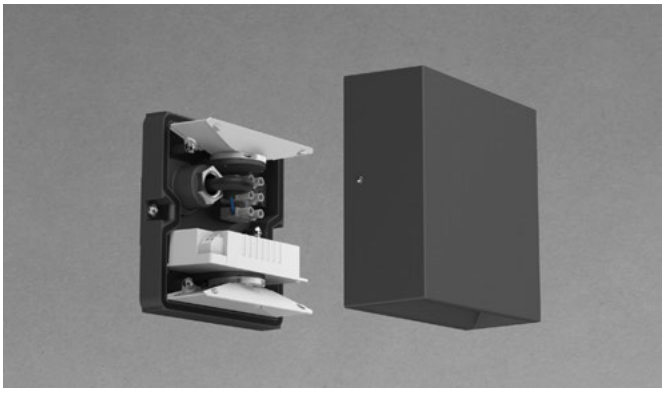
The entire range uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.



Plus







Three light skimming effects

Direct, indirect, and direct/indirect emission.
The direct light version has an inclined plane at the bottom that, together with the opal polycarbonate screen, softly accompanies the light recalling the design of the ZEDGE Series.
In the version with only indirect or direct/indirect emission the polycarbonate screen at the top softly diffuses the light.

Double geometry and easy installation

130x130 square solution and 63x300 rectangular solution, both made up of two elements for quick mounting without visible screws and an overall clean effect. The base is attached to the installation surface and the body of the device, which has different sections based on the type of emission, is attached to it.

Note

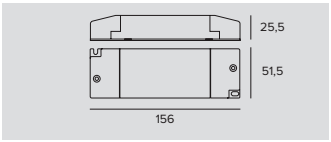
The drivers selected by Targetti make the fixtures “Safe Flicker”.

Accessories

Control systems



Code
1T6581

Dimmer for 12-24Vdc constant voltage LED driver.
1-10V/DALI control input.
IP20

Code
1E3048

A IP67 Module for individual control of external devices equipped with DALI drivers.
The module needs to be positioned in order to receive radio signals.
The distance to the lighting fixtures can reach up to 50m.
Wireless control via the Casambi application.
LxHxP=56.5x22.3x35.8mm.

Code
1E3049

IP67 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in outdoor applications via the Casambi application.
LxHxP=150x40x148mm.

Cataphoresis treatment

Inground or wall mounted LED fixture with grazing lighting effect with unbroken radial 360° emission that can be controlled using accessories to modulate the light as if it were a second skin.
The light emitted is capable of adhering perfectly to architectural surfaces and to emphasize textures and the consistency of different materials. Its compact design integrates harmoniously with the architecture making it a discrete element even during the daytime.

On request it is possible to subject the product to “Cataphoresis” treatment making it suitable to be installed near the sea (up to 5 metres) or in saline environment or in the presence of corrosive agents.

The entire range uses the “Waterblock Plus” technical solution that involves resin coating the connection cables and completely resin coating the integrated driver limiting the risk of humidity reaching the fixture.

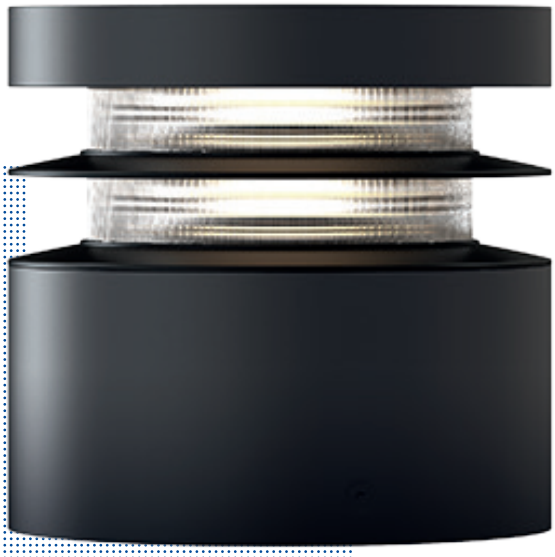
Plus



Installed on the floor Febo Evo

Is a reliable tool with minimal visual impact capable of lighting paths in depth and breadth, or separating different areas using light. It is installed on the ground with a simple support base that is supplied.

It is in wall installations that Febo Evo shows its potential the most

This sophisticated fixture emits a 360° blade of light without any interruptions that is capable of adhering to every surface like a second skin.

With the use of accessories

The light from Febo Evo can be shaped according to needs. Simple rubber elements, combined, coordinated or cut can be positioned at any point so that they “design” the light that best suits the project needs..

STILO

Wall mounted
Ceiling mounted

A range of products with the same design but with different installation characteristics: from architectural lighting of building facades and porticos right up to pedestrian walkways. Different needs and effects with a unique family feeling; wall mounted and ceiling mounted versions that produce a myriad of lighting effects, from purely graphic and defined effects to wider beams that fill large spaces.

On request it is possible to subject the product to “Cataphoresis” treatment making it suitable to be installed near the sea (up to 5 metres) or in saline environment or in the presence of corrosive agents.

The entire range uses the “Waterblock Plus” technical solution that involves resin coating the connection cables and completely resin coating the integrated driver limiting the risk of humidity reaching the fixture.

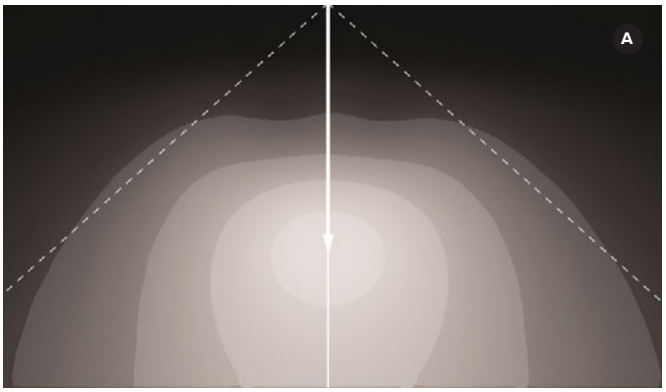
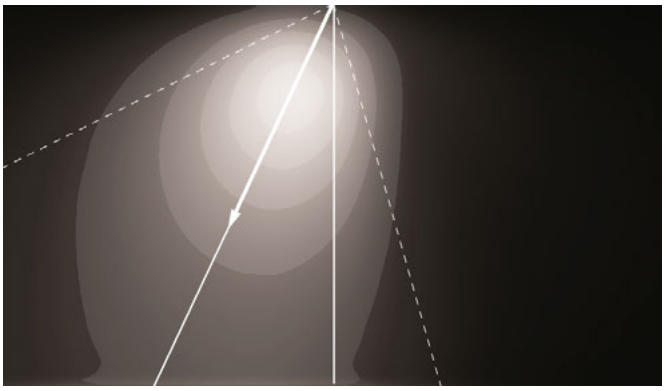
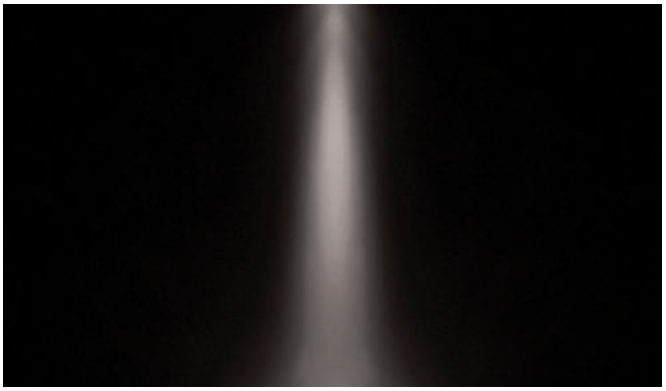
Plus

Available in two installation types
Flat (parallel to the wall) and Straight (perpendicular to the wall), both available in mono and bi-emission versions.

The ceiling mounted version
Are ideal to light porticos, the different optics make it possible to light pedestrian areas or vertical walls.







Stilo is available with four different optical solutions

A Elliptical emission
Using it like a grazing lighting is ideal to illuminate the building facades.
The ceiling mounted versions allows to light pedestrian areas in a particularly uniform way.

B Asymmetric emission
Installed for indirect emission to light arches and direct emission for pedestrian areas.
The ceiling mounted version can also be used to light walls.

C Superspot emission
Has a particularly concentrated and defined effect that is suitable for lighting a facade.

D Defined effects
Real light patterns on the wall from a blade light beam as thin as a pin, to wider, yet defined effects with beam angles of 30° and 90°.

Cataphoresis treatment

A compact fixture with a simple design with two different installation types- ceiling and wall mounted for direct light- that makes this a flexible tool in the hands of lighting designers.

In the wall mounted version the cast aluminium bracket echoes the fixture's rounded shape becoming part of its design.

On request it is possible to subject the product to "Cataphoresis" treatment making it suitable to be installed near the sea (up to 5 metres) or in saline environment or in the presence of corrosive agents.

The entire range uses the "Waterblock Smart" technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.

- Cataphoresis treatment

LED bollard specifically designed to light large open spaces.
Its mechanical characteristics (IK10) and performance make it possible to use it in every space.
The highly controlled radial emission avoids any risk of glare while still ensuring deep lighting in pedestrian areas.

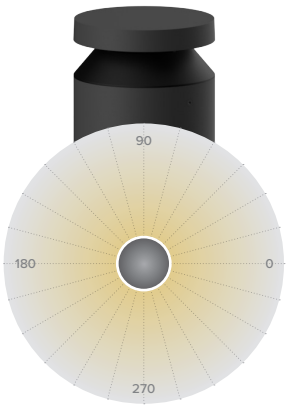
All versions have been designed to maintain the same level of lighting on the floor regardless of the combination of different versions used in the same project.

Accessory for the proper control of light pollution (0 cd/klm emission on angles equal or above 90°). On request it is possible to subject the product to cataphoresis treatment making it suitable to be installed near the sea (up to 5 metres) or in saline environment or in the presence of corrosive agents.

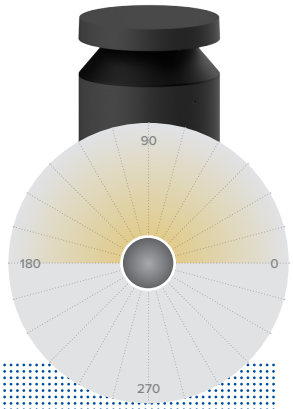
The entire range uses the “Waterblock Plus” technical solution that involves resin coating the connection cables and completely resin coating the integrated driver limiting the risk of humidity reaching the fixture.

