# FERMOB

MANUFACTURER OF FURNITURE DESIGNED FOR OUTDOOR USE

For more than 30 years, Fermob has been designing and manufacturing **colourful metal outdoor furniture**.

Our furniture stands out for its original designs and **exclusive range of colours**. We work with renowned designers who create **original, exclusive products** for the brand, protected by copyright. The name of the designer can be found alongside each item of furniture.

Drawing on our **outdoor know-how** and colour expertise, we also offer lighting products, and outdoor and lifestyle accessories that are perfect for creating truly liveable spaces. At Fermob, our intention is clear: to decorate and fit out gardens, patios and terraces from top to bottom – always with the same consistency and visual appeal. Because we're more than a manufacturer: **we're your outdoor design expert**.

## FERMOB: MATERIALS AND TREATMENTS FOR OUTDOOR USE

### FERMOB: THE COLOUR EXPERT

#### A UNIQUE RANGE

**Fermob has been famous for colour** since 1996. Bernard Reybier quickly understood that colour is what makes a garden distinctive, creates atmosphere on a terrace, adds **personality to an item of furniture and establishes a sense of boldness...**

In a market that was limited to two shades (English Green and White) at the time, the brand revolutionised the sector by offering an **original colour chart of bright, intense and contrasting colours**. Today, Fermob has further developed its **colour expertise** with more **subtle shades**, making it possible to **play with different hues** and compose your own palette. **23 unique colours**, 23 ways to make our furniture happy, 23 degrees of intensity, 23 shades of light... Our colours are designed to flourish out there on their own, as well as to be **coordinated** and **bring out the best in each other**. For an **infinite number of combinations**, plenty to make every terrace and patio unique.

We add one or two new shades to our colour chart every year.

Our colours are fit for **demanding outdoor use**. We carry out intensive testing before every launch, so that we can guarantee:

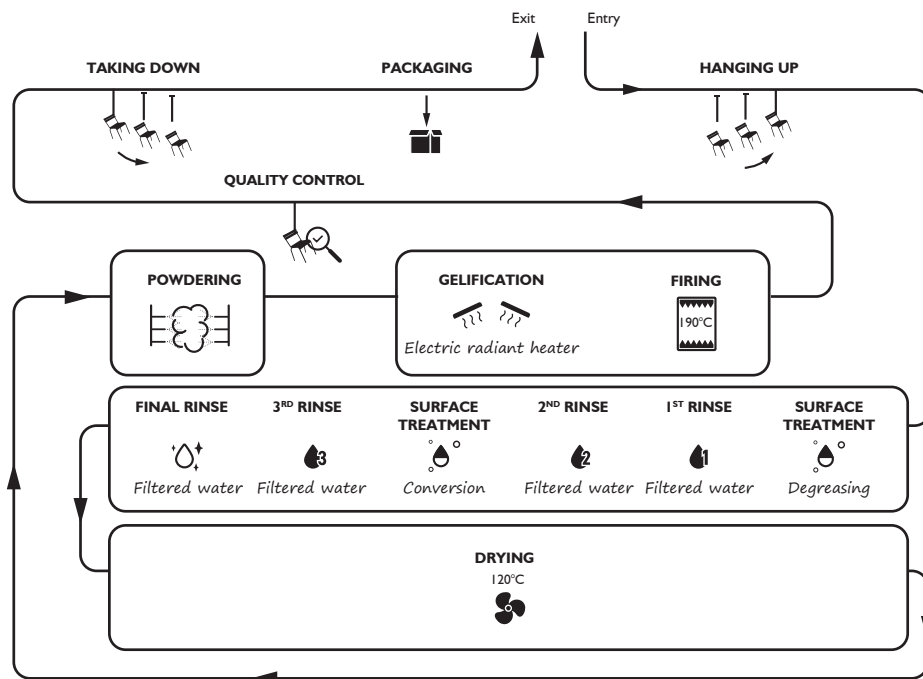

- **lightfastness**
- **scratch resistance**
- **UV resistance**
- **moisture resistance**

## HIGH PERFORMANCE INDUSTRIAL FACILITIES

The company has ensured that it has the means to achieve its ambitions and now owns **the most advanced painting line anywhere in the world** ! It takes just **6 minutes to change paint colours** and the line can handle every shade of the colour chart in just 3 days, proving this impressive industrial tool's **flexibility and reactivity**.

Painting process on the historic Thoissey site

All Fermob metal products are painted with a **100% polyester powder coating**, which offers better UV resistance than standard epoxy paints. The paint is **applied electrostatically to the furniture for an optimal coverage**, then baked at very high temperature.

To improve anti-corrosion performance, we apply **surface treatments** (galvanisation, electro-galvanisation, electrolytic coating) **before painting, either as standard or as an option**.

**Electrogalvanising** : Protecting an object by applying a layer of zinc using electrolysis (electrical energy).

**Galvanisation**: Iron protection process that involves dipping a part into a bath of melted zinc.

**Electrolytic coating** : A surface treatment originally used in the automotive industry. An electrophoresis paint (sub-layer) technique where a part is immersed in a bath of water-soluble paint. Electrolytic coating means that the product benefits from Very High Protection treatment and is suited to intensive use or use in extremely wet/humid environments.

**Electrostatic** : An eco-friendly painting technique that involves using powder instead of solvent-based paints. An electrostatic force attracts the powder coating to the metal, achieving optimal coverage. The coating is then baked onto the furniture.

## THE METAL: WONDERFUL MATERIAL OF IDEAS

For our furniture, we choose to use **metal** (over 98% recyclable) – the “**material of ideas**”, as Gustave Eiffel put it – on account of its incredible versatility. The metals we use are **premium-grade steel and aluminium**.

### STEEL

- Fermob's original expertise
- Stable and durable
- Creates an elegant design

### ALUMINIUM

- Malleable
- Light
- Easy to weld

**Colled-rolled steel**: The laminated steel is passed through a set of rollers, which transform it into material (e.g. into sheet for table top). Cold rolling is Fermob's technique of choice, since it makes the steel resistant, gives it a precise, uniform thickness, and promotes good paint hold.

Whenever our designers and technicians are working on a new product, **anti-corrosion performance is always top of mind**. We're constantly thinking of ways to eradicate, or at least reduce, areas that could be prone to corrosion because they are not protected or treated.

Examples of **corrosion-prone areas** include:

- rims under table tops
- air gaps
- tubular parts
- areas subject to friction, such as folding mechanisms
- areas where the properties of the material have changed as a result of heat (such as from laser cutting or welding).

Fermob furniture benefits from anti-corrosion treatment specifically for outdoor use and undergoes intensive tests at our laboratories, in accordance with **general standards on safety** (NF EN 581-1), **stability** (NF EN 1022), and **resistance and durability** for collective use (NF EN 581-2, NF EN 581-3).

