FIXTURES | FITTINGS

Creating modular presentation systems for inspired spaces

Surestyle is a family owned and operated business since 1975. For 40 years we have designed, manufactured, constructed and delivered modular shopfitting projects across the nation, creating spaces that inspire and engage. Surestyle makes it easy for our clients to turn their visions of presentation & organisational excellence into reality.

flexi WALL

Introducing flexiWALL, the innovative modular shelving and display system that is modernising shop fit-out design and construction.

flexiWALL is a multi-configurational, modular shelving system.

Highly versatile, modular customisability and ease of installation to suit the needs of your ever changing merchandising and product display requirements. flexiWALL gives you complete control over presentation.

Structurally supported by upright posts and rails which are either fixed to the wall or used in combination with a wall bracket, a ceiling mount or offset bar options. With flexiWALL, you can make configuration changes easily when featuring new or seasonal clothing ranges without major dismantling. Simply add, subtract and adjust in accordance to your needs in minutes.

A range of interchangeable display parts and accessories available to create endless configurations and sections and sizes. From base panels to custom shelves, shelf brackets, hanging rails and arms, infill panels (plain, slat panels or grid panel), signage, ticketing and integrated lighting, SureStyle supplies it all.

Module spacings are available in 600mm, 900mm or 1200mm and our shelves are manufactured in-house to suit your needs, available in a range of colours, thicknesses and depths.

Supplied with specification details, dimensions and customer support, flexiWALL enables quick speed-of-delivery and the flexibility that traditionally constructed and fixed shelving/display units can't.

Benefits of flexiWALL

- **Easily Customised To Suit Your Needs**. The flexiWALL system is adaptable and totally customisable to suit the design, aesthetic and specification needs of your business.

- **Countless Configurations and Design Options**. flexiWALL and flexiPLUS parts and accessories are completely interchangeable to create endless configurations, sections and customised space. Staff have flexibility to change shelving, hanging and display merchandising layouts in minutes.

- **Fast to assemble and disassemble** . Easy to construct, easy to specify into design, NZ/AU compliant and relocatable.

- **Modern, Minimalist Design**. With its clean, slimline look, flexiWALL matches any space's colour scheme and overall interior design. Ideal for retail stores, small business owners, designers, specifiers, interior designers, procurement managers, fit-out construction specialists.

- **Unmatched Customer Support**. Our talented team is available to support you with your design and display needs. Providing guidance, support and advice to help enhance your brand's presentation, drive sales and improve overall customer experience.

Want to see flexiWALL In-Person?

flexiWALL is on full display at our Auckland Showroom - 7 Moa Street, Otahuhu, Auckland, NZ.

PROJECT SNAPSHOT

101

HOWICK, AUCKLAND

"We carefully curate ranges of handpicked products, created by NZ designers and international brands, so you can find perfect pieces for your home and gorgeous gifts for your loved ones."

Seeking to accentuate their designer Home & Lifestyle products, Surestyle collaborated with 101 and their design team to execute the perfect look and feel for their curated fit-out in Howick.

flexiWALL was the product of choice to display their high-end homewares and apparel. A bold modern look was achieved with Black flexiWALL offset bars, uprights and shelf brackets, complimented by a natural beached timber finished 4-tier shelving and custom cabinets. FlexiPLUS hanging rails were integrated for clothing on the flexiWALL system, breaking up the shelving and creating more interest.

The result was a retail store for 101 Home that exuded a refined, edgy modern elegance that is a delight for shoppers to visit and be inspired.

Colours used in this project

flexiWALL 50 in Black
Premium Oak Woodgrain Shelves

Selecting a flexiWALL colour scheme

Making design decisions is easy with flexiWALL. The modular nature of the system allows you to customise the colour scheme of your presentation to align with the interior design of your space and products to be displayed. Surestyle keeps display design simple.

1. Select your preferred colour for the structural metal components (including uprights, brackets, offset bars and interchangeable accessories). Choose from three colours: black, white or chrome.

2. Next, select a shelf colour to compliment the colour of the metal components. Choose from our selection of melamine shelving in white, coloured or customised options like a natural timber melamine or veneer. Available in 600mm, 900mm or 1200mm lengths for ease of specification and installation.