Plus

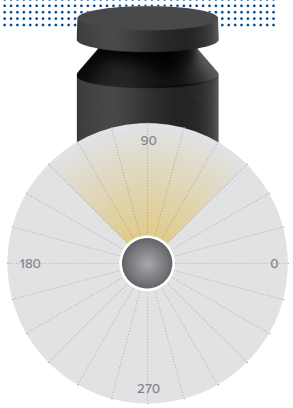
360°



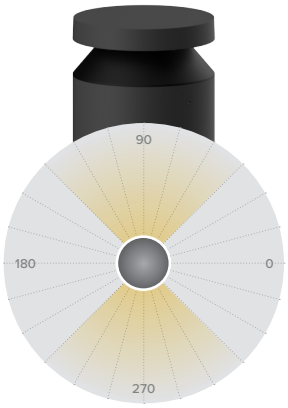
180°



90°

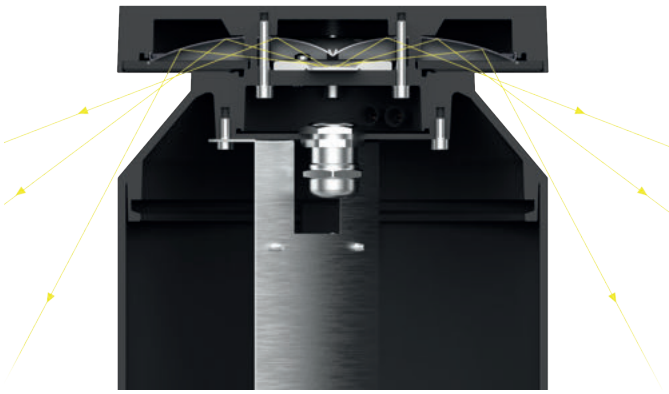


90°+90°

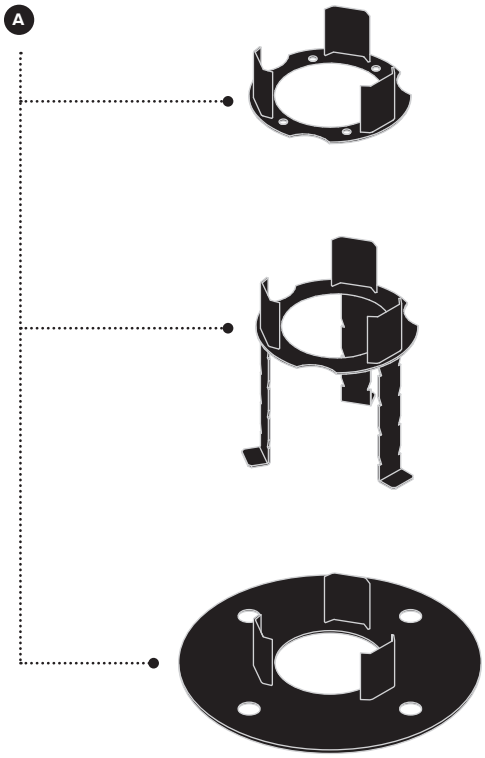


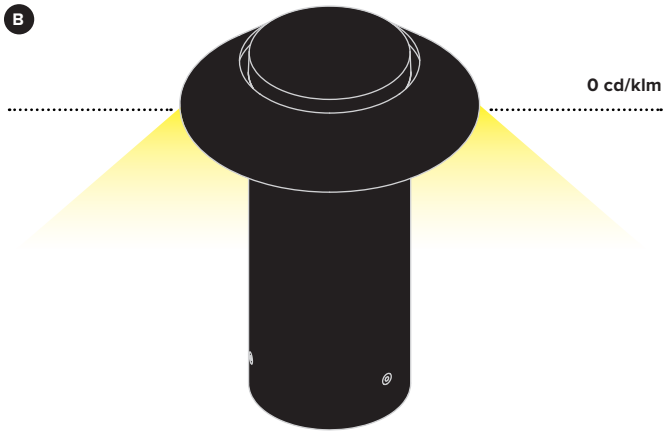
The fixture is made of three different elements

The fixture is composed of different elements that, combined together create various solutions. Four different optical units for four different radial emissions - from 90° to 360° - to be combined with poles available in three different heights 334mm, 734mm and 934mm and two different fixing systems.



400mm 800mm 1000mm





A Fixing system

There are 3 different installation systems available

- a small plate for surface installation. The plate is not visible when it is installed in the ground
- plate for installation with fixing rods for installation in concrete
- a large plate for surface installation. The plate remains visible even when the product is installed.

B Perfect control of light emission

Thanks to the new accessory for the dark light control, Mr. Bo gurantees no light spill (0 cd/klm emission) for angles ≥ 90°, complying with international norms to control the light pollution. This makes Mr. Bo ideal especially for urban landscaping in public environments, where the prescriptions on light pollution are more strict.

C Excellent lighting performance

The high quality optical system developed for Mr. Bo makes it possible to obtain an average lighting of 40 lux even with a distance of 8mt between fixtures.

Cataphoresis treatment

110-277Vac power supply

Suitable for lighting small walkways Zedge Bollard is the most compact bollard in the Zedge range developed in collaboration with the Gensler architecture and design firm. Fixtures with Floor Washer optics, allowing to light further from it maintaining the maximum visual comfort, are now available also in the new High Output version with high emission

On request it is possible to subject the product to “Cataphoresis” treatment making it suitable to be installed near the sea (up to 5 metres) or in saline environment or in the presence of corrosive agents.

The entire range uses the “Waterblock Smart” technical solution that involves resin coating the connection cables limiting the risk of humidity reaching the driver or the fixture.

Zedge Bollard is available in a 24V version to be powered by a 230V/24Vdc electronic transformer accessory and can be dimmed using a special kit. It must be completed with a special fixing system.

Thanks to the special accessories even Zedge Pro can be installed in a bollard version for a high performance solution capable of adapting to different needs.

Electronic power supply.

Note

The drivers selected by Targetti make the fixtures “Safe Flicker”.

Accessories

Connector

	Code
	1E2769

Linear connection box IP66/IP68.
5 poles max. wire section 1.5mm^2.
Cable diameter range from 7 to 12mm.

	Code
	1E2494

Multiple connection box IP68.
1 IN - 3 OUT 4 poles max. wire section 2.5mm^2.
Cable diameter range from 6 to 12mm.

	Code
	1E2493

Linear connection box IP68.
4 poles max. wire section 2.5mm^2.
Cable diameter range from 7 to 12mm.

Tool

	Code
	1E3305

(Tightening) wrench for the connector kit.

Control systems

	Code
	1T6581

Dimmer for 12-24Vdc constant voltage LED driver.
1-10V/DALI control input.
IP20

	Code
	1E3048

A IP67 Module for individual control of external devices equipped with DALI drivers.
The module needs to be positioned in order to receive radio signals.
The distance to the lighting fixtures can reach up to 50m.
Wireless control via the Casambi application.
LxHxP=56.5x22.3x35.8mm.

	Code
	1E3049

IP67 Extender for wireless control of DALI fixtures.
It generates a local DALI bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in outdoor applications via the Casambi application.
LxHxP=150x40x148mm.

DMX SYSTEM

Light Management System

How we control our fixtures

Dali

The fixture is equipped with a driver that provides a connection to a BUS DALI system for overall management of the system.

DALI is the acronym for “Digital Addressable Lighting Interface”, an international standard protocol compliant with IEC EN 62386 that guarantees the interchangeability of dimmable electronic power supplies from different manufacturers. It is used in building automation. It can be used for medium-sized and large projects and entails a preventive design with special cable routing.
Many fixtures in the Targetti collection have DALI drivers and are therefore compatible with home automation systems that integrate lighting into building automation.

Targetti Control powered by Casambi

Fixtures are controlled via wireless or Bluetooth by a smartphone or a tablet without the need for any other hardware. For Casambi on board fixtures or those equipped with DALI drivers.

LMS is the Targetti home automation lighting control system that makes it possible to manage lighting systems in wireless mode. Designed for both the consumer and professional markets LMS is the result of a combination of components from Casambi, a leading company producing wireless lighting control solutions, and Targetti light fixtures. As one of the first to apply this type of control system along with Casambi we later developed ad hoc components (Extender) that make it possible to control several DALI fixtures in wireless mode.

Dimm on board

The fixture is dimmed using a commutator located inside it.