## ANTI-CORROSION PROTECTION RATING

Fermob has introduced a new **Anti-Corrosion Performance Rating (IPAC)** for all metal items of furniture. The rating is an indication of the product's anti-corrosion performance, combining three factors: **design, material and surface treatment.**

Since all our items of furniture are designed for outdoor use, we systematically apply a surface treatment and high-performance outdoor paint to offer the very best protection against corrosion.

**On a scale from 1 to 10, all Fermob furniture has a minimum IPAC rating of 6.**

All products bearing this logo are eligible for additional, **optional anti-corrosion treatment** (contact our sales department).

The 1<sup>st</sup> figure gives the basic rating and the 2<sup>nd</sup> figure in the upper right-hand corner gives the **IPAC after additional treatment.** Depending on the products and their design, the IPAC enhancement may be different.

## MIXED-MATERIAL PRODUCTS

Metal can be combined with other materials such as **Outdoor Technical Fabric** (polyester coated with PVC), **thread** (woven polymer), **outdoor fabrics** developed in conjunction with reputable suppliers known for their exacting standards or **teak**.

**OTF**

*Outdoor Technical Fabric*

**OUTDOOR FABRICS**

**THREAD**

*Woven polymer*

**TEAK**

## OUTDOOR TECHNICAL FABRIC (DUO OR STEREO)

We use Batyline® **Outdoor Technical Fabrics** (OTFs) on our products, sourced from market-leading **French manufacturer Serge Ferrari**. The fabrics are made from **high-tenacity 100% polyester thread, protected with a solution-dyed PVC cover**, guaranteeing:

- a hard-wearing, tearproof product (can withstand loads of up to 4 tons per square metre)
- a seat that doesn't sag (the fabric retains its shape after use)
- a design look that lasts.

The manufacturer handles **all four phases of the production process in-house**:

- creating the polyester thread (core)
- extruding the PVC thread (cover)
- weaving the fabric
- heat weld the fabric.

Batyline® is the **best-performing outdoor fabric money can buy**. The Stereo fabric is developed **exclusively for Fermob**.

Batyline® is **particularly suited for an outdoor use** because it:

- is UV-resistant (colours do not fade over time)
- stays cool
- does not hold water
- anti-mould and anti-stain treated
- hypoallergenic
- offers a flexible and comfortable seat that retains its shape
- is easy to clean with soap and water.

Batyline® DUO  
(Cactus)

Batyline® STÉRÉO  
(Rosemary)

## THE 100% OUTDOOR FABRIC

The cushioned furniture (as well as the parasol and some textile accessories) use **Sunbrella® fabric by Dickson, the French outdoor fabric specialist**. **100% solution-dyed acrylic**, Sunbrella® fabrics are designed for **outdoor use**.

### WHAT MAKES A GOOD OUTDOOR FABRIC ?

- A fabric that has **technical qualities enabling it to withstand sustained outdoor use without deteriorating** (colour-fastness to UV rays, water-repellent, resistant to stains and mould, etc.)
- A fabric that's **easy to keep clean** (removable cover, machine-washable, etc.).

Colour-fast  
in the sun

Water-repellent  
treatment

Breathable:  
quick-drying

Anti-stain  
treatment

Tearproof and  
resistant to abrasion

Removable  
covers

Machine  
Washable

**Abrasion** : Wear caused by rubbing.

**Water-repellent** : A water-repellent fabric does not instantly absorb water droplets. Instead, water slides off the surface. It reinforces the resistance to stains and mould. However, if the water is not removed quickly, it will end up being absorbed into the fibre (water-repellent is not the same as waterproof).

## WOVEN POLYMER THREAD

The seats in the Croisette and Sixties collections are handwoven on an aluminium frame. The wires are extruded from resin (polymer) before being **braided by hand, the traditional way**. This means that each item is **unique**, and requires 8 to 19 hours of manual work.

Croisette collection

Sixties collection

The **Croisette** collection reinvents **traditional wickerwork**, using **textured flat weave**.

The **Sixties** collection stands out with its visually **striking retro effect**. The seats are braided using a **round “scoobie” weave**.

## TEAK EXPERTISE IN THE FERMOB GROUP

Fermob relies on the **teak expertise of Vlaemyck** (a brand in the Fermob group), and uses the same supplier.

Teak is an exceptional wood; it is used in shipbuilding because of the protection provided by its naturally occurring oleoresin. It is rot-proof and withstands the action of insects, inclement weather and the passing of time. **The king of woods for outdoors**, teak requires no maintenance to keep its technical characteristics: robustness, longevity and ease of use.

The teak we use has come from the same factory for 30 years, sourced exclusively from legal tropical plantations that can ensure the **longevity of the species and protect the environment**.

The teak used by Fermob is:

- Natural: **untreated and un-oiled**. It fades to grey after a year, producing a patina that enhances its authentic feel and contemporary style. It requires no maintenance.
- Grade C: it has knots and other **natural patterns which prevent a uniform appearance**.

Teak showcases Fermob’s work on the materials, giving the items of furniture a **warm look** and a **comfortable feel** (as teak stays cool).

# MARK PEOPLE'S MIND

NOT NATURE !

---

Fermob furniture is designed to live outdoors, and is made using materials and processes that respect the environment. Environmental concerns have always been at the heart of the design and aesthetic qualities of Fermob's creations, together with their lightness and resistance, helping us **save materials** and **limit waste** as well as **transport impact**.

## CONTINUALLY IMPROVING OUR ENVIRONMENTAL IMPACT

**Optimising energy consumption** remains one of Fermob's key concerns, as regularly demonstrated through **concrete actions**:

- **Reducing the temperature** of our ovens (-10°C in 25 years),
- Setting up a **stoving process that consumes 10% less energy**,
- Investing in a **new painting line**, saving 8 tons of powder per year,
- **Reduction in our water use** (30% reduction in 5 years)
- **Reduction in our electricity use**, with the addition of LED lighting (5% reduction in 5 years)

## METAL : AN ENVIRONMENTALLY FRIENDLY CHOICE

**Some 98% of all iron and aluminium is now recycled worldwide.** This means that Fermob can guarantee that its **furniture is fully recyclable – and recycled.**

In 2013, we teamed up with **Eco-mobilier**, an environmental body that **collects used furniture to give it a second lease of life.**

The organisation's purpose is to arrange for the collection of unwanted furniture and, in doing so, to meet government recycling and recovery targets. Fermob contributes to this endeavour by:

- **Encouraging customers to donate** unwanted items of furniture to charities and social enterprises for recycling.
- **Supporting eco-design** research.
- **Keeping customers informed** about how the eco-participation tax is used.