## How to determine what flexiWALL components & configuration you need

1. The first step in working out what you need is to assess the space you are working with. Determine the flexiWALL configuration you would like, either a direct wall fixing with upright wall brackets, or offset bar brackets, or the ceiling mounted option. Continue scrolling to view your options. Each configuration offers different aesthetics and functionality for customisation to your display and merchandising needs.

2. To determine the system parts and quantity you will need, we recommend contacting Surestyle. Our talented team is available to provide support, guidance and advice for your design and product needs.

Call us at 09 276 8878 or 0800 474 358, send us an email at enquiry@surestyle.co.nz, fill out a contact form on our website or visit our Auckland Showroom.

DIRECT
WALL FIXING

flexi WALL

flexiWALL has been designed to adjust to your ever changing merchandising requirements. The flexiWALL system is made up of 50mm pitch (spacing measured from the top of one slot, to the top of the next slot) slotted steel uprights with a range of accessories to form a complete merchandising and display system.
flexiWALL Upright 2500mm comes complete with adjustable leveller.

The uprights are ideal for direct wall fixing or use in combination with the wall bracket, ceiling mount or offset bar options.

1 FWPOSTB - 2500mm Black

2 FWPOSTC - 2500mm Chrome

3 FWPOSTW - 2500mm White

First bay   Additional bays

50mm
Upright Bays

Simple steps to work out your requirements

1. Measure your wall length.

2. Divide the wall length by 600mm, 900mm or 1200mm centres to work out how many bays you require.

3. Select the components to suit your needs.

Easy installation

Posts can be directly fixed to the wall depending on your wall structure; if the wall is timber or concrete you can fix directly to the wall, however if it is a steel stud wall you will need to run two horizontal battens to fix the posts to.

Ceiling Mount Bracket

**FWCBB - Black | FWCBW - White | FWCBC - Chrome**

Ceiling mount suitable for all uprights, for situations where wall mounting is not available.

Upright Wall Bracket

FWUWBB - Black | FWUWBC - Chrome | FWUWBW - White

Stand-off suitable for all uprights (2 per upright required), adjustable depth for uneven walls.

PROJECT SNAPSHOTS

flexi WALL

GIRLZ ROOM
AUCKLAND

Slotting seamlessly into the client's branding and existing construction, flexiWALL was installed directly to the inside of two huge recessed walls for a variety of modular shelves of different sizes. Once installed, the merchandising team had complete control over their display needs for alignment with their products. Installed within a few hours using fixed wall uprights and complete with white shelving, cutting down construction timelines and costs.

101 HOME
HOWICK, AUCKLAND

A fixed floor-to-ceiling flexiWALL system with shelves was used for 101's new Howick store. Seeking to accentuate their designer products, bold modern aesthetics were achieved using Black flexiWALL ceiling brackets, uprights and shelf brackets, complimented by custom timber 3-tier shelving.

Surestyle collaborated with 101 and their design team to execute the perfect look and feel for their curated fit-out in Howick.

DOVE HOSPICE
NEWMARKET, AUCKLAND

Surestyle was engaged early in the design process to integrate modular fixture and fittings to their new store at Newmarket. A fixed wall flexiWALL system with modular white shelves and SlatPanels were chosen to meet the clients needs of flexibility to modify with Surestyle's interchangeable display accessories. Along with custom solutions and bespoke joinery items, Surestyle proudly supplied all the internal fixtures for this store.

OFFSET

flexiWALL has been designed to adjust to your ever changing merchandising requirements. The flexiWALL system is made up of 50mm pitch (spacing measured from the top of one slot, to the top of the next slot) slotted steel uprights with a range of accessories to form a complete merchandising and display system.

2 FWPOSTC   - 2500mm Chrome

3 FWPOSTW - 2500mm White

Upright Offset Bar 355mm

FWOSBB - Black | FWOSBC - Chrome | FWOSBW - White

Fits into the top of uprights to allow for reverse merchandising or to avoid protruding obstacles.

OFFSET
PROJECT SNAPSHOTS

flexi WALL

SASSYS
PONSONBY, AUCKLAND

Exuding elegance and classic beauty, Sassys' flagship store in Ponsonby was a curated masterpiece. Seeking a display system that would compliment their existing patterned feature wall, our chrome offset flexiWALL system ticked every box. Enhancing the space and making a grand statement without distracting the eye away from their products. flexiWALL was seamlessly integrated with flexiPLUS accessories including chrome hanging rails and forward arms for modifiable convenience.