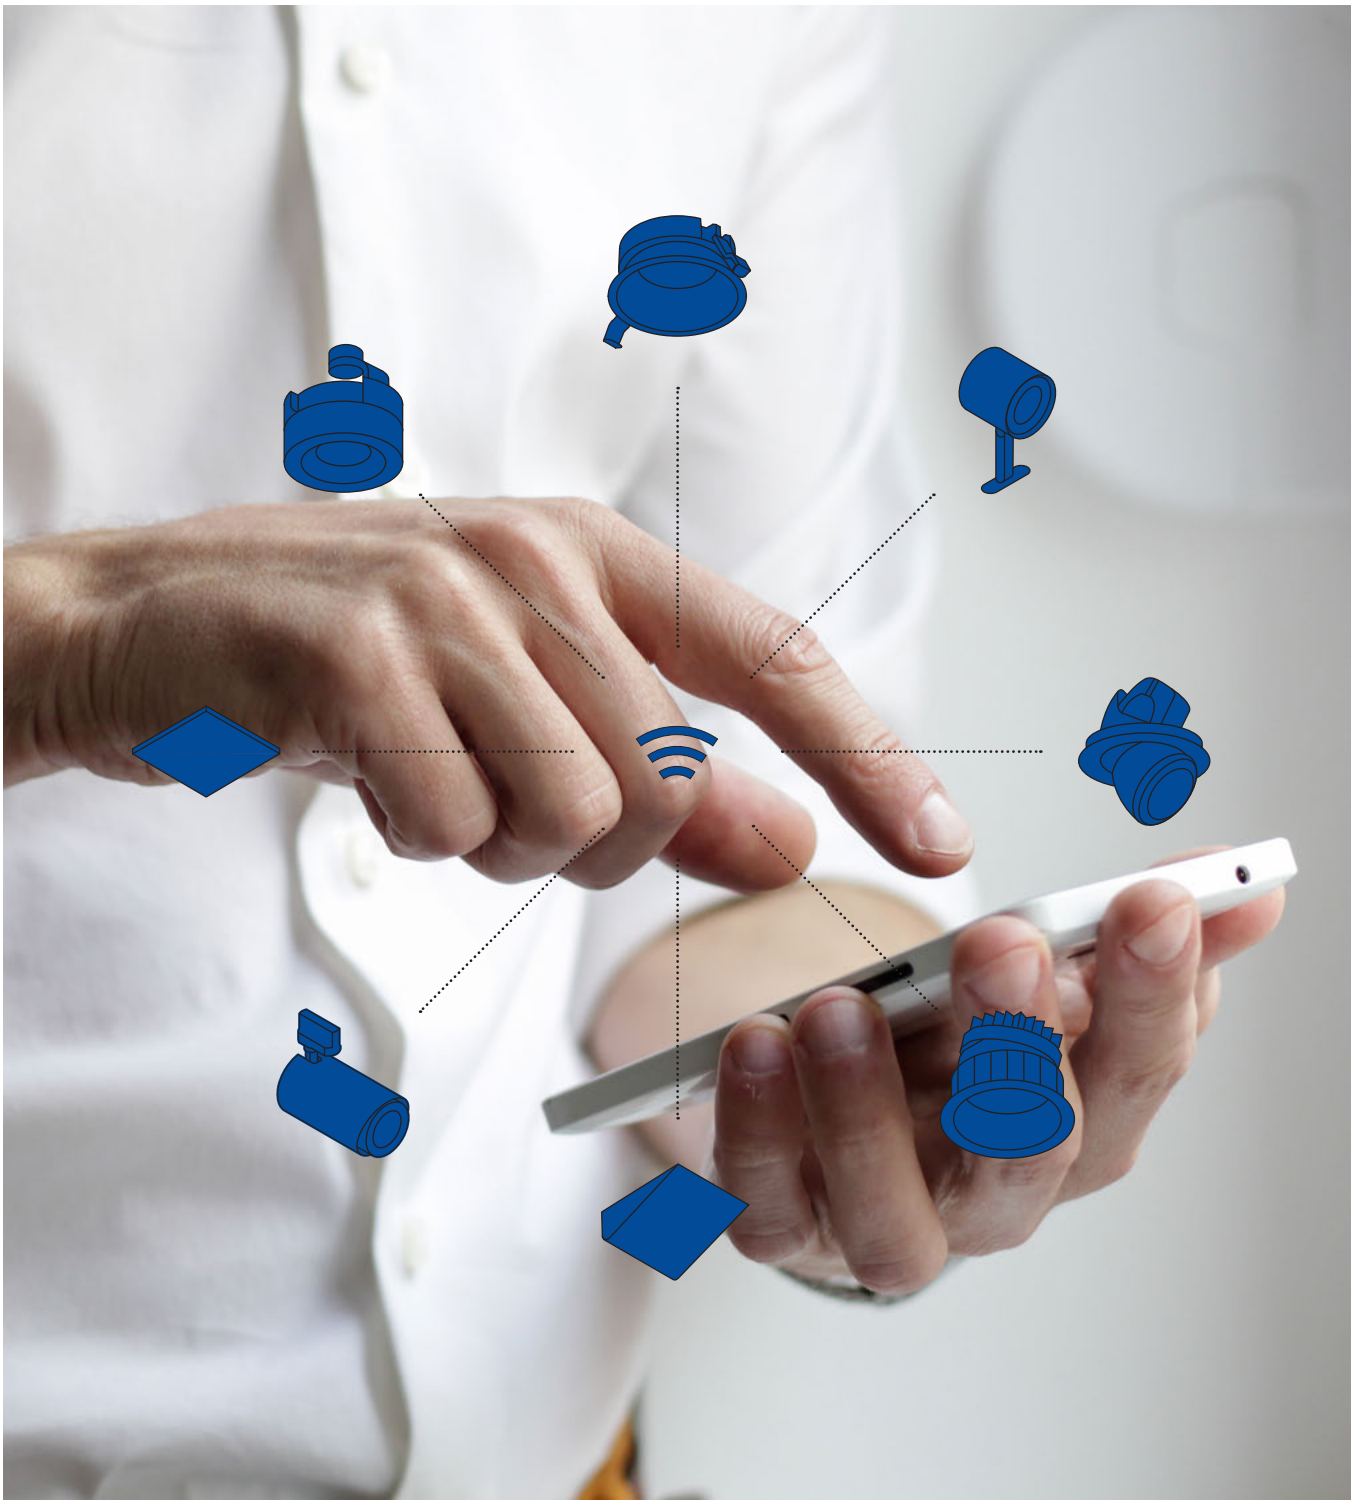
The simplest system for dimming light fixtures. A commutator inside the fixtures makes it possible to intervene manually and regulate the intensity of the light emission to modulate the light according to actual project needs.

DMX

RGB and RGBW fixtures are controlled using a DMX protocol. Software and touch screen interfaces are available to manage and create static and dynamic lighting scenes.

Targetti Control

Powered by Casambi



LMS is the Targetti wireless home automation system that can manage even the most complex lighting systems. Designed for the consumer and the professional market, LMS is the result of the combination of components from Casambi - a leading company producing wireless lighting control solutions - and Targetti light fixtures.

iOS and Android apps

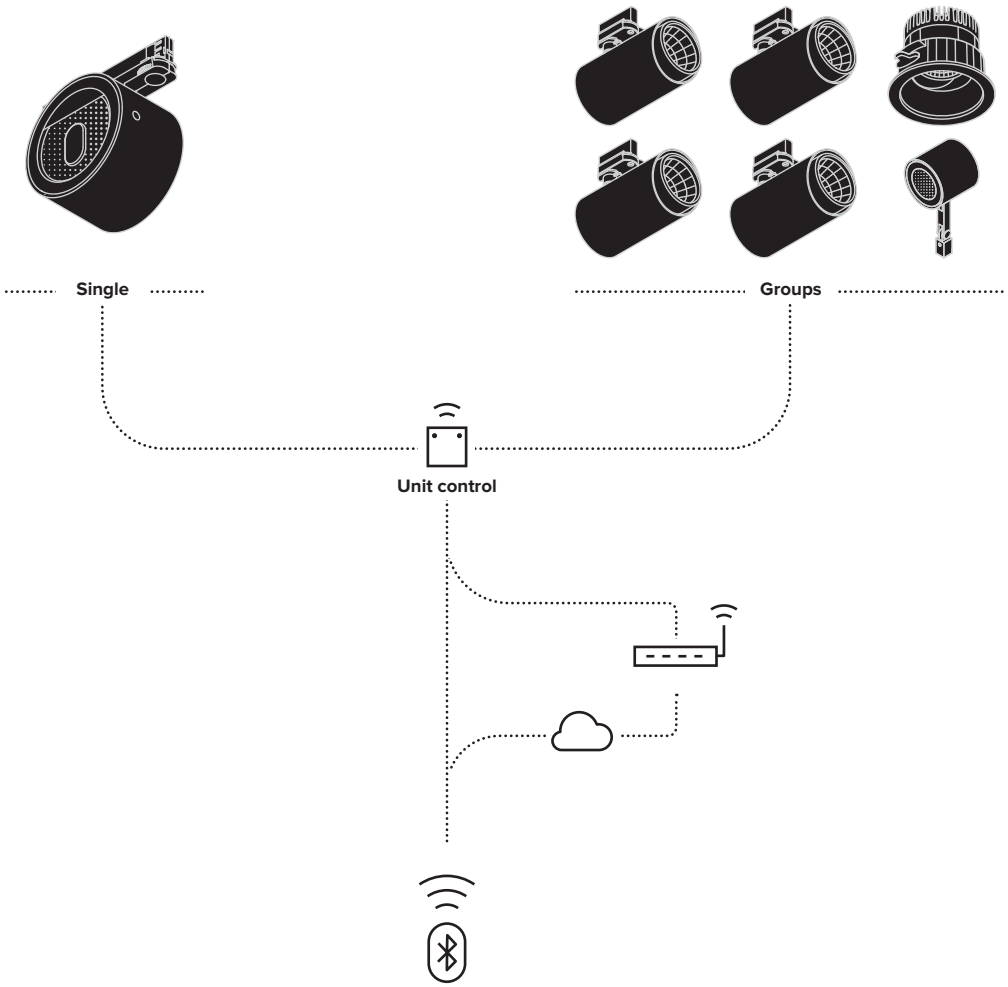
Thanks to the intuitive simplicity of the app developed by Casambi for iOS and Android, LMS ensures system operational readiness. You just need a phone or another mobile device and anyone can create and manage a lighting network singlehandedly by controlling every fixture individually or in groups depending on the needs and the functions required. Managing the system using a standard handset is also made possible with the use of specific accessories.

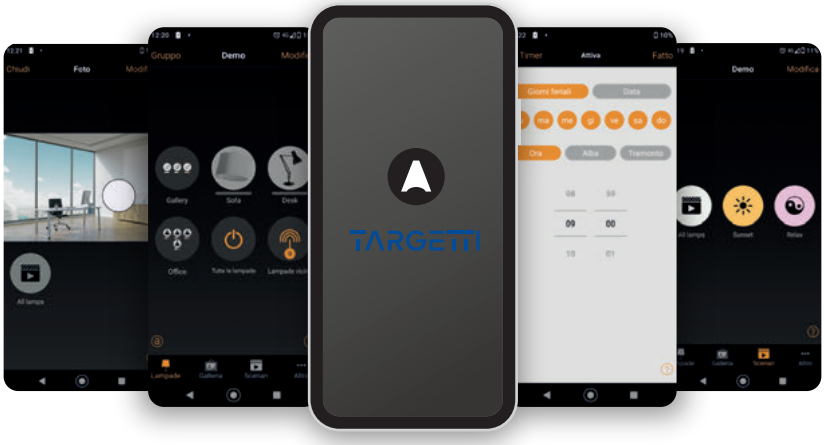
Extreme usability

The ease of use and programming of the system makes it easy to manage without the use of special control units or assistance from specialised technicians. The application recognises and associates the Targetti fixtures that are installed in the space automatically by using the BLE (Casambi Bluetooth Low Energy) proprietary protocol to communicate with the various fixtures. No Internet connection is necessary except for synchronisation functions or remote access.

Mesh self-healing network

LMS allows the final user to generate adaptive and multipoint networks: “adaptive” because every fixture can work as a buffer for all the others, adapting automatically to various contexts to optimise control signal propagation; “multipoint” because you can connect up to 127 fixtures on each network without any limit on the number of networks. The result is strong, reliable and affordable networks that manage the system, the profiles of individual fixtures and access rights.