## ECOLOGICAL PAINT THAT PROTECTS BOTH THE ENVIRONMENT AND YOUR HEALTH

The powder paint used by Fermob contains **no solvents**. It is **100% recycled and recyclable** and it is applied in a **zero-waste facility**, with successive dips making our products guaranteed for outdoor use.

**Zero discharge of polluted water**  
thanks to the use of a carefully balanced successive-dip process in the surface treatment tunnel.

**Zero atmospheric emissions**  
heat from the ovens is even recovered to heat the metal treatment baths !

**Zero powder waste**  
our solvent-free, 100% polyester powder coating is applied without water via a closed-loop process, meaning that any surplus powder is collected via suction and reused.

Because this facility is a **classified installation on environmental protection grounds**, Fermob has specific obligations and responsibilities that echo its commitment to the environment. The brand is also part of a program that aims to reduce the release of dangerous substances into water.

## RECYCLED AND RECYCLABLE PACKAGING

Fermob has been participating in the **CITEO (Eco-emballage/Ecofolio)** program for many years now. We help turn our everyday products into new resources, and we are firm believers in **getting the packaging just right** – using eco-designed packaging that contains as few raw materials as possible.

**CITEO**  
Le nouveau nom  
d'Eco-Emballages et Ecofolio

 **ECO  
EMBALLAGES**

 **ecofolio**

**All of these actions align with our extended producer responsibility (EPR) approach, and with our values...**

# THE FERMOB GUARANTEE

## CHARTER

### THE EUROPEAN FURNITURE GUARANTEE

When we design our products, we pay special attention to three key aspects:

- making sure the piece will continue to fulfil its intended purpose for many years to come
- anticipating how it will age as time passes
- designing it so it is suited to our customers' requirements.

As a manufacturer, we have a duty to guarantee that our products are fit for purpose, no matter how our customers use them.

We never stop listening to our customers. That is why we have amended our European Furniture guarantee to reflect painstaking laboratory testing and customer feedback.

Because we use only the highest-quality materials and finishes, we are now in a position to go one step further and offer two separate guarantees – a 5-year functional guarantee on all our items of furniture, plus a 2-year ageing guarantee, **provided that the product is used as per our recommendations.**

**FUNCTIONAL  
GUARANTEE**  
5-YEAR

**AGEING  
GUARANTEE**  
2-YEAR

Each of our products comes with a recommended usage setting, so you can better cater to your own customers' requirements and keep the guarantee valid:

1. **Domestic:** product designed for private use in non-public spaces such as gardens, winter gardens, patios, terraces and balconies.
2. **Professional:** product designed for professional use in supervised public spaces such as restaurants, outdoor pools, beaches and recreational facilities.
3. **Intensive professional:** mobile product, not fixed to the ground, designed for professional use in unsupervised public spaces such as motorway service stations, public parks and squares that are accessible around the clock.

DOMESTIC | PROFESSIONAL | INTENSIVE

DOMESTIC | PROFESSIONAL | INTENSIVE

DOMESTIC | PROFESSIONAL | INTENSIVE

- **5-YEAR FUNCTIONAL GUARANTEE**

Fermob guarantees that products will remain fit for the purpose for which they were designed for 5 years. The guarantee covers all functional aspects of the product such as welding, fasteners, rivets and folding.

**If a product is not used as per Fermob's recommendations, the functional guarantee is reduced to 2 years.**

- **2-YEAR AGEING GUARANTEE**

The speed at which a product ages depends on how carefully it is treated by customers. Please read the exclusions so you can advise customers how to care for and maintain their products.

The ageing guarantee covers premature and abnormal deterioration in the appearance of the product's materials.

**Fermob's 2-year ageing guarantee applies in Europe (excluding Russia) only. Elsewhere, the guarantee is 2 years for aluminium furniture and 1 year for steel furniture.**

### THE AGEING AND FUNCTIONAL GUARANTEES DO NOT COVER:

- Damaged, converted or modified furniture.
- Furniture not used as per Fermob's recommendations.
- Any damage arising from insufficient care, or from failure to comply with the supplied instructions and advice for receiving, assembling, using, maintaining and storing furniture supplied to the customer.
- Rings or stains undeclared when unpacking (including stains related to a combination of humidity retention + heat).
- General wear and tear or natural fading of the materials used.
- Corrosion originating from scratches or abrasions that result from general wear and tear and which cannot be removed via standard cleaning and maintenance processes.
- Minor spots of rust under table tops and seats or on bases. These are a natural outcome of the material used (iron) and can be treated using the maintenance tools made available to customers by Fermob.
- Corrosion of stainless steel parts due to use in a confined, and/or chlorinated environment.
- Corrosion of steel furniture (including stainless steel furniture) as a result of use in a coastal environment.
- Any changes in the visual appearance of wood that are directly linked to ageing. As wood is a living material, the appearance of its surface changes naturally over time.

This guarantee is limited to reimbursement (with application of a reduction) or replacement of the product, and applies only upon presentation of the purchase receipt (cash register slip or purchase invoice).

### THE EUROPEAN LIGHTING GUARANTEE

Fermob's lighting products are just like its furniture: designed for outdoor use and made from premium-grade materials and components. They are covered by the relevant statutory European guarantees, and meet European standards and certifications (such as NF EN 62262).

USE	DOMESTIC	PROFESSIONAL	INTENSIVE
GUARANTEE	2 YEARS	1 YEAR	-

### THE EUROPEAN ACCESSORIES AND PARASOL GUARANTEE

Like its furniture, Fermob accessories (cushions, etc.) and parasol are designed to last, based on a careful selection of materials. They are covered by the statutory European guarantee.

USE	DOMESTIC	PROFESSIONAL	INTENSIVE
GUARANTEE	2 YEARS	1 YEAR	-

- Acrylic textiles and PVC are guaranteed against UV, wear and tear, mould and tearing.
- Reticulated foam filling is guaranteed against mould.

### THE GUARANTEE (LIGHTING / ACCESSORIES / PARASOL) SPECIFICALLY EXCLUDES :

- Lamps, accessories or parasols that have been altered, changed or modified.
- Damage related to a lack of proper care or failure to observe the precautions (e.g. do not open the lamp) and advice for use, maintenance (e.g. close your parasol during inclement weather) and storage provided to the customer.
- Rings or stains not declared when unpacking.
- General wear and tear or natural fading of the materials used.
- Corrosion originating from scratches or abrasion resulting from general wear and tear and which cannot be removed via standard cleaning and maintenance processes.
- Metal components for lights, parasol and accessories are covered by the same guarantee terms and exclusions as items of furniture (see above).

This guarantee is limited to reimbursement (with application of a reduction) or replacement of the product, and applies only upon presentation of the purchase receipt (cash register slip or purchase invoice).

For intensive product usage, please contact our sales department for advice.