ISLAND OREWA
OREWA, AUCKLAND

flexiWALL served as perfect shelving solution for displaying Island Orewa's footwear and accessories range at their flagship store. This is a thoughtfully curated fashion and lifestyle boutique store that stocks high-quality products. Searching the market for a modular system that would not take away focus from the product, the flexiWALL system ticked every box due to its ability to scale, wrap corners and deliver an ambient shopping experience. Opting for white offset bars and uprights, the flexiWALL system was finished with natural timber shelving and each shelve was custom fit with LED light strips to illuminate products.

SUPERETTE
NEWMARKET, AUCKLAND

Leading fashion retailer Superette engaged Surestyle for complete supply of their merchandising and product display systems for a revamp of their Newmarket retail store. We worked closely with Superette and shop-fitters W Gartshore Limited to transform their vision into a reality. Seeking systems that are easily modifiable, versatile and minimalist were key requirements for Superette's design requirements.

flexiWALL was selected for the perimeters of the interior and framework for custom floor gondolas. Seeking a dual-purpose solution for their huge shop front window display, FlexiPLUS provided effortless frontage and interior display in one system.

HOME LEE
AUCKLAND

In need of an ultra-modern multi-functional display system, fashion and retail brand Home Lee, engaged Surestyle for our modular flexiWALL solution. Adding sharp clean lines against the natural plywood walls and ceilings, white offset brackets and uprights were coupled with multiple hanging rails, shelving and display accessories. Complimenting the colour palette of their branding, creating spacial interest and enhancing customer experience, was possible through the extensive configurations available with the flexiWALL merchandising system.

GUIZE MENSWEAR
NEW PLYMOUTH

Working within a tight construction time frame (6 weeks during Covid-19), Guize chose SureStyle products for their inherently fast installation and delivery, modern aesthetics, stability and quality.

Seeking functionality, sleek design and optimisation of their display systems whilst retaining an open plan design. A Black Offset flexiWALL systems were configured to construct a multi-shelving solution; achieving a highly organised and tidy, uniform presentation. SureStyle provided outstanding support to ensure that all stakeholders received the information and advice they needed for successful project delivery.

"I found the team to be extremely helpful, with good product knowledge and professional to deal with. We were very happy with the look we achieved and feel our product is displayed to its maximum. The premium quality of Surestyle for us, means doing it once and doing it well." - Brett Stokell, Director of Guize NZ.

BAMBINI
WELLINGTON, NZ

Complimenting Bambini's ambient and natural design aesthetics, white offset flexiWALL systems were installed against their existing plywood feature walls. As a one-stop shop for high-quality, designer kids clothes, footwear, books and accessories; the ability to customise, and chop-and-change easily were important requirements for Bambini. As a small family-owned business, the ability to modify their merchandising displays themselves is a major advantage over other systems. Surestyle supplied over 50 different interchangeable accessories including flexiWALL hanging rails, custom shelving and baby + child timber coat hangers.

CONCEALED
STRIPPING

Concealed Stripping

FWCS2400

50mm pitch single slot suitable for 18mm face board 2400mm long - aluminium.

Slot is suitable for use with two fittings side by side.

flexiWALL 50 Uprights and Concealed Stripping
Installation Sequence

Take three simple steps to work out your requirements.
1. Measure your required wall lengths
2. Divide your wall lengths by 600mm, 800mm or 1200mm centres to work out how many bays you require(remember you can mix and match bay widths to suit your wall lengths/requirements).
3. Choose the accessories to suit.

Concealed stripping can be installed either to vertical timber battens or direct fixing to existing wall structure by gluing and screwing a layer of 16mm mdf to the wall prior to installation of the stripping.

Installation sequence for Uprights and Stripping
1. Find the highest part of your floor
2. Start fitting the first stripping/upright from this position (ensure the adjustable leveller is wound right upon the uprights), this will give you the horizontal level for the balance of the stripping/uprights.
3. Install further stripping/uprights at desired bay widths with all the lengths vertically and horizontally aligned to the first. Ensure the adjustable levellers are wound down to floor level on the uprights.

For Concealed Stripping install infill panels between stripping on either split battens or directly fixed to the wall.

Note: Infill panels are available in either mdf which can be painted, white or coloured melamine or SlatPanel.
For more technical installation instructions please call or email to discuss with one of our experienced installers.