Installation sequence

1. Choose Targetti fixtures by opting for the Targetti Casambi Ready package or Casambi accessory components
2. Download the Casambi iOS or Android App depending on the device used
3. Launch the App: the fixtures in operation will be detected automatically
4. Create one or two networks depending on the characteristics of the environment
5. Create groups of devices as needed
6. Program scenes and/or sequences.
7. Set the level of network sharing

TC — Functions

Control Type

Casambi control can be done using:
- Buttons and switches (manual control)
- App (manual digital control)
- Sensors and timers (automatic digital control)

Grouping

Different fixtures can be grouped together to be managed all together or individually. Grouping is easy and the same as grouping apps on smart devices.

Scenes

It is possible to:
- create lighting scenes for different occasions;
- manage several fixtures with just one touch to create the perfect atmosphere for specific needs;
- Use the same fixture in different scenes.

Tunable control

Casambi provides complete colour temperature control for those permitted in the range for LED sources. Just swipe your finger over the icon for the source to change the colour temperature.

Animation

It is possible to create dynamic scenes with fades from scene to scene. Animated scenes can be recalled again or repeated as required. It is possible to set both the duration of each scene and fade times between scenes.

Gallery

The exclusive gallery function makes control intuitive. Taking a photo of an environment or uploading a floor plan on the app it is possible to mark the fixtures and then recall them. Images are saved in a special gallery on the app with the fixtures displayed. Users only have to touch the ones they want to manage.

Gateway

With the gateway function it is possible to access a Casambi network remotely. Casambi enabled fixtures can be managed and network settings (administration rights required) can be changed. To enable the remote access feature, an iOS or Android device must act as a gateway on the Casambi network.

Adaptable

The Casambi system is adaptable to both simple as well as more complex projects. It is based on the possibility to create an unlimited number of networks that can be turned on and off.

Calendar

With the calendar and timer function it is possible to activate and deactivate scenes and animated scenes based on parameters such as: timetables, weekly scheduling, seasonality etc. This makes it possible to meet the needs of different users and the environments to be lit. All Casambi units keep track of time.

Casambi Accessories

External accessories with simple electric cables make it possible to control Targetti fixtures in wireless mode. For a clear and easy choice for the correct accessories, please refer to the explanatory table on page 800 that shows:

- An alphabetical list of the Targetti fixtures that are compatible with Casambi accessories
- Product variants that are compatible with Casambi accessories (only some variants of the same product can be controlled by the LMS system)
- Compatible accessories (descriptions and technical characteristics are listed below)
- Wiring diagram

Gateway DALI/Casambi available that allows fixtures fitted with mesh Bluetooth Casambi technology to interface with a traditional DALI system and to be adjusted by a DALI control unit. For further information seethe website.

Control module IP20 - DALI

1T5349

A wireless control module with a DALI interface. It generates a local DALI bus which makes it possible to connect a LED driver directly to a DALI interface. The module can only be used in a closed system and cannot be connected to an existing DALI network. The module is wireless controlled using a CASAMBI app for smartphones and tablets using Bluetooth 4.0 technology. The devices create an adaptive, secure and reliable wireless mesh network that can control a large number of fixtures in a simple and efficient way. IP20.

Power supply	220-240 VAC
Power	1,1W - PF 0,6
Max current	0,6 Amp AC
Max n. DALI driver	1
Max n. 1-10v driver	1
Dimensions	56.5x22.3x35.8mm
Exit	1-10V / DALI

Dimmer wireless Bluetooth

1T7944

Wireless Bluetooth Dimmer capable of handling constant voltage loads of 12V or 24V subdivided into 4 channels with PWM output. This dimmer must be connected between the 12V or 24V power supply and the constant voltage LED module. The maximum total current that can be supplied by the control unit is 6A (equivalent to a total of 144W) that can be divided between the 4 outputs. Compatible with Minimercure RGB and Micromercure.

Power supply	12/24 VDC
Power	144W (24V) - 72W (12V)
Max current	6A
Max n. DALI driver	
Max n. 1-10v driver	
Dimensions	72,6x18x30mm
Exit	PWM

Xpress

1T5350

Xpress is a wall mounted wireless user interface; it can be installed wherever the user chooses thanks to battery power with autonomy of 2-3 years providing direct access to all the most important CASAMBI system control functions. As well as switching the fixtures on and off, Xpress controls dimming, colour temperature change in fixtures equipped with this technology, and control of individual fixtures and lighting scene or sequence management.

Bridge DALI/Casambi

1T8173CA

A fixture that allows fixtures equipped with mesh Bluetooth Casambi to interface with a traditional DALI system and to be adjusted by a DALI control unit. Inside the usual DALI circuit it is possible to have a maximum of 64 cabled DALI and Casambi wireless devices. It only works with Casambi Evolution networks. The DALI Bridge is transparent in the DALI system, and therefore does not require an address. There is no need for a power supply given that it is supplied directly by the DALI bus.

Dimensions	40,4x14x36,3mm

Trailing Edge dimmer IP20

1T5351

A Wireless Trailing Edge / IGBT dimmer managed using Bluetooth 4.0 technology. It works with LED 230 V-AC modules, dimmable LED sources and halogen lamps. It can be installed inside a standard 503 wall switch box, lighting fixtures or ceiling canopies. It can manage systems with a maximum absorption of 150W. The module is wireless controlled using a CASAMBI app for smartphones and tablets or traditional wall switches. IP20

Power supply	85-240 VAC
Power	0,3W - PF 0,35
PMax power fixtures*	
Dimensions	37x41x14mm

*Consultare le istruzioni di montaggio

Extender IP20 - DALI

1T5352

Extender IP20 allows for wireless control with a DALI interface.
It generates a local DALI bus with the capacity to drive up to 64 fixtures and can control groups of fixtures in indoor applications. It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A. It prevents any change to the management features provided by the CASAMBI system.

Power supply	100-240 VAC
Power	2,7W - PF 0,6
Max current	6 Amp AC
Max n. DALI driver	64
Max n. 1-10v driver	30
Dimensions	129x30x42mm

Control module IP67

1E3048

A IP67 Module for individual control of external devices equipped with DALI drivers. The module needs to be positioned in order to receive radio signals. The distance to the lighting fixtures can reach up to 50m.

Power supply	220-240 VAC
Power	1,1W - PF 0,6
Max current	0,6 Amp AC
Max n. DALI driver	1
Max n. 1-10v driver	1
Dimensions	120x65x30mm

Extender IP67

1E3049

A IP67 Extender allows for wireless control with DALI interfaces.
It generates a local DALI bus with the capacity to drive up to 64 fixtures and can control groups of fixtures in outdoor applications. It prevents any change to the management features provided by the CASAMBI system.

Power supply	100-240 VAC
Power	2,7W - PF 0,6
Max current	6 Amp AC
Max n. DALI driver	64
Max n. 1-10v driver	30
Dimensions	150x150x40mm

Unità di controllo IP20 - DT8

1T5349DA8

Wireless control unit for DALI8 fixtures.
It generates a local DALI8 bus that can control individual fixtures.
The module can be connected to an existing DALI network.
The module is wireless controlled using a Casambi app for smartphones and tablets using Bluetooth 4.0 technology.
The devices create a wireless mesh network that can control up to 128 fixtures.
IP20.

Dimensions	56,5x22,3x35,8mm

Extender IP20 - DT8

1T5352DA8

IP20 Extender for wireless control of DALI8 fixtures.
It generates a local DALI8 bus with the capacity to drive up to 64 fixtures.
Can control DALI fixtures in indoor applications via the Casambi application.
It is also equipped with a relay that can control non-dimmable fixtures up to a maximum of 6A.