**The local statutory guarantee applies outside the European Union.**

# CONTRACT UNIT

A DEPARTMENT DEVOTED TO PROFESSIONAL PROJECTS

As professional outdoor spaces are the showcases of both private and public institutions, they must be **personalized** and **attractive**, and **thought must be given to their every aspect** - furniture, lighting, separators, parasols and decorative accessories - **to create uniquely styled, complete layouts for all professional outdoor spaces.**

**Professional markets are long-standing markets for the Fermob brand.**

The Bistro chair, created from the Simplex model (a Fermob patent dating back to 1889) used to be sold to lemonade sellers! Since then, our professional catalogue has grown to **400 pieces** across over **60 collections**, a large selection that doesn't even include adaptations and bespoke pieces.

MARIOTT HÔTEL RENAISSANCE, BORDEAUX - FRANCE

HOTEL MOLITOR, PARIS - FRANCE

To coordinate our activity and offer the highest level of service, **a team of 30 people within the Fermob Contract Unit is exclusively dedicated to consulting and professional projects:** layout advice, developing 2D/3D plans and 3D files for your mock-ups, special articles, customized services, installation and assembly.

TIDEHOUSE STUART - USA

## SUPPORTING YOU IN ALL YOUR PROJECTS

Architects, landscape designers, project retailers, designers and decorators play a key role in the choice of furniture for large layout projects. This is why Fermob supports them by keeping the documentation up to date (metal and colour charts, catalogues, technical documentation, etc.) and by providing them with 3D files for drawing up their layout plans for projects in the hotel and catering industry, for public spaces or office exteriors.

Find all our collections modelled on Pcon.

APICIUS, PARIS - FRANCE

The Fermob Contract Unit team of interior designers and shop-fitters works in various fields such as the design of terraces, swimming pools/spas, balconies, rooftops, hotel rooms, entrance halls, public spaces, office exteriors, reception areas and waiting rooms, etc.

Its main missions are:

- Advice on projects and decoration (moodboards)
- Space optimization: design and production of 2D plans
- Proposals for complete layouts: design and production of 3D plans

HOTEL MOLITOR, PARIS - FRANCE

## BESPOKE PROJECTS : BE UNIQUE !

Our bespoke projects division is available to offer you products that meet with **specific requests related to your brand identity** (charters, logos, etc.) or to **particular functional or made-to-measure design requirements**.

- **Marking:** different types of logo, short texts or graphic design using either laser cutting or silk-screen printing on either metal or OTF.
- **Special colours:** RAL (lets you make finer distinctions between colours) or other colours on request.
- **Adaptations:** format modification, reinforcement, fireproofing on OTFs that allow it.
- **Attachments:** to the floor or by cable.
- **Textiles / Cushions:** The group's other know-how means that we can also offer you outdoor lighting, custom-made cushions and parasols in your colours.
- **Tailor-made furniture:** Because we offer an end-to-end production service in-house, we can develop metal products that meet your requirements. So use our tailor-made solutions to customize your outdoor equipment as you please, and let your clients enjoy a fine experience and unique moments.

# PROTECTION & MAINTENANCE

## OUR CARE AND MAINTENANCE RECOMMENDATIONS

### DURING THE SEASON

- **In the open air:** design + material + surface treatment (anti-UV paint and moisture resistance) allow Fermob furniture to be left outside,
- **Clean your furniture regularly**, more frequently in places with high humidity and in salty environments near the sea,
- Use the **breathable, dirt-resistant protective covers** (Contract – stack covers) to protect solid-top tables, sunloungers and chairs from dead leaves, pine sap and bird droppings.
- Use the **water-repellent protective covers** (Bellevie).

### WINTER STORAGE

- To extend the lifespan of your garden furniture, we recommend storing it over **winter in a dry, well-ventilated place** where it will be **protected from impacts**, if at all possible,
- **Clean** and restore the Fermob products if necessary (rust remover / paint touch-up),
- **Place the tables** (and other products) **on a block** to create a slope that allows water to drain away,
- **Do not store anything on top of the furniture**, especially objects that may retain water and moisture (such as flower pots and trivets),
- **Do not store the tables stacked with the table tops together**, or the benches stacked with the seats together.
- **Store folding items of furniture in their folded state**, and under cover if possible,
- Ideally, you should **rest your seats against the tables** rather than placing them upside down on top of them,
- **Stack chairs / sun loungers...** and store them **under cover** if possible,
- **Wash, then bring in the cushions** and store them away from dust and moisture,
- If you have to chain up your furniture, **use sheathed chains to prevent scratching**.

Never cover the furniture, especially with a non-breathable plastic tarpaulin that will retain moisture, to avoid paint discoloration and stains.

## PROTECTIVE COVER

What are the 2 types of protective cover available in the Fermob catalogue?

- **Protective cover for table, sunlounger and chair (Contract cover)**

Colour: Light Grey

Material: Polyamide or Polyester

**Breathable**, the covers protect the item of furniture from dirt (from dead leaves, pine sap, bird droppings, etc.) during the season.

**They also prevent moisture and condensation from building up and stagnating inside the cushion cover.**

- **Protective covers for furniture Bellevie cushion**

Colour: Anthracite

Material: Polyamide with polyurethane coating

**Water-repellent**, the covers protect the cushions of items of furniture from inclement weather during the season.

**Caution: these 2 types of cover are not designed for winter storage, but to protect items of furniture during the season.**

## CLEANING FURNITURE'S SURFACES

### METAL CLEANING

To preserve their original appearance, most of our materials require **basic precautions**. They can be damaged, to a varying extent, depending on the product type, by:

- **mechanical** factors: wear and tear, scratches, impact, distortion, etc.
- **chemical** factors: acids, bases, solvents, etc.

Our surfaces must therefore be cleaned in accordance with the following principles :

- **Systematically carry out a preliminary test on non-visible and restricted areas** to determine compatibility (e.g. under the seat or table top)
- **Do not use abrasive products** or products which may affect the condition of the surface (abrasive sponges, wire wool, pads, scouring creams or powders, dyed textiles which may leave marks, etc.)
- **Do not use aggressive chemicals** (solvents, alkaline detergents, etc)
- Beware of retention zones in which cleaning products can be trapped, leading to further damage
- **Comply with the conditions of use** of the products used (dilution, diffusion, application time, etc.)

- **Limit the use of a pressure washer** and comply with the operational instructions (application distance, pressure, nozzle type, temperature, use of chemicals, etc.)
- If your table has a solid top, tilt it slightly, using the **Fermob table block supplied**, to prevent water from accumulating when it is not in use,
- Avoid prolonged contact with objects that may retain water or moisture (such as flower pots or trivets),
- **Never cover the furniture with non-breathable tarpaulin** or plastic sheeting that will retain moisture,
- Clean off any bird droppings as soon as possible, as these are particularly corrosive.

