Food for thought:

A smooth sea never trained a skilled mariner

Dormer:

Room set into the roof, which is illuminated by windows of various kinds.

We don't just deliver products, we CREATE them

RESCUED!

Thank you to the owner of this wonderful historic building who has gone to great effort to rescue and restore it to its former glory.

It is the highlight of our industry to be on the same team as those rescuing such an excellent example of true craftsmanship and one of the main credits must go to the on site plasterers.

The building was partly demolished and then reconstructed using only the best materials available.

Accumen Ltd was invited to reproduce the mouldings and details in our factory which we did with great pleasure.

Using our strong lightweight material with KickIt® plaster, we were able to create the capitals, bangles, tapered half columns, plinths, sills and decorative details underneath the sills.

Some of you will recognise similar types of classic details which you have used on new buildings and would have noticed the wonderful ambiance they create.

Our decorative mouldings and details are very ROBUST, but still affordable. This is why more and more architects, builders, plasterers and designers specify them on new construction.

If you prefer to receive our newsletter via email, please provide us with your address.

Accumen Ltd is not responsible for any damage(s), loss(es) or injury(ies) whatsoever arising, either directly or indirectly from the improper application or installation of its products and all information should be checked before use.