Dimensions	129x30x42mm

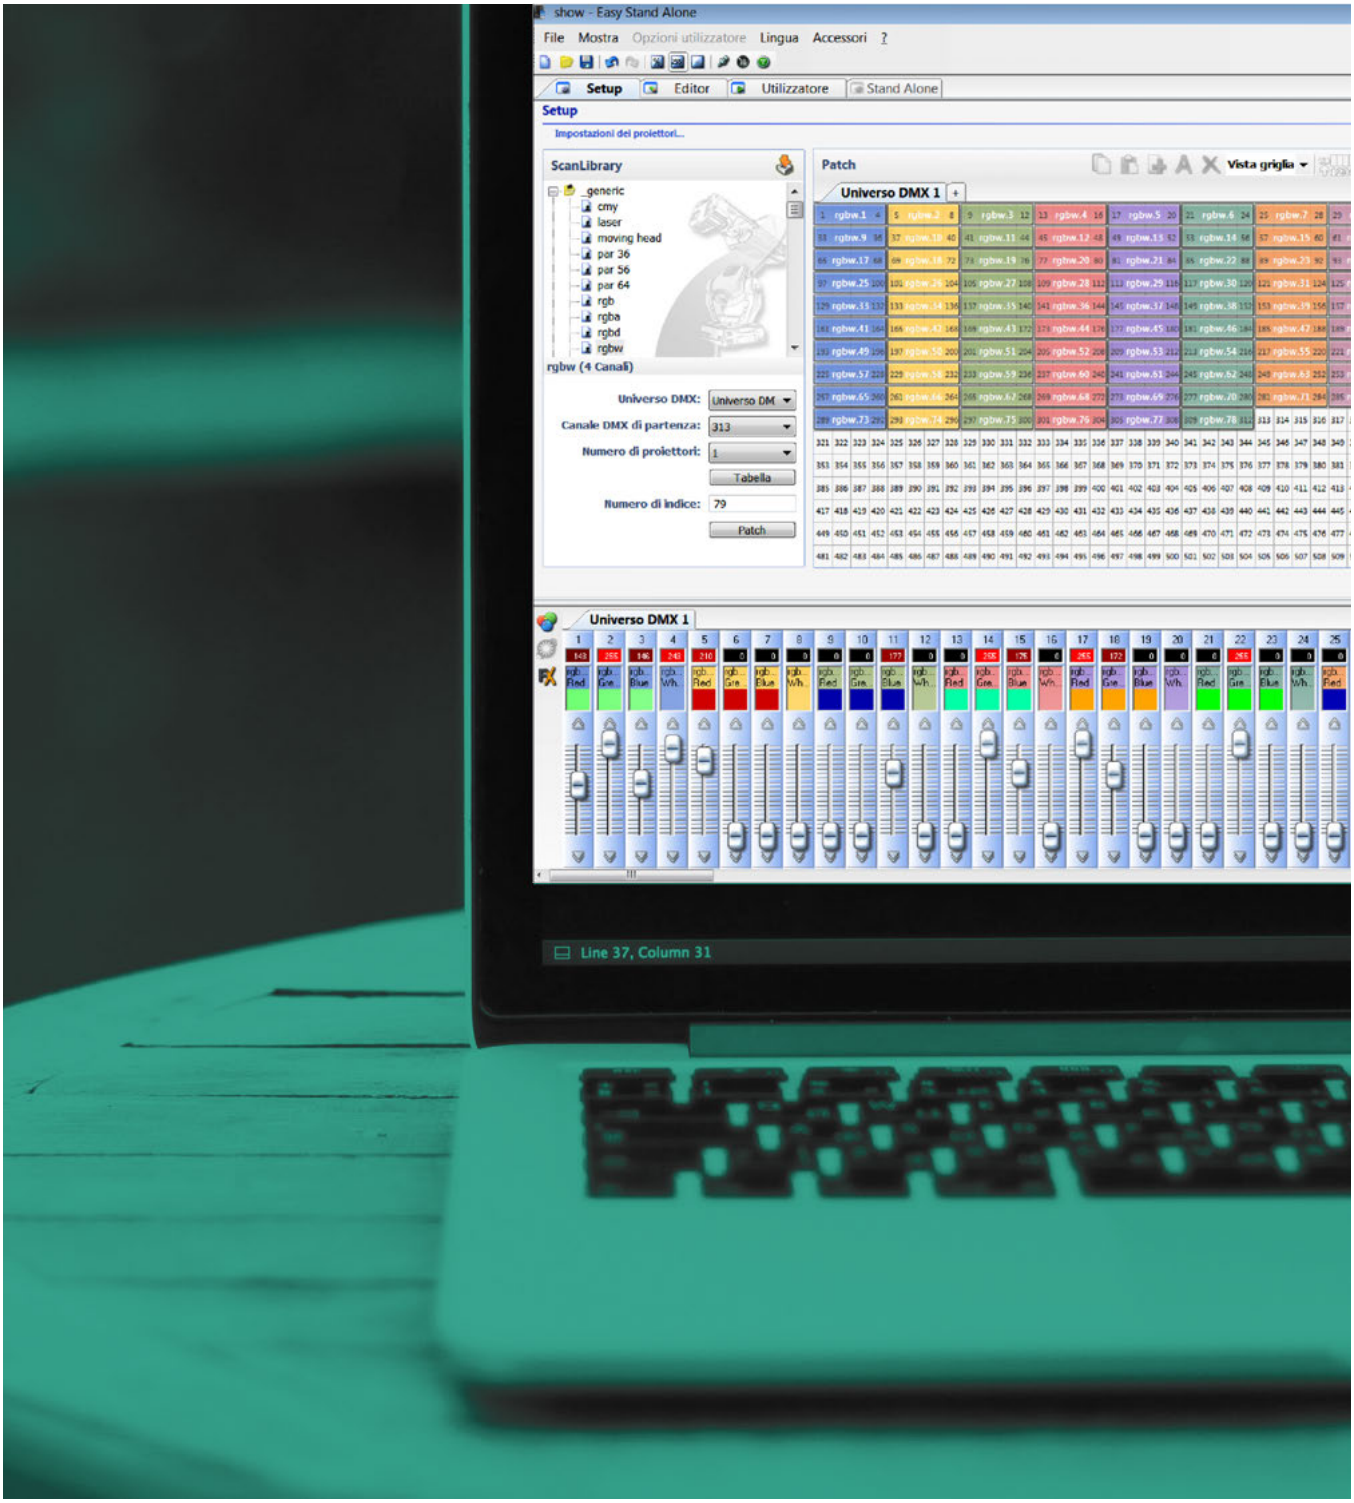
DMX

Control system for DMX, Tunable White RGB and RGBW fixtures



For programming and control RGB and RGBW fixtures use the DMX 512 digital protocol, the most widespread and proven standard for smart light control. This allows for complete compatibility with other fixtures on the market and makes a wide variety of accessories available at a reasonable cost.

Fixture power supply

LED RGB and RGBW fixtures need special power supplies with PWM (Pulse Width Modulation) technology that makes it possible to regulate the light intensity separately of primary colours.
In larger RGB and RGBW products the electronic power supply is always combined with the one used for dynamic control (DMX); in this case the fixtures are self-sufficient and defined as "smart"; smaller fixtures on the other hand require an external device called a SECS BOX that can power and control several fixtures at the same time.
RGB fixtures and drivers are compatible with the DMX control protocol and are fitted with a dip-switch for address programming and operating modes. RGBW fixtures are compatible with the DMX – RDM protocol that allows for remote programming via the data line.

Automatic operation

To programme colour-changing light scenarios an external device is usually needed.
Thanks to the "Easy-Run-Menu" function the so called "intelligent" RGB fixtures and the SECS drivers can operate automatically performing dynamic colour sequences without any external controller. Through internal dip-switches it is possible to select among 16 different chromatic sequences:
- 8 static colour scenarios
- 8 dynamic colour sequences
- 5 different playback speed values (30sec, 80sec, 160sec, 320sec, 740sec).

"Master/slave" - Configuration

RGB Fixtures can be configured in a master/slave configuration where a virtually unlimited number of fixtures is controlled by a main one. In case of "non intelligent" fixture the master/slave configuration is achieved through a SECS BOX.

SECS 75/36

Power supply and Control System SECS Scene Effect Control System

SECS 75 and SECS 36 drivers combine, in a single unit, the following 3 functions: power supply of RGB LED devices, playback of pre-set colour sequences and DMX interface for external control devices. The SECS "Easy-Run-Menu" function allows to playback of colour-changing light scenarios that are pre-stored into the driver, without the use of any external driver:

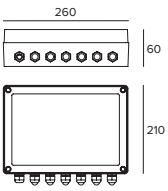
- 8 static colour scenarios;
- 8 dynamic colour sequences;
- 5 different playback speed values;
- Start/Stop of the selected scenario through a remote switch.

SECS 75 and SECS 36 drivers can also be controlled through DMX 512; in this case:

- DMX address (from 1 to 511) can be configured by using dip-switches;
- 3 channels mode: all R-G-B outputs are controlled simultaneously by 3 DMX channels only;
- 6 channels mode: the outputs are divided in 2 R-G-B groups, each one controlled by 3 different DMX channels;
- DMX line termination: SECS drivers contain a 120Ohm resistance which can be activated using a dip-switch;
- a DMX output is available for connection to other DMX devices.

SECS 75 **1E1401**

1,5 IP67



Output 75W

Power supply: 100-240 VAC, 50-60 Hz with automatic adjustment and short circuit protection

Max. output power: 75W

Output voltage: maximum 24 VDC

Driving current can be selected using dip-switches: 350 mA (for 1W leds) or 700 mA (for 3W leds)

Controllable led devices: RGB led with common anode (+24 VDC, 4 wires) and power RGB led (1-3W, 6 wires)

Led control mode: Pulse Width Modulation (PWM)

Resolution: 8 bytes with 256 levels equal to 16.770 million colours

Digital interface: RS485 with opto-isolator and integrated buffer, compatible with USITT DMX 512 (1990) protocol

Input: socket for DMX signal, over-voltage protection

Outputs (modular terminal boards) that can be used simultaneously:
- 2 outputs for constant voltage led devices
- 2 outputs for constant current
- 1 DMX output (over-voltage protection)

Operating configuration: through dip-switches

Internal diagnostics: led signalling correct or erroneous DMX connection

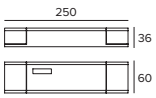
Firmware updates: by PC using DMX input

Operating temperature: -20° +50°C

SECS 36

1T2245

1,25 | IP20



Output 35W

Power supply: 90-240 VAC, 50-60 Hz with automatic adjustment and short circuit protection

Max. output power: 35W

Power factor 0.9 (PFC)

Led control mode: Pulse Width Modulation (PWM)

Output voltage: maximum 30 VDC, SELV

Driving current 350 mA

Controllable devices: power RGB led (1-3W, 6 wires), 9 LED for colour max

Resolution: 8 bytes with 256 levels equal to 16.770 million colours

Digital interface: RS485 with opto-isolator and integrated buffer, compatible with USITT DMX 512 (1990) protocol

Input: socket for DMX signal, over-voltage protection

Outputs:
- 2 outputs for constant current LED devices
- 1 DMX output with over-voltage protection

Operating configuration: through dip-switches

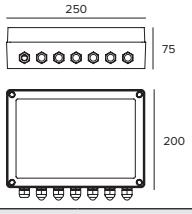
Internal diagnostics: led signalling correct or erratic DMX connection

Operating temperature: -20° +50°C

Optosplitter

1T2266

0,85 | IP66



4 ch

Device that has to be used for splitting a DMX 512 line to create up to four new branches, each fully optoisolated from the others. Optical isolation of each line increases transmission reliability, since it eliminates any possibility of ground looping.
OptoSplitter 4ch also amplifies the DMX signals in output; this permits extending the transmission length to the maximum recommended by the DMX standards; each of the new DMX lines may be used as an independent line and each can handle up to 32 devices (not buffered). The fixture is not RDM compatible.

Power supply: 100-240 V AC, 50-60 Hz input (built-in)

Power consumption: 5W

Main switch for switching the device ON/OFF

Input: 1 input for DMX 512 - USITT 1990 signal

Outputs: 4 optoisolated, amplified DMX 512 outputs (3 kV), 1 amplified output for daisy-chain connection

Connectors: modular terminal blocks inside the housing

DIP switch: for inserting terminal resistor at end DMX line

Protection classification: IP66

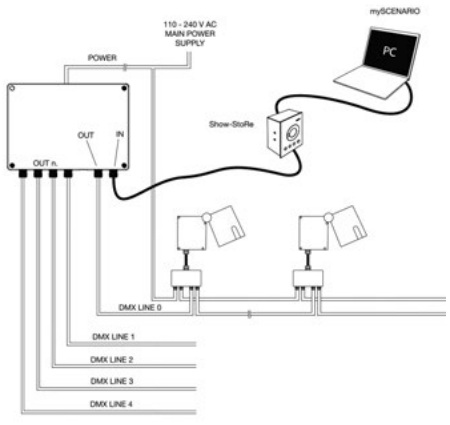
Housing: Plastic material with input and output cable glands, Complete with 1.5-meter power cord

Ambient temperature for operation: -20°C to +50°C

Dimensions: 250 x 200 x 75 mm

Feeding cable

6-pole cable for driver output connection to Constant Current LEDs	**1E1713**
Standard DMX cable (1 twisted pair + shield, 120Ohm)	**1T1932**



Schema tipico di collegamento

Dmx 512 Wireless technology

DMX Wireless technology can be transmitted the control signal to the lighting fixtures, without cables. Transmission is handled by a radio transmitter operating on a reserved frequency that is license-free worldwide.