**Our recommendations are as follows:**

**Use water, soapy water** or a **detergent with a neutral PH** (5 to 8).

*(FERMOB mild multi-purpose cleaner or household items such as dishes or windows)*

Apply with a **soft sponge** or a white soft cloth made of a non-abrasive material.

**Rinse with water.**

**Wipe carefully** to avoid traces of limescale.

### FOCUS ON MILD MULTI-PURPOSE CLEANER

- Allows you to clean all your Fermob furniture
- Effective on metal (aluminium or painted steel), Outdoor Technical Fabric (OTF), woven resin, synthetic fibres... (Do not use on teak)

**The following products may be used** but they should be diluted and subject to extensive compatibility testing:

- Ethanol
- Bleach (98% dilution)

**We strongly advise against the following non-exhaustive list of products;** unless appropriately diluted, they could damage our materials:

- Alcohol, isopropanol
- Petrol, white spirit, solvents, dissolvents
- Hydrocarbons, caustic soda, ammonia
- Alkaline detergents (pH > 9)
- Acids
- Polish
- Products to remove graffiti
- etc.

## OUTDOOR TECHNICAL FABRIC (OTF) AND POLYMER THREAD CLEANING

Use clean water, soapy water or, or Fermob multi-purpose cleaner.

Spray or apply with a **soft sponge**. Rub gently with a soft brush.

**Rinse with water.**

**Wipe clean.**

Very dirty surfaces may require a second application.

## TEAK CLEANING

If you have left your garden furniture outside, it will have turned grey over time. You can get it back to its original colour by following the following steps :

**Clean your furniture** with a brush and soapy water.

**Sand the teak** furniture with sandpaper (grade 240 or 120 depending on how grey it is) in the direction of the wood grain.

You can also use a degreasing product, which is more aggressive to the wood and is therefore not recommended as an initial approach.

## FABRIC CLEANING

### PREWASH

**Vacuum your cushion or, if there are any stains, quickly dab them** to absorb the liquid with a paper towel, cloth or towel.

**Clean with a soft brush** or sponge **using a neutral soap**, giving special attention to any stains.

**Rinse with clean water** (do not use a high pressure cleaner, a steam cleaner, dry cleaning or an abrasive liquid).

**Machine-wash compatible materials**, following the recommendations on the label

**Allow to dry in the open air.**

**At the end of the season, wash the cushion covers before tidying away/storing your cushions indoors, protected from dust and moisture.**

## TOUCH UP AND REPAIR

We advise that any scrapes / missing paint should be repaired immediately to prevent corrosion of the metal (steel or aluminium). We recommend this type of touch-up for the parts of your furniture that cannot be seen.

If you observe minor corrosion on your **steel furniture** (most often located at the welds, rivets, joints, under the tops or under the seats) rivets, joints, under the trays or under the seats) the **Fermob anti-rust spray** will allow you to stop the spread of rust the spread of rust:

**Sand the rusted area** with sandpaper (240 or 120), and then **wipe the sanded area with a clean cloth** to remove impurities.

**Before using the rust-proofing product, shake the spray** can well. Do a test spray onto a piece of cardboard.  
**Apply the rust-proofing product** in a sweeping action.  
**Allow to dry** for 5 to 10 minutes.

Move to the painting stage, where you will be using the **touch-up pen** or the **paint spray**.

You do not need to use a rust remover on **aluminium furniture**. Simply sand and repaint.

Wear and tear of painted items (scratches, stains, etc.), whether natural or through failure to follow our precautions for use, can be alleviated on Textured shades (but not on Smooth shades) by applying paint spray:

Follow the cleaning instructions to **clean the surface to be painted**.

**Before using the paint spray, shake the spray** can well. Do a test spray onto a piece of cardboard.  
**Apply the paint in a sweeping action**, starting the application on the outside of the product to avoid any risk of projection.  
**Allow to dry** for 5 to 10 minutes.  
A second coat of paint can be applied.

If the item has only had a slight knock, you could use the **touch-up pen** instead.

## ROLL-OUT OF A SOLUTION FOR PROFESSIONALS

We are able to offer to our professional clients a **viable disinfectant solution** with:

- **Two types of hand-held spray bottles**, developed specifically for COVID-19 by the company Berthoud, with a volume of 1 litre (small size) or 5 litres (large size).
- **A professional disinfectant** (called HAGRAL SPRAY SR), ready to use, doesn't require rinsing, is a virucide, according to the decree of 13 March 2020, is **compatible with surfaces which are in contact with food and is colourless and odourless**. A 98% diluted bleach solution may also be appropriate.

Professional disinfectant  
HAGRAL SPRAY SR

1 Liter      5 Liters  
Hand-held spray bottles  
Berthoud

### CORRELATIONS ESTABLISHED FOLLOWING APPLICATION TESTS

#### Large size 5L

- Surface covered **76 m<sup>2</sup>** (7.5 seconds/m<sup>2</sup>), or about 50 Alizé sunloungers (15 seconds/sunlounger)

#### Small size 1L

- Surface covered **15 m<sup>2</sup>** (15 seconds/m<sup>2</sup>), or about 30 Bistro chairs (15 seconds/chair)

*Under no circumstances can these two services constitute grounds for liability on the part of Fermob with regard to the product's appearance, their virucidal power or any other consequence related to their use.*

## ADDITIONAL ADVICE

A non-exhaustive list of household products including degreasers, disinfectants, antibacterial products, sanitisers, hydroalcoholic gel, fungicides, virucides and multi-purpose products (Sanytol, Cif, La Croix, Mr Clean, etc.) have been tested in our laboratory. **Most of these commercial products are diluted or have a neutral pH and do not damage our materials.**

*This advice is provided in addition and is compatible with the general recommendations above; under no circumstances can this advice constitute grounds for liability on the part of Fermob with regard to the product's appearance, their virucidal power or any other consequence related to their use.*

### HIGH DINING :

Bar stool, bar chair, high armchair and high table

## MATERIALS

### ACRYLIC

Synthetic fibre that is soft and silky to the touch, does not pill, and is ultra-light.

- extremely resistant to tearing and wear
- rotproof (i.e. prevents the formation of mould)
- keeps its shape
- UV and fade resistant
- does not retain heat or moisture
- resistant to temperature variations (-30° to +70°C)
- resistant to chemicals
- easy to clean: machine-washable at 30°C, no ironing required.

All our acrylic fabrics are water-repellent.

### CAST IRON

Cast iron is a carbon-rich iron alloy. Its density, weight and sturdiness mean that it is ideally suited for stability purposes.

### COATING

A treatment process in which a coating is applied to the surface of a textile to make it waterproof.

