

## Transform Your Space with iD Comfort 19 LVT: Tarkett's Solution for Enhanced Acoustic Comfort

iD Comfort 19 provides superior acoustic performance.

**Tarkett Australia is excited to announce the launch of its latest innovation in flooring, the iD Comfort 19 LVT. Designed specifically for the demanding conditions of the Australian climate, iD Comfort 19 offers superior acoustic performance, durability, and underfoot comfort.**

### **Innovative Multi-Layer Construction**

The unique six-layer construction of iD Comfort 19 is specifically designed for long-term dimensional stability. Each layer is formulated to prevent warping and gapping, even under extreme temperature variations. With a total thickness of 5mm, including a 1mm acoustic backing and a 0.55mm wear layer, iD Comfort 19 is ideal for high-traffic areas, resisting indents, scratches, and everyday wear and tear.

### **Designed to perform**

iD Comfort 19 is designed to withstand the harsh Australian climate, from intense heat and cold to prolonged exposure to UV light. This robust design means the Luxury Vinyl Tiles & Planks maintain their appearance and functionality for years, providing a reliable and aesthetically pleasing flooring solution.

Its pet-friendly and stain-resistant properties make it an ideal choice for households and commercial spaces alike. The flooring is resistant to indentations, scratches, and stains, ensuring it remains flawless with minimal effort. Cleaning is simple – just use a standard detergent suitable for vinyl flooring to keep it hygienic and looking new.

### **Market-leading Acoustic performance**

One of the standout features of iD Comfort 19 is its built-in cushioned acoustic backing, which delivers exceptional sound reduction by up to 19dB. This enhancement significantly improves interior acoustics compared to traditional materials like wood, ceramic tiles, and stone, making it perfect for creating peaceful and comfortable living and working environments.

In multi-residential and commercial settings, where acoustic comfort is critical, iD Comfort 19 excels. It has been rigorously tested to ensure it meets and exceeds the National Construction Code performance requirements for noise control. When installed on a 270mm thick concrete base floor with additional insulation, iD Comfort 19 achieved a remarkable weighted impact sound insulation rating of L'nT,w 40, resulting in a 6-star AAAC Acoustic Certified Rating, further validating its superior performance.

### **Health and Wellness Benefits**

Tarkett's iD Comfort 19 also contributes to a healthier indoor environment. Its smooth surface reduces the accumulation of dust and allergens, and the materials used release no harmful compounds, ensuring high-quality indoor air. The product is also phthalate-free and features ultra-low VOC emissions, making iD Comfort 19 an excellent choice for anyone concerned with maintaining a clean and healthy living space.

### **Easy Installation**

Installing iD Comfort 19 is a straightforward and hassle-free process, designed to save both time and effort. The glue-down installation method ensures a secure and stable fit, preventing movement and providing a long-lasting solution. The product is designed to be laid quickly and efficiently, minimising disruption to your home or commercial space.

### **Exclusive to Tarkett Australia**

Explore Tarkett's iD Comfort 19, now featuring 14 contemporary designs tailored for Australian homes and commercial spaces including hospitality, stores & shops, and workplaces. Designed for versatility, iD Comfort 19 is suitable for wet areas and living spaces—from kitchens to loungerooms—providing seamless transitions from room to room. Choose from ten natural wood designs that bring the timeless warmth and elegance of timber into your space or select from four sleek concrete and marble finishes for a modern, sophisticated touch. With iD Comfort 19, you can achieve both acoustic comfort and lasting style.

Experience the versatility and durability of iD Comfort 19, engineered to withstand Australian climates while enhancing the aesthetic appeal of residential and commercial environments alike. For more details, visit Tarkett Australia's website or contact our customer service team today.