It is able to transmit a signal:
- from one building to another;
- from a central control room to multiple installations in different positions, distant the ones from the others;
- from the inside of a building to the exterior, the facade, the roof, or a surrounding;
- in archaeological contexts in which digging trenches for laying.

A DMX 512 Wireless system requires that the control unit be equipped with a radio transmitter (external or built-in) and that a radio receiver is available in proximity to each DMX device or group of fixtures.

The product range includes a series of devices/fixture incorporating DMX 512 Wireless technology, having the following characteristics in common:

- the signal is transmitted via radio, using a protocol and components derived from the GSM mobile telephony standard;
- the frequency used is FCC approved and is license-free throughout the world, including Japan and the USA;
- the devices apply FHSS (Frequency Hopping Spread Spectrum) technology;
- installation is the “plug-and-play” type; that is, there is no need to attribute IP addresses to the fixtures, which automatically recognize the transmitter by which they are controlled;
- the radio signal can be transmitted in a range up to 500 meters (1700 feet) in free space and through material such as walls, glass, and metals;
- multiple transmitters may be used in the same area because they can be individually to control a single group of fixtures without creating reciprocal interference;
- the fixtures are not RDM compatible.

Wireless optosplitter — 1E1906

IP66

4 ch with Wireless receiver

A device that operates as a radio receiver with up to 4 wired DMX lines in output.

Technical feature of this unit are identical to the ones of the normal Optosplitter with the following additional features:
Built-in radio receiver module
Built-in antenna
RLS (Radio Link Status) monitoring system and LOG command (for transmitter linkage)
Built-in power supply for all components, including radio section
Protection grade: IP65
Not RDM compatible

Wireless dmx - Transmitter — 1E1929

0,2 IP66

Transm. with 1 DMX input

This device receives a DMX-IN signal via cable. It can be installed at any point in a DMX line and from that point on it transmits the signal via radio. For example, connecting the device directly to the output of any DMX512 controller transforms it into a wireless controller. Not RDM compatible.

Built-in radio module transmitting on the 2.45 GHz license-free radio frequency
One radio output with external antenna
Capability to control a DMX universe and to address individually 512 radio receivers
RLS (Radio Link Status) LED system for monitoring quality of DMX transmission
LOG key for secure receiver linkage
Transmission range: 50S0 meters in open air
Built-in power supply: 90-250V AC, 50/60 Hz
Housing in plastic material, for outdoor use (IP65)
Dimensions: 175 x 125 x 76 mm.

mySCENARIO

Systems of digital devices designed to control dynamic lighting fixtures and to programme dynamic light scenarios and sequences.

The system consists of an intuitive software, compatible with Windows operating systems, able to control different hardware devices having the following functions:

- recording colour-changing scenarios set by the operator;
- rallowing the selection among the multiple scenarios recorded;
- rtransmitting the control signals to the lighting system.

The software is interfaced to the PC through a USB port; the interface with lighting fixtures is featured through a DMX 512 output.

The software provides a graphic simulation of the operating keys of lighting controller; the patching function allows to assign the DMX control channels to the fixtures by using the internal library.

The Colour Manager function allows a quick and intuitive programming of a RGB light show, consisting of several steps with assigned duration and fading times. The built-in calendar allows a full time scheduling of show playback (month, day, hour, minutes, recurring events). The programmed light shows can be transferred to the different control interfaces.

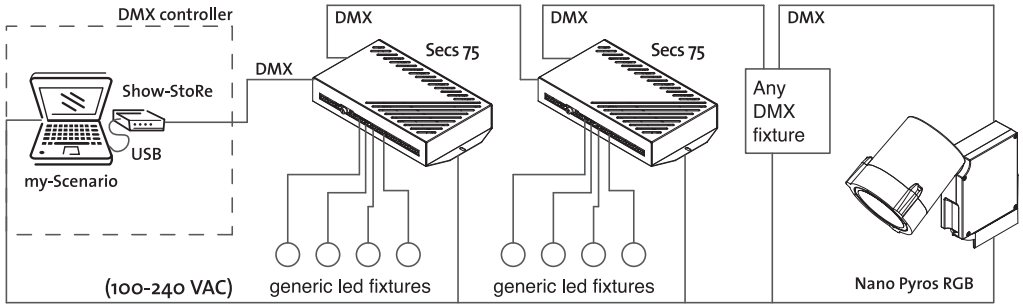
Software + USB interface
Storage, via USB, of light-shows created through mySCENARIO software
Automatic stand-alone operation with non need of a PC or any other external driver
Keys for scrolling through programmed sequences
Digital display to show the number (1-99) of active scene
Led indicators for ON/OFF status
Three poles XLR output – DMX signal to lighting fixtures
XLR input for daisy chain connection to other identical unit
Management of 512 DMX channels (512 parameters to be programmed separately)
Memory dedicated to light shows proportional to number of connected channels (2877 with 20 channels; 2877 with 60 channels; 355 with 512 channels)
Internal clock for sequences triggering

Typial wiring layout

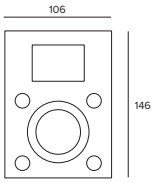


mySCENARIO Wall

DMX controller with a glass touch sensitive screen for architectural applications.

- It can control two different DMX universes (2x 512 channels).
- Stand alone function or connected to a computer using a USB port.
- Software for creating scenarios (that can be downloaded from the Targetti website) is included.
- It can manage 10 different lighting zones and 50 scenarios per zone.
- The touch keys on the front make it possible to modify and recall programmed scenarios.
- USB cable included.
- To be used with all RGB and RGBW products.

mySCENARIO Wall **1T6499**



Power supply	6 Vdc
Output	4W
Memory	SD card
DMX Channels	2 x 51 1
Operating system	Windows 32/64bit
Dimensions	146 x 106 x 11 mm

USB-RDM Programmer code

DMX-RDM (Remote Device Management) address planner.

Used with the “RDM Targetti” software that can be downloaded for free from the Targetti website download section.

To be used with all RGBW products.

USB – RDM **1E2767**

Technical data

Flicker

We spend the majority of our time exposed to artificial lighting. The quality of the effect, even in terms of stability of the light is therefore an indispensable requirement for a light fixture. Flicker is defined as “rapid variations in intensity over time of a light source”; in particular, those belonging to the frequency range of between 0-80Hz.

However, when fluctuations belong to the frequency range of between 80Hz-2KHz these are called “Stroboscopic effects” in which fluctuations in brightness produce a misperception of the movement of lit objects by a static observer.

This phenomenon has become increasingly important following the introduction of LED sources for general lighting due to a combination of the following factors:
These fluctuations in light intensity, according to the frequency, intensity, viewing angle, level of light in the environment, age of the observer and their sensitivity level, can be perceptible on a conscious and/or unconscious level and generate a series of side effects depending on the sensitivity level such as headaches, visual fatigue, distraction etc.

In order to mitigate the risks on health in lighting contexts using LED sources on a European level Technical Reports IEC TR 61547-1 and IEC TR 63158 have been developed.

1. **LED sources are characterised by a high speed response to fluctuations in the power supply which result in variations of the light emitted.**
2. **Unwanted residual fluctuations of the driving current generated by the electronic power supplies used.**
3. **Modulation of the driving current of LED sources for example PWM (Pulse Width Modulation), necessary to adjust the emission level.**
4. **Any instability in the operation of dimmers connected externally to the LED source power supplies.**

The Targetti approach to the Flicker phenomenon

Fixtures with the Safe Flicker logo in the catalogue and on data sheets have parameters below the minimum visibility threshold $P_{ST}^{LM} \leq 1$ and SVM≤0,4 (IEC TR 61547-1 and IEC TR 63158).

1

P_{ST}^{LM} (Short-Term flicker)

Quantifies visible Flicker that is harmful to human health caused by the modulation of light in the frequency range of between 0.3Hz and 80Hz.

The recommended threshold is $P_{ST}^{LM} = 1$

Note - This value was determined based on a representative test group of people and identifies the average perception threshold of visible flicker.

2

SVM (Stroboscopic Visibility Measure)

Quantifies stroboscopic effects that can occur in situations relating to objects in movement in the presence of modulation of light in the frequency range of between 80Hz and 20KHz.

SVM=0,4 represents the visibility threshold in a test group of people that quantifies the stroboscopic effect in defined laboratory conditions.

Fixtures that do not have the Safe Flicker logo on the data sheet on the other hand show the flicker value declared by the driver manufacturer which is not determined according to IEC criteria. Constant renewal of drivers will bring about the introduction of new models in line with IEC requirements.

For more details and/or specific needs please contact our technical department.

Photobiological Safety Risk Groups

This is an extremely important parameter because it identifies the danger to the eyes and skin of prolonged exposure to artificial sources. Legislative Decree 81/2008 (Consolidated Law) and supplementary and corrective measures Legislative Decree 06/2009, puts risk assessment and management obligations for workers' health and safety in the hands of the company and more precisely employers.

Among the risks employers have to evaluate there are also any possible photobiological risks deriving from exposure to artificial optical radiation (AoR), chapter V of Legislative Decree 81/08. The technical reference standard IEC/EN 62471:2010 defines a classification of sources in 4 Photobiological Safety Risk Groups on the basis of the quantity of radiation emitted by the sources in the range of wavelengths from 200 nm to 3000 nm, therefore well beyond the range of the visible, providing a clear indication of the limits of maximum exposure for each group. In accordance with Paragraph 6.1 of EN 62471: 2010 the risk groups (for blue light) are defined as follows:

1

RG0
(Risk Exempt)

The source does not cause any photo-biological risk. Requirement met by any lamp that does not cause a blue light (BL) retinal risk with an exposure time of up to 10,000 s (about 2.8 h).

2

RG1
(Low Risk)

The source does not cause risk due to normal operating limitations on exposure. Requirement met by any source that exceeds the limits of the Exempt Group but does not cause a blue light (BL) retinal risk with an exposure time of up to 100 s.

3

RG2
(Moderate Risk)

The source does not cause a risk due to an instinctive reaction when looking at very bright light sources (or due to a sensation of thermal discomfort.) Requirement met by any source that exceeds the limits of Risk 1 Group but does not cause a blue light (BL) retinal risk with an exposure time of up to 0.25 s.