### SOLUTION-DYED

Fermob uses solution-dyed textiles (the dye is applied to the fibre, not the surface). This dyeing technique means that the colour lasts five times longer than a conventional dye.

### STAINLESS STEEL

Stainless steel is an alloy of steel and chromium that is highly resistant to corrosion and rust. Fermob uses stainless steel to make the screws for its products.

### SILENCING PADS

An exclusive, patented technology that allows furniture to slide effortlessly across the floor and features an integrated shock absorber to reduce vibrations. Comes as standard on Croisette, Facto, Kate, Luxembourg®, Luxembourg® Kid table, Monceau, Pétale, Rythmic, Salsa, Stripe and Studie.

NOISE REDUCTION OF 14 DB = 10 TIMES QUIETER!

### WATER-RESISTANT

Offers long-lasting protection against moisture.

 PROTECTIVE COVER FOR SUNLOUNGERS - ALIZÉ

13.5 kg

The “zero-gravity” position, as found on the Alizé sunlounger, is **perfect for relaxing** and is widely recommended by medical professionals. It is this position, with the legs positioned slightly above the heart, that the body adopts in a weightless state. The position was named by NASA in the 1970s. The sensation of gravity is reduced seven-fold, similar to when the body is floating in water.

The legs are raised and the thighs and trunk form an angle of 127 degrees, thereby :

- Significantly easing pressure on the lower back and spine.
- Reducing tension in the lower back muscles.
- Promoting improved blood flow in the legs and reducing strain on the heart.
- Freeing up the rib cage and allowing the lungs to expand, which improves oxygenation.

**Zero gravity is reached by raising the feet (7°) and raising the backrest to the maximum (45°).**

ULTRASOFA & MOON!

# THE LIGHTING COLLECTIONS

Fermob, a long-standing outdoor furniture brand, has grown to become a **leading name in battery-powered, smart, portable lighting**. The brand's first portable lamp, Balad, was released in 2015.

This was the starting point for a **ground-breaking, diverse range of lighting** products backed by R&D expertise from in-house resources, key partners (Smart & Green and IPW), designers and new employees. Fermob approaches every new product development with a manufacturer's eye, building on its own knowhow and bringing on board the best partners.

*Balad*  
(2015)

*Moon!*  
(2017)

*Mickey®*  
(2018)

*Inoui*  
(2020)

*Hoop*  
(2020)

*Aplô*  
(2021)

A dedicated work team for a concentrate of expertise  
and a short development process for an accelerated launch rate!

The brand's lighting products take their cues from modern-day lifestyles and from history, and they bear all the hallmarks of Fermob's DNA: simplicity, attention to detail and, of course, visual appeal. These collections reflect the brand's positioning as a comprehensive **outdoor environment specialist** and are very much **in tune with the times**. Fermob offers a multitude of options (lighting stools, portable lamp, table lamp and wall lights) which, coupled with a wide range of accessories (stands, brackets, hanging straps and more), add up to a **unique user experience adapted to each moment of life**.

## A LIGHT IDENTITY

Fermob's lamps complement one another perfectly, offering the **ultimate in versatility**: use them as **table lamps, floor lamps, or mobile lamps** to take with you as you go. Most models are **wireless and boast an extended battery life**, charging easily on a base or via a USB cable.

The LED light sources are **kind on your pocket and on the environment**. But that's not all, since they also allow you to **adjust the colour temperature** (measured in °K) and **brightness** to create your preferred lighting mood.

## QUALITY GUARANTEED

Because the entire range is designed and manufactured to stringent criteria, these products come with our quality guarantee:

- **Premium materials and electrical components** (aluminium, polyethylene, LEDs, etc.),
- Exclusive use of materials recognised for their **outdoor robustness**, sourced from globally recognised suppliers,
- 100% polyester powder coating, **resistant to UV rays**,
- A **dedicated quality team**.

All our lamps undergo a two-step certification process:

- At the design stage, our products are tested for durability, ingress protection and other criteria against the requirements of IEC 60598, NF EN 60529 and similar standards.
- Fermob sends the complete pre-production model to SGS for certification against the relevant standards.

**SGS**

**IEC 60598** : IEC 60598 specifies the general safety and performance requirements for electric light sources operating at supply voltages of up to 1,000 V. It sets out the requirements and related tests for classification, marking, and mechanical and electrical construction.

**IP index** : Defines the degree of protection provided by the equipment against the penetration of solid matter (first figure) and liquid matter (second figure). The rating ranges from 00 to 68 (according to standard NF EN 60529).

**IK index** : Defines the strength of a device against knocks and impacts, but not against falls. The test is carried out with a steel vertical or pendulum hammer. The rating ranges from 0 to 10 (according to standard NF 62262).

**SGS** : SGS is the world's leading inspection, testing, analysis, and certification body.

# MARK PEOPLE'S MINDS NOT NATURE !

## LAMPS MAY BE DISASSEMBLED FOR RECYCLING

**EXPERTISE IN LIGHTING QUALITY**  
resulting in sustainable, eco-friendly products.

**AN EMPHASIS ON CONTINUOUS IMPROVEMENT**  
including seeking out more eco-friendly materials  
and employing processes that extend the  
product's lifespan.

**Our lamps are built using environmentally friendly materials and processes.**

### LED

They are **recyclable** and considerably **more energy-efficient** than other types of light, offering a much greater lifespan, consuming 85% less electricity and containing **non-toxic mercury**.

### POLYETHYLENE OR POLYCARBONATE DIFFUSER

These hard-wearing materials can be **recycled multiple times**.

### METAL

An eco-friendly material. Some **98%** all of iron and aluminium is now recycled worldwide

**ECO-FRIENDLY PAINTS** that protect the planet and human health. Fermob's powder coatings are **solvent-free**. They are applied in a **zero-waste facility** and are guaranteed for outdoor use.

**THE ADVANCED BATTERY, PCB MODULE AND OTHER ELECTRICAL AND ELECTRONIC COMPONENTS ARE RECYCLABLE AND BUILT TO LAST.**

**RECYCLED AND RECYCLABLE PACKAGING**  
Fermob help turn our everyday products into new resources, and we are firm believers in getting **the packaging just right** - using eco-designed packaging that contains as few raw materials as possible.

Fermob has been a member of the French CITEO recycling scheme for many years.

## PRODUCTS THAT CAN BE TAKEN APART FOR END-OF-LIFE RECYCLING

Fermob has **worked with ECOSYSTEM** which **manages waste electrical and electronic equipment** and with **Screlec** which **recycles batteries**.

## WHERE CAN I DISPOSE OF MY END-OF-LIFE LAMP?

Manufacturers and consumers have to follow certain **rules on the management of waste electrical and electronic equipment (WEEE)**. Further guidance is provided in the form of regulatory markings in user guides and on packaging.

