We don't just deliver products, we CREATE them

LOOK AT THE DIFFERENCE!

Rejuvenating the road frontage of tired old buildings with lightweight Accumen® mouldings is an affordable method of transformation. We believe we have created an attractive and inviting street front image at 89 Huia Road, Otahuhu.

The lightweight **top parapet moulding** with the matching lower version adds character to the building.

The four windows are framed with **ex-stock Historical Band** and the cills are **ex-stock Cill K** with return mitres. This emphasises the standalone feature of the windows.

The three **half round shaped Roman columns**, permanently attached, soften the lower wall at the entry door.

The **large square corners** on each side of the roller door, look like large block work or quoins, making a bold statement. The **crest** and **numerals** add decorative interest.

All decorative details are installed with **TidyUp® Adhesive Plaster** and stainless steel fixings, without altering the structure of the existing building.

Accumen® mouldings create attractive buildings, prompt occupancy, good rental return, and increases value of the owner's investment.