4

RG3
(High Risk)

The source can constitute a risk even due to momentary or brief exposure.

We choose LED sources with the lowest Photobiological Safety Risk Group available on the market so that our fixtures are in the Risk 0 or Risk 1 groups.

The current standard EN 60598-1 concerning indoor light fixtures indicates that RG0 or RG1 risk groups are acceptable for safety purposes albeit technically not equivalent. Exposure to fixtures with RG1 is not to be considered dangerous in ordinary use because exposure times of more than 100 seconds are considered to be "unlikely", although not impossible because this would mean looking in the direction of a light fixture for 100 consecutive seconds. Risk group RG0, on the other hand, has a period of exposure greater than 2.8 h and as such, it can be stated with greater confidence that fixtures would not be viewed for such a long time.

LED

Characteristics of the LED lamps Targetti fixtures are fitted with

1

Colour tolerance

The Targetti collection uses different LED lamps depending on the type of fixture. Nevertheless the hue of the light emitted is always the same from one fixture to another because only LED lamps produced by leading companies in the sector are used, with the same chromaticity identified by the methodology of MacAdam ellipse or SDCM (Standard Color Deviation Matching).

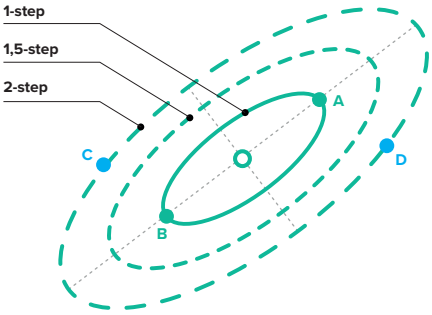
Light chromaticity is identified using a two-dimensional value within an ellipse that defines the maximum displacement of chromaticity from the point of reference (the centre of the ellipse).

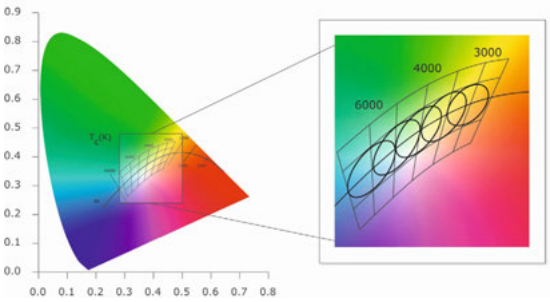
A 3 SDCM value is generally considered the maximum value before an average observer perceives chromaticity differences.

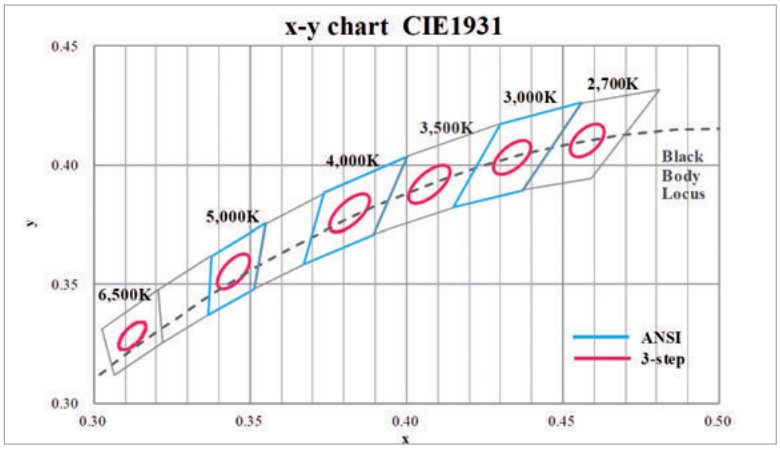
The colour tolerance values used in Targetti are as follows:

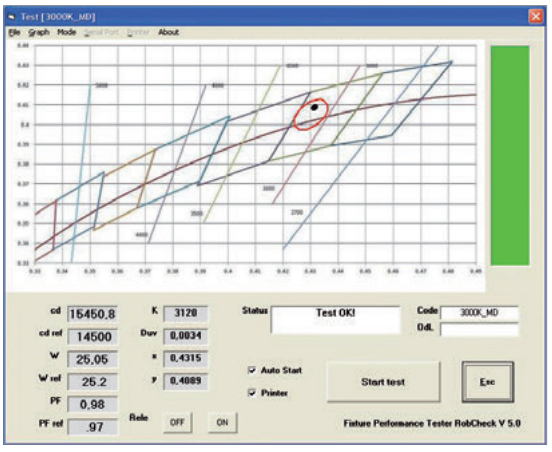
- **1.5 - 2 SDCM** (1 on request) for fixtures that use COB LED lamps
- **3 SDCM** (2 on request) for fixtures that use LED COB High density and LED Mid-Power lamps

It is also important to consider colour tolerance throughout the life span lamps (long term color consistency). Targetti LED lamps ensure the declared colour tolerance for the entire life of all fixtures.









2

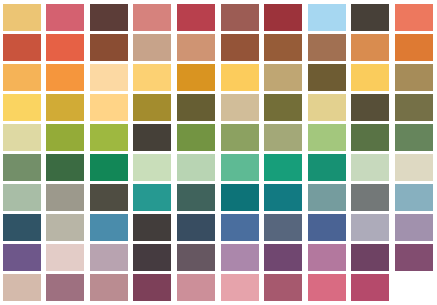
Colour rendering

The colour rendering index is the quantitative measure of the ability of a light source to reproduce colours faithfully. The method approved and currently used is the CIE CRI (Color Rendering Index) also known as CIE Ra. To determine it a comparison is carried out between the lamps to be evaluated and a reference light source with the same colour temperature.

It is based on a comparison of 15 “patches” of colour. The Ra index is the average of the 15 Patches, R9 is the rendering of the red patch.
A colour rendering index between 90 and 100 is considered excellent and a value between 80 and 90 is good. Among specialists in the field the CRI method is often contested given that it provides values that are sometimes inadequate especially for some LED sources.

At meetings between the regulatory and standardisation committees various alternative methods have been put forward.
The one that is more popular and considered more reliable today is the TM 30-15 method from the IES (Illuminating Engineering Society).

Most importantly is the IES TM-30-15 IES – the acronym for the Illuminating Engineering Society – the organisation that developed the scale as a new method for evaluating the colour rendering of a light source. It appears to be more reliable than the previous Ra because it is based on the colour rendering comparison of 99 “colour patches" rather than 8+6 like the CRI. In addition, where the CRI provides a single score, therefore it does not significantly express the narrow but broad relationship between light and colour, the TM-30 appears to be more complete because it is identified using three different parameters: an Rf Fidelity index, an Rg Gamut index and a colour vector graphic. These combine to provide a more accurate image of the colour fidelity of a light source and a better explanation of the exceptional colour rendering capabilities of LED sources.



3

Rf (Fidelity)

The TM-30 Fidelity index uses 99 colours, rather than 8+4 of the CRI, chosen from real world objects. Like the CRI the points of the Fidelity index go from 0 to 100. A score of less than 60 is too poor for indoor use and a 90+ score is ideal for an effect that is similar to daylight.

The TM-30, 99 “colour patches" are classified into seven groups (nature, skin tones, textiles, paints, plastics, printed material and colour systems). This categorisation helps because the light source can be tested on specific application areas.

Rg (Gamut)

Evaluates the intensity of colours under a certain light, therefore it provides indications of the source’s ability to reproduce colour saturation (breadth of colour range). A score range equal to 100 indicates that the light source does not change the hue or colour saturation that are reproduced in the same way as the sample source.

R>100 indicates an increase in colour saturation, therefore they appear more intense.

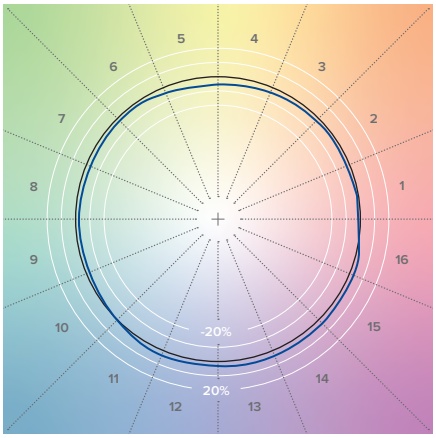
R<100 indicates a decrease in saturation.

4

TM-30 colour vector graphic

Indicates which colours appear to be saturated and which desaturated.

In the TM- 30 colour vector graphic the white circle represents the sample light, while the circle with the colored background is the light being tested. If the circles overlap perfectly the tested light corresponds to sunlight.
The areas that extend beyond the black circle indicate that the colours are more intense compared to the sample, however those that remain inside represent colours that appear desaturated.
Unlike the Fidelity and Gamut indexes which are numerical scores, the colour vector graphic is a visual representation that makes it possible to understand which colours are more and less intense. This is particular useful when it is necessary to highlight a particular colour, for example in retail applications.



5

Life expectancy of LED sources and lumen maintenance

LED lamps emit light for an extremely long length of time with an almost insignificant failure rate. The life expectancy of a LED lamp is based on the decreasing lumen rate and the percentage of fixtures are subject to this decrease in a certain period of time.

For example a LED source with a life expectancy of 80000 hours is identified with the code L80 B10 when lots of this type of source once they reach 80000 hours will have at least 90% (100% - B=10) of the LED with lumen of over 80% of the original (L=80).

The lifetime of LED lamps is measured using tests carried out according to the IES LM80 standard. A certain number of LED lamps are left working at different temperatures for at least 6000 hours. Every 1000 hours various parameters are measured: lumen, chromaticity, power etc. The results are then processed using the IES TM 21 procedure that makes it possible to extract the data and produce the lumen maintenance values in hours, L and B depending on the operating temperature.

6

Life span of LED fixtures

The life span of LED light fixtures depends mainly on two components: the LED lamp and the LED driver.
The life span of LED sources and LED drivers are heavily dependent on the temperature these components operate inside the fixture. Targetti fixtures are designed to have very low operating temperatures for LED sources and drivers compared to the limits indicated by producers to ensure excellent performance in terms of duration and lumen maintenance.

7

Targetti fixture data

Since LED technology was applied to light fixtures we have always wanted to be completely transparent in publishing data relating to the performance of our fixtures. For every fixture we have always indicated:

- The power of the LED source (Watt)
- The lumen of the LED source (lm)
- The power of the fixture (Watt)
- The lumen of the fixture (lm)
- Maximum intensity (cd)
- Typical colour rendering CIE Ra - TM30 Rf, Rg

8

Warnings on LED fixtures

Given the production process of LED lamps, typical values indicated by parameters only represent statistical magnitude. These values are affected by the manufacturing tolerances of producers of LED lamps, drivers (LED power feed) and also the operating temperature of the fixtures (LED voltage varies with temperature).