This symbol means that the lamp must not be disposed of with normal household waste.

### AT A WASTE DISPOSAL CENTRE

These facilities, which are normally run by the local authority, will take your end-of-life products and ensure their disposal via the appropriate channel.

### IN STORE

Retailers are required to accept and dispose of end-of-life lamps sold by them. This requirement applies equally to small, independent stores and specialist superstores.

Fermob

### WITH THE MANUFACTURER

Manufacturers will take your end-of-life lamps and ensure their disposal via the appropriate channel.

### KEEP YOUR FERMOB LAMP OPERATING AT ITS BEST

Fermob lamps are high-quality products that require care and attention to keep them operating at their best.

- **Charge your lamp in a sheltered spot**, protected from bad weather, at a temperature of between 0 and 40°C,
- **Clean** your lamp regularly,
- **Only use the charging and power supply equipment provided**,
- **Do not let the lamp's battery run flat**,
- **Opt for frequent, short-duration charges**.

A battery's lifespan depends on several factors:

- The environment in which the product is used (temperature, humidity, etc.),
- The environment in which the product is charged (temperature, humidity, etc.).

### WINTER STORAGE

- **Clean and restore** as required,
- **Store your lamp with its battery partially charged**, in a dry, well-ventilated spot, sheltered from direct sunlight. Clean and restore as required.

### CLEAN THE SURFACES OF YOUR LAMP

To preserve their original appearance, most of our materials require **basic precautions**. They can be damaged, to a varying extent, depending on the product type, by:

- **mechanical** factors: wear and tear, scratches, impact, distortion, etc.
- **chemical** factors: acids, bases, solvents, etc.

Our surfaces must therefore be cleaned in accordance with the following principles :

- **Systematically carry out a preliminary test on non-visible and restricted areas** to determine compatibility (e.g. under the seat or table top),
- **Do not use abrasive products** or products which may affect the condition of the surface (abrasive sponges, wire wool, pads, scouring creams or powders, dyed textiles which may leave marks, etc.),
- **Do not use aggressive chemicals** (solvents, alkaline detergents, etc),
- Beware of retention zones in which cleaning products can be trapped, leading to further damage,
- **Comply with the conditions of use** of the products used (dilution, diffusion, application time, etc.),
- **Limit the use of high-pressure equipment** and comply with the operational instructions (application distance, pressure, nozzle type, temperature, use of chemicals, etc.).

## POLYETHYLENE & POLYCARBONATE MAINTENANCE

Our recommendations are as follows :

**Use water, soapy water or a detergent with a neutral PH** (5 to 8) for very stubborn dirt.

**Apply with a soft sponge** or a white soft cloth made of a non-abrasive material.  
**Rinse with water.**

**Wipe carefully** to avoid traces of limescale.

## GLOSSARY

### ABS

Acrylonitrile Butadiene Styrene (ABS) is a relatively rigid, lightweight, impact-resistant and mouldable thermoplastic polymer (a type of styrenic polymer, to be exact).

### BYPASS

A bypass is a circuit that avoids a device or system.

### LUMINOUS FLUX - LUMEN (Lm)

In photometry, luminous flux is a measure of the power of a light source as perceived by the human eye. It's the most commonly used indicator of the total amount of light emitted by a light source in all directions.

### LED - LIGHT EMITTING DIODE

An electronic and optical component that converts electrical current passing through it into light.

LED technology has several benefits:

- Cost-efficient
- Eco-friendly
- Instant lighting
- Long life (25,000 to 100,000 hours)
- No hazardous materials present (e.g. mercury)

### POLYETHYLENE

Polyethylene is one of the most common thermoplastic resins in use today. It is known for its excellent impact resistance.

### COLOUR TEMPERATURE - KELVIN (°K)

Measures the colour temperature of the light. It indicates whether white light is warm -yellow hue) or cool (blue hue). It varies depending on the source. The higher the figure, the more bluish-white the colour temperature, while light with a lower colour temperature tends towards the red end of the scale.

#### ALTER THE COLOUR TEMPERATURE TO CREATE THE RIGHT LIGHTING MOOD.

This feature lets you adjust the colour temperature to the task at hand. Warm white (2,700 to 3,300°K) creates a comfortable mood that's perfect for relaxing. Neutral white (4,200 to 4,500°K) is more soothing and energising. Cool white (5,500 to 6,500°K) is closest to natural daylight, with a slightly blue hue that boosts focus and concentration.

**MUCH MORE THAN JUST A COLLECTION,  
A REAL LIGHTING CONCEPT !**

With its **clever accessories**, the H.24 Aplô lamp offers a **multitude of lighting solutions**, both indoors and outdoors.

This **wireless Led lamp**, with its clear-cut design, is a concentrate of knowhow: it meets standards of solidity and resistance to outdoor conditions, it's fast charging, and has a long autonomy, with multi-temperature and intensity light power.

## PORTABLE LAMP

## TABLE LAMP

## WALL LAMP

## HANGING LAMP

APLÔ IS A **SMART AND MOBILE** LIGHTING SOLUTION THAT MEETS ALL THE NEEDS OF EVERYDAY LIFE!

## 3450 - MAGNETIC BASE

DESIGN BY TRISTAN LOHNER

Aluminium frame  
ABS base  
Lamp screwed by a «quarter turn» system  
See inside cover for available colours

Compatible with :  
LAMP H24 - APLÔ

LI200

## MUCH MORE THAN A GARLAND...

**HOOP LI200** is a fully fledged aerial lighting solution.

It consists of a 12-metre matt black cable, including a 6-metre hanging cable, plus 8 LED spotlights that are adjustable through 360° and 2 hook mechanisms, one at each end.

The dimmer switch, which is easy to access once installed, means it's equally suited to both a muted lounge area and a large, brightly lit table.

What's more, it's equipped with Bluetooth technology and can be controlled remotely with the Fermob Lighting app.

# THE PARASOL & ACCESSORIES COLLECTIONS

Fermob has harnessed all of its outdoor expertise and audacious attitude to bring you a comprehensive **product range for outdoor spaces**. Over five years ago, the brand launched a series of **collections of decorative accessories and outdoor fabrics** – trays, trivets, decorative cushions, round cushions for chairs, fouta towels, garden ponchos, and more – that complement its core product range and are **specially designed for outdoor living**. Now, the brand is going even further as it looks to cement its unique brand positioning. Drawing on the **know-how of Vlaemyck**, a French supplier of parasols and outdoor furniture to the hotel and restaurant industry, Fermob has added a **brand-new type of product** to its range: **parasols**.

## WHAT MAKES A GOOD OUTDOOR FABRIC?

- A fabric that has **technical qualities enabling it to withstand sustained outdoor use without deteriorating** (colour-fastness to UV rays, water-repellent, resistant to stains and mould, etc.)
- A **fabric that's easy to keep clean** (removable cover, machine-washable, etc.).

Colour-fast in the sun

Water-repellent treatment

Breathable: quick-drying

Anti-stain treatment

Tearproof and resistant to abrasion

Removable covers

Machine washable

**Abrasion** : Wear caused by rubbing.

**Anti-UV** : Anti-UV treated products are resistant to alteration caused by ultraviolet rays (present in sunlight and moonlight), meaning colours do not fade over time. All Fermob products are UV-resistant.

**Water-repellent** : A water-repellent fabric does not instantly absorb water droplets. Instead, water slides off the surface. This increases the resistance to stains and mould. However, if the water is not removed quickly, it will end up being absorbed into the fibre (water-repellent is not the same as waterproof).

**Rotproof** : Guarantees against the formation of mould over time. This is an important guarantee for outdoor products.

For its decorative accessories and parasol, Fermob has chosen to work with **manufacturers who have genuine outdoor know-how** (like Serge Ferrari, Margueroy and Tuva Textile) to ensure that its customers can enjoy a high-quality product, whatever they use it for. Like all Fermob products, they incorporate the fundamentals of the brand: **creativity, design, technique and colour**, and combine an attractive appearance with **originality and technicality**.

## QUALITY GUARANTEED

Fermob's accessories are built to the same high standards as the brand's other products :

- Metal accessories (trays, trivets, etc.) are manufactured in the same factories as Fermob furniture, meaning they are designed with the exact same materials (metal, paint, etc.).
- Textile accessories (cushions, etc.) and parasol are designed in conjunction with experts (stylists, designers, manufacturers, etc.), all selected for adhering to the same exacting standards as Fermob. All our fabrics are sourced from partners in France or the European Union. Our **Jacquard fabrics**, **printed fabrics** and **Batyline® Outdoor Technical Fabric (OTF)** are all **made in France**.

All Fermob textile accessories are made with fabrics that meet relevant standards and undergo resistance tests.

- Colour-fastness (sunlight and inclement weather) standards : ISO 105-B04 & 105-B02
- Abrasion and friction resistance standard : ISO 12947-1 (méthode Martindale)
- Tear resistance standard : ISO 13937

## OUR CARE AND MAINTENANCE RECOMMENDATIONS

To preserve their original appearance, most of our materials require **basic precautions**. They can be damaged, to a varying extent, depending on the product type, by:

- **mechanical** factors: wear and tear, scratches, impact, distortion, etc.
- **chemical** factors: acids, bases, solvents, etc.

**Cushions must be brought inside during bad weather.**

## MAINTENANCE OF OUTDOOR TECHNICAL FABRIC (OTF)

**Use clean water, soapy water or, or Fermob multi-purpose cleaner.**

Spray or apply with a **soft sponge**. Rub gently with a soft brush.

**Rinse with water.**

**Wipe clean.**

N.B. Very dirty surfaces may require a second application.

## MAINTENANCE OF ACRYLIC FABRIC (YARN-DYED / SOLUTION-DYED)

Gently brush the fabric if there are stains or other marks.

**Machine-wash on a gentle cycle** compatible materials, following the recommendations on the label.

**Iron the fabric** if necessary.

## MAINTENANCE OF COTTON FABRIC

**Machine-wash on a gentle cycle** compatible materials, following the recommendations on the label.

**Iron the fabric** if necessary.

N.B. Prefer 800 RPM spinning.

## MAINTENANCE OF METAL

See PROTECTION & MAINTENANCE chapter.

## SYMBOLS

### RECOMMENDED USAGE

### COLOURS

No. of available colours for the product

### METAL ACCESSORIES CHARACTERISTICS

Stacking

### FABRIC ACCESSORIES CHARACTERISTICS

Water repellent fabric

Machine washable at 30°C

Removable covers

Brush the fabric if there are stains or other marks

Iron-safe

## ACRYLIC

Synthetic fibre that is soft and silky to the touch, does not pill, and is ultra-light.

- extremely resistant to tearing and wear
- rotproof (i.e. prevents the formation of mould)
- keeps its shape
- does not retain heat or moisture
- resistant to temperature variations (-30° to +70°C)
- resistant to chemicals
- easy to clean: machine-washable at 30°C, no ironing required.

All our acrylic fabrics are water-repellent.

## DRALON®

A woven textile made from synthetic fibre that offers excellent resistance to water, stains and UV rays. It is soft in texture, bright in appearance, rot-proof and easy to clean.

## COATING

A treatment process in which a coating is applied to the surface of a textile to make it waterproof.

## FOAMS

### ETHYLENE-VINYL ACETATE (EVA) FOAM

A dense, compact, hard-wearing foam (no cells or air bubbles) that's lightweight and easy to mould.

### HIGH-RESILIENCE PU FOAM

A polyurethane foam selected by Fermob for its ability to return to its original shape after deformation, even following an extended period of use.

### OPEN-CELL FOAM

A foam that allows liquid to pass through. It does not retain water and dries very quickly, meaning that the cushion does not stay wet.

### POLYESTER FOAM

A PU-type foam with open cells and variable density. This versatile foam is typically used to make padding and occasional seats.

### POLYETHYLENE FOAM (closed-cell)

A foam used for thermal insulation and for air-, water- and dust-proofing.

### POLYURETHANE (PU) FOAM

A high-quality foam known for its firmness and comfort. It consists of fine closed cells enclosing a low thermal conductivity gas. It makes an excellent thermal insulator.

### RETICULATED FOAM

A foam with very fine, regular closed cells. This is a rot-proof and waterproof foam.

## YARN-DYED ACRYLIC

A yarn-dyed synthetic fibre is dyed on the yarn after it has been manufactured.

## SOLUTION-DYED

Fermob uses solution-dyed textiles (the dye is applied to the fibre, not the surface). This dyeing technique means that the colour lasts five times longer than a conventional dye.

## JACQUARD FABRIC

On a Jacquard fabric, the patterns are made by criss-crossing threads. The Jacquard loom, developed in 1801 by Joseph Marie Jacquard from Lyon, is capable of creating weaves with complex patterns.

## LOUNGE OTF

Outdoor Technical Fabric (OTF) is a Batyline® fabric manufactured in France by the world's leading firm, Serge Ferrari. This high-tenacity 100% polyester thread is protected with a solution-dyed PVC cover for exceptional colour-fastness. OTF keeps its shape, is light, flexible and sturdy, and does not deteriorate over time. It is resistant to both moisture and micro-organisms, and is treated with an anti-fungal product. The tight weave, coupled with the performance characteristics of Batyline®, give this material a textile-like feel and make it ideally suited for outdoor use. Lounge OTF is a unique material which combines the elegance of a natural-looking textile with the performance characteristics of a technical fabric.