Targetti fixtures are designed, built and tested in compliance with current standard regulations and technical requirements. As required by regulation IEC 60598, technical checks are carried out at a room temperature of 25°C.
Even lumen output and lighting data are based on a room temperature of 25°C. At different temperatures deviations from the values indicated in the catalogue are possible.

Manufacturing tolerance on data relating to declared output and performance is ± 10%
Then laboratory measurement uncertainties are then added:

- Lumen 5%
- Intensity 1%
- Power 0.5%
- Temperature 3%

Photometric data

Photometric measurements were taken at the “Photometric Laboratory Targetti. These measurements are performed at a room temperature equal to 25±1 °C as required by UNI EN 13032-1 - Light and lighting - Measurement and presentation of photometric data of lamps and luminaries - Part 1.

The photometric values quoted are dependent on the optical system to which they relate, and from the light source used. In order to improve its production, the Company reserves the right to change these optical systems and consequently relative photometric data without notice.

This catalog shows the only photometries for the 3000K color temperature version, to consult the photometric data of the other versions, please refer to the website www.targetti.com.
For ease of use, the photometric curve present within this catalogue is shown and explained below.

Photometric data are available in the “download” section of www.targetti.com, in digital format.

The photometric curves shown in this catalogue are compiled according to the “C-γ” international reference system, where the C0-C180 plane is perpendicular to the fixtues and the C90-C270 plane is parallel to the fixtues, as depicted in the figue. For symmetrical and rotationally symmetric fixtues therefore, a single curve is used.

Cie flux code

Commission Internationale de l'Eclairage (CIE) provides a classification of luminaires according to the distribution of the flux delivered within certain limits of solid angle. The first three numbers indicate the fluxes contained in the cones identified by solid angles equal to π/2, π, 3/2π. The fourth number gives the percentage of direct light compared to total emission. The fifth is the ratio between the total emission of the fixtures and total emission of the lamps (efficiency of the fixtures). The 5 codes are expressed in percentages.

Fixture performance

In accordance with EN 13032-2 - Light and lighting - Measurement and presentation of photometric data of lamps and luminaries - Part 2: Presentation of data for indoor and outdoor work places - the performance of lighting fixtures is indicated by the acronym "LOR" (Light Output Ratio) defined as the ratio of the luminous flux emitted by a fixture and the total flux of the sources used. For direct/ indirect light fixtures appliances, the regulation introduces the components "DLOR" (Down Light Output Ratio) and "ULOR" (Up Light Output Ratio). These components show the distribution of luminous flux of the fixtures in the lower and upper half-space. The 3 parameters are expressed as percentages.

UGR method

The UGR method was introduced by the CIE (Commission Internationale de l'Eclairage) with the CIE 117 – 1995 publication "Glare Discomfort in Interior Lighting" in order to have a unified method for evaluating glare. Unlike the previous method (Diagram of light or Söllner), the index of glare depends on both the characteristics of the fixtures, and the characteristics of the environment in which it is installed, taking into account the relative position of observer- fixtures.
The UGR glare index is calculated from the size of the room, the type of light fixtures, its size and the surface reflection properties of the environment.
It is expressed by the formula:

$$UGR = 8 \log \left(\frac{0{,}25}{L_b} \sum \frac{L^2 \pi}{\rho^2} \right)$$

UGR: A value that defines the class of the annoying glare (or glare that causes disruption without affecting the view of objects) directly produced by the fixtures of an indoor lighting system.
Background luminance Lb: luminance of the visual field, in cd/ sqm, with the exclusion of glaring sources.
Fixtures luminance L: luminance of the luminous parts, in cd/sqm, of each appliance in the direction of observation.
Solid angle π: solid angle, in steradian, of the luminous parts of each illumination fixture in the direction of the eye of the observer.
Guth's position index ρ: a value that defines the offset angle to the axis of vision for each individual luminary.

UGR glare index values are between 10 and 30, from minimum to maximum probability of distress.

- **UGR C0:** refers to the transversal direction of observation of the fixtures
- **UGR C90:** refers to the longitudinal direction of observation of the fixtures.

Glare ratio reported in polar diagrams are calculated in relation to a local standard, as provided for by regulation CIE 117, having the following characteristics (Figure 1).

The size of the room as well as the distance between fixtures in both directions are specified in relation to the distance
H between the fixture plane and the observer plane (usually assumed to be equal to 1.2 m)
S Distance between fixtures in both directions equal to 0.25H
X longitudinal dimension of the room equal to 4H
Y transverse dimension of the room equal to 8H
Reflectance index of the ceiling, walls and floor, respectively, equal to 0.7, 0.5, 0.2

To aid better understanding, the UGR values reported in the polar diagram of the lighting fixtures have been grouped into the following illustrative classes by type of application, as specified in UNI EN 12464-1:

- <16 maximum viewing comfort
- <19 comfort required in offices
- <22 comfort required in other work places
- <25 need for reduced visual comfort
- <28 extremely low visual comfort

Luminance values

The UNI EN 12464-1 - Light and lighting - Lighting of workplaces - Part 1: internal workplaces - prescribes the boundary values of average luminance of the lighting equipment at elevation angles of 65° and above from the downward vertical, radially around the luminaires, for work stations where display screens which are vertical or inclined up to 15° tilt angle are used.

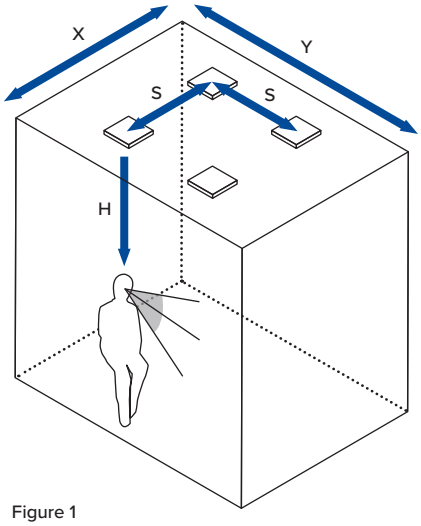

Figure 1

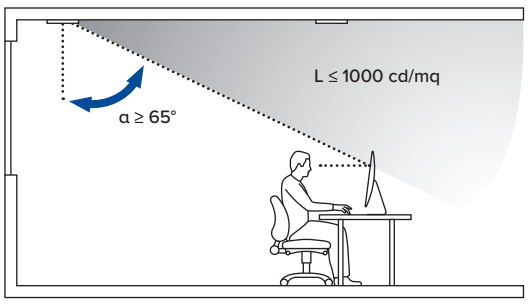
Case A
Flat screens operating at positive polarity with normal requirements concerning colour and details of the shown information, as used in office, education, etc.

Case B
To flat screens operating at negative polarity and/or with higher requirements concerning colour and details of the shown information, as used for CAD colour inspection, etc.



Screen high state luminance	High luminance screen > 200 cd/mq	Medium luminance screen ≤ 200 cd/mq
Case A	≤ 3000 cd/mq	≤ 1500 cd/mq
Case B	≤ 1500 cd/mq	≤ 1000 cd/mq

Requisites and information

All fixtures of the Targetti collection have been designed and produced to comply with European Standard EN60598-1 relative to the safety requisite of light fixtures.

CE **DIRECTIVES EUROPEAN COUNCIL**

All fixtures comply with the following directives:

- EMC Directive 2014/30/EU
- LV Directive 2014/35/EU
- RoHS Directive 2011/65/EU

Unless specified otherwise

- all fixtures are supplied without lamps;
- all fixtures are sold separately;
- all measurements are expressed in millimeters;
- all fixtures at low voltage are supplied without transformer;
- For products in Class III performance is only guaranteed using the electronic power supplies and drivers indicated in the catalogue.

TARGETTI SANKEY SpA
Certificated ISO 9001 n° 9130. TAR1
Certificated ISO 14001 n° IT319206

The Enec mark, ISO9001 and ISO14001 certifications and the CE marking all guarantee that the activities carried out internally in the company are governed and controlled by procedures which assure constant level of quality.

Accredited laboratory in accordance with ISO 17025.

Consorzio ecolight

Targetti Sankey Spa is a member of the Ecolight consortium that was set up in 2004 (D.Lgs. 49/2014) to comply with the provisions of the European Directive that was adopted in Italy as the European Directive 2012/19/EU for WEEE on managing, recovering and treating waste electrical and electronic equipment, used batteries and accumulators in compliance with all applicable legislation.

The colors of the products illustrated are reproduced as faithfully as possible compatibly with the technical limitations of the printed medium. The company reserves the right to make changes to the production without notice. Reproduction of this catalogue or any part of it is prohibited. The products illustrated in this catalogue are covered by one or more Italian or international patents. The company will take legal action against any imitators.

Icons legend

	Class I luminaire in which the protection against electrical shock is guaranteed by the connections of the conductive elements accessible to a protective conductor (earth connection).
	Luminaire in which the connection to a protective conductor (earth connection) guarantees the immunity to radio noises.
	Class II luminaire (double insulation), protected against the accidental contact with parts under tension from the user.
	Class III luminaire, suitable for connection to very low voltage circuits.
	Solid particle and liquid ingress protection degree.
	Protection degree - Recessed part . Protection degree - Exposed part.
	Impact protection degree.
	ENEC European Norms Electrical Certification.

Particular symbols

	Weight of the single fixture.
	Cable length.
	Walk-over.
	Driver-over safe.
	Fixtures that have parameters below the minimum visibility threshold PstLM≤1 and SVM≤0.4 (IEC TR 61547-1 and IEC TR 63158).
DBS	Dynamic Beam Shaper optical technology with remote management of the beam opening.
	LED with Ra__ where not present in the catalogue, available on request.
	Different colour temperatures available on request.
	Custom finish of your choice from the Targetti Colours range and RAL indicated in the colour chart can be downloaded on line from the download section.
	Treatment carried out on request.
	Supplied on request with an integrated or remote 110-277Vac power supply as indicated for the standard model.
	LED version with a different “Tunable White” tone available on request.

Note

- Please contact us for on demand treatments and versions.
- The performances reported on the products refer to the use of the recommended drivers.
- The drivers selected by Targetti make the fixtures “Safe Flicker”.
